

# ELPAC Participation Rate in the ELPI

The English Learner Progress Indicator (ELPI) uses the Summative English Language Proficiency Assessments for California (ELPAC) and Summative Alternate ELPAC taken each spring to report on the progress English learner (EL) students are making towards English language proficiency at their schools and districts. To ensure that districts and schools are testing all current EL students, they must meet or exceed a participation rate of 95 percent on the Summative ELPAC and Summative Alternate ELPAC.

Districts and schools that do not meet the 95 percent participation rate on the Summative ELPAC and Summative Alternate ELPAC and have at least 30 EL students enrolled during the testing window (February 1 to May 31) will receive a modified ELPI rate on the California School Dashboard (Dashboard).

## Who is Counted as Participating in the Summative ELPAC?

For the Summative ELPAC, EL students who log on to at least one domain (i.e., Listening, Speaking, Reading, or Writing) in each composite are counted as participating.

### Oral Language Composite

Listening

Speaking

### Written Language Composite

Reading

Writing

## Who is Counted as Participating in the Summative Alternate ELPAC?

For the Summative Alternate ELPAC, EL students must be administered, at a minimum, one Receptive item and one Expressive item from anywhere within the assessment. Please note that a “Mark as No Response” is also considered a valid response and, therefore, counts as a completed item.

For more information about participation on the Summative Alternate ELPAC, refer to the Alternate ELPAC Participation and Scoring document at <https://www.cde.ca.gov/ta/tg/ep/documents/altelpacpartscoring.pdf>.

## Calculating the ELPAC Participation Rate

The ELPAC participation rate is calculated for any districts or schools that have at least 30 EL students enrolled in the current Dashboard year based on ETS enrollment. The ELPAC participation rate is calculated as follows:

### Example:

Chai Elementary School had 46 EL students enrolled during the Summative ELPAC testing window. Chai Elementary School tested 39 out of the 46 EL students on the Summative ELPAC and Summative Alternate ELPAC. The school's ELPAC participation rate is 84.8 percent (39 divided by 46 equals 84.8 percent). As a result, Chai Elementary School did not meet the 95 percent participation rate target.

## Participation Rate Impact on Dashboard

For each district and school that does not meet the 95 percent target, the minimum number of students needed to reach a participation rate of at least 95 percent is determined. The resulting number of students will be counted as not making progress in the current ELPI Status calculation.

### Example:

Continuing the previous example, Chai Elementary School had an ELPAC participation rate of 84.8 percent.

This calculation shows the school needed to test 44 students to meet the 95 percent ELPAC participation rate:

**0.95 multiplied by 46 equals 43.7**

The **43.7** is rounded up to **44**, the number of EL students needed to meet the 95 percent ELPAC participation rate. The difference between the number of students needed to meet the goal and the number of students tested is determined:

**44 minus 39 equals 5**

These 5 students will be added to the denominator for Chai Elementary School in calculating ELPI Status:

ELPI Methodology	ELPI Numerator	ELPI Denominator	ELPI Status Rate	ELPI Status Level
ELPI without participation rate	24	39	61.5%	High
ELPI with participation rate	24	44 (39 plus 5)	<b>54.5%</b>	<b>Medium</b>

As shown above, Chai Elementary School’s ELPI Status was High but after the incorporation of the participation rate to the denominator, the school’s ELPI Status is now Medium. This ELPI Status of Medium will be used, along with the Change, to determine the overall performance color for this school.
