[2] The API scale is 200-1000. Only scores for students in the district the prior school year are included in the calculation.

[3] Rankings are in deciles with 10 being the highest and 1 the lowest. Each decile contains 10% of all schools.

[4] The growth target is 5% of the difference between the 1999 API and the interim Statewide Performance Target of 800.

[5] This is the sum of the 1999 API plus the 1999-2000 Growth Target.

[2] The API scale is 200-1000. Only scores for students in the district the prior school year are included in the calculation.

[3] Rankings are in deciles with 10 being the highest and 1 the lowest. Each decile contains 10% of all schools.

[4] The growth target is 5% of the difference between the 1999 API and the interim Statewide Performance Target of 800.

[4] The growth target is 5% of the difference between the 1999 API and the interim Statewide Performance Target of 800.

[5] This is the sum of the 1999 API plus the 1999-2000 Growth Target.

[3] Rankings are in deciles with 10 being the highest and 1 the lowest. Each decile contains 10% of all schools.
[4] The growth target is 5% of the difference between the 1999 API and the interim Statewide Performance Target of 800.
[5] This is the sum of the 1999 API plus the 1999-2000 Growth Target.

"n/a" means a number is not applicable or not available due to missing data.

[1] This percent is calculated by dividing the number of students tested by enrollment in grades tested as indicated on the October, 1998 CBEDS School Information Form.
[2] The API scale is 200-1000. Only scores for students in the district the prior school year are included in the calculation.
[3] Rankings are in deciles with 10 being the highest and 1 the lowest. Each decile contains 10% of all schools.
[4] The growth target is 5% of the difference between the 1999 API and the interim Statewide Performance Target of 800.
[5] This is the sum of the 1999 API plus the 1999-2000 Growth Target.

[1] This percent is calculated by dividing the number of students tested by enrollment in grades tested as indicated on the October, 1998 CBEDS School Information Form.

[2] The API scale is 200-1000. Only scores for students in the district the prior school year are included in the calculation.

[3] Rankings are in deciles with 10 being the highest and 1 the lowest. Each decile contains 10% of all schools.

[4] The growth target is 5% of the difference between the 1999 API and the interim statewide Performance Target of 800.

[5] This is the sum of the 1999 API plus the 1999-2000 growth target.

[2] The API scale is 200-1000. Only scores for students in the district the prior school year are included in the calculation.
[3] Rankings are in deciles with 10 being the highest and 1 the lowest. Each decile contains 10% of all schools.
[4] The growth target is 5% of the difference between the 1999 API and the interim statewide Performance Target of 800.
[5] This is the sum of the 1999 API plus the 1999-2000 growth target.

"n/a" means a number is not applicable or not available due to missing data.

Note: Data are reported only for numerically significant subgroups. Ethnic/racial and socioeconomically disadvantaged subgroups meeting the following criteria are considered numerically significant: the group (1) contains at least 100 students with valid test scores OR (2) comprises at least 15% of the school population tested and contains at least 30 students with valid scores.

[1] This percent is calculated by dividing the number of students tested by enrollment in grades tested as indicated on the October, 1998 CBEDS School Information Form.

[2] Number of pupils with tests contributing to the API.

[3] The API scale is 200-1000. Only scores for students in the district the prior school year are included in the calculation.

[4] Rankings are in deciles with 10 being the highest and 1 the lowest. Each decile contains 10% of all schools.

[5] The growth target is 5% of the difference between the 1999 API and the interim Statewide Performance Target of 800.

[6] This is the sum of the 1999 API plus the 1999-2000 Growth Target.

[7] In most cases, 1999-2000 comparable improvement Growth Targets are 80% of the 1999-2000 Schoolwide Growth Target. For exact calculation of growth targets, please refer to the *Explanatory Notes.*

"n/a" and "--" mean a number is not applicable or not available due to missing data.

* The interim Statewide API Performance Target is 800. Schools scoring 800 or more are expected to maintain an API at or above 800. However, the State Board of Education has not yet determined criteria for the purposes of rewards for schools scoring 800 or more.

[4] The growth target is 5% of the difference between the 1999 API and the interim statewide Performance Target of 800.

[5] This is the sum of the 1999 API plus the 1999-2000 growth target.

[1] This percent is calculated by dividing the number of students tested by enrollment in grades tested as indicated on the October, 1998 CBEDS School Information Form.

[2] The API scale is 200-1000. Only scores for students in the district the prior school year are included in the calculation.

[3] Rankings are in deciles with 10 being the highest and 1 the lowest. Each decile contains 10% of all schools.

[4] The growth target is 5% of the difference between the 1999 API and the interim statewide Performance Target of 800.

[5] This is the sum of the 1999 API plus the 1999-2000 growth target.
