7. If reserve amounts designated for economic uncertainties or capital projects are over the greater of \$50,000 or 5% of total expenditures (Lines E.a. or E.b.), explain the reason for maintaining excess reserves.

<p>MCIA tries to keep a reserve for economic uncertainty of 5% in order to insure that there is adequate cash on hand to cover monthly expenses. This aids in covering fluctuations and/or deferrals of state aid along with changing estimates and collections of in-lieu of property taxes received from districts. MCIA's student population can be very volatile since most of the students fall into the "at risk" category. Enrollment has been increasing over the last few years, but this could just as easily drop substantially within a year. MCIA tries to make conservative projections but without any prior year ADA "hold harmless" protections, ADA fluctuations can substantially vary throughout the year and between years causing large fluctuations in the amount of revenues earned. Currently MCIA has started to set aside funds for expansion of their current facility due to the rapid enrollment increases seen within the last few years. MCIA has outgrown 3 prior facilities so far and continues to expand.</p>
