## Planning and Advisory Update

### Planning Committee

- Met twice in September to discuss the formation of an Advisory Group and development of October Consortium meeting agenda.
- Will meet 2-3 times in preparation for March 2017 Consortium meeting and to get updates on workgroups.
- Decided on **March and September for 2017 Consortium Meetings**; specific dates will be sent to Consortium members at a later date.

### Advisory Group

- Ad hoc group of content experts and stakeholders incorporated through the following:
  - Workgroups request support and topic-related information during workgroup meetings
  - Planning Committee decides who to bring in as experts for Consortium meetings

# CA-QRIS Consortium Meeting

## Revisiting the Workgroup Purpose

### **Purpose of Workgroups**

- Delve deeply into QRIS topics related to areas of responsibility designated in statute (Rating Matrix, Continuous Quality Improvement Pathways) and areas of statewide interest, such as communications and evaluation.
- Develop proposed recommendations to bring to the CA-QRIS Consortium for adoption at a regularly scheduled Consortium meeting.
- Topics include those that require in-depth review of the research/best practices and careful study and consideration of various alternatives/solutions that best address the CA-QRIS goals and funding requirements.

# Purpose of QRIS Evaluation

QRIS evaluation should be considered an ongoing and iterative process that provide states with information about whether QRIS design decisions are producing meaningful changes...

(Tout et al., 2015)

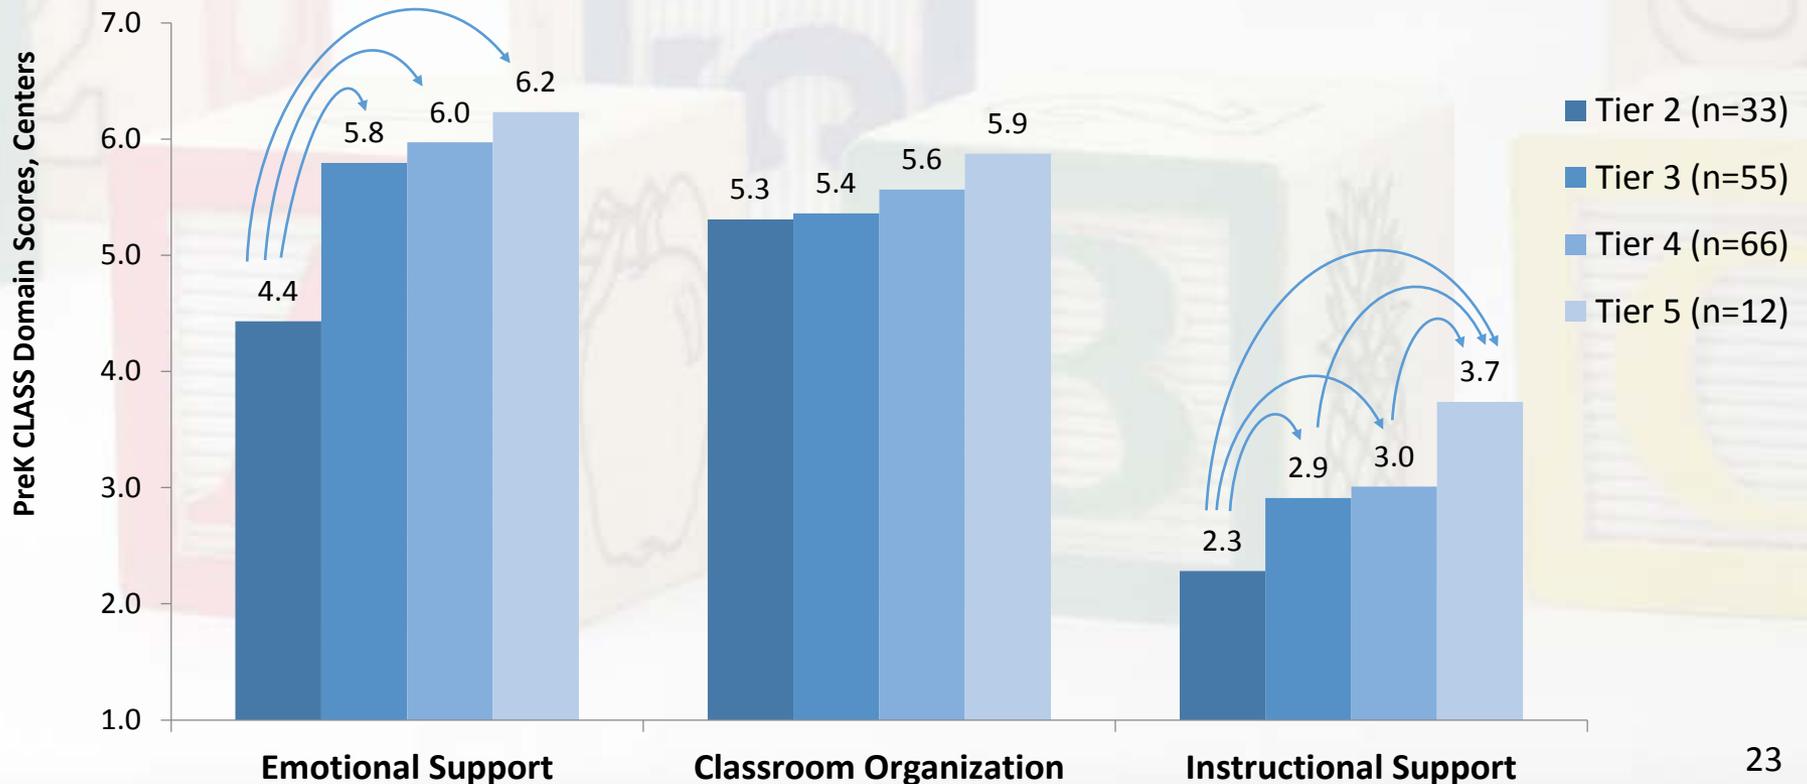

# Study Approach

# QRIS Ratings & CLASS

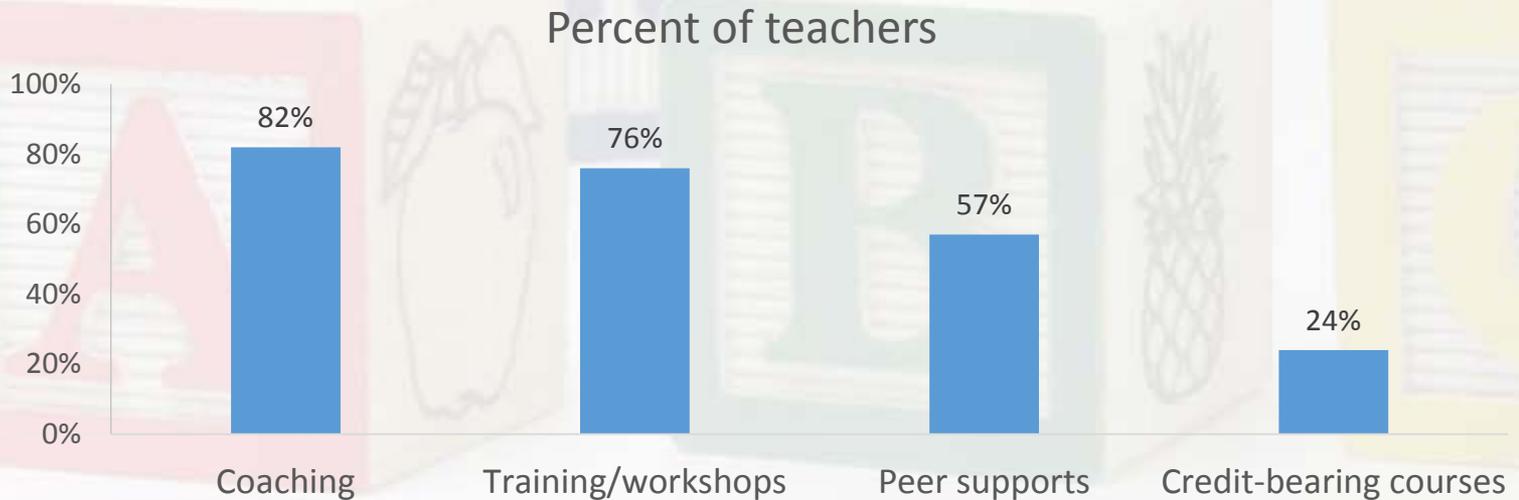

## QRIS ratings differentiate centers by CLASS Emotional Support and Instructional Support scores

# High Levels of QI Activities

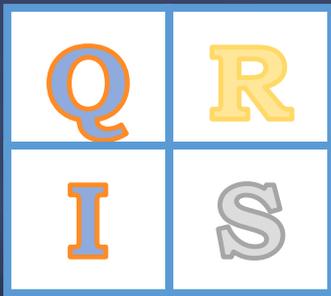

**Program staff reported high levels of participation in quality improvement activities**

# Coaching is Promising

- Hours of coaching and sustained coaching throughout the year are associated with classroom quality and child outcomes in math, literacy, and executive function
- Evidence suggests stronger links to outcomes with more intensive coaching

# Key Takeaways

1. Implementation was in the early stages during the study, but Consortia made significant progress from 2012–2015
2. Providing detailed ratings may be most useful
3. The study finds some evidence of validity of the QRIS ratings
4. The study finds high levels of participation in quality improvement activities and coaching appears to be a promising approach

# Policy Options

- Consider presenting detailed rating information to parents that includes program ratings as well as element scores.
- Consider alternative rating strategies, such as taking an average score across elements and giving additional weight to the CLASS element to strengthen validity.

# Policy Options

- Consider a coaching model that offers sustained support over the course of the year.
- Consider exploring the types of peer supports that are available to staff to learn more about effective approaches to this type of quality improvement activity.

# Policy Options

- Consider ways to encourage or require a broader range of providers to participate.
- Consider another validation phase once the system is refined and expanded.

# What does this mean for us?

- Cultivating a CQI stance:
  - Our programs, our systems, our evaluations
  - Build nimbleness into the system
  - Open to change
- Current RTT-ELC evaluation focused on one aspect of a QRIS evaluation: **Measurement Validation**

# And so...

### ➤ **Systems Building**

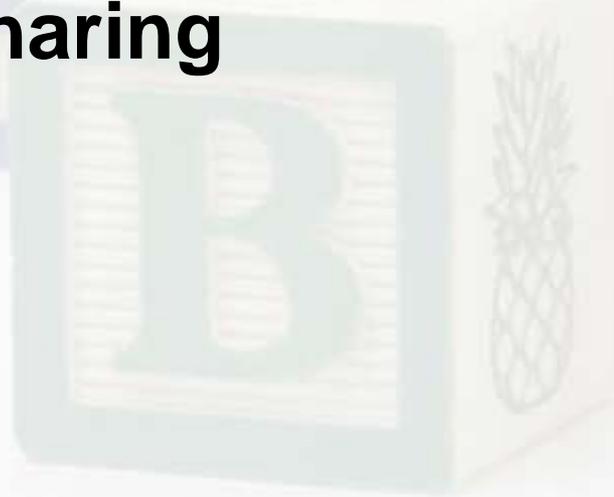

What might a broader, systems-focused QRIS evaluation look like?

## Homepage

The wireframe shows a homepage layout. At the top left is the logo for 'Excellence in Early Learning' with the tagline 'Ensuring quality programs for California's youngest children'. To the right of the logo is a navigation menu with three buttons: 'PARENTS', 'MEDIA', and 'QRISs'. Below the navigation is a row of three images: children eating at a table, a teacher interacting with a child, and a woman with a child. Below the images is a large text block with a 'CA' logo and a star icon. The text describes the initiative's purpose. A horizontal line with a star in the center separates this text from two columns of text below. The left column describes the implementation of QRISs, and the right column describes the standards and how QRIS ratings help parents and programs.

PARENTS MEDIA QRISs

**CA** Excellence in Early Learning is a statewide improvement initiative intended to ensure a consistently high-quality early care and education experience for infants, toddlers, and other pre-K-age children whose parents enroll them in a center-based program or a family child care home in California.

The initiative is implemented at the county or regional level through locally tailored and operated Quality Rating and Improvement Systems (QRISs). Using a common set of early care and education program standards and general guidance developed collaboratively through a state and local partnership, each QRIS assesses and rates voluntarily participating programs in its own geographic area. The ratings are based on how well the programs meet the five-tiered set of program standards, which cover three broad areas: Child Development and School Readiness, Teachers and Teaching, and Program and Environment.

QRIS ratings can help parents to choose the best early care and education program for their child. At the same time, the QRIS helps programs themselves by identifying areas for potential improvement and by providing incentives and supports to help programs make the improvements.
