Tools for Math Success: Professional Development Programs

January 13 through February 24, 2026

Webinar Lineup:

Join Us!

The California Department of Education (CDE) is excited to announce a four-part professional development webinar series designed to support educators in strengthening instructional practices and improving student outcomes in mathematics. This series will highlight professional development programs with proven success in California schools.

Each session will spotlight the program's evidence-based approaches to professional learning, demonstrated successes in students' standardized test scores, and testimonials from local educational agencies (LEAs) that used the program. While the CDE does not endorse any program over another, these programs represent the range of professional learning opportunities available to LEAs.

Educators, administrators, and instructional leaders are encouraged to attend. Registration is free and open to all.

To register, scan the corresponding QR code.

Presentations

Solution Tree: January 13, 2026
1–2 p.m.

Mindsets: January 27, 2026
1–2 p.m.

Silicon Valley Math Initiative:
February 10, 2026
1–2 p.m.

EduProtocols: February 24, 2026
1–2 p.m.
