

California Mathematics Framework Toolkit

The California Department of Education is excited to announce the *California Mathematics Framework for California Public Schools (Mathematics Framework)* toolkit.

Resources in the toolkit will ensure that educators, parents, and community members are well-informed about the information in the *Mathematics Framework*.

The toolkit is organized into two areas:

For Educators

- **Key Messages for Local Educational Agencies (LEAs)** summarizes the key talking points to use when talking to educators about the *Mathematics Framework*.
- **Mathematics Framework Key Messages Slide Deck** is a short deck to use when talking to educators about the benefits of the *Mathematics Framework*.

For Families and Communities

- **Key Messages for Families** summarizes the key talking points to use when talking to families and communities about the *Mathematics Framework*.
- **Mathematics Framework Key Messages Slide Deck for Families** is a short deck to use when talking to families about the benefits of the *Mathematics Framework*.
- **Social Media Posts for LEAs** includes three social media posts that districts and schools can “plug-and-play.” These include the image, the content for the post, the image description for alternate text, and links for any link trees.
- **Benefits of the 2023 Mathematics Framework Flyer** summarizes the benefits of the *Mathematics Framework* and allows schools and districts to add their logo to the flyer to send out to their families.
- **Family Guide to the Mathematics Framework** gives families and community members more information about the framework, using family-friendly language.
