11	7.4. Unpacking Sentences and Nominalization in Complex History Texts, Designated ELD Instruction in Grade Eleven	7	803–811

Vignette 3.1. Retelling and Rewriting *The Three Little Pigs* Integrated ELA/Literacy and ELD Instruction in Transitional Kindergarten

Background

Ms. Campbell teaches in a two-way immersion school where the children learn in both Spanish and English. Half of her class of 24 transitional kindergarteners is composed of native English speakers, and half is composed of EL children dominant in Spanish at the Emerging and Expanding levels of English language proficiency. The school's goals include promoting biliteracy and an appreciation for cultural diversity. Ms. Campbell engages her students in many rich language activities every day, half of the time in English, and half of the time in Spanish. She reads aloud to her students daily in both languages. She collaboratively plans lessons with her transitional kindergarten (TK) and kindergarten (K) colleagues, and the team routinely exchanges lesson plans.

Lesson Context

Over the past two weeks, Ms. Campbell has read aloud several versions of the story, *The Three Little Pigs*, both in English and in Spanish. The big ideas of the unit are that people tell stories to entertain and communicate life lessons. At the end of the unit, children will be able to retell stories using key details and vocabulary, applying their understandings of how stories are organized. They will also be able to discuss some of the lessons the stories convey.

Ms. Campbell's interactive read alouds have included much discussion about the characters and plot, the vocabulary used, and similarities and differences between the different versions of the story. Last week, the class made a story map containing important details: the setting, characters, problem, and sequence of events. Yesterday, Ms. Campbell guided her students to retell the story with a partner using three aids: pictures from the texts glued onto cards, simple props of the characters, and the story map. Today, Ms. Campbell will guide her students to retell the story again and then collaboratively rewrite it. The learning target and cluster of CA CCSS for ELA/Literacy and CA ELD Standards Ms. Campbell is focusing on are the following:

Learning Target: The children will retell and rewrite the story using colorful words and key details to convey the series of events in the sequence in which they occurred.

CA CCSS for ELA/Literacy: *RL.K.2 – With prompting and support, retell familiar stories, including key details; SL.K.2 – Confirm understanding of a text read aloud . . . ; W.K.3 – Use a combination of drawing, dictating, and writing to narrate a single event or several loosely linked events, tell about the events in the order in which they occurred . . . ; L.K.*6 *– Use words and phrases acquired through conversations, reading and being read to, and responding to texts.*

CA ELD Standards (Expanding): *ELD.PI.K.12a – Retell texts and recount experiences using complete sentences and key words; ELD.PII.K.1 – Apply understanding of how different text types are organized to express ideas (e.g., how a story is organized sequentially with predictable stages . . . ; ELD.PII.K.2 – Apply understanding of how ideas, events, or reasons are linked throughout a text using a growing number of connecting words or phrases (e.g.,* next, after a long time*) . . .*

Lesson Excerpts

Ms. Campbell calls her students to the carpet and reminds them that they have been reading lots of different versions of *The Three Little Pigs.* She recalls that yesterday, they spent a lot of time retelling the story to one another and explains that today, they are going to use all

Vignette 3.1. Retelling and Rewriting *The Three Little Pigs*
Integrated ELA/Literacy and ELD Instruction in Transitional Kindergarten (cont.)

of that great oral retelling to rewrite the story together. Using her computer tablet and a projector, Ms. Campbell projects five pictures depicting important events from the story. She asks her students to take turns with a partner retelling the story, using the pictures. She listens to the children as they share, noting the language they use, their ability to sequence events, and any misunderstandings.

Ms. Campbell: Children, I really enjoyed listening to your retellings of the story. Today, when I write down what you say, we need to make sure we get all those great details, including the setting, the characters, the problem, and the important events into our reconstructed story. Let's remind ourselves what we included in our story map.

Ms. Campbell points to the story map the class generated together (see vignette 3.2 for the story map) and guides them in reading it. She then sets the purpose for engaging in the next task.

Ms. Campbell: When we rewrite, or reconstruct, the story together, we also need to remember that one of the main purposes for telling stories is to entertain other people. So we have to make sure that the language we use is really colorful and interesting. For example, we can't just say that the pig built a house and the wolf blew it down. That would be kind of boring, wouldn't it? (The children enthusiastically agree.) Instead, we need to use descriptive, or colorful, words and interesting dialogue. We could say something like, "The wolf (taking a deep breath and inviting students to join her by motioning with her hand) huffed and he puffed and he blew the house down."

Tania: He destroy the house!

Ms. Campbell: That's right! He *destroyed* the house. He absolutely demolished it. Can you say more about that?

Tania: He destroy the house and he say "I huff and I puff and I blow you house down!" And the house, it crash on the floor!

Ms. Campbell: Wow! That is a great way to retell the story! When we retell and rewrite the story, let's make sure we remember to use lots of that colorful language and dialogue.

Ms. Campbell uses her computer tablet to project the "Story Rewriting Template" the class will use. The template uses the same terms as the story map and organizes the story grammar and sequence into three stages: *orientation*, *complication*, and *resolution*. Rather than using the terms *beginning, middle,* and *end* (which all text types have), Ms. Campbell finds that using the terms *orientation*, *complication*, and *resolution* helps students discuss story organization because the terms are related to what is happening at each stage of the narrative. She uses the template to guide students as they jointly reconstruct the story aloud. In the Story Rewriting Template below, the template Ms. Campbell uses with students is on the left while her notes to herself about the function of each stage are on the right.

Vignette 3.1. Retelling and Rewriting *The Three Little Pigs*
Integrated ELA/Literacy and ELD Instruction in Transitional Kindergarten (cont.)

Story Rewriting Template	
Template to use with students	Ms. Campbell's lesson plan notes for herself
Story Title	*The Three Little Pigs*
Orientation	*Orients* readers to the story – Introduces the characters and setting, foreshadows the problem
Complication	*Complicates* the story – Introduces the problem and shows how things get *complicated* Lots of events and dialogue here
Resolution	*Resolves* the problem in the story and wraps everything up
(Optional) Story Theme(s)	Articulates the life lesson(s) of the story

Ms. Campbell: When I look at our notes in the story map, it says that at the beginning of the story, Mama pig says goodbye. The three little pigs go to build their houses. Should I just write that?

Children: No!

Ms. Campbell: What should I write then. Ysenia, what do you think?

Ysenia: We should start like, "Once upon a time."

Ms. Campbell: Oh, that's a great way to start a story. What does everyone think about beginning the story like that?

Children: (Nodding.) Yeah! Once upon a time!

Ms. Campbell: Okay then. (Writing.) Once upon a time . . . Then what? Turn to your partner and see if you can come up with our first sentence.

Ms. Campbell continues to guide the children to jointly reconstruct, the orientation stage of the story, using the details in the story map and the colorful language that characterizes engaging storybooks. At the complication stage, she prompts the children to use language to signal to readers that something is shifting in the story.

Ms. Campbell: Okay, so now that we have the *orientation* stage written, we need to get into the *complication* stage. Remember, that's where the problem comes in and where things get complicated. What was the problem in this story? Martín, what do you think?

Martín: The wolf wants to eat the pigs, but they don't want to get eaten.

Ms. Campbell: Yes, but things got a little complicated because the houses the pigs built weren't so sturdy, were they? Were the pigs surprised when the wolf comes? How can we use descriptive words to communicate what happened?

Jordan: We could write the pigs built their houses. And then a wolf came.

Vignette 3.1. Retelling and Rewriting *The Three Little Pigs* Integrated ELA/Literacy and ELD Instruction in Transitional Kindergarten (cont.)

Ms. Campbell: Oh, you used "and then!" That's a great idea, Jordan. When you said that, it made me think something was changing in the story, that there was a problem coming. Is there a word we could use to let readers know that something is changing and that things are getting complicated?

Several Children: Suddenly!

Ms. Campbell: Yes, we learned that word "suddenly" when we were reading *The Three Little Pigs* stories last week, didn't we? That really tells us something is changing and that it happens unexpectedly. So, how about if we write, "*Suddenly*, a wolf came along." How does that sound?

Children: (Nodding.)

Ariel: And he was very hungry.

Rashidi: Very, very hungry.

Juanita: ¡Era muy feroz!

Ms. Campbell: Yes, he was ferocious! Let's all say that word together—ferocious. Oh, that adds a lot of colorful detail. These words are giving us important details about the wolf. How about if I write, "Suddenly, a ferocious wolf came along, and he was very, very hungry." How's that? That really lets me know things are going to get complicated, doesn't it?

As they jointly reconstruct the story, Ms. Campbell and the children choose colorful language from the stories they have been reading. They also use dialogue and general academic vocabulary.

Ms. Campbell: And what does the wolf do when he knocks on the first little pig's door? What does he say?

Children: "Little pig, little pig, let me in!" (The other children agree.)

Ms. Campbell: (Writing.) And how does the wolf say it? Does he whisper it, like this? (Whispering.)

Children: No!

Sara: He roars!

Ms. Campbell: Does everyone like that? (The children nod and say "yes," and Ms. Campbell adds it to the story.) And then what does the little pig say?

Children: "Not by the hair of my chinny chin chin!"

Ms. Campbell: And how does he say that, Miguel?

Miguel: He scare.

Ms. Campbell: Yes, he's scared, isn't he. So does he shout it, like this (shouting)? Does he whimper, like this (whimpering)?

Miguel: I think he whimper.

Ms. Campbell: I think so, too!

Vignette 3.1. Retelling and Rewriting *The Three Little Pigs*
Integrated ELA/Literacy and ELD Instruction in Transitional Kindergarten (cont.)

When the children and Ms. Campbell are finished reconstructing the story, they read the story together chorally. As they do, Ms. Campbell models enthusiastic reading and prosody, and she encourages the children to do the same. The next day, Ms. Campbell will guide the children to rewrite the story in Spanish. Then, she will use the text from the reconstructed story in English and Spanish to make a bilingual big book illustrated with photographs she has taken of the children acting out the story in the dramatic play center. The big book will remain in the classroom library corner for the students to read and re-read to themselves, to one another, and to visitors.

Teacher Reflection and Next Steps

Ms. Campbell brings her observation notes and the reconstructed stories to the next regularly scheduled collaborative planning meeting she has with her TK and K colleagues. She describes guiding her students to use new language and recognize story structure as well as language features, and she shares how some students have begun using some of the new language in their oral retellings and in the stories they dictate to other adults who work in the classroom. One colleague asks Ms. Campbell if he can make use of her lesson plan for *The Three Little Pigs* and observe the next time she engages her students in a story reconstruction activity.

Vignette 3.2. Retelling *The Three Little Pigs* Using Past Tense Verbs and Expanded Sentences
Designated ELD Instruction in Transitional Kindergarten

Background

At the beginning of the year, six of Ms. Campbell's EL students were at the early Emerging level of English language proficiency. By this point in the year, they are able to express themselves using short sentences and learned phrases when they interact with peers in English. The other six EL children came into her classroom at the early Expanding level and are now able to interact using English about a variety of topics and in more extended exchanges. Ms. Campbell and her TK and K colleagues plan their designated ELD lessons at the same time that they plan their ELA and other content area lessons. As they plan, they focus on anticipating students' language development needs for these content areas, and they make adjustments, based on recent observations of their students during lessons.

Lesson Context

Ms. Campbell works with her twelve EL children in two small groups of six in order to provide designated ELD instruction tailored to their specific language learning needs. While she works with these groups, the other children in the class engage in collaborative tasks at learning centers, some of them supervised by parent volunteers. In ELA instruction, Ms. Campbell has just guided her students to rewrite, or jointly reconstruct, the story of *The Three Little Pigs* (see vignette 3.1). As she observed students during their oral retellings of the story in English, she noticed that ELs at the Emerging level of English language proficiency were not consistently using past tense verbs or expanding their sentences with much detail. She would like the children to feel more confident orally retelling stories in general and using past tense verb forms and particular language resources to expand and enrich their sentences, so she plans to focus on these two areas in her designated ELD lessons this week. Ms. Campbell's learning targets and the cluster of CA ELD Standards she will highlight in today's lesson are the following:

Learning Target: The children will retell the story in order using past tense verbs and expanded and enriched sentences.

CA ELD Standards Addressed (Emerging): *ELD.PI.K.12a – Retell texts and recount experiences using complete sentences and key words; ELD.PII.K.3b – Use simple verb tenses appropriate for the text type and discipline to convey time . . . ; ELD.PII.K.4 – Expand noun phrases in simple ways (e.g., adding a familiar adjective to describe a noun) . . . ; ELD.PII.K.5 – Expand sentences with frequently used prepositional phrases (e.g.,* in the house, on the boat*) to provide details (e.g., time, manner, place, cause) . . .*

Lesson Excerpts

Ms. Campbell invites the six EL children at the Emerging level of English language proficiency over to the teaching table. She tells them that today, they are going to retell the story of *The Three Little Pigs* again, but that this time, they are going to focus on adding a lot of details to their retellings and making sure listeners know that the events in the story took place in the past. She points to the story map that the class generated the previous week.

Vignette 3.2. Retelling *The Three Little Pigs* Using Past Tense Verbs and Expanded Sentences
Designated ELD Instruction in Transitional Kindergarten (cont.)

The Three Little Pigs		
Characters Three little pigs Big bad wolf Mama pig	***Setting*** The countryside Next to the forest	***Problem*** The wolf wants to eat the pigs, and the pigs don't want to be eaten

Events
Once upon a time → → → → The end

Orientation	Complication			Resolution
Mama pig says goodbye. The three little pigs go to build their houses.	The first little pig builds a house of straw. The wolf blows it down.	The second little pig builds a house of sticks. The wolf blows it down.	The third little pig builds a house of bricks. The wolf can't blow it down.	The third little pig tricks the wolf, and the three pigs live together in the brick house.

Ms. Campbell places the same five pictures the students have already used for orally retelling the story in ELA (see vignette 3.1) on the table in front of them. She hands each of the six children a popsicle stick puppet (three pigs and three wolves). She explains that when there is dialogue, they will each have a chance to act out how the character is saying the dialogue using the puppets.

Ms. Campbell: Children, let's retell the story together. The first time, I'm going to say what's happening, and then you're going to repeat what I say. I want you to notice how when we tell stories, we use words, or verbs, that tell us that the story already happened in the past. So, we don't say, there *are* three little pigs. We say, there *were* three little pigs because it happened in the past.

María: Once upon a time.

Ms. Campbell: Yes, "once upon a time." That means it happened a long time ago. And we don't say, the wolf *blows* the house down because that would mean it's happening right now. It happened a long time ago, so we say, the wolf *blew* the house down. Say that with me – *blew*. (Students repeat the word.) I want you to listen for the words, or verbs, that let us know the story happened a long time ago. I'll retell what's happening in each picture, and then you repeat after me. (Pointing to the first picture.) Once upon a time, there were three little pigs.

The children repeat what Ms. Campbell says as they retell the story using the pictures. In her retelling, she intentionally models enthusiastic rhythm and intonation (prosody). She also models the use of expanded sentences (using descriptive adjectives and prepositional phrases) that contain details about the characters and events.

Ms. Campbell: The *frightened little* pig ran *into his house*.

Vignette 3.2. Retelling *The Three Little Pigs* Using Past Tense Verbs and Expanded Sentences Designated ELD Instruction in Transitional Kindergarten (cont.)

Two of the Children: The frighten little pig run to his house.

Ms. Campbell: Let's all say that together. Listen carefully first. The *frightened little* pig ran *into his house*.

Children: (all six together) The *frightened little* pig ran *into his house*.

After the children have retold the story with Ms. Campbell, she asks them to work in partners to retell the story (one partner has a wolf puppet; the other has a pig puppet). As the children retell the story, Ms. Campbell listens carefully and provides "just-in-time" scaffolding.

María: The pig saw the wolf and he scared and he ran away.

Ms. Campbell: Yes, that's right. And how can we let people who are listening know a little more about the pig and the wolf? Are they little, are they big, are they nice, are they scary?

María: The little pig saw the big, scary wolf and he scared. He ran away to his house.

Rafael: The wolf huff and he puff and he blew the house down.

Ms. Campbell: That's wonderful that you said *blew*, Rafael! That lets us know the story happened in the past. But remember we have to show with all the action words that the story happened in the past, or a long time ago, so we have to say the wolf huff*ed* and he puff*ed* and he *blew* the house down. Say it with me.

Ms. Campbell stresses the –ed suffix in the words "huffed" and "puffed" to make sure Rafael hears the past tense endings, and she has him say the sentence with her to make sure he has guided practice. She doesn't correct everything the children say, as she knows this might make them feel overly self-conscious and detract from their focus on meaning making. Instead, she is strategic with corrective feedback, focusing primarily on past tense verbs and expanded sentences.

As the children retell the story, Ms. Campbell uses a rubric based on the CA ELD Standards, to guide her observations of their oral retellings. The rubric provides her with information about individual students' progress in particular areas of English language development, and this information in turn helps her strategically plan subsequent instruction.

Teacher Reflection and Next Steps

Based on information from the rubric, Ms. Campbell makes a note to continue to work on past tense verb forms and expanded sentences with these six children during designated ELD for the rest of the week. She also makes a note to listen to the children carefully over the next couple of weeks as they retell stories during ELA instruction and at literacy stations to see if they use past tense verbs and expand their sentences independently.

Ms. Campbell sends all children home with a packet that contains the five pictures from the story, the popsicle stick puppets of the wolf and pig, and the text of *The Three Little Pigs* in English and Spanish with suggestions for parents about reading aloud and facilitating oral retellings at home in both languages. For the six EL children in today's lesson, she adds additional instructions for parents in Spanish asking them to support their children to use past tense verbs and expanded sentences in their oral retellings in English.

Vignette 3.3. Interactive Storybook Read Aloud
Integrated ELA/Literacy and ELD Instruction in Kindergarten

Background

Mr. Nguyen reads aloud to his students daily during ELA instruction. He intentionally selects storybooks that have an engaging and fun plot because such books promote extended discussions. He also ensures that his 30 kindergarteners, half of them ELs, are exposed to books containing rich language, including academic vocabulary. Most of the EL children in Mr. Nguyen's class are at the Expanding level of English language proficiency. However, three are new to the U.S. and are at the early Emerging level. Three of his students have moderate intellectual disabilities, and Mr. Nguyen works closely with the school specialist to ensure he is attending to their socio-emotional and cognitive learning needs.

When he reads complex literary texts aloud, Mr. Nguyen incorporates specific instructional strategies to help his students connect personally with the stories, attend to sophisticated languge, and develop listening comprehension skills. To the extent possible, he also looks up specific words and phrases in his EL students' primary languages so that he can use them to scaffold their comprehension of English texts.

Lesson Context

Mr. Nguyen and his colleagues collaboratively plan their read aloud lessons and designated ELD lessons that build into and from the read alouds. They have just designed a five-day sequence for the story *Wolf*, by Becky Bloom and Pascal Biet. The teachers plan to read *Wolf* to their students three times over three consecutive days. Each time they read it aloud, teachers will model successful reading behaviors, drawing attention to vocabulary and prompting students to discuss comprehension questions (at first mostly literal, "right there" text-dependent questions—with answers that can clearly be found easily in the text—and increasingly inferential questions as the week progresses). In the last two days of the lesson sequence, the teachers will guide students to retell the story, first orally and then in writing. The team's planning map for the week is as follows:

Interactive Storybook Reading 5-Day Planning Template		
Book title and author:		
The problem (in child-friendly language):		
General academic vocabulary in the story:		
Selected words to teach more in depth later (~5):		
Day 1	**Day 2**	**Day 3**
Places in the story to model making inferences: Vocabulary to explain (E), act out (A) or show in the illustration (S): Places to stop for think-pair-share (write questions and sentence frames, differentiated as needed):	Places in the story to model making inferences: Vocabulary to explain (E), act out (A) or show in the illustration (S): Places to stop for think-pair-share (write questions and sentence frames, differentiated as needed):	Places in the story to model making inferences: Vocabulary to explain (E), act out (A) or show in the illustration (S): Places to stop for think-pair-share (write questions and sentence frames, differentiated as needed):

Vignette 3.3. Interactive Storybook Read Aloud
Integrated ELA/Literacy and ELD Instruction in Kindergarten (cont.)

Interactive Storybook Reading 5-Day Planning Template (cont.)
Days 4–5 Guided (with the teacher) or independent (in pairs or groups): • Oral retelling of the original story • Written retelling of the original story • Alternate version of the original story

At the end of the week, Mr. Nguyen will ask pairs of students to compose and illustrate either a retelling of the original story or an alternate version of it (e.g., with different characters or an alternate ending). The learning target and cluster of CA CCSS for ELA/Literacy and CA ELD Standards Mr. Nguyen is focusing on today, the first day of the lesson series, are the following:

Learning Target: Students will listen to a story and discuss text-dependent questions about it. They will practice being good conversational partners.
CA CCSS for ELA/Literacy: *RL.K.1 – With prompting and support, ask and answer questions about key details in a text; RL.K.7 – With prompting and support, describe the relationship between illustrations and the story in which they appear (e.g., what moment in a story an illustration depicts); SL.K.1 – Participate in collaborative conversations with diverse partners, follow agreed-upon rules, and continue a conversation through multiple exchanges; SL.K.2 – Confirm understanding of a text read aloud.*
CA ELD Standards (Expanding): *ELD.PI.K.1 – Contribute to class, group, and partner discussions by listening attentively, following turn-taking rules, and asking and answering questions; ELD.PI.K.3 – Offer opinions in conversations using an expanded set of learned phrases (e.g., I think/don't think X. I agree with X.), as well as open responses, in order to gain and/or hold the floor; ELD.PI.K.5 – Demonstrate active listening to read-alouds and oral presentations by asking and answering questions with oral sentence frames and occasional prompting and support.*

Lesson Excerpt

On the first day, Mr. Nguyen invites his students to gather on the carpet to listen to the story. He briefly *previews the story problem* since this is often challenging for students to perceive on their own.

Mr. Nguyen: Today, you're going to meet a hungry wolf. At first, he wants to eat some farm animals – a cow, a pig, and a duck. But the farm animals are much more interested in reading their books, so they *ignore* him. That means they don't pay attention to him *at all*. He doesn't like that, and he tries to get them to pay attention to him.

As Mr. Nguyen reads the story, his students are very engaged, in large part because the story is so well written, but also because Mr. Nguyen models enthusiasm by reading with intonation and acting out the voices of the interesting characters when there is dialogue. He

Vignette 3.3. Interactive Storybook Read Aloud
Integrated ELA/Literacy and ELD Instruction in Kindergarten (cont.)

frequently invites the children to read along with him some particularly engaging passages. For example, when the pig explains to the wolf that the farm is for educated animals, Mr. Nguyen invites the children to say the dialogue together.

Mr. Nguyen: "'Educated animals . . . Educated animals!' the wolf repeated to himself." Let's all repeat that together, and let's say it like the wolf would.

Mr. Nguyen thinks aloud as he reads, modeling how to make inferences at strategic points in the story and exposing the children to general academic vocabulary that they may want to use when discussing the text later.

Mr. Nguyen: I'm thinking that the reason the animals aren't paying attention to the wolf is because they're so *engrossed*, or interested in their books. Even though he's *leaping* and *howling* at them, they're more *interested* in reading. I think they must love to read and that they're probably reading really good books!

At one or two strategic points in the story, Mr. Nguyen *stops and asks his students to think* about a text-dependent question he poses and then prompts the students to share their ideas with a partner. His students engage frequently in "think-pair-share," turning to their designated partners to discuss ideas in the text.

Mr. Nguyen: "You've got a long way to go." That means, "you have a lot of work to do." Why do you think the duck told the wolf, "You've got a long way to go?"

Mr. Nguyen points to the illustration in the book, which shows the wolf laboriously reading his book out loud, the pig annoyed and glaring at him, and the other animals ignoring him. He has found that this kind of visual support helps students with learning disabilities as well as ELs at the early Emerging level to comprehend and to engage more actively in partner discussions. It also helps all of the children describe the relationships between illustrations and the print in stories. After Mr. Nguyen poses the question, he is quiet for several seconds so his students have time to think.

Mr. Ngyuen: Now that you have an idea, you can use this sentence frame when you share it with your partner. Listen to me first, and then we'll say it together: "Maybe the animals think that ____." Remember to help your partner, add on to what your partner says, or ask a question, if you need to. Don't stop your conversation until I call the class back together.

The children take turns sharing their ideas with their partners, and Mr. Nguyen listens carefully. He has intentionally placed his ELs at the early Emerging levels next to friends who speak the same primary language, and he encourages them to communicate in their primary language as needed. He also encourages them to use gestures (e.g., hand motions and nodding) and simple phrases (e.g., I think . . . Can you say that again?) in order to participate actively in their conversations with partners.

Alicia: Maybe the animals think that, think that . . . the wolf . . .

Sam: (Nodding in encouragement and waiting.)

Alicia: Maybe the wolf is . . .

Sam: Maybe the animals think that . . .

Vignette 3.3. Interactive Storybook Read Aloud
Integrated ELA/Literacy and ELD Instruction in Kindergarten (cont.)

Alicia: (Nodding) Maybe the animals think that they don't like him. Your turn.

Sam: I can add on to you because maybe the animals think that he don't read good.

Alicia: Yeah. They read good. They only like to read.

Sam: And the wolf, he don't read good like them.

Mr. Nguyen: (Signaling for students to face him.) I am hearing some great ideas. I heard someone say that maybe the animals think that the wolf doesn't read very well, and that's why they told him he has a long way to go. Here (pointing to the text) it says that the animals just kept on reading. It seems like they weren't even interested in hearing him read. It looks like that's what's happening in the illustration, too. Maybe that's what the pig means when he says "you've got a long way to go." Maybe they think Wolf needs to practice reading a lot more, or that he has to practice reading for a lot *longer* before he can read as well as they do.

Throughout the story, Mr. Nguyen pauses when he comes to general academic vocabulary that his students may not know or may only partially understand. He acts out some of the words (e.g., *peer, budge*), points to illustrations in the text for others (e.g., *emerging*), and briefly explains others (e.g., *educated, ignored, satisfied, impressed*).

Mr. Nguyen: "You have *improved*," remarked the pig. When you improve, that means you get better at doing something.

At the end of the story, Mr. Nguyen asks a final question to stretch his students' analytical thinking.

Mr. Nguyen: Why do you think that the other animals want Wolf to keep reading to them now?

During the next two days, when he reads the story aloud again, Mr. Nguyen continues to model good reading behaviors, focusing on key vocabulary and other rich language (e.g., *his eyes were playing tricks on him*), and providing many opportunities for the children to discuss their comprehension of the text. By the third time Mr. Nguyen reads the book aloud, the children are able to discuss more analytical questions in extended ways. For example, by the third day, the children have a more nuanced understanding of why the animals ignored the wolf and can explain their ideas more precisely (e.g., *because he was acting in an "uneducated" way and couldn't read like them*). They are also able to provide more evidence in their responses to questions like "What do you think the wolf learned by the end of the story? How do you know?" For example, they note that wolf's behavior and appearance changed throughout the story.

Throughout the week, Mr. Nguyen keeps notes on what students are saying and doing. So that he can strategically support students with varied needs, his teaching log has sections for notes regarding those who need support with listening comprehension, those with special needs, and ELs. On day four, Mr. Nguyen guides the children in an oral retelling of the story. On day five, he engages them in jointly reconstructing the story as he writes it for all to see using a document camera. He scaffolds their use of sophisticated language, helping them extend and refine their ideas as they reconstruct the story together.

Vignette 3.3. Interactive Storybook Read Aloud
Integrated ELA/Literacy and ELD Instruction in Kindergarten (cont.)

Teacher Reflection and Next Steps

At the end of the week, Mr. Nguyen reviews his teaching log. He notes that during the initial reading of the story, his ELs at the early Emerging level of English language proficiency struggled to communicate in English during think-pair-share, and that two used their primary language to share ideas for a couple of the questions. However, by the third time he read the story, these students were speaking English more confidently, using short phrases and integrating the sentence frames he had previously provided. He makes a note to ask his colleagues for ideas about supporting these students to participate more actively in English the first time a story is read. At the same time, he is pleased that students listened actively during the first reading and that after hearing the story repeatedly, they were able to communicate their ideas more readily in English. Returning to his notes, Mr. Nguyen also sees that the three children with moderate learning disabilities were very engaged during all three readings of the book, which he attributes in part to the deliberate scaffolding and structure he provided.

Mr. Nguyen sends home an information sheet—in English and in the primary language of the EL children—with some suggestions for how parents might interact with their children while reading aloud to them at home.

Vignette 3.4. General Academic Vocabulary Instruction from Storybooks Designated ELD in Kindergarten

Background

Mr. Nguyen has just read his students the story *Wolf* by Becky Bloom and Pascal Biet (see vignette 3.3). During the interactive read aloud, he paused when he came to several general academic vocabulary words to point to illustrations showing the meanings of the words or act out or explain their meanings. Despite this embedded vocabulary instruction, Mr. Nguyen has observed that many of his ELs have a hard time understanding or using the words orally. He wants all of his students to be able to understand these types of words when he reads them stories and use the words when they retell stories or compose their own original stories. He explicitly teaches some general academic vocabulary during ELA instruction. However, he also uses part of his designated ELD time to teach additional general academic words explicitly so that his EL students can rapidly build their vocabulary repertoires in ways that are tailored to their specific language learning needs.

Lesson Context

Mr. Nguyen and his kindergarten teaching team plan their vocabulary lessons together. They use a structured routine for teaching vocabulary that the children know well and enjoy because it makes learning the new words fun. The lesson incorporates several key elements:

- contextualizing the word in the story;
- providing a child-friendly explanation of its meaning along several examples of the word used meaningfully; and
- ample opportunities for the children to practice using the word with appropriate levels of scaffolding.

The kindergarten teachers teach 4–5 words per week during ELA instruction using a predictable routine. They use the same routine to teach additional words, when needed, during designated ELD instruction. The teachers develop the children's knowledge of the words over time by using the words frequently themselves throughout the day and by providing ample opportunities for the children to use the words in meaningful ways. The lesson-planning template the team uses is provided below.

General Academic Vocabulary Instruction - Lesson Plan Template (Whole group and small group)
Story: Word: Cognates: Timing: (should take 5–10 minutes, depending on the word)

Vignette 3.4. General Academic Vocabulary Instruction from Storybooks Designated ELD in Kindergarten (cont.)

General Academic Vocabulary Instruction - Lesson Plan Template (Whole group and small group) (cont.)

Routine:

1. Tell the students the word, and briefly show them the place in the story where they first heard it. Tell students any cognates in the students' primary language (e.g., *furious* in English is *furioso* in Spanish).
2. Explain what the word means in child-friendly terms (1–2 sentences). Use the word in complete sentences, so you do not sound like a dictionary.
3. Explain what the word means in the context of the story.
4. Provide a few examples of how the word can be used in other grade-appropriate ways.
5. Guide students to use the word meaningfully in one or two think-pair-shares (three, if needed), with appropriate scaffolding (e.g., using a picture for a prompt, open sentence frames, etc.).
6. Ask short-answer questions to check for understanding (not a test – they are still learning the word).
7. Find ways to use the word a lot from now on, and encourage the children to use the word as much as they can. Tell them to teach the word to their parents when they go home.

If taught in small groups for ELD

Children in group (names):
EL proficiency level: Emerging, Expanding, Bridging
Differentiated sentence frames for step 5 (see CA ELD Standards):

Emerging	*Expanding*	*Bridging*

Mr. Nguyen teaches designated ELD during literacy centers. While the other children are engaged in independent tasks (e.g., at the dramatic play area, the library corner, the listening station, the writing station), he works with small groups of EL children at the same English language proficiency level so that he can focus on their particular language learning needs. The learning target and cluster of CA ELD Standards Mr. Nguyen is focusing on today are the following:

Learning Target: Students will use general academic vocabulary meaningfully in complex sentences.

CA ELD Standards (Expanding): *ELD.PI.K.12b - Use a growing number of general academic and domain-specific words in order to add detail or to create shades of meaning . . . ; ELD.PII.K.6 – Combine clauses in an increasing variety of ways to make connections between and join ideas, for example, to express cause/effect (e.g., She jumped because the dog barked) . . .*

Vignette 3.4. General Academic Vocabulary Instruction from Storybooks Designated ELD in Kindergarten (cont.)

Lesson Excerpt

Mr. Nguyen sits at the teaching table facing five of his EL students who are at the Expanding level of English language proficiency. He shows them the book they read that morning, *Wolf*, and briefly summarizes the plot of the story. Next, he tells them about the new word they are going to learn to use: *ignore*.

Mr. Nguyen: (Showing the illustration.) Today, you're going to learn a new word: ignore. Let's all say that together. In the story when the wolf tried to scare the other animals, they just ignored him. When you ignore someone or something, you don't pay attention to it at all. You pretend it's not there. In the story, the animals ignored the wolf—or pretended he wasn't there—because they wanted to read their books.

Mr. Nguyen tells the children some other ways the word can be used so that they have models for using the word in different situations.

Mr. Nguyen: You can use this word a lot and probably every day. For example, this morning, I noticed that Hector ignored a friend who was trying to play with him while I was reading you this story. Hector didn't pay attention to him at all because he wanted to listen to the story. Sometimes when I'm trying to take a nap, there's noise outside my house, but I just have to ignore it so I can go to sleep. Take a look at this picture. Sometimes, my dog ignores me when I call her. She just pretends I'm not there, and I have to tell her "Please don't ignore me."

By this point, the children have a good idea of what the word means, and now it is their turn to use it. Mr. Nguyen provides a structure the students are familiar with (think-pair-share), linguistic support (open sentence frames), and a good question to promote thinking and their meaningful use of the word.

Mr. Nguyen: Now it's time for you to use the word. Here's a picture of a baby bothering a dog (shows picture). It looks like the dog is ignoring the baby. Why do you think the dog is ignoring the baby? (Waits several seconds for students to do their own thinking.) I'm not sure what you were thinking, but I'm thinking that maybe he's ignoring the baby because he's a lot bigger than the baby, and he doesn't want to hurt her. Maybe he's ignoring the baby because he doesn't care if she pulls his ears. You can use your idea, or you can use my idea. Now you get to tell your partner the idea. Use this sentence frame: The dog is ignoring the baby because ___.

After the children say the sentence frame with Mr. Nguyen, they turn to their partner to share their idea. Mr. Nguyen makes sure that his sentence frames contain the new word and that they are "open," meaning that children can use the frame as a springboard to add a lot, and not just one or two words. He also makes sure to think about the grammatical structure of his sentence frames and to constantly stretch his students linguistically. The sentence frame he uses is a complex sentence, and he would like for his students to use complex sentences to show the relationship between two ideas more often, rather than only using simple sentences to express themselves. He listens as the children share their ideas.

Vignette 3.4. General Academic Vocabulary Instruction from Storybooks Designated ELD in Kindergarten (cont.)

Marco: The dog is ignoring the baby because he's a lot bigger. Maybe he doesn't want to hurt it.

Alexi: The dog is ignoring the baby because he likes it.

Mr. Nguyen: Can you say a little more? What does he like?

Alexi: When she goes on him and pulls him. He loves the baby.

Mr. Nguyen: So he's ignoring the baby because he loves her, and he doesn't care if she pulls on his ears?

Alexi: (Nodding.) He ignoring her because he loves her, and he doesn't care if she hurt him.

Mr. Nguyen does not correct Alexi and require him to say "he's ignoring her" or "she hurts him" because he wants to keep Alexi's focus on the meaningful use of the word *ignore*. However, he makes a note in his observation log to address this grammatical point in another lesson. He asks the children another question and has them share their ideas with a partner, and then he asks them some short-answer questions to reinforce their understanding.

Mr. Nguyen: Now we're going to play a little game. If what I say is a good example of something you should ignore, say "ignore." If it's not, say "don't ignore." Your friend wants to play with you during circle time.

Children: (In unison.) Ignore.

Mr. Nguyen: Your friend falls off the swing and hurts herself.

Children: (In unison.) Don't ignore.

At the end of the lesson, Mr. Nguyen returns to the places where the word *ignore* appears in the story and briefly reminds the children of how it was used. The vocabulary lesson has taken about eight minutes, and now the children have a solid foundation for using the word and for understanding the word when they encounter it again in *Wolf* (when Mr. Nguyen reads it again) and in other stories.

Mr. Nguyen will continue to develop the children's knowledge of the word over time and will encourage the students to use the word meaningfully. For example, he will encourage the students to "ignore" the sounds outside as they are enjoying quiet reading time. He will also encourage the children to use the word when speaking to one another ("Please don't ignore me. I want to play with you," for example). The children will also learn many other words, some taught directly and many more they are exposed to through the rich stories and informational texts Mr. Nguyen reads aloud daily. In addition, Mr. Nguyen will often choose different words to teach his ELs at the Emerging level of proficiency, words that are important to understanding the stories he reads and that the other students in the class may already know well (e.g., dangerous practice), as well as some everyday words the children may not pick on their own (e.g., town, village, farm).

Vignette 3.4. General Academic Vocabulary Instruction from Storybooks Designated ELD in Kindergarten (cont.)

Teacher Reflection and Next Steps

Over the next week, Mr. Nguyen observes the children closely as they speak and write to see if they begin to use the words he has taught them. He deliberately finds ways to use the new words several times each day for the next week, and he posts the new words, along with the picture that depicts or triggers a reminder of the meanings of the words (e.g., the dog and the baby) on the class "Big Kids Words" wall. Each week, he sends home a sheet with the new words and a supportive illustration so that his students can "teach" their parents the new words they are learning and so that parents can reinforce the learning.

Vignette 3.5. Interactive Read Alouds with Informational Texts Integrated ELA, Literacy, and Science Instruction in Grade One

Background

Mrs. Fabian reads informational texts aloud to her students daily during integrated science and ELA instruction. She intentionally selects informational texts that are rich in content, engaging, and provide opportunities for students to discuss their ideas and develop academic language. Her class of 35 first graders includes 15 native English speakers and 20 EL children with several primary languages. Most of her EL students began the year at an Expanding level of English language proficiency and are comfortable with everyday English.

Lesson Context

During integrated science and ELA instruction, Mrs. Fabian is teaching her first graders about bees. Her goal for the end of the unit is for the children to write and illustrate their own informational texts, which will provide descriptions of bees (e.g., their anatomy, habitat, behavior) and explain how bees pollinate crops and why they are so important to humans. The children have listened actively to multiple informational texts on the topic and have asked and answered questions about them. They have also viewed videos and visited Web sites about bees and pollination, used magnifying lenses to view pollen on flowers in the school garden, observed (from a distance) bees pollinating flowers in the school garden, and acted out the process of pollination using models of bees and large flowers with "pollen" in them.

The class began generating a "bee word wall" with vocabulary from the informational texts and activities in the unit accompanied by illustrations and photographs. The words are grouped semantically. For example, the words describing bee anatomy (*head*, *thorax*, *abdomen*, *proboscis*) are presented as labels for an illustration of a bee's body. The class adds new terms as they progress through the unit. Mrs. Fabian, who is fluent in Spanish, strategically "code switches" between English and Spanish to scaffold understanding for her Spanish-speaking EL students. Whenever possible, she also supports her other ELs by using words that she has learned in their primary language.

Lesson Excerpts

In today's lesson, Mrs. Fabian will be modeling how to read a section of the informational text closely. She will then guide students to discuss the content of the text using domain-specific vocabulary from the text. Her goal is not for students to know every fact from the passage but, rather, to focus their attention on what is most important and to think about how the author presents ideas. Her learning target and the clusters of CA CCSS for ELA/Literacy and CA ELD Standards in focus for the lesson are the following:

Vignette 3.5. Interactive Read Alouds with Informational Texts Integrated ELA, Literacy, and Science Instruction in Grade One (cont.)

Learning Target: Students will identify the main topic of an informational text they listen to, using good reasons and evidence to support their ideas.
Primary CA CCSS for ELA/Literacy*: RI.1.2 – Identify the main topic and retell key details of a text; RI.1.3 – Describe the connection between two individuals, events, ideas, or pieces of information in a text; RI.1.7 – Use the illustrations and details in a text to describe its key ideas; W.1.7 – Participate in shared research and writing projects . . . ; SL.1.1 – Participate in collaborative conversations with diverse partners; SL.1.2 – Ask and answer questions about key details in a text read aloud . . . ; L.1.6 – Use words and phrases acquired through conversations, reading and being read to, and responding to texts . . .*
CA ELD Standards (Expanding)*: ELD.PI.1 – Contribute to class, group, and partner discussions by listening attentively, following turn-taking rules, and asking and answering questions; ELD.PI.5 – Demonstrate active listening to read-alouds and oral presentations by asking and answering questions with oral sentence frames and occasional prompting and support; ELD.PI.11 – Offer opinions and provide good reasons and some textual evidence or relevant background knowledge (e.g., paraphrased examples from text or knowledge of content); ELD.PI.12b – Use a growing number of general academic and domain-specific words . . .*
Related CA Next Generation Science Standard: 1-LS1.A Structure and Function – All organisms have external parts. Different animals use their body parts in different ways to see, hear, grasp objects, protect themselves, move from place to place, and seek, find, and take in food, water and air. (http://www.nap.edu/openbook.php?record_id=13165&page=143)

Mrs. Fabian begins by *briefly* activating the children's background knowledge about bees and previewing the passage they will be reading closely.

Mrs. Fabian: Children, we've been learning a lot about bees lately. I'm going to give you one minute to take turns sharing with your partner at least three observations or facts about bees. If you both finish before the minute is up, you can share even more observations and facts.

The children quickly turn to their partners and animatedly share ideas, using the "bee word wall" as a reference. Mrs. Fabian listens to the conversations to determine which ideas students are expressing and how they are expressing them.

Mrs. Fabian: Wow! I can tell you already know a lot about bees. Today, we are going to learn something new. We are going reread a couple of pages in one book we've been reading, *The Honeymakers,* by Gail Gibbons. As you listen, I'd like you to think about what the main ideas is in this section. What is it mostly about?. (Reading from a passage mid-way through the book) "At each flower the forager bee collects nectar with her proboscis. She stores the nectar in a special part of her body called the crop, or honey stomach. This stomach is separate from her other stomach" (14).

Vignette 3.5. Interactive Read Alouds with Informational Texts Integrated ELA, Literacy, and Science Instruction in Grade One (cont.)

As Mrs. Fabian reads these first three sentences in the passage, she points to the illustrations depicting some of the domain specific vocabulary (e.g., *proboscis, crop*). She briefly explains other vocabulary (e.g., *nectar*, or the sweet juice inside the flower) to make sure all students understand the text. While the children are familiar with this content because they have been learning about it in science, the language is still quite new for many of them. After she has read the third sentence, she stops and asks the children a question.

Mrs. Fabian: The author is giving us a lot of information here. What do you think the author means by "her other stomach?"

Tyler: I think it gots two stomachs.

Mrs. Fabian: You think the bee has two stomachs? Can you say more about that?

Tyler: It said the bee puts the nectar in the stomach. In the honey stomach. And it said it's different from the other one.

Mrs. Fabian acknowledges that Tyler has inferred correctly and rereads the section aloud again.

Mrs. Fabian: So, let's go back to what I asked you to think about. What do you think this part of the book is *mostly* about? Think for a moment (pauses for several seconds). When you share your idea with your partner, use this sentence frame: This part is *mostly* about _____. Let's say that together.

After the children say the open sentence frame chorally with Mrs. Fabian, they use it to preface their ideas with partners, while Mrs. Fabian listens carefully. She notices that one of her EL students, Chue, has a good grasp on the main idea, and he has shared with his partner some evidence from the text to support it. A few other students are sharing their ideas but are still not quite sure about what the main idea from the passage is.

Mrs. Fabian: Chue, can you tell me what you shared with your partner?

Chue: I share that the part is *mostly* about the bees when they get nectar and they put it in the stomach. In the honey stomach.

Mrs. Fabian: Can you explain why you think that? What did the text say that makes you think that?

Chue: Because it talking about how the forager bee get nectar from the flower with the proboscis and then it put it in it stomach.

Mrs. Fabian: That's good evidence that tells me what this section is mostly about. Children, listen carefully as I reread this part so that we can make sure we're getting the main idea (rereads the passage). Thumbs up or down everyone if you agree that this part is mostly about the bees collecting nectar and storing it in their honey stomachs.

Vignette 3.5. Interactive Read Alouds with Informational Texts Integrated ELA, Literacy, and Science Instruction in Grade One (cont.)

Mrs. Fabian writes "bees collect nectar and store it in the honey stomach" on the chart next to her. As she reads the next part of the passage, she again points to the illustrations to draw attention to some of the words that are depicted in them (e.g., *pollen*, *pollen basket*) and she acts out some of the bee behavior that the passage describes (e.g., collect). The information in this part of the passage is relatively new for many of the children, so Mrs. Fabian asks another question to further promote their understanding and model how to read a text more closely.

Mrs. Fabian: "As she goes from flower to flower she comes in contact with a yellow powder called pollen. Some of the pollen is collected in little 'baskets' formed by the special hairs on her hind legs. As the forager bee collects nectar, she carries pollen from flower to flower. This process is called pollination." And down here, in this corner, it says, "This makes seeds to grow new plants" (Gibbons, 1997,14-15). Now, here's some pretty new information for us. This might be a little trickier than the last section we read, but let's try it. What do you think the main idea in this section is? And why do you think that? Think about the details.

Mrs. Fabian places the open book under the document camera so the children can refer to the illustrations and text as they discuss their ideas with partners. As she listens to her students, she observes that most of them say the part is mostly about pollen, while others suggest it is about "baskets" or "seeds." The children continue pointing to the illustrations as they discuss their understandings.

Mrs. Fabian: Inés, what do you think?

Inés: I think it's mostly about the pollen.

Mrs. Fabian: And can you explain more? Why do you think it's mostly about pollen?

Inés: Because it says that the bee gets pollen on its legs and then it goes to the flowers.

Mrs. Fabian: Okay, let's read that again. (Rereads the part.)

Inés: I think maybe it's about pollination?

Mrs. Fabian: That's a big word, isn't it? Let's all say that word together.

Children: (Chorally with Mrs. Fabian) Pollination.

Mrs. Fabian: And what makes you think that, Inés?

Inés: (Shrugging.)

Mrs. Fabian: Can someone add on to what Inés said? Brandon?

Brandon: It said that the bees get the pollen on their legs and then it goes to the flower. (Pauses.)

Mrs. Fabian: And then what happens?

Brandon: And then it's called pollination. It makes seeds so the plants grow.

Mrs. Fabian: Oh, so what you're all saying is that the bee gets pollen on its legs, in its pollen baskets, and when it goes from flower to flower, it leaves pollen on the other flowers. And that's what helps the flowers make seeds so that they can grow plants. This process is what we call *pollination*.

Vignette 3.5. Interactive Read Alouds with Informational Texts Integrated ELA, Literacy, and Science Instruction in Grade One (cont.)

Chue: We did that. When we had the flowers and the yellow powder – the pollen.

Mrs. Fabian: Yes, that's right, you acted out the process of pollination. Let's reread this part just to make sure we have the main idea right (rereads). Okay, so thumbs up or down if you think this part is mostly about the process of pollination.

Mrs. Fabian writes "the process of pollination" under "the bee collecting nectar." Rereading the passage again, she guides the students to tell her how she should label a drawing she has prepared in advance, which illustrates bee pollination (a bee going from flower to flower). Later, she will post the diagram on the "bee word wall." To wrap up the lesson, Mrs. Fabian models making an inference, guiding students to think a little more deeply about the text.

Mrs. Fabian: Hmm. I'm noticing something interesting here. First the author told us about the *bee collecting nectar*, and then she told us about the *process of pollination*. I wonder why she put these two ideas in the same passage. Why do you think she did that? (Pauses to let the children refer to the illustrations and text as they consider her question.)

Mrs. Fabian: Share what you are thinking with your partner. (She listens to the children share their ideas.) Solange and Carlos, what did the two of you share with one another?

Solange: Maybe they get the nectar and the pollen at the same time when they go to the flower?

Carlos: And then they carry the pollen on their legs to another flower. And they get more nectar and more pollen, and then they keep doing that.

Mrs. Fabian: (Nodding.) I'm thinking that, too. I'm thinking that the author wanted to show that the bees are getting pollen on their legs from all those flowers *while* they're collecting nectar, and that's why she's telling us these two things at the same time. They are happening at the same time, and that's how the pollen travels from one flower to another. What was that big word we learned?

Children: Pollination!

To wrap up the lesson, Mrs. Fabian asks students to continue being good scientists when they observe what is happening around them and notice what is happening—from a distance—when they see a bee outside of school, in a video, or in a book. She asks them to make connections between the text she read aloud and what they are learning in science instruction. She encourages students to ask themselves questions like these: Does the bee have *pollen* in its pollen baskets? Is the pollen getting on the flowers? Is the bee getting the *nectar* with its *proboscis*?

Teacher Reflection and Next Steps

Over the course of the unit, Mrs. Fabian observes her students carefully. She is particularly interested to see if the children understand the science concepts they are learning and whether they use some of the new vocabulary and grammatical structures in their discussions and writing. For the culminating project—student-written informational texts about bees—students use the new language they have developed.

Vignette 3.5. Interactive Read Alouds with Informational Texts Integrated ELA, Literacy, and Science Instruction in Grade One (cont.)

All About Bees, by _____		
p. 1 Introduction	p. 4 Bee jobs	p. 7 Pollination
p. 2 Bee anatomy	p. 5 Metamorphosis	p. 8 Bee dances
p. 3 The beehive	p. 6 Honey	p. 9 Interesting facts

As they write their texts, the children refer to the "bee word wall," charts and sentence frames posted throughout the room, and look back at several informational texts on the topic that Mrs. Fabian has placed on tables and in the classroom library. Once finished, each child reads his or her book to the class from the "Author's Chair." Finally, the books students have written are placed in the classroom library corner to be read over and over again.

One student, Maryam, has just arrived to the U.S. from Somalia and is at the early Emerging level of English language proficiency. Mrs. Fabian watches Maryam carefully, and she assigns her a "buddy," Tanaad, another first grader who speaks Somali and is a good class helper. Maryam sits next to Tanaad during partner talk and at first listens as Tanaad and his partner discuss the science content. Mrs. Fabian models for Maryam and prompts her to use some simple words and phrases (e.g., *yes, no, what's that?, I don't know, I think . . .)* so that she can contribute her ideas to conversations. Maryam is expected to participate in class chants, poems, and songs about bees and pollination, even if she is initially only able to say a few words. At first, she is a little shy, but very soon, she participates enthusiastically in these group language activities because they are engaging.

Mrs. Fabian encourages the class to make Maryam feel welcome and successful in her English language development, and her peers encourage her to participate in the activities with them. Before long, Maryam is chatting on the playground and in the classroom using everyday English. With encouragement from Mrs. Fabian and her classmates she begins to participate more in discussions about texts and content. In addition to social English, she is learning the academic English in the bee unit alongside the other children, labeling her drawings with words related to pollination (e.g., *pollen, bee, fly*) and using more and more of the words in her spoken interactions with others.

Vignette 3.6. Unpacking Sentences
Designated ELD Instruction in Grade One

Background

During an integrated ELA and science unit on bees, Mrs. Fabian observes all of her students carefully as they discuss the science concepts and use new language associated with the lesson (see vignette 3.5). She finds that some of her EL students at the Expanding level of English language proficiency are having difficulty describing and explaining their ideas using domain-specific and general academic vocabulary and complex sentence structures. This makes it difficult for them to convey their understandings of the content; she suspects that if they are not comprehending the language in the texts then they may not be fully understanding the scientific concepts.

Lesson Context

Mrs. Fabian meets with her first grade teaching team and asks for their suggestions for addressing the language needs of her EL students. Because her colleagues have had similar challenges, they decide to collaborate on a series of designated ELD lessons, differentiated by English language proficiency levels. The team begins by analyzing the informational science texts they are using for: (a) language that is critical to understanding the science content; and (b) language they would like students to produce orally and in writing. Some of this language is domain-specific vocabulary, which the teachers decide to address daily in both integrated ELA/science and in designated ELD.

In addition to vocabulary, the team also notices that many ofthe sentences in the informational science texts are densely packed. They decide that instead of simplifying the language for their EL students, they should delve into the language so that their EL students can begin to understand it better. They refer to the CA ELD Standards to see what types of vocabulary and grammatical structures their EL children at the Expanding level should be able to use, and they incorporate this guidance into their planning. The teachers decide to model for students how to "unpack" the dense sentences that characterize their science texts. After studying this particular technique in a professional learning seminar provided by their district, and adapting it to meet their students' needs, they write the procedure they will use knowing that they can refine it after they have seen how well it works.

Unpacking Sentences

1. Start with a text that you are already using.
2. Identify a few sentences that students find challenging to understand.
3. Focus on meaning: Show students how to unpack the meaning in the sentence by writing a list of simple sentences that, when combined, express the meaning of the sentence.
4. Focus on form: Show students important features of the sentence (e.g., specialized vocabulary and descriptive language; conjunctions show relationships between two ideas in compound and complex sentences, prepositional phrases are used to add details, vocabulary).
5. Guided practice: Guide the students to help you with steps 3 and 4.
6. Keep it simple: Focus on one or two things and use some everyday language examples, as well as examples from the complex texts. (Adapted from Christie 2005, Derewianka 2012, Wong Fillmore 2012)

Vignette 3.6. Unpacking Sentences
Designated ELD Instruction in Grade One (cont.)

In today's lesson, Mrs. Fabian will introduce the "sentence unpacking" technique to model how to read/listen to their texts more closely. The learning targets and cluster of CA ELD Standards Mrs. Fabian focuses on are the following:

Learning Target: Students will discuss how to join two ideas using coordinating and subordinating conjunctions to show relationships between ideas.

CA ELD Standards (Expanding): *ELD.PI.1 – Contribute to class, group, and partner discussions by listening attentively, following turn-taking rules, and asking and answering questions; ELD.PI.7 – Describe the language writers or speakers use to present or support an idea (e.g., the adjectives used to describe people and places) with prompting and moderate support; ELD.PII.6 – Combine clauses in an increasing variety of ways to make connections between and to join ideas, for example, to express cause/effect (e.g.,* She jumped because the dog barked.*), in shared language activities guided by the teacher and with increasing independence.*

Lesson Excerpts

During designated ELD time, Mrs. Fabian tells her students that in the science books she is reading to them, there is often a lot of information packed into the sentences, so she is going to show them some ways to *unpack* sentences so they can understand them better. She shows her students a tightly packed suitcase.

Mrs. Fabian: Sometimes, it is hard to see all the things inside the suitcase when it is packed in tightly like that. (Pulling out some of the things that are packed inside – a shirt, a pair of pants, some books and shoes.) When we *unpack* the suitcase a little, we can see the different things that are in there. Some sentences are like suitcases. When they are jammed full of many different words, they can be hard to understand, but when we *unpack* sentences and take the words apart we can understand the meanings more easily.

Mrs. Fabian reads a passage from one of the informational texts about bees that she has previously read and discussed with the whole class. She follows the procedure her team is using to show the students how to *unpack* or break down densely packed sentences.

Mrs. Fabian: Children, today we're going to be looking closely at a couple of sentences we've seen in the books about bees. Here's the first sentence.

She shows the children a sentence from the book *The Honeymakers,* by Gail Gibbons, which is written on a sentence strip and placed in the pocket chart.

"As the forager bee collects nectar, she carries pollen from flower to flower."
(Gibbons, p. 15)

Mrs. Fabian: I'm going to model for you how I unpack sentences that have a lot of information in them. (Points to the sentence and reads it slowly, thinking aloud.) Hmm. It seems like this sentence is mostly about a bee doing some different things.

Vignette 3.6. Unpacking Sentences
Designated ELD Instruction in Grade One (cont.)

As Mrs. Fabian thinks aloud, she pulls shorter sentence strips from behind the original sentence and places them in the rows below, visually *unpacking* the meaning of the sentence so that students can see the break down. She reads each sentence as she places it in the pocket chart.

There's a forager bee.

The bee collects nectar.

The bee has pollen on its legs.

The bee carries the pollen to many flowers.

Mrs. Fabian: Can you see how I unpacked or separated all the ideas in the sentence? There are really just two big ideas. The first is that the bee is collecting nectar, and the second is that the bee is carrying pollen to the flowers. But these ideas are connected in a special way. There's a really important word in the sentence that's connecting the ideas. The word "as" at the beginning of the sentence tells me that the two things are happening at the same time.

Mrs. Fabian pulls out another sentence strip and places it under the sentences.

As = At the same time

She has the children read the original sentence with her chorally. Then they read the shorter sentences followed once again by the sentence with the word *as* in it. She models how to unpack another sentence and follows the procedure of thinking aloud as she pulls the shorter sentences from the pocket chart.

While a worker bee crawls around an apple blossom, the bee is dusted with pollen.

There's a worker bee.

There's an apple blossom.

The bee crawls around an apple blossom.

There's pollen.

The bee gets pollen on its body.

The pollen is like dust.

Mrs. Fabian: Hmm. Here, it says that the bee is getting pollen on it and that it's like dust, but it doesn't tell us how the dust is getting on the bee. I think it must be on the flower, and when the bee's body rubs against the flower, the bee gets pollen on it because the pollen is on the flower. The pollen is like dust (shows a picture of dust). Sometimes it's difficult to figure out all the meanings in a sentence, but if you break down the sentence, it's easier to understand. Let's read the original sentence and then the shorter sentences together.

Children: (Reading the sentences chorally.)

Mrs. Fabian: Did anyone notice that there's another special word at the beginning of the sentence that tells us *when* something is happening?

Carla: While?

Vignette 3.6. Unpacking Sentences
Designated ELD Instruction in Grade One (cont.)

Mrs. Fabian: Yes, the word "while" is like the word "as." It tells us that two or more things are happening at the same time. The words "while" and "as" are important for showing how the two events are connected in time.

Mrs. Fabian pulls out another sentence strip and places it below the others.

While = At the same time

Mrs. Fabian: Let's read the original sentence together again, and then see if you and your partner can tell me what two things are happening at the same time.

Mrs. Fabian helps her students unpack other sentences from the texts they are using in integrated ELA and science. Each one is a complex sentence containing the subordinate conjunctions "as" or "while." She writes each sentence on chart paper, reads them with the students, and invites them to explain in their own words what is happening. Then she writes the students' simpler sentences down on the chart paper for all to see. During this process, she explicitly draws their attention to how the two ideas are connected using the words "as" and "while," and she and the students engage in extensive discussion about the meaning of the original sentence.

Mrs. Fabian: When you connect your ideas using the words "while" and "as," it doesn't matter which idea you put first. For example, I can say, "While you watched me, I wrote a sentence." Or, I can say, "I wrote a sentence while you watched me." I can say, "While I washed the dishes, I sang a song." Or, I can say, "I sang a song, while I washed the dishes." We're going to play a little game connecting ideas.

She hands the children sets of pictures where two things are happening simultaneously (e.g., children are playing on a playground while their parents watch them, a bee is sucking nectar from a flower while it collects pollen on its legs), and she writes the words "while" and "as" at the top of a piece of chart paper. She asks students to work in pairs and create sentences that include two ideas connected with the word "while" or "as." As they work together to combine the ideas, she listens to them so that she can respond to any misunderstandings right away. After the children have constructed multiple sentences in partners, she asks them to tell her some of them, and she writes them on the "while" and "as" chart.

Mrs. Fabian: Who can tell me why we might want to use the words "while" or "as?"

Thao: They help us put two ideas together.

Mrs. Fabian: Yes, they do. Can you say more?

Thao: (Thinking.) They make the two ideas happen at the same time?

Vignette 3.6. Unpacking Sentences
Designated ELD Instruction in Grade One (cont.)

Mrs. Fabian: Yes, that's right. The words "while" and "as" let us know that two events are happening at the same time. Today we unpacked sentences to find out what all the meanings are, and we looked especially closely at how the words "while" and "as" are used to connect ideas. From now on, I want you to be good language detectives. A good language detective is always thinking about how to unpack sentences to understand the meaning better. And a good language detective is someone who is always thinking about how words are used to make meaning. Who thinks they can be a good language detective?

Children: (Chorally). Me!

Teacher Reflection and Next Steps

During the rest of the day, Mrs. Fabian observes her EL children to see if they are using any of the new language resources she is teaching them in their speech and writing. For the rest of the science unit, Mrs. Fabian works with her students during designated ELD time to unpack sentences in other science texts she is using, focusing strategically on the aspects of the sentences that make them dense (e.g., long noun phrases, prepositional phrases). She uses a rubric based on the CA ELD Standards to assess how individual students are progressing with their use of particular language resources (e.g., vocabulary, grammatical structures, text organization). Whenever possible, she encourages them to use the new language, prompting them with questions like, *How can you combine those two ideas to show they are happening at the same time?* Although the children often produce imperfect sentences, Mrs. Fabian offers corrective feedback sparingly since she knows that the children are experimenting with language and practicing the grammatical structures that they will continue to learn as the unit progresses.

Vignette 4.1. Close Reading of *Lilly's Purple Plastic Purse* (Narrative Text) ELA Instruction in Grade Two

Background

Each month, Mrs. Hernandez's class of 35 second graders conducts an author study. Mrs. Hernandez selects the authors based on the rich language they use and the many opportunities the literacy texts provide for students to make inferences about ideas and events in the stories and engage in extended text-based discussions. The compelling plots motivate the children to read the books multiple times. This month, students are enjoying books by author Kevin Henkes. Mrs. Hernandez's class comprises 25 children who are native English speakers or bilingual children proficient in English, and ten children who are ELs. Two are at the Emerging level of English language proficiency, six are at the Expanding level, and two are at the Bridging level.

Lesson Context

Mrs. Hernandez reads some of Kevin Henkes books' aloud to the whole class. Students then explore other books by Henkes in small reading groups while their classmates work in partners or small groups at literacy stations (e.g., the listening station, the writing station, the partner reading station). During her read alouds, she sometimes *code switches* between English and Spanish to provide scaffolding for her two Spanish-speaking ELs who are at the Emerging level of English language proficiency and are fairly new to English (newcomer ELs). She sometimes previews the stories for them in Spanish or asks a parent who is fluent in Spanish to do so.

Today, Mrs. Hernandez is working with a small reading group of six children (two are ELs at the Bridging level, two are bilingual students who are not ELs, and two are native speakers of English only). They are reading *Lilly's Purple Plastic Purse*. Mrs. Hernandez helps students read the text closely by thinking about and discussing text-dependent questions. Yesterday, when the group read the book for the first time, Mrs. Hernandez asked text-dependent questions focused on literal comprehension. Today, she will stop at strategic points in the text and guide the children to discuss text-dependent questions targeting inferential comprehension of the text. The learning target and cluster of CA CCSS for ELA/Literacy and CA ELD Standards in focus for today's lesson are the following:

Learning Target: The students will answer *on-the-surface* and *below-the-surface* text dependent questions while reading a text closely.
Primary CA CCSS for ELA/Literacy Addressed: *RL.2.1 – Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text; RL.2.3 – Describe how characters in a story respond to major events and challenges; W.2.1 – Write opinion pieces in which they introduce the topic or book they are writing about, state an opinion, supply reasons that support the opinion, use linking words (e.g., because, and, also) to connect opinion and reasons, and provide a concluding statement or section; SL.2.1 – Participate in collaborative conversations with diverse partners . . .*

Vignette 4.1. Close Reading of *Lilly's Purple Plastic Purse* (Narrative Text) ELA Instruction in Grade Two (cont.)

Primary CA ELD Standards Addressed (Bridging):
ELD.PI.1 – Contribute to class, group, and partner discussions, including sustained dialogue, by listening attentively, following turn-taking rules, asking relevant questions, affirming others, adding pertinent information, building on responses, and providing useful feedback; ELD.PI.3 – Offer opinions and negotiate with others in conversations . . . ; ELD.PI.6 – Describe ideas, phenomena (e.g., erosion), and text elements (e.g., central message, character traits) using key details based on understanding of a variety of grade-level texts . . . with light support; ELD.PI.11 – Support opinions or persuade others by providing good reasons and detailed textual evidence . . .

Lesson Excerpts

Mrs. Hernandez signals her class to proceed to their literacy stations, and within moments, her reading group is seated at the teaching table with their materials. She points to the *on-the-surface* question card in front of her and asks the children to read chorally with her what is written on it. She recalls yesterday's questions about the story and reminds students that good readers are constantly asking themselves questions about what they are reading.

On-the-Surface Question Card
What is this part mostly about?
What is happening?
Who is involved in what's happening?
When and where is it happening?

Mrs. Hernandez: Yesterday, we learned a lot about Lilly, didn't we? Can anyone tell me what we know about Lilly and about this book so far?

Jamal: It's about Lilly. She's a mouse. At the beginning, she really likes her teacher, but then she was being really annoying, and he took her purse, so she was mad. (Pauses.)

Ana: I have something to add on to you. Then Mr. Slinger gave her back her purse, and she liked him again.

Mrs. Hernandez: Okay, that was a nice review of what we discussed yesterday, and great use of the word *annoying*, Jamal. Today, we're going to go below the surface to read the story even more closely.

Mrs. Hernandez places the *below-the-surface* card on the table and asks the students to read what is written on it with her. She explains that they will be using this card to ask themselves questions as they read today.

Below-the-Surface Question Card
How does the author let us know ____?
Why does ___ happen? How do we know?
What if _____? How do we know?
Would ____? How do we know?

Vignette 4.1. Close Reading of *Lilly's Purple Plastic Purse* (Narrative Text) ELA Instruction in Grade Two (cont.)

Mrs. Hernandez: Often, the author will not come right out and tell you what is happening or what a character is thinking or feeling, so you have to go *below-the-surface* to get to the deeper meanings. These questions will help us to do that.

Mrs. Hernandez asks her students to reread the text with her. At strategic points, she stops and poses a few text-dependent questions that she has prepared in advance using the language frames on the card. She has the children discuss the questions, locating evidence in the book to support their ideas. She has modeled using textual evidence to answer questions numerous times during teacher read alouds and has engaged the students in discussions about these types of questions, but doing this with the texts they are reading themselves is relatively new for students. Discussing the *below-the-surface* questions is challenging for the children at first, so Mrs. Hernandez guides them as they articulate their thoughts and find textual evidence to support their ideas.

Mrs. Hernandez:	Why do you think Mr. Slinger wasn't angry at Lilly for drawing and writing mean things about him?
Steven:	I think he wasn't angry because he's nice. And he's a teacher, so he has to be nice.
Elodie:	I have something to add on to what you said. I think he wasn't angry because he saw that Lilly was really, really sorry.
Mrs. Hernandez:	What do you think, Charles?
Charles:	I agree with Steven that Mr. Slinger is a nice teacher, but I also agree with Elodie. I think he wasn't angry because he saw Lilly was sorry she did all those things.
Mrs. Hernandez:	Hmm. Can you say more about what "all those things are?"
Charles:	(Shrugs).
Mrs. Hernandez:	Let's go into the book to see if we can find some textual evidence to support your idea. (Pauses and waits so the children have an opportunity to find evidence on their own.)
Jamal:	I think he saw she was really sorry because it says she wrote a letter and drew a picture. The story says that Lilly is really sorry and everyone forgave her. And in the picture, it says he's kind, good, and nice.
Sara:	I have something to add on to you. Lilly's father baked some no-frills cheese balls, and her mother wrote a note. And then on this page, he tastes the cheese balls and reads the note. And then he says "wow."
Eva:	Yeah, that's a good idea, Sara. I think Lilly was proving she was really, really sorry, and he had to forgive her.
Mrs. Hernandez:	What do you think he meant when he said "wow."
Eva:	I think he meant "I forgive you."
Jamal:	I think he meant he wasn't angry at her anymore.

Vignette 4.1. Close Reading of *Lilly's Purple Plastic Purse* (Narrative Text) ELA Instruction in Grade Two (cont.)

Mrs. Hernandez: Okay, so it sounds like you found evidence that Mr. Slinger wasn't angry with Lilly anymore just because he was a nice teacher. It looks like the evidence shows that he forgave her because she did all those things you discussed to deserve forgiveness. Do you think he could see that she was really sorry?

Children: (In unison.) Yes!

At the end of the lesson, Mrs. Hernandez sends the group to the writing station to complete a writing task in pairs that involves choosing one of the text-dependent questions they discussed during reading group, conferring about it again, and using a template to write their opinion, including supporting textual evidence. Mrs. Hernandez has guided students through this process before, but this is the first time that the children will be doing it on their own.

Before placing their opinion pieces in their writing folders to review the next time they meet with Mrs. Hernandez, the students first share what they wrote with two classmates, who offer feedback about the strength of the writer's statements: Do the statements make sense? Is the evidence enough to support the ideas. Is their other evidence from the text that would make the writer's ideas more convincing? What other words could be used? Mrs. Hernandez walks around the room, observing and listening to students as they engage in peer discussions. She has taught her students to cross out words or sentences and then rewrite them on the same piece of paper (rather than erasing what they wrote) which allows her to see how they revised their opinion pieces. At the end of the lesson, students write in their reflection journals, commenting on how well they think they followed pre-established norms for providing peer feedback and how helpful the peer feedback they received actually was.

Teacher Reflection and Next Steps

The next time this reading group meets with Mrs. Hernandez, she will guide them to think more deeply about the meanings the author is trying to convey. She will use a *deeper dive* question card to guide them as they answer text-dependent questions.

Deeper Dive Question Card

What do you think the author wants us to *understand about* _____?

How does the author use special words to show us _____?

How does the author play with *language* to add meaning?

When Mrs. Hernandez meets with her second-grade teaching team, she tells them about using the question cards in her reading groups and shares how the lessons went. Even though the below-the-surface text-dependent questions were challenging for her students, she could see that they were engaged in talking about the texts and finding evidence to support their ideas. She also shares that recently she has noticed that during collaborative conversations about texts she read aloud her students now attend much more to what it says in the text rather than relying solely on background knowledge or guessing. She concludes that paying attention to text-dependent questions in her small reading groups and whole group teacher read alouds has contributed to her students' development of these skills.

Vignette 4.2. Discussing "Doing" Verbs in *Chrysanthemum* Designated ELD Instruction in Grade Two

Background

Mrs. Hernandez's class is conducting an author study of Kevin Henkes (see vignette 4.1). Mrs. Hernandez has observed that her ELs at the Expanding level of English language proficiency find the inferential text-dependent questions she poses during teacher read alouds and in small reading groups challenging, especially when the language the author uses is somewhat nuanced. She wants to find ways to help them understand the inferential text-dependent questions and effectively convey their understandings of the questions in English. To this end, she plans to explicitly address the language that may be making it difficult for students to make inferences and respond to the text-dependent questions.

Lesson Context

Mrs. Hernandez meets with her colleagues to discuss her observations. The other second-grade teachers share that some of their students are experiencing the same types of challenges she describes. As the team examines the types of questions students are having difficulty with and the language in the texts that students need to interpret in order to answer the questions, they discover that some of the textual challenges stem from the way the author shows how a character feels or what the character is thinking. Sometimes authors do not explicitly state such things, but rather suggest emotions and thoughts through behavior and dialogue. Instead, authors show emotions and thoughts through behavior and dialogue.

When the teachers comb through the storybooks for examples of this use of language, they discover that there are quite a few instances. For example, in Kevin Henkes' book, *Chrysanthemum*, instead of writing "She's sad," Henkes writes that the main character "wilts" when her classmates tease her about her name. Instead of writing "She's nervous," he writes that she "drags her feet in the dirt." The teachers also notice that "sad" and "nervous" are adjectives, whereas "wilts" and "drags" are verbs. They decide that this is an important language feature to point out to their EL students, as the children may not notice this on their own. Using resources from recent professional learning sessions provided by their district, Mrs. Hernandez and her colleagues plan a series of designated ELD lessons that delve more deeply into how authors use different types of verbs to show how a character is feeling. The learning target and cluster of CA ELD Standards for today's lesson, during which Mrs. Hernandez will work with a group of EL children at the Expanding level of English language proficiency, are the following:

Learning Target: The students will describe how authors use verbs instead of adjectives to show how a character is thinking or what they are feeling.
Primary CA ELD Standards Addressed (Expanding): *ELD.PI.2.1 – Contribute to class, group, and partner discussions . . . ; ELD.PI.2.6 - Describe ideas, phenomena (e.g., how earthworms eat), and text elements (e.g., setting, events) in greater detail based on understanding of a variety of grade-level texts and viewing of multimedia with moderate support; ELD.PII.2.3 – Use a growing number of verb types (e.g., doing, saying, being/having, thinking/feeling) with increasing independence.*

Vignette 4.2. Discussing "Doing" Verbs in *Chrysanthemum* Designated ELD Instruction in Grade Two (cont.)

Lesson Excerpt

During designated ELD, Mrs. Hernandez explains to her students that they are going to be looking carefully at one way that Kevin Henkes makes his writing so interesting. He uses *doing* verbs to show how his characters are feeling or what they are thinking. She opens the book, *Chrysanthemum,* to the page just after the complication stage of the story began.

Mrs. Hernandez:	Children, remember when we read the story, *Chrysanthemum*, and how the children teased the main character because of her name? Here it says, "Chrysanthemum wilted." How does Kevin Henkes show how Chrysanthemum is feeling at this point in the story?
Noé:	She's sad because they're teasing her.
Mrs. Hernandez:	Yes, she is sad. But Kevin Henkes does not just say, "she's sad," does he? He uses the word "wilted," and he uses this word for a reason. Usually, we use the word "wilt" when a flower is dying and folding over like this. (Mrs. Hernandez acts out the word). Let's say "we're wilting" together and pretend we are flowers wilting. Ready?
Children:	(Chorally, while acting out the word) We're wilting.
Ibrahim:	That's how Chrysanthemum felt. She felt like a flower that's wilting.
Noé:	(Excited). And Chrysanthemum is a flower, too!
Mrs. Hernandez:	That's right. So, what you are saying, is that Kevin Henkes did not just tell us "she's sad." Instead, he showed us how she was feeling, and he used a doing verb, *wilt*, to show us. We are going to take a look at some other places where Kevin Henkes uses doing verbs—instead of using adjectives, like *sad* or *happy*—to show how characters are feeling or what they're thinking.

Mrs. Hernandez shows the children a chart she made. In one column, there is a place to record what Kevin Henkes wrote. In a second column, there is a place for the children to record what the text means using *being/having* verbs (*relating*) or *thinking/feeling* verbs (*sensing*). She explains that examples of being/having verbs that relate one piece of information to another are sentences such as "I *am* a teacher." or "I *have* a pencil." Examples of thinking/feeling verbs are "She *thought* it was recess time." or "She *felt* happy." She does not dwell too much on the terms as she will come back to them over the next few weeks.

Mrs. Hernandez continues to model finding instances in *Chrysanthemum* where the author uses doing verbs to show how the characters felt or what they thought. First, she reads the sentence and has the children turn to a partner to discuss what they think the sentences mean. She then asks a few students to share the ideas they discussed with the whole group, and she writes them on the chart. As she writes the sentences, she uses a different color for the verbs in each column.

Vignette 4.2. Discussing "Doing" Verbs in *Chrysanthemum* Designated ELD Instruction in Grade Two (cont.)

Using Verbs to *Show* and *Tell*		
Story	What it says in the story Showing with *doing* verbs	What it means Telling with *being/having* and *thinking/feeling* verbs
Chrysanthemum	Everyone *giggled* upon hearing Chrysanthemum's name.	They *thought* her name was funny.
	Chrysanthemum *wilted*.	She *was* very sad.
	Chrysanthemum *walked* to school as slowly as she could.	She *was* nervous about going to school.
	She *loaded* her pockets with her most prized possessions and her good luck charms.	She *didn't feel* safe.

Mrs. Hernandez: What do you notice about the verbs the author is using, the ones in the left hand column (pointing)?

Noé: The author is showing the characters are doing something. They're not feeling or thinking about it. Over there, it says, "she was sad," and that's describing her, how she feels.

Ana: I want to add on to what Noé said. He—Kevin Henkes—he didn't say she was sad, but he did say it. He said it with showing us what she did, how she acted.

Mrs. Hernandez: Yes, showing us what characters are doing is one way that authors tell us about what the characters are thinking or feeling. It makes their writing more interesting. It's okay to say things like, "she's sad," or "she's nervous," but it makes it more interesting for the reader when the author shows us what the characters are doing instead of just telling us. So, an example of *showing* us is when the writer says Chrysanthemum wilts or she drags her feet in the dirt. An example of the writer *telling* us would be when the author says that Chrysanthemum is sad or nervous. When authors *show* us, we have to really think about what's going on. As *readers*, we have to do the thinking work.

Clara: But when it says "Chrysanthemum *walked* to school as slowly as she could," the verb doesn't just do it.

Mrs. Hernandez: What do you mean? Can you say a little more about that?

Clara: You have to look at the rest, not just the verb. You have to look at where it says, "as slowly as she could." She was walking, but not fast. She was walking slowly because she didn't want to go to school. Because she was so nervous.

Vignette 4.2. Discussing "Doing" Verbs in *Chrysanthemum* Designated ELD Instruction in Grade Two (cont.)

Mrs. Hernandez: Great observation, Clara. Yes, you have to look at the verb, but you also have to look at what is around the verb, how the action was happening. Chrysanthemum was walking in a certain way: not quickly, not at a normal pace, but *slowly*. Where it says she was walking slowly, that tells us more about the verb or, in this case, what Chrysanthemum was doing. Over the next couple of weeks, we are going to be talking a lot about different types of verbs and about the words in sentences that give more information about the verbs. Today, we are going to start writing down some of the different types of words we find.

Mrs. Hernandez shows the children another chart, one with four columns representing four categories (or types) of verbs. She writes the verbs that are in each of the sentences putting them in the columns according to their type. The chart Mrs. Hernandez starts follows.

Verb Chart: Different types of verbs in books by Kevin Henkes			
doing	thinking/feeling	being/having	saying
giggled wilted walked (slowly) loaded	thought didn't feel	was	sighed

Mrs. Hernandez explains that there are still a lot of thinking/feeling and being/having verbs in a story, and there are many *saying* verbs because there is a lot of dialogue in stories, but that today, they are mostly focusing on the doing verbs that show what a character is feeling or thinking. She tells them that they may also find examples of saying verbs that do this. For example, an author may write "she sighed," to show that a character is disappointed or sad. She writes this on the chart as an example.

Mrs. Hernandez tells the children that their next task is to be *language detectives*. She has the students work in groups of three to find other examples in books by Kevin Henkes where he shows how a character is feeling or is thinking by using doing or saying verbs. She gives the triads copies of several Kevin Henkes books, along with a graphic organizer like the one she used to model the task. For each book, some examples have been written in the left-hand column and a space in the right-hand column for students to write their *translations*.

She tells the students that their task is to find a sentence in the text that they think uses doing verbs to to show what a character feels or what a character thinks. Next, the groups of three try to agree on what they will write and record it on the graphic organizer, discussing why the author used the doing verb instead of a being/having or thinking/feeling verb with an adjective. As the students engage in the task, she observes their discussions and provides just-in-time scaffolding when needed. Once the time for the task is up, she calls the students back to the rug to discuss their findings. Mrs. Hernandez asks students to tell her where to place the verbs on the Verb Chart, which she posts in the room along with the Using Verbs to Show and Tell chart, so that children will have models for their own story writing.

Vignette 4.2. Discussing "Doing" Verbs in *Chrysanthemum* Designated ELD Instruction in Grade Two (cont.)

Teacher Reflection and Next Steps

At their next collaborative planning meeting with her second-grade teacher colleagues, Mrs. Hernandez shares how the lessons went. She says that although the task was challenging at first, her students were excited about being language detectives, and the groups had lively discussions about the language they discovered in their investigations. In addition, Mrs. Hernandez was pleasantly surprised by how easily and meaningfully her students discussed the ways different types of verbs are used in stories.

Vignette 4.3. Collaborative Summarizing with Informational Texts Integrated ELA and Science Instruction in Grade Three

Background

In science, Mr. Franklin has been teaching his third graders about plants and interdependent relationships in ecosystems. He has been reading aloud and supporting students as they independently read complex literary and informational texts in both science and ELA. His class of 33 students, drawn from an urban neighborhood with upper middle class and working class families, is quite diverse linguistically, culturally, ethnically, and socioeconomically. Fifteen of his students are ELs with several different home languages. Most of Mr. Franklin's EL students have been at the school since kindergarten and are at an early Bridging level of English language proficiency in most areas, while a few are at the Expanding level. Five of Mr. Franklin's students have been identified as having mild learning disabilities. Because the students in his classroom have diverse learning needs, Mr. Franklin looks for teaching approaches that will meet a range of needs.

Lesson Context

Mr. Franklin and his third-grade teaching team meet weekly to plan lessons, discuss student work and assessment results, and read articles to refine their practice. Lately, Mr. Franklin and his colleagues have noticed that when their students approach complex informational texts, many of them give up as soon as the language in the texts starts to become challenging. The teachers work together to plan a series of lessons focusing intensively on teaching their students how to read complex informational texts more closely. Using the resources in their staff professional library, they decide to teach their students a comprehension strategy called *collaborative summarizing*. They plan a series of lessons to teach the strategy incrementally over the next week and, if the strategy seems useful, they plan to incorporate it into their instruction two to three times per week, as recommended in the resources they found. They agree to check back with one another the following week to compare their observation notes on how their students respond to the instruction. Based on his collaborative planning with colleagues, the learning target and clusters of CA CCSS for ELA/Literacy and CA ELD Standards for Mr. Franklin's lesson the next day are the following:

Learning Target: The students will collaboratively summarize the main idea of sections of an informational text about plants, using precise words and details.

Primary CA CCSS for ELA/Literacy Addressed:
RI.3.2 – Determine the main idea of a text; recount the key details and explain how they support the main idea; SL.3.1 – Engage effectively in a range of collaborative discussions . . .

Primary CA ELD Standards Addressed (Expanding level shown):
ELD.PI.3.1 – Contribute to class, group, and partner discussions . . . ; ELD.PI.3.6 - Describe ideas, phenomena (e.g., how cows digest food), and text elements (e.g., main idea, characters, events) in greater detail . . . with moderate support; ELD.PI.10b – Paraphrase texts and recount experiences using complete sentences and key words from notes or graphic organizers; ELD.PII.3.7 – Condense clauses in a growing number of ways . . . to create precise and detailed sentences.

Vignette 4.3. Collaborative Summarizing with Informational Texts Integrated ELA and Science Instruction in Grade Three (cont.)

Lesson Excerpt

During ELA instruction the following day, Mr. Franklin introduces collaborative summarizing and explains to students how to use the approach. He tells them he knows that sometimes the informational texts they read can feel challenging, but that this strategy will give them a way of tackling the texts so that they understand them better.

Mr. Franklin: When I'm reading a tough informational text, every once in a while I have to stop and *summarize* what I just read to make sure I'm understanding the text. When you summarize, you put the reading into your own words. You say what the section is generally about without giving all the little details. Summarizing helps you figure out the main idea of what you just read. This is a really powerful comprehension strategy that you can use when you're reading on your own, and I'm not around to help you. Today, we're going to practice using this strategy. You like reading with a partner, right? Well, today, you're going to get to read a short part of a text on *plants* with a partner, and you're going to work together to practice summarizing, by collaboratively *summarizing* the text.

Mr. Franklin shows the students a chart with the steps of the strategy and explains them:

Collaborative Summarizing Process
Step 1: Find *who* or *what* is most important in the section.
Step 2: Find out what it is that the *who* or *what* are doing.
Step 3: Use some of the most important words in the text to summarize the section in 15 words or fewer. (Your summary can be more than one sentence.)

Using a document camera to project the text for the students, Mr. Franklin first models, by thinking aloud, how to apply the strategy with the first short section (two paragraphs) of a text on plants that the class has already read. As he reads all the paragraphs once, the students read chorally with him. Then, he goes back into the paragraphs and models how to do Step 1. He circles the words that tell *who* or *what* is most important in the paragraphs, talking through the process as he goes along so his students can hear what he is thinking. He then models Step 2. Once he has plenty of words circled, he models how to decide which words are the most important by thinking aloud about the meaning of the passage. Then, he puts the words together to create a concise summary of the passage. He writes and edits multiple versions of the short sentence, crossing out words here and adding other words there, continuing to think aloud, until he settles on a sentence he is satisfied with. Then, he rereads the paragraph to make sure his 15-word statement is an accurate summary of the passage.

After he models once, he repeats the process with the next passage, and this time, he invites students to tell him which words to circle. Once he has guided students through Steps 1 and 2 and feels confident that they understand the task, he asks them to work with partners to create a collaborative summary using the words they have circled. He walks around the room to observe students and gauge how they are taking up the strategy as they negotiate with one another to another to create their summaries. The passage that the students summarize in pairs follows.

Vignette 4.3. Collaborative Summarizing with Informational Texts Integrated ELA and Science Instruction in Grade Three (cont.)

What is Photosynthesis?

Since they stay in one place and can't move around to find food, plants don't eat the same way that animals do. Photosynthesis is how plants eat. They use this process to make their own food, and they can make their food anywhere as long as they have three things. The three things are carbon dioxide, water, and light. Carbon dioxide is a chemical that is in the air. It's normal that carbon dioxide is in the air. Every time you breathe in, you breathe in a bunch of chemicals from the air, including oxygen and carbon dioxide. Plants breathe, too, and they breathe in the carbon dioxide.

Plants also drink, and they use their roots to suck water up from the soil. They also need light to live. Leaves are made up of a bunch of tiny cells. Inside the cells are tiny little things called chloroplasts. Chloroplasts are what makes leaves green, and they are also what takes the carbon dioxide, the water, and the light, and turns them into sugar and oxygen. The sugar is then used by the plants for food. This whole process is called *photosynthesis*.

Melanie and Rafael are working together to summarize the text. They have circled many words, including *photosynthesis, eat, process*, *carbon dioxide, water, light, chemical, air, breathe, leaves, chloroplasts, sugar, oxygen, plants,* and *food*. Now they must work together to determine what is most important to include in their summary. Mr. Franklin listens in on their discussion.

Melanie: We could say, "Plants make their own food, and they use carbon dioxide and water and light . . ."

Rafael: And air, they need air, too. So, we could say, "Plants make their own food, and they need carbon dioxide, water, light, and then they make their food with it, and it's called photosynthesis." Wait, that's too many words.

Melanie: Yeah, and I think . . . I think the carbon dioxide . . . Isn't that a chemical that's *in* the air? So maybe we don't need to use the word *air*.

Rafael: (Rereading the text with Melanie). Yeah, you're right. Okay, so let's cross out *air*. What about *chloroplasts*? What are those again?

Melanie and Rafael reread the passage multiple times as they collaboratively construct their summary, making sure that the words they are using are absolutely essential. They discuss how to put the words together so that the summary conveys the core meanings of the passage. As they discuss and write, they choose necessary adjectives and prepositional phrases (e.g., *in the leaves*), and precise vocabulary, and they rearrange the order of the words to best convey their thinking.

Rafael: Okay, so we could say, "Plants make their own food, and they use carbon dioxide, water, and light to do it. The chloroplasts in the leaves turn all that into sugar, and it's food. It's photosynthesis."

Melanie: That's way too many words. Maybe we can combine some of the ideas. How about, "Plants make their own food with the chloroplasts in their leaves . . ."

Vignette 4.3. Collaborative Summarizing with Informational Texts Integrated ELA and Science Instruction in Grade Three (cont.)

Rafael: In their cells. Here, it says that the chloroplasts are in their cells.

Melanie: Yeah, in their cells. So we could say that, and then say that they use the chloroplasts to make the food, right? They use it to make sugar and oxygen, and the sugar turns into food.

Rafael: Yeah, but I think that's still going to be too many words. How about . . . (Looks at the second sentence in the text.) Here! Here it says "Photosynthesis is . . ." How about if we start with that?

Melanie: "Photosynthesis is when plants make their own food using carbon dioxide, water, and light." That's fourteen words!

Rafael: Do we need "chloroplasts?"

Melanie: I think this is what the passage is mostly about.

Rafael: Me, too.

Mr. Franklin checks the summary statements each set of partners has written and provides support to those who need it. Some students are so focused on the *game* part of the task that they forget to go back to the text to verify that their summaries accurately represent the most salient ideas in the passage, so he redirects them to do so. Students who finish are able to move to the next section and repeat the process. Once the allotted time for the task is up, Mr. Franklin asks each pair to share their summary with another pair and compare what they wrote. Then, he asks for volunteers to share their summary statements with the whole class. Mr. Franklin sees that some of his students are still not quite understanding the process, so as the rest of the class works independently (with their partners) on the next section, he invites these students to his teaching table to provide additional modeling and guided practice. In doing so, he is able to make sure that all students become completely comfortable with the strategy.

Teacher Reflection and Next Steps

Over the next several days the students practice using collaborative summarizing as they read sections of their science informational texts. The following week, Mr. Franklin will introduce another layer of the strategy, which involves students working in heterogeneous groups of four. In order to ensure equitable participation in the task, he will teach them to assume designated roles with specific responsibilities which will be posted in the room on a chart for easy reference. The students will take turns assuming different roles each time they engage in the task.

Collaborative Summarizing Responsibilities	
Facilitator:	Guides the group in the process. Makes sure everyone is participating.
Scribe:	Takes the official, most legible notes that anyone can use for reporting out (everyone else must take their own notes, too).
Timekeeper:	Keeps an eye on the time and moves the group along so they don't run out of time.
Encourager:	Gives specific praise to group members. Encourages members to assist one another.

Vignette 4.3. Collaborative Summarizing with Informational Texts Integrated ELA and Science Instruction in Grade Three (cont.)

The following week during collaborative planning time, Mr. Franklin debriefs with his teaching team. The teachers indicate how impressed they are with the students' ability to discuss the *content* of the passages and focus on the *language* they will use to summarize them. Mr. Franklin shares how a few of his students still do not quite understand the strategy, even after his modeling, guided practice, and small group teacher-supported instruction. The teachers decide that they will all model the task as a group for each of their classes. They think their students will enjoy watching their teachers pretend to be third graders, and they also feel that this type of *fish bowl* modeling will help reinforce the strategy for all students as well as provide additional scaffolding for those students who still find the strategy challenging.

Vignette 4.4. Analyzing Complex Sentences in Science Texts Designated ELD Instruction in Grade Three

Background

Mr. Franklin has noticed that some of his EL students at the Expanding level of English language proficiency find the complex informational texts the class is using in integrated ELA and science very challenging. (See vignette 4.3.) In particular, he has noticed that some of the domain-specific and general academic vocabulary and dense grammatical structures of these complex texts are unfamiliar. Mr. Franklin often paraphrases and explains the meaning as he reads complex informational texts aloud to students; however, he wants students to gain greater independence in understanding the language of the complex texts, because he knows that the language they will encounter as they move up through the grades will be increasingly challenging. Therefore, he would like students to develop strategies for comprehending the complex language they encounter in science informational texts that they can use when they are reading independently or with peers, and he also wants them to learn to use a greater variety of vocabulary and grammatical structures in their writing and speaking about science.

Lesson Context

The third-grade teaching team plans their upcoming designated ELD lessons together. They begin by analyzing the language in the texts they use for instruction. One text that students will be reading in small reading groups during ELA instruction is called *From Seed to Plant*, by Gail Gibbons. As the teachers analyze the text, they note several potentially new domain-specific words (e.g., *pod, pistile, ovule*), that they will teach during science. In addition, the text contains several long, complex sentences that they anticipate their EL students will find challenging. The team also notices that there is a pattern in many of the complex sentences; they contain subordinating conjunctions that create a relationship of time between two events (e.g., *Before* a seed can begin to grow, a grain of pollen from the stamen must land on the stigma.). The team discusses the challenge students may face if they miss the meaning these relationships between clauses create, and they plan several designated ELD lessons, adjusted to different English language proficiency levels, during which they can discuss this way of connecting ideas. The learning target and cluster of CA ELD Standards Mr. Franklin focuses on in the lesson are the following:

Learning Target: The students will describe ideas using complex sentences to show relationships of time.
Primary CA ELD Standards Addressed (Expanding level shown): *ELD.PI.3.1 – Contribute to class, group, and partner discussions . . . ; ELD.PI.3.6 – Describe ideas, phenomena (e.g., how cows digest food), and text elements (e.g., main idea, characters, events) in greater detail based on understanding of a variety of grade-level texts and viewing of multimedia with moderate support; ELD.PI.3.6 – Combine clauses in an increasing variety of ways (e.g., creating compound and complex sentences) to make connections between and join ideas . . .*

Lesson Excerpt

After the students have read *From Seed to Plant* once during ELA, Mr. Franklin sets the stage with his designated ELD group of students at the Expanding level of English language proficiency by clearly explaining the purpose of the series of lessons he will teach that week.

Vignette 4.4. Analyzing Complex Sentences in Science Texts Designated ELD Instruction in Grade Three (cont.)

Mr. Franklin: This week, we are going to be looking closely at some of the language in the book we are reading, *From Seed to Plant*. The way that we discuss the language in the book is going to help you understand what the author is trying to tell us. Discussing the language in books also helps you when you are reading and writing on your own.

Mr. Franklin distributes copies of the book to the children and reviews the general meanings in the text, which they discussed earlier that day. He asks them to work in pairs—not to read the text but instead to look at the illustrations and take turns describing what is happening in them, using what they remember from the morning's read aloud and discussion. He tells them to encourage their partners to provide many details in their descriptions. As the students engage in the task, he listens to them and notes in his observation journal whether they are using domain-specific vocabulary and complex sentences to express time relationships (e.g., *When the fruit is ripe, it starts to break open.*). He notes that a few students are using compound sentences (e.g., *The fruit gets ripe, and it breaks open.*), and some are using complex sentences. However, most of the children are using only simple sentences (e.g., *The fruit gets ripe. The fruit breaks.*).

After several minutes of observing, Mr. Franklin stops the children and tells them that they are going to be using the text to put together two events in sentences in a way that shows when the events happened. In order to describe what he means by this, he orally models using complex sentences with time-related subordinating conjunctions using conversational language:

- *Before* I go to bed at night, I brush my teeth.
- *When* the bell rings, you all stop playing.
- You listen, *while* I read stories to you.
- *After* you come in from recess, I read you a story.

He explains that when they closely observe the language used in books and in their speaking, they can find out how the language works to make different meanings, such as showing when things happen. Using a document camera, he displays the same complex sentences he just provided orally. He explains that each sentence has two events. Sometimes the events are happening at the same time, and sometimes they are happening *in order*—one event first and the other second. He highlights the subordinate clauses and circles the subordinating conjunctions (*before*, *when*, *while, after*) while explaining that the words that are circled let us know when the two events in the sentence are happening in relation to one another.

Vignette 4.4. Analyzing Complex Sentences in Science Texts Designated ELD Instruction in Grade Three (cont.)

Showing When Events Happen	
Sentence	**When the events are happening**
Before I go to bed at night, I brush my teeth.	happens second, happens first
I brush my teeth *before* I go to bed at night.	happens first, happens second
When the bell rings, you all stop playing.	both happen at the same time
You listen *while* I read stories to you.	both happen at the same time
After you come in from recess, I read you a story.	happens first, happens second
I read you a story *after* you come in from recess.	happens second, happens first

Mr. Franklin reads the sentences with the children and discusses what is written on the chart.

Mr. Franklin: What would happen if the words *before* or *after* or *when* were taken away? What if I said, "I go to bed. I brush my teeth."

Mai: We can't know when it happens.

David: It doesn't make sense!

Mr. Franklin: Right, sometimes it doesn't make sense. I can tell you about when things happen if I use the words *after, before, while*, and other words that show time. We're going to play a game to practice using those word to tell when things happen, and then we're going to see how those words are used in the book we're reading, *From Seed to Plant.*

Mr. Franklin reads the sentence frames he has written on the white board, as the children read chorally with him. He asks them to take turns making up two events and to use the sentence frames to show when the events happened. The sentence frames follow:

- Before I come to school, I _____.
- After I get home from school, I _____.
- While I'm at school, I _____.

After the children have practiced putting together two familiar ideas using complex sentences and familiar language, he shows them how these same ways of telling when something is happening appears in *From Seed to Plant*, using his document camera to project several sentences from the book for everyone to see. After each sentence, he thinks aloud, rephrasing what the sentences mean (e.g., I think this means . . . The word *before* tells me that . . .). He highlights the subordinate clauses and circles the subordinating conjunctions in each sentence.

Vignette 4.4. Analyzing Complex Sentences in Science Texts Designated ELD Instruction in Grade Three (cont.)

Showing When Events Happen	
Sentence	**When the events are happening**
Before a seed can begin to grow, a grain of pollen from the stamen must land on the stigma . . .	happens second, happens first
While they visit the flowers for their sweet juice, called nectar, pollen rubs onto their bodies.	both happen at the same time
When the fruit or pod ripens, it breaks open.	happens first, happens second

Mr. Franklin discusses the meanings of the sentences with the students and guides them to identify the two events and describe how the words *before, while,* and *when* create a relationship between the two events in time. Next, he asks the children to go back through *From Seed to Plant* again to look closely at the illustrations. Then he asks them to use the words *when*, *before*, and *while* to explain what is happening to their partner using the pictures to help them. Afterwards, they will check what the text says and compare their sentences with the author's.

At the end of the lesson, Mr. Franklin asks students to listen for when and how their friends or teachers link ideas using these special connecting words. Mr. Franklin also encourages his students to try using these more complex types of sentences in their own speaking and writing.

Teacher Reflection and Next Steps

When the third-grade teachers meet the following week, they share their experiences teaching the designated ELD lessons they had planned together to the different groups of EL students. Mr. Franklin's colleague, Mrs. Garcia, taught the differentiated lessons to the third-grade EL students at the Emerging level of English language proficiency. This group of children has been in the country for a year or less and needs substantial scaffolding to access complex text.

Mrs. Garcia explains how she modified the designated ELD lessons by providing time at the beginning of the week for the children to discuss and describe the illustrations of the text as well as other pictures, using simple sentences, to help them become familiar with the new vocabulary and syntax. This preparation appeared to support these children when they began to tackle complex sentences. Next, she and the children chorally chanted poems containing the subordinating conjunctions *before, while,* and *after* (e.g., Before I go to bed, I brush my teeth. Before I go to school, I eat my breakfast.). The group then created a big book using compound and complex sentences to describe the illustrations in *From Seed to Plant*.

Vignette 4.4. Analyzing Complex Sentences in Science Texts Designated ELD Instruction in Grade Three (cont.)

With this differentiated instruction during designated ELD time, all of the EL students in the third-grade classes were able to gain deeper understandings of how writers and speakers can choose to use language in particular ways to express relationships between events in terms of time. The teachers agree to continue developing designated ELD lessons that build their students' understanding of how to create different kinds of relationships between ideas. They also concur that using the books and supplemental texts students are reading in ELA, science, social studies, and other content areas is a useful way of helping ELS understand both the language used in those text and the content they convey.

Vignette 5.1. Writing Biographies
Integrated ELA and Social Studies Instruction in Grade Four

Background

Mrs. Patel's 32 fourth graders write many different text types during the course of the school year. Currently, they are in the middle of a unit on writing biographies based on research. At Mrs. Patel's school, the TK–5 teachers have developed a multi-grade scope and sequence for *literary nonfiction writing.* Instruction focuses on simple recounts of personal experiences in TK–grade 1, autobiographies in grades 2–3, and biographies that involve research in grades 4–5. Fourth graders write biographies about famous Californians who made a positive contribution to society through their efforts to expand Americans' civil rights (e.g., Dolores Huerta, Fred Korematsu, Edmund G. "Pat" Brown, Mary Ellen Pleasant, Cesar Chavez, Ed Roberts, Jackie Robinson, Harvey Milk).

The students at the school come from diverse cultural and linguistic backgrounds. In Mrs. Patel's class, children speak 12 different primary languages. Seven of Mrs. Patel's students are ELs at the late Expanding or early Bridging level of English language proficiency, and five students are former ELs in their first year of reclassification. Students with disabilities are included in all instruction. The fourth-grade teachers intentionally select biographies that reflect the diversity of the students. Among the teachers' main purposes for conducting this biography unit are to engage students in discussions about life in different historical contexts and explore how specific historical figures dealt with life's challenges in courageous ways that not only benefited society but were also personally rewarding.

Lesson Context

At this point in the biography unit, Mrs. Patel's students are researching a California historical figure of their choice. Ultimately, students will individually write a biography on the person they select and provide an oral presentation based on what they wrote. First, students conduct collaborative research in small groups with others who have selected the same historical figure. They read books or articles and view multimedia about the person; discuss the findings they have recorded in their notes; and work together to draft, edit, and revise their biographies and oral presentations. Texts are provided in both English and in the primary languages of students (when available) because Mrs. Patel knows that the knowledge students gain from reading in their primary language can be transferred to English and that their biliteracy is strengthened when they are encouraged to read in both languages.

Before she began the unit, Mrs. Patel asked her students to read a short biography and then write a biography of the person they read about. This *cold write* gave her a sense of her students' understanding of the genre and helped focus her instruction on areas that students need to develop. She discovered that while the students had some good writing skills, they were unclear about how to structure a biography and what type of information to include or language to use. Most students' writing took the form of a short paragraph that included mostly what they liked about the person, along with a few loosely strung together events and facts.

Over the course of the unit, Mrs. Patel reads aloud several biographies on different historical figures in order to provide models of well written biographies. She also provides a bridge between learning about historical figures and writing biographies independently by explicitly teaching students how to write biographies; she highlights the purpose of biographies (to tell about the important events and accomplishments in a person's life and reveal why the

Vignette 5.1. Writing Biographies
Integrated ELA and Social Studies Instruction in Grade Four (cont.)

person is significant) and focuses on how writers make choices about vocabulary, grammatical structures, and text organization to express their ideas effectively.

Mrs. Patel deconstructs biographies with her students so that they can examine the text structure and organization; they discuss how writers use grammatical structures to create relationships between or expand ideas, and attend to vocabulary that precisely conveys information about the person and events. The mentor texts she reads aloud to the class or that students read in small groups provide models of writing that students may want to incorporate into their own biographies. This week, Mrs. Patel is reading aloud and guiding her students to read several short biographies on Dr. Martin Luther King, Jr. Yesterday, the class analyzed, or deconstructed, one of these biographies. As they did, Mrs. Patel modeled how to record notes from the biography using a structured template, which follows.

Biography Deconstruction Template Text Title:	
Stages and Important Information	*Vocabulary*
Orientation (tells where and when the person lived) • Where and when the person was born • What things were like before the person's accomplishments	
Sequence of Events (tells what happened in the person's life in order) • Early life, growing up (family, school, hobbies, accomplishments) • Later life (family, jobs, accomplishments) • How they died or where they are now	
Evaluation (tells why this person was significant) • Why people remember the person • The impact this person had on California and the U.S. • How they improved the rights and privileges of Americans through their actions • How their actions exemplified the principles outlined in the American Declaration of Independence • Meaningful quote by this person that shows his or her character	

Lesson Excerpts

In today's lesson, Mrs. Patel is guiding her students to jointly construct a short biography on Dr. King using three sources of information: the notes the class generated in the Biography Deconstruction Template; their knowledge from reading or listening to texts and viewing short videos; and any other relevant background knowledge they bring to the task from previous experiences inside and outside of school. The learning target and clusters of CA CCSS for ELA/Literacy and CA ELD Standards in focus for today's lesson are the following:

Vignette 5.1. Writing Biographies
Integrated ELA and Social Studies Instruction in Grade Four (cont.)

Learning Target: The students will collaboratively write a short biography to describe the life accomplishments and significance of Dr. Martin Luther King Jr., using precise vocabulary, powerful sentences, and appropriate text organization.

CCSS for ELA/Literacy: *W.4.3 – Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences; W.4.4 – Produce clear and coherent writing (including multiple-paragraph texts) in which the development and organization are appropriate to task, purpose, and audience; W.4.7 – Conduct short research projects that build knowledge through investigation of different aspects of a topic; RI.4.3 – Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text.*

CA ELD Standards (Expanding): *ELD.PI.4.1 – Contribute to class, group, and partner discussions, including sustained dialogue, by following turn-taking rules, asking relevant questions, affirming others, and adding relevant information; ELD.PI.4.10a – Write longer literary and informational texts (e.g., an explanatory text on how flashlights work) collaboratively (e.g., joint construction of texts with an adult or with peers) . . . ; ELD.PI.4.12a – Use a growing number of general academic and domain-specific words, synonyms, and antonyms to create precision and shades of meaning while speaking and writing; ELD.PII.6 – Combine clauses in an increasing variety of ways (e.g., creating complex sentences using familiar subordinate conjunctions) to make connections between and join ideas in sentences . . .*

The joint, or collaborative, construction of the short biography on Dr. King provides Mrs. Patel's students with a scaffolded opportunity to apply the content knowledge and language skills they are learning in the biography unit. She uses the document camera so that all students can see the text as it develops. Mrs. Patel's guides her students' thinking and stretches their language use as she encourages them to tell her what to write or revise in the short biography. At strategic points throughout the discussion, she poses the following types of questions:

- What information should we include in the first stage to *orient* the reader?
- Which events should we write first? What goes next?
- How can we show when this event happened?
- Is there a way we can expand this idea to add more detail about when or where or how the event happened?
- Is there a way we can combine these two ideas to show that one event caused the other event to happen?
- Would that information go in the orientation, events, or evaluation stage?
- What word did we learn yesterday that would make this idea more precise?
- How can we write that he was a hero without using the word *hero*? What words could we use to show what we think of Dr. King?

Vignette 5.1. Writing Biographies
Integrated ELA and Social Studies Instruction in Grade Four (cont.)

After writing the orientation stage together, when the class commences the *sequence of events* stage, Mrs. Patel asks the students to refer to their notes and briefly share with a partner some of Dr. King's accomplishments, and then discuss just one of them in depth, including why they think it is an accomplishment. She asks them to be ready to share their opinions with the rest of the class using an open sentence frame that contains the word *accomplishment* (i.e., One of Dr. King's accomplishments was _____.). She asks students to elaborate on their opinions by stating their reasons and encourages them to continue asking and answering questions until she asks them to stop. After students have shared with their partners, Emily volunteers to share what she and her partner, Awat, discussed.

Emily: One of Dr. King's accomplishments was that he went to jail in (looks at the notes template) Birmingham, Alabama.

Mrs. Patel: Okay, can you say more about why you and your partner think that was one of Dr. King's accomplishments?

Emily: Well, he went to jail, but he didn't hurt anyone. He was nonviolent.

Awat: And, he was nonviolent on purpose. He wanted people to pay attention to what was happening, to the racism that was happening there, but he didn't want to use violence to show them that. He wanted peace. But he still wanted things to change.

Mrs. Patel: So, how can we put these great ideas together in writing? Let's start with what you said, "One of Dr. King's accomplishments was ___." (Writes this, displaying it with the document camera.)

Awat: I think we can say, "One of Dr. King's accomplishments was that he was nonviolent and he went to jail to show people the racism needed to change."

Matthew: We could say, "One of Dr. King's accomplishments was that he was nonviolent, and he wanted people to see that racism in Birmingham, so he went to jail. He was protesting, so they arrested him."

Mrs. Patel: I like all of these ideas, and you're using so many important words to add precision and connect the ideas. I think we're getting close. There's a word that I think might fit really well here, and it's a word we wrote on our chart yesterday. It's the word "force." It sounds like you're saying that Dr. King wanted to *force* people to do something, or at least to think something.

Emily: Oh, I know! He wanted to force people to pay attention to the racism that was happening in Birmingham. But he wanted to do it by protesting nonviolently so that the changes that had to happen could be peaceful.

Mrs. Patel continues to stretch her students' thinking and language in this way, and after a lively discussion with much supportive prompting from Mrs. Patel to collaboratively revise and refine the text, the class generates the following paragraph:

Vignette 5.1. Writing Biographies
Integrated ELA and Social Studies Instruction in Grade Four (cont.)

One of Dr. King's accomplishments was going to jail in Birmingham to force people to pay attention to the racial discrimination that was happening there. He was arrested for protesting, and he protested nonviolently on purpose so that changes could happen peacefully. When he was in jail, he wrote a letter telling people they should break laws that are unjust, but he said they should do it peacefully. People saw that he was using his words and not violence, so they decided to help him in the struggle for civil rights.

Mrs. Patel guides her students to complete the short biography together as a class in this way—using relevant and precise vocabulary and and effective sentence structures—until they have a jointly constructed text they are satisfied with. She posts the biography in the classroom, so it can serve as a model, or mentor text, for students to refer to as they write their own biographies. By facilitating the collaborative writing of a short biography in this way, Mrs. Patel has strategically supported her students to develop deeper understandings of important historical events. She has also guided them to use their growing knowledge of language to convey their understandings in ways they may not yet have been able to do on their own.

When they write their biographies, Mrs. Patel notices that some of her students, particularly her ELs at the Expanding level of English language proficiency, make some grammatical and vocabulary approximations (e.g., use some general academic vocabulary incorrectly or write sentence fragments). She intentionally does not correct every misunderstanding. Instead, she is selective about her feedback because she knows that these approximations are a normal part of second language development as her EL students stretch themselves with new writing tasks and interact with ever more complex topics using increasingly complex language. She recognizes that focusing too much on their grammatical or vocabulary approximations will divert their attention from the important writing skills she is teaching them, so she is strategic and focuses primarily on the areas of writing she has emphasized in instruction (e.g., purpose, audience, content ideas, text organization and structure, select grammatical structures, and vocabulary). In addition, while students edit and revise their drafts in their research groups, Mrs. Patel guides them to refine their own writing and help one another by using a checklist that prompts them to attend to these same areas, as well as conventions (e.g., punctuation, spelling).

Teacher Reflection and Next Steps

At the end of the unit, when Mrs. Patel and her fourth-grade colleagues meet to examine their students' biographies, they use a language analysis framework that focuses on biography writing and is based on the CA CCSS for ELA/Literacy and the CA ELD Standards. (See chapter 8 of this *ELA/ELD Framework* for an example.) They also compare the pre-writing cold write students did with their final writing projects. They find that, over the course of the unit, most students grew in their ability to organize their texts in stages (orientation, sequence of events, evaluation) and to use many of the language features taught during the unit (general academic vocabulary, complex sentences, and words and phrases that create cohesion throughout the text). Using some of these new language resources, students are able to successfully convey their understandings about the person they researched. This language analysis framework has helped the fourth-grade team identify critical areas that individual students still need to develop and consider additional ways to refine their teaching in the future.

Vignette 5.1. Writing Biographies
Integrated ELA and Social Studies Instruction in Grade Four (cont.)

For the other culminating project, oral presentations based on the written reports, the students dress as the historical figure they researched, use relevant props and media, and invite their parents and families to view the presentation. This way, all of the students learn a little more about various historical figures the class researched, and they have many exciting ideas about history to discuss with their families.

Vignette 5.2. General Academic Vocabulary in Biographies Designated ELD Instruction in Grade Four

Background

Mrs. Patel's class is in the middle of a biography unit in which students conduct research on an important historical figure and learn how to write biographies. (See vignette 5.1.) For designated ELD, Mrs. Patel and her colleagues regroup their students so they can focus on the academic English language learning needs of their students in a targeted way. Mrs. Patel works with a group of ELs who have been in the school since kindergarten or first grade and are at the late Expanding and early Bridging levels of English language proficiency. Another teacher works with a group of ELs who came to the school at the beginning of third grade and are at the Emerging level of English language proficiency. A third teacher works with native English speaking students as well as those who have recently been reclassified from EL status. Mrs. Patel and her colleagues plan their designated ELD lessons together at the same time as they plan their integrated ELA/social studies biography unit. Some designated ELD time is devoted to supporting students to develop deep understandings of and proficiency using general academic and domain-specific vocabulary from the texts and tasks in ELA and other content areas. The vocabulary lessons they plan are differentiated to meet the particular language learning needs of the students. For example, some groups may receive particularly intensive instruction for a set of words.

Lesson Context

Throughout the biography unit, Mrs. Patel and her colleagues ensure that their ELs are engaged in all aspects of the biographical research project and that they are provided with the support they need for full participation. For example, when reading texts aloud or when highlighting and recording important information from the texts in a *biography deconstruction template*, Mrs. Patel explains the meanings of words and provides cognates when appropriate. She also explicitly teaches all students some of the words that they are encountering during integrated ELA/social studies instruction. However, Mrs. Patel and her colleagues recognize that their EL students need more intensive support in understanding and using some of these new terms, particularly general academic vocabulary. The teaching team uses a five-day cycle for teaching vocabulary in designated ELD, which is modified based in the different groups' evolving needs. This week, the words that the students in Mrs. Patel's class are learning are *unjust, respond, protest, justice,* and *discrimination.* The five-day cycle Mrs. Patel uses is summarized in the following chart.

Vignette 5.2. General Academic Vocabulary in Biographies Designated ELD Instruction in Grade Four (cont.)

Five-day vocabulary teaching cycle					
	Day One	**Day Two**	**Day Three**	**Day Four**	**Day Five**
Purpose	Linking background knowledge to new learning and building independent word learning skills	Explicit word learning and applying knowledge of the words through collaborative conversation	Explicit word learning and applying knowledge of the words through collaborative conversation	Explicitly learning about morphology and applying knowledge of all the words in an oral debate	Applying knowledge about the words *and how they work together* in writing
Lesson Sequence	Students • Rate their knowledge of the 5 words • Engage in readers theater or other oral language task containing the target words • Use morpho-logical and context clues to generate definitions in their own words	Students • Learn 2–3 words explicitly via a predictable routine • Discuss a worthy question with a partner using the new words	Students • Learn 2–3 words explicitly via a predictable routine • Discuss a worthy question with a partner using the new words	Students • Discuss their opinions in small groups, using the target words where relevant • Discuss useful morphological knowledge related to the words	Students • Write a short opinion piece using the target words • Review initial ratings and refine definitions

Lesson Excerpts

In today's lesson, Mrs. Patel's designated ELD class will learn two words explicitly—*unjust* and *respond*—and then discuss a worthy question using the words meaningfully in conversation. The learning target and cluster of CA ELD Standards in focus for today's lesson are the following:

Vignette 5.2. General Academic Vocabulary in Biographies Designated ELD Instruction in Grade Four (cont.)

Learning Target: The students will use the words *unjust* and *respond* meaningfully in a collaborative conversation and in a written opinion.

CA ELD Standards (Bridging): *ELD.PI.12a – Use a wide variety of general academic and domain-specific words, synonyms, antonyms, and figurative language to create precision and shades of meaning while speaking and writing; ELD.PI.6b – Use knowledge of morphology (e.g., affixes, roots, and base words) and linguistic context to determine the meaning of unknown and multiple-meaning words on familiar and new topics; ELD.PI.4.1 – Contribute to class, group, and partner discussions, including sustained dialogue, by following turn-taking rules, asking relevant questions, affirming others, adding relevant information, building on responses, and providing useful feedback.*

For teaching general academic vocabulary explicitly, Mrs. Patel uses a predictable routine that students are familiar with. The steps are as follows:

1. ***Introduce***: Tell the students the word they will learn, and briefly refer to where in the text they saw or heard it. Highlight morphology (e.g., the suffix *-tion* tells me the word is a noun). Identify any cognates in the students' primary language (e.g., *justice* in English is *justicia* in Spanish).
2. ***Explain the Meaning***: Explain what the word means in student-friendly terms, using one or two complete sentences.
3. ***Contextualize***: Explain, with appropriate elaboration, what the word means in the context of the text. Use photos or other visuals to enhance the explanation.
4. ***Give Real-life Examples***: Provide a few examples of how the word can be used in other grade-appropriate ways, relevant to the students, using photos or other visuals to enhance the explanation.
5. ***Guide Meaningful Use***: Invite students to use the word meaningfully in one or two think-pair-shares, with appropriate scaffolding (e.g., using a picture for a prompt or an open sentence frame).
6. ***Ask and Answer***: Ask short-answer questions to check for understanding. (This is not a test; the students are still learning the word.)
7. ***Extend***: Find ways to use the word often from now on, and encourage the students to use the word as much as they can. Encourage students to teach the word to their parents and other family members.

After Mrs. Patel uses this sequence to teach the two words explicitly, she provides the students with an opportunity to use the words meaningfully in an extended conversation that is directly related to what they are learning about in the biography unit. She has written a question and a couple of open sentence frames and displayed them using the document camera. She then asks the students to discuss the question in partners, drawing on examples from the biography unit (e.g., how historical figures responded to *unjust* situations) to enhance their conversations.

Vignette 5.2. General Academic Vocabulary in Biographies Designated ELD Instruction in Grade Four (cont.)

Mrs. Patel: Describe how you could *respond* if something *unjust* happened on the playground at school. Be sure to give an example and to be specific. Use these sentence frames to help you get started: "If something *unjust* happened at school, I could *respond* by ____. For example, ___."

Mrs. Patel reminds them that the verb after *by* has to end in the suffix *–ing*" She points to a chart on the wall, which her students have learned to refer to as they engage in collaborative conversations, and she reminds them that they should use this type of language in their discussions.

How to be a Good Conversationalist	
To ask for clarification: Can you say more about ___? What do you mean by ____?	*To affirm or agree:* That's a really good point. I like what you said about ___ because ___.
To build or add on: I'd like to add on to what you said. Also, ___.	*To disagree respectfully:* I'm not sure I agree with ____ because ____. I can see your point. However, _____.

As the students engage in their conversations, Mrs. Patel listens so that she can provide just-in-time scaffolding and so that she will know what types of language are presenting challenges to her students. Carlos and Alejandra are discussing their ideas.

Carlos: If something *unjust* happened at school, I could respond by telling them to stop it. For example, if someone was being mean or saying something bad to someone, I could respond by telling them that's not fair.

Alejandro: I'd like to add on to what you said. If something *unjust* happened at school, like if someone was being a bully, I could respond by telling them they have to be fair. I could use my words.

Carlos: Yeah, you could use nonviolence instead, like Martin Luther King, Jr.

Mrs. Patel: That's great that you also used the word "nonviolence," Carlos. You could also say, "We could respond by using nonviolence."

Carlos: Oh yeah, we could do that. We could respond by using nonviolence.

At the end of the lesson, Mrs. Patel asks the students to write down one sentence they shared with their partner or that their partner shared with them using the words *unjust* and *respond*.

Vignette 5.2. General Academic Vocabulary in Biographies Designated ELD Instruction in Grade Four (cont.)

Teacher Reflection and Next Steps

At the end of the week, students write short opinion pieces in response to a scenario. Mrs. Patel requires them to use all five of the words they learned that week. When she reviews their opinion pieces, she sees that some students still do not quite understand the nuances of some of the words. She makes a note to observe these students carefully as they continue to use the words throughout the coming weeks. She also plans to work individually with those who could benefit from additional attention even though they may have had multiple opportunities to use the words in context because she realizes that students take up new information in different ways over time.

Mrs. Patel's colleague, Mr. Green, who works with the small group of newcomer ELs at the Emerging level of English language proficiency, describes the vocabulary instruction he provided that week. He also taught the five words explicitly. However, the level of scaffolding he provided was substantial. Because his colleagues indicated that this group of students was having difficulty sequencing their ideas in the biography unit activities, he also provided many opportunities for the students to use oral language so that they would feel more confident using this type of language when writing their biographies. For example, he asked students to orally recount personal experiences (e.g., what they did over the weekend in time order), and he worked with them to use language useful for recounting (e.g., past tense verbs, sequence terms). He also encouraged them to expand and connect their ideas in a variety of ways (e.g., by creating compound sentences or adding prepositional phrases to indicate when things happened). He used experiences that were more familiar to the students so that they could initially focus on stretching their language without worrying about the new content. Next, he drew connections to the content of the biography unit and supported students to use these language resources when recounting events in the lives of the people they were learning about. He also focused on two of the general academic vocabulary words the other teachers taught, but he spent more time on the words so that the students would feel confident using them.

Vignette 5.3. Science Informational Research Reports on Ecosystems Integrated ELA and Science Instruction in Grade Five

Background

Mr. Rodriguez's fifth-grade class contains a range of students, including 12 ELs at the Bridging level of English language proficiency and several students who are former ELs in their first and second years of reclassification. The class is in the middle of an integrated ELA and science unit on ecosystems. Mr. Rodriguez began the unit by building students' content knowledge of one local ecosystem (freshwater). He modeled the process of researching the ecosystem to foster conceptual scientific knowledge about ecosystems and develop his students' understandings of how science texts are written. Mr. Rodriguez is preparing his students to conduct their own research on an ecosystem of their choice, write an informational science report, and create a multimedia presentation about the ecosystem they research. Students work in groups to complete their written research reports and companion multimedia assignments. Mr. Rodriguez and his colleagues collaboratively designed this unit to incorporate specific instructional practices practices that they have found to be particularly helpful for ELs and for students with special needs. The teachers want to make sure that all of their students enter middle school ready to interact meaningfully with complex texts and tasks across the disciplines.

Lesson Context

To develop his students' understandings of ecosystems, Mr. Rodriquez reads multiple complex informational texts about freshwater ecosystems aloud to the class, and the students also read texts on the topic together during whole and small group reading instruction. He explicitly teaches some of the general academic vocabulary words during ELA time and domain-specific words during science instruction. Mr. Rodriquez pays particular attention to developing his students' awareness of cognates and he has posted a cognate word wall in the class alongside the vocabulary wall containing general academic vocabulary (e.g., *despite*, *regulate*, *restore*) and domain-specific vocabulary (e.g., *species*, *predator*, *decomposer*) from the ecosystem unit.

During science instruction, students view multimedia and discuss the new concepts they are learning in structured extended discussions with guiding questions. They also engage in science practices, such as observing a freshwater ecosystem, assessing the water quality in the ecosystem, and identifying the connections between poor water quality and the overall health of the ecosystem. The class takes a walking fieldtrip to a local pond to collect data, which they document in their science journals and then discuss and record on a chart when they return to the classroom. They also design and conduct an experiment to investigate which everyday materials can most effectively filter dirty water.

Now that his students have developed some knowledge about freshwater ecosystems, as well as some critical domain-specific vocabulary (e.g., *ecosystem*, *species*, *habitat*, *watershed*) related to the topic, Mr. Rodriguez plans to use some .mentor texts to model the kind of writing he wants students to emulate when they write their group research reports. He also uses these mentor texts as a way to demonstrate how to read complex informational texts more closely. The learning target and cluster of CA CCSS for ELA/Literacy and CA ELD Standards in focus for today's lesson are the following:

Vignette 5.3. Science Informational Research Reports on Ecosystems Integrated ELA and Science Instruction in Grade Five (cont.)

Learning Target: The students will collaboratively reconstruct a complex text about ecosystems. They will apply their content knowledge and knowledge of the language of the text type.

CA CCSS for ELA/Literacy: *W.5.2 – Write informative/explanatory texts to examine a topic and convey ideas and information clearly . . . ; W.5.4 – Produce clear and coherent writing (including multiple paragraph texts) in which the development and organization are appropriate to task, purpose, and audience; W.5.7 – Conduct short research projects that use several sources to build knowledge through investigation of different aspects of a topic; L.5.3 – Use knowledge of language and its conventions when writing, speaking, reading, or listening; L.5.3a – Expand, combine, and reduce sentences for meaning, reader/listener interest, and style . . . L.5.6 – Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases . . .*

CA ELD Standards (Bridging): *ELD.PI.5.1 – Contribute to class, group, and partner discussions . . . ; ELD.PI.5.4 – Adjust language choices according to purpose, task (e.g., facilitating a science experiment), and audience with light support; ELD.PI.5.10a – Write longer and more detailed literary and informational texts (e.g., an explanation of how camels survive without water for a long time) collaboratively (e.g., joint construction of texts with an adult or with peers) and independently using appropriate text organization and growing understanding of register; ELD.PII.5.4 – Expand noun phrases in an increasing variety of ways . . . ; ELD.PII.5.5 – Expand and enrich sentences with adverbials; ELD.PII.5.6 – Combine clauses in a wide variety of ways; ELD.PII.5.7 – Condense clauses in a variety of ways . . .*

Lesson Excerpts

In today's lesson, Mr. Rodriguez engages his students in a text reconstruction (also known as dictogloss) lesson. The goal, he explains to the class, is for them to learn how to write research reports. The purpose of this text type is to report on information from a variety of sources about a single topic. He reminds his students that they have read—and he has read aloud to them—many texts about ecosystems. He also recalls that they have been learning and using language to discuss ecosystems as they have engaged in various science tasks related to ecosystems. He tells them that the purpose of the lesson is to apply their knowledge of ecosystems and their knowledge of the language used to describe and analyze ecosystems. The steps of today's lesson are written in Mr. Rodriguez's planning notebook as follows.

Vignette 5.3. Science Informational Research Reports on Ecosystems Integrated ELA and Science Instruction in Grade Five (cont.)

Text Reconstruction Procedure

1. *Read once:* Teacher reads a short section of the text (no more than 60 seconds) aloud while students **just listen.**
2. *Read twice:* Teacher reads the text a second time while students **listen and take notes** (bullet points with no more than a few words—make sure they know how).
3. *Reconstruct:* Students work with a partner to collaboratively **reconstruct the text** using their notes (lots of discussion should happen here). (If there is time, have the partners work with another set of partners to further refine their reconstructions.)
4. *Check and compare:* Teacher shows the original text to students and invites students to discuss differences or similarities between the original and their texts.
5. *Deconstruct:* Teacher highlights for students a few key language features in the text. (Later, show them how to deconstruct, or unpack, the text even further to reveal more of the **language features and patterns**.)

Mr. Rodriguez explains that when students reconstruct, or rewrite, the short text with their partner, he wants them to try to get as close as they can to recreating the text he read to them.

Mr. Rodriguez: You're not trying to copy me exactly, but the text you reconstruct has to make sense and use the language of information reports on ecosystems. This is one way we're practicing how to write information reports before you write your own.

A portion of the text Mr. Rodriguez reads follows.

> Freshwater ecosystems are essential for human survival, providing the majority of people's drinking water. The ecosystems are home to more than 40 percent of the world's fish species. Despite their value and importance, many lakes, rivers, and wetlands around the world are being severely damaged by human activities and are declining at a much faster rate than terrestrial ecosystems. More than 20 percent of the 10,000 known freshwater fish species have become extinct or imperiled in recent decades. Watersheds, which catch precipitation and channel it to streams and lakes, are highly vulnerable to pollution. Programs to protect freshwater habitats include planning, stewardship, education, and regulation. (National Geographic Society n.d.)

Mr. Rodriguez reads the text twice. The first time his students just listen; the second time they take notes. Before today's lesson, he taught his students how to take brief notes, recording key words or phrases as they were reading a text or viewing a video. Today, they are using their notetaking skills in a new way while Mr. Rodriquez reads aloud. Afterwards, they work in pairs to reconstruct the text. Mr. Rodriguez circulates around the room so he can listen to their conversations and provide support where needed. He stops at a table where Sarah and Ahmad are busy reconstructing their text.

Ahmad: I have *human survival*, *water*, and *40 percent of fish*. I think he said that the freshwater ecosystems, we have to have them for to survive.

Vignette 5.3. Science Informational Research Reports on Ecosystems Integrated ELA and Science Instruction in Grade Five (cont.)

Sarah: Yeah, I think that's right, and it makes sense because we learned about that. But I think there was something more about water. I have *drinking water*, so I think he said that the freshwater ecosystem give us most of our drinking water, so maybe that's why we have to have them to survive.

Ahmad: What should we write? How about, "We have to have the freshwater ecosystem for to survive because they give us most of our drinking water?"

Sarah: (Nodding.)

Mr. Rodriguez: Can we take a look at your notes again, Ahmad? Before you said you wrote, *human survival*, and I'm wondering if the two of you can figure out how to use that in your reconstruction.

Ahmad: (Thinking for a moment.) Can we write, "We have to have the freshwater ecosystem for human survival because they give us most of our drinking water?"

Mr. Rodriguez: What do you think, Sarah?

Sarah: Yeah, that sounds right. I think that sounds like what you said, and it sounds more like a science book.

Mr. Rodriguez: Yes, it does sound more like a science book. But why is *human survival* important here?

Ahmad: (Thinking.) Because we have to have the fresh drinking water so we can survive, so if we say *human survival*, that means the same thing.

Sarah: And when we say "human," that means all the people in the world, not just us.

Mr. Rodriguez continues to circulate around the room, providing just-in-time scaffolding to students to stretch their thinking and language. Mostly, he asks them to refer to their notes for the words to use and also to make sure the text they reconstruct makes sense based on what they have learned about freshwater ecosystems. He prompts them to use the words and phrases they have in their notes and to use their knowledge of connecting/condensing and expanding/enriching their ideas. When time is up, Mr. Rodriguez asks if any volunteers would like to share their reconstruction with the class. Ahmad and Sarah share their reconstruction, and Mr. Rodriguez recognizes them for using critical terms, such as *human survival* and *freshwater fish species*, as well as some of the math terms (such as, *40 percent* of fish species in the world).

After students have shared their reconstructions, Mr. Rodriguez shows the class the original text and asks them to talk briefly with their partners about similarities and differences. He explains some of the domain-specific and general academic vocabulary and phrasing his students found particularly challenging to reconstruct (e.g., *highly vulnerable to pollution*, *despite their value and importance*).

Vignette 5.3. Science Informational Research Reports on Ecosystems Integrated ELA and Science Instruction in Grade Five (cont.)

Next Steps

The following week, Mr. Rodriguez shows his class how the informational texts they are reading are organized by big ideas. Mr. Rodriguez writes the big ideas of one book on chart paper as headings (e.g., geographical characteristics; food webs—producers, consumers, secondary consumers; natural factors—climate, seasons, and natural disasters; human impact—pollution, overfishing) and writes some of the details beneath them. Looking at how the mentor texts are organized helps the students see how they can create categories to guide their research and structure their writing. Mr. Rodriguez facilitates a class discussion and guides the students to create an outline they will use to conduct their own research projects and write information reports. The class decides on the following outline, using their own words to describe the stages and phases in the text:

Stages and phases	Information Report Outline
Stage 1	*General statements*: • Tell/define what ecosystems are • Identify what ecosystem this one is
Stage 2 Phases (subtopics)	*Description of the ecosystem*: • Describe the geography of the ecosystem • Describe what lives there and the food web • Describe the natural factors that harm the ecosystem • Describe what people have done to affect the ecosystem • Describe ways that people can fix the damage they have caused
Stage 3	*Conclusion*: Restate the gist of the report's findings and conclude with a general statement.

Once the reports are complete, they are posted around the room for other students to read, and students present their multimedia projects to classmates as well as to a first-grade class they have been reading aloud to all year. Mr. Rodriguez evaluates the informational reports using a rubric his district has provided based on the CA CCSS for ELA/Literacy, the CA ELD Standards, and the Next Generation Science Standards.

As they engaged in learning about the freshwater ecosystem, assessed the water quality in the local pond they visited, and learned about the consequences of unhealthy ecosystems, the students had many lively discussions about what kinds of changes they could make to help protect the ecosystem. Mr. Rodriguez brings in examples of letters to the editor that other students have written over the years on various topics. He guides his students in determining how an effective letter to the editor is constructed, including taking a stance that would be likely to give a writer greater credibility. The students also discuss the types of language resources and evidence they might want to select if they were to write their own letters to the editor of the local newspaper. They unanimously vote to work in small groups to write letters

Vignette 5.3. Science Informational Research Reports on Ecosystems Integrated ELA and Science Instruction in Grade Five (cont.)

that identify different negative consequences of unhealthy freshwater ecosystems (e.g., fish asphyxiation, dirty water unfit for consumption, habitat depletion), choosing their writing groups based on interest. After exchanging the letters between groups for peer feedback based on a rubric for letters to the editor letters and a list of academic vocabulary used in the lesson, teams write final drafts. The students keep individual copies of the rubrics and final drafts in their writing portfolios to document growth over time. Each group's short letter is published within a few weeks, and the class is featured on the local news.

Vignette 5.4. Learning About Cohesion in Science Designated ELD Instruction in Grade Five

Background

During designated ELD, Mr. Rodriguez delves deeper into the language of the texts the class is using for their ecosystems research projects. (See vignette 5.3). He and his colleagues are all teaching the same integrated ELA and science unit in their fifth-grade classroom. This makes it possible to share students when they regroup for designated ELD and provide instruction that builds into and from science and ELA, targeting their students' particular language learning needs. For his ELD class, Mr. Rodriguez works with a large group of EL fifth graders who are at the Bridging level of English language proficiency while one of his colleagues works with a small group of students at the Emerging level who are new to English, and a third teaches the native English speaking students and reclassified ELs.

Lesson Context

In integrated ELA and science instruction, Mr. Rodriguez has focused on text structure and organization and has taught his students general academic and domain-specific vocabulary pertaining to the ecosystem unit. He has also worked with his students, particularly during writing instruction, on structuring their sentences and paragraphs in more grammatically complex ways, according to the expectations of the CA CCSS for ELA/Literacy and the CA ELD Standards. Even so, he observes that some EL students at the Bridging level of English language proficiency experience challenges reading some of the complex science texts. He also observes that when they write, their texts are sometimes choppy and lack cohesion. The learning target and cluster of CA ELD Standards in focus for today's lesson are the following:

Learning Target: The students will discuss ways of using language that help create cohesion, including connecting and transition words and words for referring to ideas mentioned elsewhere in the text.
CA ELD Standards (Bridging): *ELD.PI.5.6a* – Explain ideas, phenomena, processes, and text relationships (e.g., compare/contrast, cause/effect, problem/solution) based on close reading of a variety of grade-level texts and viewing of multimedia, with light support; *ELD.PII.5.2a – Apply increasing understanding of language resources for referring the reader back or forward in text (e.g., how pronouns, synonyms, or nominalizations refer back to nouns in text) to comprehending texts and writing cohesive texts; ELD.PII.5.2b – Apply increasing understanding of how ideas, events, or reasons are linked throughout a text using an increasing variety of academic connecting and transitional words or phrases (e.g., consequently, specifically, however) to comprehending texts and writing cohesive texts.*

Lesson Excerpts

Today, Mr. Rodriguez is teaching his students how to identify words and phrases that help create cohesion, that is, help texts *hang together* or *flow*.

Mr. Rodriguez: Today, we're going to discuss some of the ways that writers help guide their readers through a text. They use different words and phrases to make sure that their texts *hang together* and *flow*. These words help to link ideas throughout a text, and they help the reader *track* the meanings throughout the text. We call this way of using language *cohesion*.

Mr. Rodriguez writes the word *cohesion* on a chart, along with a brief explanation, which he says aloud as he writes:

Vignette 5.4. Learning About Cohesion in Science Designated ELD Instruction in Grade Five (cont.)

Cohesion:

- How information and ideas are connected in a text
- How a text hangs together and flows

Mr. Rodriguez: Sometimes, it might be hard to identify the language that creates cohesion in a text, so we're going to discuss it. We're going dig into some passages you've been reading in science and take a look at how writers use language so that it will be easier for you to see it in the texts you're reading for your research reports. Once you start to see the many different ways that writers create cohesion in their writing, you'll have some more ideas for how you can do that when you write your own ecosystem informational reports.

Using his document camera, Mr. Rodriguez displays a short passage from a familiar text the students have been reading in science. The text is quite challenging, and Mr. Rodriguez has spent a fair amount of instructional time on the language and content of the text, including showing the students where *nominalization* occurs (e.g., *modification, flood protection, water diversions*) and teaching them the meaning of some of these words. Mr. Rodriguez models, by thinking aloud and highlighting the text, how he identifies the language in the text used to create cohesion. The passage he shows them follows.

> Wetlands perform many important roles as an ecosystem. One is to provide an important habitat for birds, fish, and other wildlife. Another is to contribute to flood protection by holding water like a sponge. By doing this, they keep river levels normal and filter the water. However, California's wetlands are in danger, and their ability to perform these important roles is threatened. Unfortunately, they continue to be drained for agriculture or filled for development. Other activities that harm them include modifications to the watershed such as dams or water diversions, not to mention climate change. Consequently, California has lost more than 90% of its wetlands, and today, many of the ones remaining are threatened. (California Environmental Protection Agency 2014)

Mr. Rodriguez highlights the terms that may be more familiar and transparent to students: *however, unfortunately, consequently*. He briefly explains the meaning of these words, noting that such *text connectives* are very useful for helping readers navigate through texts. He then delves more deeply into the language in the passage that serves a cohesive function by explaining that *however* is signaling to the reader that something different is going to be presented and that it will contrast with what came right before it. He models his understanding of the text by reading the rest of the sentence and then reading from the beginning of the passage, paying particular attention to the connecting word, *however*.

Mr. Rodriguez: *However, California's wetlands are in danger, and their ability to perform these important roles is threatened.* Hmm . . . I know that what it's saying here is contrasting with what came right before it. In the beginning, it was discussing all the great things that ecosystems do, or the important roles they have. Then, it says that they are having a hard time doing these things. So the word *however* links the ideas that came right before it with the new information.

Vignette 5.4. Learning About Cohesion in Science Designated ELD Instruction in Grade Five (cont.)

When he comes to the word *unfortunately*, he explains that this word signals to readers that something negative is going to be presented, and he confirms this by reading on. When he comes to the word *consequently*, he asks his students to briefly discuss with one another what they think the word is doing to help connect ideas in the text.

Ernesto: I think that when you use the word *consequently*, you're saying that something is happening because something else happened. Like, *consequently* means *it's a result*.

Mr. Rodriguez: Can you say more about that? What ideas is the word *consequently* connecting in this text?

Ernesto: (Thinks for a moment, then points to the document displayed on the screen) Right there, where it says "they continue to be drained" and "other human activities" . . . like, modif . . . modifications and dams.

Talia: And climate change. That does it, too.

Mr. Rodriguez: So, what you're saying is that the word *consequently* is linking those activities, those terms—*draining for agriculture, filling in the wetlands, making dams or water diversions, and climate change*—it's linking those activities with . . . ? Turn to your partner and discuss what ideas the word *consequently* is connecting.

The students grapple with this question, but through the scaffolding Mr. Rodriguez has provided, they determine that the word *consequently* connects harmful human activities to the loss of and threat to wetlands. Mr. Rodriguez continues to model how he identifies the other language in the text that creates cohesion, including pronouns that refer back to nouns (e.g., *they*, *their*) and other *referring* words that may not be as obvious. For example, he explains that the words *one* and *another* refer to the word *roles*, which appears in the first sentence. He highlights other referring words and the words they refer back to, and he draws arrows between them to make the reference clear. After modeling one or two examples, he asks students to tell him what the words are referring to, and he marks up the text with additional arrows so they can see clearly what is being referenced. The passage he shows, along with the language he highlights while modeling his thinking process, follows.

> Wetlands perform many important roles as an ecosystem. **One** is to provide an important habitat for birds, fish, and other wildlife. **Another** is to contribute to flood protection by holding water like a sponge. By doing **this**, **they** keep river levels normal and filter the water. **However,** California's wetlands are in danger, and **their** ability to perform **these important roles** is threatened. **Unfortunately, they** continue to be drained for agriculture or filled for development. Other activities that harm **them** include modifications to the watershed such as dams or water diversions, not to mention climate change. **Consequently,** California has lost more than 90% of its wetlands, and today, many of **the ones** remaining are threatened. (California Environmental Protection Agency 2014)

After Mr. Rodriguez has modeled this process, he provides students with similar passages, and asks them to work in pairs to locate any words that create cohesion by following the same

Vignette 5.4. Learning About Cohesion in Science Designated ELD Instruction in Grade Five (cont.)

process he shared with them. At the end of the lesson, he asks students to share what they found and explain how the words they highlighted create cohesion in the text by linking ideas and information. As the class generates a list of words that help the text hang together, Mr. Rodriguez writes them down on a piece of chart paper for all to see. Later that week, the students will work in small groups to categorize one form of cohesive language, text connectives. The chart will be posted so that the students can draw upon the words and phrases when they write their research reports. Mr. Rodriguez chooses the categories, but the students decide where the words go (with his guidance), and they agree on a title for the chart, which follows.

Language to Connect Ideas (Cohesion)		
Adding	**Contrasting**	**Sequencing**
in addition furthermore similarly also	however despite this instead otherwise unfortunately	to start with to summarize in conclusion finally
Cause/Result	**Time**	**Clarifying**
therefore consequently because of this in that case	next meanwhile until	that is in other words for example for instance
Words for referring back to people or things: they, their, it, them, this, these, those, one, another, the ones		

Teacher Reflection and Next Steps

After teaching these lessons on cohesion, Mr. Rodriguez observes that many of his students begin to use these language resources in their writing. For example, instead of repeating the word *ecosystems* in each sentence (e.g., Ecosystems are . . . , Ecosystems have . . . , Ecosystems can . . .), they use pronouns to refer back to the first usage of the word. Similarly, many of his students begin to experiment with the connecting words listed on the chart that the students generated during ELD. He also notices that his students are becoming more aware of this type of language they encounter while reading. Throughout the day, he responds enthusiastically when students tell him when they find other examples of cohesion.

Vignette 6.1. "The Making of a Scientist"
Close Reading of a Memoir in ELA with Integrated ELD in Grade Six

Background

Ms. Valenti's sixth-grade English language arts (ELA) class is learning how to read texts more analytically. Currently, the class is reading memoirs to determine how people depict their formative years, including seminal events that shaped their profession or outlook on the world. Ms. Valenti's class of 35 students includes two students with mild learning disabilities and five English learners at the Expanding level of English language proficiency, four who have been in U.S. schools for at least four years and one who arrived to the U.S. a little more than a year ago. Ms. Valenti collaborates with the other sixth-grade teachers at her school. Two of them teach the students mathematics and science, while Ms. Valenti and another sixth-grade teacher teach ELA and history/social studies. There are a small number (three to five) of EL students in each sixth-grade class, and each of the sixth-grade teachers teaches his or her own students designated ELD in small groups. Specialists teach the visual and performing arts, as well as physical education.

The interdisciplinary team works together to determine the cross-curricular themes they will teach. Some reading of informational and literary texts occurs in ELA, but much of it is done in the other content areas. For example, during science and history/social studies time, the class reads informational texts related to the topics they are learning about. During ELA time, students read literature or literary non-fiction related to their science and/or history topics.

Lesson Context

The current interdisciplinary theme is *Careers in Action*, and Ms. Valenti has selected a text that she thinks will appeal to students at this age because it focuses on parents' expectations for their children, including how parents teach children important life lessons that will shape their outlook on the world. The text, "The Making of a Scientist," is a memoir by Richard Feynman, a famous American scientist who won the Nobel Prize in Physics and who is often referred to as the best mind since Einstein. In science that day, Ms. Valenti's colleague will engage the students in a demonstration illustrating the law of inertia – a demonstration that is similar to the wagon and ball event that Feynman describes in his memoir.[3]

Lesson Excerpts

In today's lesson, Ms. Valenti plans to engage her students in the first of a series of close reading lessons on Feynman's memoir, discussing with them how his early experiences sparked a career in science. During this lesson (the first of three on the same text), students analyze the ideas in one portion of the text, while focusing on how the author uses language resources (vocabulary, syntax, and rhetorical devices) to construct the narrative and convey his meaning. In addition, students gain practice in notetaking and summarizing text. The learning target and focus standards for the lesson are as follows:

Vignette 6.1. "The Making of a Scientist"
Close Reading of a Memoir in ELA with Integrated ELD in Grade Six (cont.)

Learning Target: The students will analyze a short memoir, discuss their interpretations, identify the central idea, and analyze how it is conveyed through details in the text.
CA CCSS for ELA/Literacy: *RI.6.2 – Determine a central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments; W.6.9 – Draw evidence from literary or informational texts to support analysis, reflection, and research; SL.6.1 – Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.*
CA ELD Standards Addressed (Expanding): *ELD.PI.6.1 – Contribute to class, group, and partner discussions by following turn-taking rules, asking relevant questions, affirming others, adding relevant information, and paraphrasing key ideas; ELD.PI.6.6b – Express inferences and conclusions drawn based on close reading of grade-level texts and viewing of multimedia using a variety of verbs (e.g., suggests that, leads to).*

Ms. Valenti starts by connecting new learning to what students already know and by providing background information about the text and author.

Ms. Valenti: Today we're going to read an excerpt from a memoir by a famous scientist named Richard Feynman. In the memoir—a memoir is a story of your life that you write yourself – Feynman explains how his father taught him some important life lessons that ultimately shaped his career. This is something that your parents or grandparents or other adults in your life do all the time. For example, they may try to teach you about being responsible by having you do chores around the house, like washing the dishes. Does anyone do that? Or, they may try to teach you compassion by having you take care of your little brother or sister or your grandparents when they're sick. Sometimes you're not aware that they're trying to teach you these life lessons until much later. Very briefly, turn and talk with a partner about some of the life lessons you think the adults in your life are trying to teach you.

The students briefly share with one another. Before they read the text about the principles Feynman's father taught him, Ms. Valenti shows them a short video so they can get a sense of who Feynman was during his career as a scientist. The animated video "Ode to a Flower" was created by Fraser Davidson to accompany Feynman talking about the nature of beauty (http://www.youtube.com/watch?v=VSG9q_YKZLI).

Ms. Valenti asks students, who are seated in groups of four, to briefly discuss at their tables how the video depicts the kind of person Feynman was. After a couple of minutes, she asks two students to share their ideas. She briefly explains some terms students will encounter in the reading that will be critical for understanding the text (such as *Encyclopedia Britannica*, *magnitude*, *translate*). She also briefly reviews what the literary term *theme* means by drawing students' attention to the chart in the room that defines literary terms, and then, as an additional link to their background knowledge, she offers a few additional examples of themes students have encountered in other texts they have read. She tells them that they will be looking for themes in Feynman's text.

Vignette 6.1. "The Making of a Scientist"
Close Reading of a Memoir in ELA with Integrated ELD in Grade Six (cont.)

Next, she reads the first part of the text aloud as students read along silently with her in their own copies. Ms. Valenti has found that reading complex texts aloud gives her students a feeling for the various voices in the narrative and models the intonation she uses as a proficient reader. Reading aloud also provides an oral introduction to the language in the text and gives her an opportunity to stop at strategic points to explain particular vocabulary and untangle complex syntactic structures (i.e., paraphrase particularly complex sentences) that may be unfamiliar to students.

Next, she asks students to share with a partner what they think the main theme or lesson of the section is. As students share, she listens in while circulating around the room. Her ongoing intent is to support students to interpret texts deliberately, and she needs to know how they are currently interpreting texts so that she can help them develop increasingly sophisticated levels of proficiency and greater autonomy as readers. She notes that there are multiple interpretations of what the main theme or lesson is, and she uses this observational information to shape how she will support students to read the text analytically so that they can refine or revise their initial ideas about what the author is expressing both explicitly and implicitly.

Ms. Valenti then asks students to read the same text excerpt silently while they use a reading guide that contains focus questions. She explains that they will read the text multiple times and that for this ***first*** reading on their own, they will just read for general understanding; she assures them that they do not need to worry about knowing the meaning of every word. (The students will have opportunities to analyze the vocabulary, grammatical structures, and nuanced meanings in the text as the lesson progresses.) The focus questions are displayed on the board, and she reviews each question to ensure that her students understand them. She also provides them with a half-page handout with the focus questions:

Focus Questions for Today's Reading

Write notes under each question *as you read*.

- What is happening in the text?
- Who is in the text and how are they interacting?
- What was Feynman's father trying to teach his son with the tiles?
- What was Feynman's father trying to teach his son with the dinosaurs?
- Which sentence best captures the central idea in this part of the text?

Excerpt from the text:

"The Making of a Scientist" by Richard Feynman

> Before I was born, my father told my mother, "If it's a boy, he's going to be a scientist." When I was just a little kid, very small in a **highchair**, my father brought home a lot of little bathroom tiles—**seconds**—of different colors. We played with them, my father setting them up **vertically** on my **highchair** like dominoes, and I would push one end so they would all go down.

Vignette 6.1. "The Making of a Scientist" Close Reading of a Memoir in ELA with Integrated ELD in Grade Six (cont.)

> Then after a while, I'd help set them up. Pretty soon, we're setting them up in a more **complicated** way: two white tiles and a blue tile, two white tiles and a blue tile, and so on. When my mother saw that she said, "Leave the poor child alone. If he wants to put a blue tile, let him put a blue tile."
>
> But my father said, "No, I want to show him what patterns are like and how interesting they are. It's a kind of **elementary** mathematics." So he started very early to tell me about the world and how interesting it is.
>
> We had the ***Encyclopaedia Britannica*** at home. When I was a small boy he used to sit me on his lap and read to me from the *Britannica*. We would be reading, say, about dinosaurs. It would be talking about the *Tyrannosaurus rex*, and it would say something like, "This dinosaur is twenty-five feet high and its head is six feet across."
>
> My father would stop reading and say, "Now, let's see what that means. That would mean that if he stood in our front yard, he would be tall enough to put his head through our window up here." (We were on the second floor.) "But his head would be too wide to fit in the window." Everything he read to me he would **translate** as best he could into some **reality**.
>
> It was very exciting and very, very interesting to think there were animals of such **magnitude**—and that they all died out, and that nobody knew why. I wasn't **frightened** that there would be one coming in my window as a **consequence** of this. But I learned from my father to **translate**: everything I read I try to figure out what it really means, what it's really saying.

Ms. Valenti also encourages students to underline words or phrases they don't understand and to write down any questions or comments they have about the text in the margins. After they read independently, the students work in pairs to discuss their notes and questions while Ms. Valenti circulates around the classroom to listen in, clarify, and assist students with any unsolved questions, providing explanations and probing their thinking as relevant. For example, some students do not understand what the word *seconds* means in reference to bathroom tiles. Other students focus on particular phrases and sentences and work together to disentangle the meanings. Ms. Valenti stops at a table where Jamal and Tatiana, an EL student at the late Expanding level of English language proficiency, are discussing their notes. The pair has already determined that the text mostly involves Feynman, as a child, and his father, and that Feynman's father is showing his son patterns using the tiles and reading to him about dinosaurs from the encyclopedia.

Jamal: Okay, so what do we think that his dad, Feynman's dad, was trying to teach him with the tiles?

Tatiana: (Referring to her notes.) I think he was trying to teach him about math, about math patterns, and he was showing him how you can make patterns with tiles.

Jamal: But he was just a baby, so he couldn't teach him with numbers, right? So he used the tiles.

Vignette 6.1. "The Making of a Scientist"
Close Reading of a Memoir in ELA with Integrated ELD in Grade Six (cont.)

Tatiana: What about the dinosaurs? What do you have?

Jamal: (Referring to his notes.) I think it's the same thing. His dad was trying to show him how big a dinosaur would be if it was standing outside the house, but he was also trying to get him excited about dinosaurs.

Ms. Valenti: Is there something in the text that gave you that idea?

Jamal: (Looking at the text for a moment.) Here it says, "Everything he read to me he would translate as best he could into some reality." I think he means that his father was trying to teach him some things, some real things about math patterns and dinosaurs, but he had to make it real for a kid, even for a baby.

Tatiana: And he was also trying to teach him something about the world.

Ms. Valenti: Can you say more about that, and can you find some examples in the text?

Tatiana: Here, it says that his father said, "No, I want to show him what patterns are like and how interesting they are."

Ms. Valenti: So, what does that mean to you? How can you interpret that, using the focus questions?

Tatiana: I think his dad was really trying to show him how the world has all this . . . stuff . . . how it's interesting. His father was trying to teach him some real things, like math patterns and dinosaurs, and he had to make that real for him as a kid. But I think he was also trying to teach him about how to see the world. That he should see it as interesting and that it has a lot of things to observe.

Jamal: Yeah, like he was trying to help him think differently about the toys he has or things he's doing. Like he was trying to help him think like a scientist.

After the students have had time to delve deeply into the text, Ms. Valenti pulls the whole class together to discuss their notes. Picking up on the themes and questions the students have raised, she leads a loosely structured discussion during which they articulate and elaborate on their ideas. As the conversation progresses, she prompts them to go back into the text for evidence that supports their claims. Lately, Ms. Valenti has noticed that some of the girls in the class have seemed reluctant to share their ideas, so she makes a conscious effort to let them know she wants to hear from them and cares about what they have to say, using the following techniques:

- Meeting with individuals before the conversation to make sure they know she cares about their participation in class discussions and to inquire as to why they are not comfortable sharing.
- Pausing before asking a probing question to allow everyone to gather their thoughts and prepare their responses.
- Deliberately calling on individuals during the conversation, those who she heard sharing enthusiastically in their pair conversations, and then validating their ideas.
- Encouraging the whole class to listen respectfully.

Vignette 6.1. "The Making of a Scientist"
Close Reading of a Memoir in ELA with Integrated ELD in Grade Six (cont.)

Next, she structures the conversation a bit more by helping them *shape* their ideas into concise statements that capture the theme of the section in students' own words. She facilitates a *joint construction* of the statement by first writing "His father wanted to teach his son" in a chart she has prepared, which is displayed using the document camera. She then asks students to help her expand and enrich the sentence to add precision and nuance, guiding students to identify details from the text that support the statement. The jointly constructed central idea and details are shown in the chart below.

Central Idea (in our words)	Details from the Text (paraphrasing and quotes)
Feynman's father wanted to teach his son about the interesting things in the world and how to think like a scientist, so he would *translate* things in ways that his son would understand.	The father . . . • made playing with tiles into a way to learn about patterns and mathematics • said, "No, I want to show him what patterns are like and how interesting they are. It's a kind of elementary mathematics." • read to him from the encyclopedia • helped him visualize the dinosaur outside his house

Ms. Valenti repeats the process the students just engaged in with the next section of the text, in which Feynman describes how his father taught him about the difference between knowing the name of something and knowing something through observation. After the collaborative conversations in pairs and whole class discussion, Ms. Valenti invites students to revise their *central idea* statement and add other thoughts to the chart. The students decide to add a section to the chart that highlights the life lessons, or principles, that Feynman's father taught him. Two of the principles the students jointly construct with Ms. Valenti are the following:

- When you read, try to figure out what it really means, what it is really saying. You have to read between the lines.
- There is a difference between knowing the name of something and really knowing something. You have to look at how something behaves or works, and not just know what it is called.

The class finishes the final section of the excerpt, in which Feynman's father teaches him to notice some important principles in physics, using everyday experiences and understandings as a springboard to understanding science concepts. Again, the class revises and adds to the chart.

Ms. Valenti concludes the lesson by showing students the short video "Ode to a Flower" once more. This time, she asks the students to think about how what Feynman's father taught him may have influenced the way he sees the flower. After watching the video, the students share their thoughts in their table groups, and Ms. Valenti then wraps up the lesson by calling on several students to share with the whole class an idea or two from their table conversations.

Vignette 6.1. "The Making of a Scientist"
Close Reading of a Memoir in ELA with Integrated ELD in Grade Six (cont.)

Next Steps

The next day, Ms. Valenti guides students to read the same text again, but she changes the focus questions so that students can analyze the *craft and structure* of the passage. She encourages them to attend to the author's deliberate language choices, and asks them to consider why he wrote the passage in the way that he did. She designs her questions so the students can focus on literary devices, word choices, structural elements, and author's purpose. For example, she asks the students to consider *how* the author lets us know what his father was trying to accomplish (e.g., which words or literary devices were used). On the third day (the third read, which focuses on *integrating knowledge and ideas*), Ms. Valenti guides students to think about what the text means to them and how it connects to other texts they have read or experiences they have had. For example, one of her focus questions for students to consider as they read the text analytically is "How does the way Feynman's father taught him principles compare to ways that other real or fictional individuals we've read about have been taught?"

At the end of the week, Ms. Valenti has the students work together in their table groups to collaboratively complete and edit the following in-class writing assignment:

> *Pick one of the examples that Feynman uses (the dinosaur, the birds, or the wagon). In one concise paragraph, explain the lesson Feynman's father was trying to teach him with the real example and then explain why that example was useful. Be sure to include evidence from the text in your explanation.*

Ms. Valenti provides the groups with a handout focusing on a select set of elements they need to include in their explanations (e.g., the lesson or principle, evidence from the text, vivid vocabulary, well-constructed sentences). She reminds them about prior lessons and suggests that they first write all of their ideas down and then work together to combine the ideas, select the words and phrases that are the most precise, condense them into sentences, and link the sentences together to make a cohesive paragraph. Each student in the group must have the same paragraph in their notebook, which she will check at the end of the day.

Later in the unit, Ms. Valenti and the students will read another memoir of an important and interesting individual using the same sequence (focusing on key ideas and details on day one, craft and structure on day two, and integration of knowledge and ideas on day three).

Vignette 6.2. Analyzing Language to Understand Complex Texts Designated ELD in Grade Six

Background

Ms. Valenti's sixth-grade class of 35 students includes five English learners at the Expanding level of English language proficiency, four who have been in U.S. schools for at least four years and one who arrived to the U.S. a little over a year ago. There are a small number (three to five) of EL students in each sixth-grade class, and each of the sixth-grade teachers teach their own students designated ELD in small groups, working collaboratively as a team to design lessons and adapt them to students' English language proficiency levels and particular learning styles and needs.

Lesson Context

The sixth graders in the school have just started reading Richard Feynman's memoir, "The Making of a Scientist." (See Vignette 6.1.) Designated ELD lessons for the next several days are designed to support EL students' understandings of the text and enhance their ability to convey their understandings through speaking and writing. In planning these lessons, the teachers noticed that the memoir is organized in a way that may not be immediately apparent to their EL students, and Feynman also uses language that may be unfamiliar. The teachers plan to focus lessons in ways that address the particular needs of EL students at different English language proficiency levels.

After the first reading of an excerpt from "The Making of a Scientist," Ms. Valenti invites her five EL students to the teaching table while the rest of the class engages in collaborative tasks they are accustomed to doing independently (e.g., writing e-mails to their pen pals in Vietnam and El Salvador or conducting searches for research projects at the *Internet café* station, observing objects through microscopes and then drawing and writing descriptions about them at the *science lab* station). The EL students bring their copies of the text, "The Making of a Scientist," as well as the focus questions handout (see vignette 6.1) with their notes. The learning target and focus standards in Ms. Valenti's lesson plan are as follows:

Learning Target: Students will analyze the language of a familiar complex text to understand how it is organized and how particular language resources are used to convey meanings.
CA ELD Standards (Expanding): *ELD.PI.6.1 – Contribute to class, group, and partner discussions by following turn-taking rules, asking relevant questions, affirming others, adding relevant information, and paraphrasing key ideas; ELD.PI.6.7 – Explain how well writers and speakers use specific language to present ideas or support arguments and provide detailed evidence (e.g., showing the clarity of the phrasing used to present an argument) with moderate support; ELD.PII.6.1 – Apply growing understanding of how different text types are organized to express ideas (e.g., how a narrative is organized sequentially with predictable stages versus how arguments are structured logically around reasons and evidence) to comprehending texts and writing texts with increasing cohesion; ELD.PII.6.2a – Apply growing understanding of language resources for referring the reader back or forward in text (e.g., how pronouns or synonyms refer back to nouns in text) to comprehending texts and writing texts with increasing cohesion.*

Vignette 6.2. Analyzing Language to Understand Complex Texts Designated ELD in Grade Six (cont.)

Lesson Excerpts

First, Ms. Valenti explains that they will be looking closely at the language Feynman chose to express his ideas and examining how he organized this language to produce a whole text that is both a pleasure to read and interesting to discuss and learn from. She tells them that this *language analysis* will help them to read texts more closely and will also give them ideas about the types of language resources they can use in their own speaking and writing. In order to contextualize the language analysis within the bigger goal of making meaning from texts, she asks students to briefly review their notes from the previous ELA lesson and then share what they thought about the memoir.

Tatiana shares that she liked how, rather than merely stating that his father taught him life lessons or principles, Feynman gave examples showing ways his father made the principles real to him as a child. Sergio shares that he enjoyed discussing the text with others but remarks that, even though some of the language was clarified in small and whole group discussions, there are still some words and phrases he does not quite understand. Other students concur. Ms. Valenti has anticipated this, and she asks each of them to select three words from the text that they are still unsure of but feel are important to know. She charts the words they have selected and briefly explains their meaning (the words will be added to the class's academic word wall later so that students can reference them while speaking and writing).

Next, Ms. Valenti facilitates a discussion about the text organization and structure of Feynman's memoir.

Ms. Valenti: Lately, we've been talking a lot about how different types of texts are structured. For example, a couple of weeks ago, we looked at how short stories are usually organized. Would anyone like to briefly remind us of what we learned about how stories are organized?

One student shares that the typical stages of a story are *orientation*, *complication*, and *resolution*, and other students add to the overall structure by sharing what typically happens in each stage. They also share that a story is structured sequentially. In other words, events are presented in order by time.

Ms. Valenti: It sounds like you really understand how a story is structured. A memoir, which is the type of text we read this morning, is structured in similar ways to a story because the author is telling the story of his or her life. So, *usually*, events will be presented sequentially, too. But there are differences. Usually, a memoir will have an orientation—where we find out things like who and where—and then there's a sequence of events, but not necessarily a complication, like a story. And at the end, there's an evaluation, meaning, the author tells you why the events and details they've shared were important or what the impact of these events was on the author's life. We're going to take a look at where these stages are in "The Making of a Scientist," and we're also going to look at some of the language Feynman uses to show when things are happening.

As she explains the stages of a memoir, Ms. Valenti writes the words *orientation*, *events*, and *evaluation* on the small whiteboard at the table with space below each word. She asks the students to take one minute to look at their copies of the memoir to see if they can identify these big stages. She tells them not to try to reread every sentence (they have already read

Vignette 6.2. Analyzing Language to Understand Complex Texts Designated ELD in Grade Six (cont.)

the text twice, and chunks of the text multiple times) but rather, to skim it as they look for the stages and use their pencils to note where they are. Then, she facilitates a discussion about what the students have found.

Azizi: I noticed that he's telling, it's like he's telling little stories inside the memory.

Ms. Valenti: Can you say more about that? What do you mean by "little stories?"

Azizi: Well, here (pointing to where he's marked his text), he's telling a story about the dominoes, how his father taught him about math with the dominoes. And here, he's telling a story about the dinosaurs and the encyclopedia, and then later he's telling a story about the birds.

Tatiana: I have something to add on to what Azizi is saying.

Ms. Valenti: What did you notice, Tatiana?

Tatiana: I noticed that same thing that Azizi is saying, and I also noticed that when he tells the stories, he says something more about the story.

Sergio: Yeah, he . . .

Ms. Valenti: Just a moment Sergio. I don't think Tatiana was finished.

Tatiana: Here (pointing to her text), it says "But I learned from my father to translate: everything I read I try to figure out what it really means, what it's really saying." First he tells the little stories, and then he tells what his father was teaching him.

Ms. Valenti: Did anyone else notice that about the events, or the little stories of his life?

Sergio: I agree with Tatiana, and I want to add that I noticed that the stories—the events, I mean—are in order. First, he's a baby—no!—(looking at his text) it starts before he's born, and then he's a baby, and then he's a kid.

Ana: I think the orientation is not long. I think the first sentence is the orientation only.

Ms. Valenti: And why do you think that, Ana?

Ana: In the first sentence, he tells us who is going to be in the story. I mean . . . What's it called again?

Sergio: The *memoir*.

Ana: Yeah, he tells us who is going to be in the *memoir*—his father, his mother, him—and his father tells his mother, "If it's a boy, he's going to be a scientist." I think he's telling us what the story is going to be about. But I don't like that. Girls can be scientists, too.

Vignette 6.2. Analyzing Language to Understand Complex Texts Designated ELD in Grade Six (cont.)

Ms. Valenti: You are so right, Ana. Girls can be scientists, and there are many famous scientists who are women. I think the reason Feynman wrote that is because, at the time, not a lot of women were scientists. Things were different back then, and women did not have as many chances to be scientists, or lawyers, or even the President of the United States. You all are noticing a lot of things in this text. That's really great thinking. Let's take a moment so I can catch up with you and write some of these details down so we don't forget them.

Ms. Valenti charts what the students have said on the whiteboard under the first two stages (orientation and events). She invites the students who haven't yet shared their ideas to suggest what she should write for the evaluation stage, and they note that at the end of the memoir, in the last two paragraphs, Feynman tells the reader how his father taught him and what that meant for his career choices.

Ms. Valenti: Okay, we've established the overall stages of the text and we noticed that it's written mostly sequentially, or in order. That's something that's the same as the way many stories—like the ones we read before—are structured. We've also seen that after each little story—or event—the author tells us what that lesson was that his father was teaching him. That's something that's different from a lot of stories, right? Now, we're going to analyze the language a little more closely. This time, when we look at the text, I want you to hunt for words and phrases that let us know when things are happening.

Ms. Valenti: For example, at the very beginning, the first several words tell us when things are happening: "Before I was born . . ." By choosing to use those words, Feynman helps us know where in time we are. So, with a partner, go through and talk about any words or phrases that you think tell the reader when things are happening. Then, go ahead and highlight those words and phrases.

The partners spend a couple of minutes searching for words and phrases that refer to time. Since there are five students at the table, Ms. Valenti is Raúl's partner. Lately, she's noticed that Raúl has been agitated in class. When she asked him if anything was wrong, he told her his uncle had recently died in a car accident. Accordingly, Ms. Valenti has been making a special effort to make Raúl feel connected to her (e.g., checking in frequently with him during the day, letting him know that she genuinely cares about him). They briefly scan the first paragraph of the text together, and then Ms. Valenti asks Raúl if he sees any words or phrases that let them know when events are taking place.

Raúl: I think . . . Here, it says he was a little kid, "When I was just a little kid." That's telling that it's later—after he was a baby.

Ms. Valenti: Let's read that sentence again. (They read the sentence together.)

Raúl: Oh! He's a baby here, I think, because he's in the highchair, so he has to be a baby. So it's . . . It happens after the start, *after* the orientation because there it says, "Before I was born." This is the first story, when he's a baby.

Ms. Valenti: And how does Feynman let us know that?

Vignette 6.2. Analyzing Language to Understand Complex Texts Designated ELD in Grade Six (cont.)

Raúl: Cuz he's saying things like, before this, when that, then later on he says (searching in the text) "When I was a small boy . . ."

Ms. Valenti: Yes, so Feynman is helping readers along by telling us when events are taking place: before he was born, when he was a baby, when he was a small boy, and so on.

When Ms. Valenti debriefs with the group, partners share that they found other language resources that the author used to sequence events in time. For example, at one point, Feynman uses the term "We used to go," and Ms. Valenti points out that this phrase lets the reader know that it happened a long time ago, but that it happened often. Tatiana points out that another way the memoir is similar to many stories is that the verbs are in the past tense (they had previously noted this when they analyzed the language of stories).

Ms. Valenti concludes the lesson by asking students to be on the lookout for how stories, memoirs, and other text types are structured and to notice the way authors use language differently. She tells them that paying attention to these text features will help them to be better readers and writers.

Next Steps

During ELA with the whole class the next day, Ms. Valenti facilitates a similar discussion about how Feynman's memoir is structured, delving deeper into analyzing the language resources he used, and helping students notice how he constructed his paragraphs and sentences as well as his dialogue. During designated ELD, Ms. Valenti uses the CA ELD Standards as a guide to help her focus more intensively on the language learning needs of her ELs and to target challenging language in the texts students are reading during ELA and in other content areas so that they can better comprehend them.

Vignette 6.3. You Are What You Eat
Close Reading of an Informational Text
Integrated ELA/Literacy and ELD Instruction in Grade Seven

Background

Mrs. Massimo is an English language arts (ELA) teacher working with an interdisciplinary team that also includes social studies, science, and math teachers. Her team plans lessons throughout the year that include an array of literary genres and informational texts related to a variety of themes. For the "You Are What You Eat" thematic unit on food, nutrition, and agribusiness, Mrs. Massimo is having her seventh-grade students read *The Omnivore's Dilemma: The Secrets Behind What You Eat* (Young Reader's Edition) by Michael Pollan. This nonfiction text examines how food is currently produced in the United States and explores what alternate forms of production are available. Mrs. Massimo's seventh-grade English class of 32 includes two students with mild learning disabilities, ten English learners at the Expanding level of English language proficiency (most of whom have been in the United States since the primary grades of elementary school), and two English learners at the Emerging level of English language proficiency who have been in U.S. schools for just over a year.

Mrs. Massimo and her team know that middle school is a critical time to prepare students for the increasingly complex texts they will encounter across the disciplines as they progress through secondary school. Using the CA ELD Standards to ensure that they are attending to the language learning needs of their English learners, they make strategic decisions about how to address academic literacy.

Lesson Context

This lesson occurs during the second week of this unit. Mrs. Massimo has shown students a documentary about processed foods, and the class has engaged in lively discussions about the types of foods they like and/or should be eating to be healthy. In this lesson, she continues to build students' content knowledge of food and nutrition by focusing on the modern farming industry. She guides them to closely read a short passage from Michael Pollan's text and facilitates a class discussion about it, prompting students to cite textual evidence to support their ideas.

Learning Targets: The students will analyze a short text about agribusiness to determine what it says explicitly as well as what can be inferred, and they will engage in collaborative conversations about the text, building on classmates' ideas.
CA CCSS for ELA/Literacy: *RI.7.1 - Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text; RI.7.3 - Analyze the interactions between individuals, events, and ideas in a text (e.g., how ideas influence individuals or events, or how individuals influence ideas or events); RI.7.4 - Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of a specific word choice on meaning and tone; SL.7.1 - Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.*

Vignette 6.3. You Are What You Eat
Close Reading of an Informational Text
Integrated ELA/Literacy and ELD Instruction in Grade Seven (cont.)

CA ELD Standards (Expanding): *ELD.PI.7.1 – Contribute to class, group, and partner discussions; ELD.PI.7.6a – Explain ideas, phenomena, processes, and text relationships based on close reading of a variety of grade-level texts . . . with moderate support; ELD. PI.7.6c – Use knowledge of morphology, context, reference materials, and visual cues to determine the meaning of unknown and multiple-meaning words on familiar and new topics.*

Lesson Excerpts

Mrs. Massimo builds her students' background knowledge by reading a short passage aloud as students follow along in their own copies of the text. The passage is related to what students will read and contains many of the words they will encounter (e.g., *agribusiness, fertilizer, chemicals, yield*). By reading aloud Mrs. Massimo is intentionally modeling prosody and pronunciation of words that may be unfamiliar. She also models the use of comprehension strategies, asking herself clarifying questions as she reads and stopping every so often to summarize what she has read.

Mrs. Massimo then asks students to read a passage independently and to consider some text-dependent questions as they do. She asks them to jot down their responses in their reading journals as well as note any questions they have about the reading or any unfamiliar vocabulary. (Previously, Mrs. Massimo met separately with the two English learners at the Emerging level to ensure that they understand the meaning of the questions, and to preview the content knowledge embedded in the text they will read.) The questions she asks students to think about as they read the text on their own for the first time are the following:

- What is this text primarily about?
- What are some key events or details that help us understand what the text is about?
- What are some important words needed to discuss the main ideas?

Excerpt from the text (Chapter 3, "From Farm to Factory")

It may seem that I've given corn too much credit. After all, corn is just a plant. How could a plant take over our food chain and push out almost every other species? Well, it had some help—from the U.S. Government.

At the heart of the industrial food chain are huge businesses, **agribusinesses**. The same businesses that create new seeds provide farmers with the tools and fertilizer they need to grow lots of corn. Agribusinesses also need cheap corn from which they make **processed food** and hundreds of other products. To get the corn flowing and keep it flowing, agribusiness depends on government **regulations** and taxpayer money.

The government started seriously helping corn back in 1947. That was when a huge weapons plant in Muscle Shoals, Alabama switched over to making chemical fertilizer. How can a weapons plant make fertilizer? Because **ammonium nitrate**, the main ingredient in explosives, happens to be an excellent source of **nitrogen**. And nitrogen is one of the main ingredients in **fertilizer**.

Vignette 6.3. You Are What You Eat
Close Reading of an Informational Text
Integrated ELA/Literacy and ELD Instruction in Grade Seven (cont.)

> After World War II, the government found itself with a tremendous surplus of ammonium nitrate. There was a debate about what the government should do with the leftover bomb material. One idea was to spray it on forests to help out the timber industry. But the scientists in the Department of Agriculture had a better idea: Spread the ammonium nitrate on farmland as fertilizer. And so the government helped launch the chemical fertilizer industry. (It also helped start the **pesticide** industry, since insect killers are based on poison gases developed for the war.)
>
> Chemical fertilizer was needed to grow **hybrid corn** because it is a very hungry crop. The richest acre of Iowa soil could never feed thirty thousand hungry corn plants year after year without added fertilizer. Though hybrids were introduced in the thirties, it wasn't until farmers started using chemical fertilizers in the 1950s that corn yields really exploded.

After students read the text independently, Mrs. Massimo asks them to discuss their notes in triads for five minutes and come to consensus about their responses to the guiding questions. This gives them an opportunity to collaboratively analyze the text's meanings before she hones in on the key ideas she wants them to focus on next. Mrs. Massimo groups students into triads, making sure that participants in each group can work well together and complement one other's strengths and areas for growth (e.g., a student who has an expansive vocabulary paired with one student who is a good facilitator and another who has a deep interest in science). She also ensures that the two English learners at the Emerging level are each in a triad with a *language broker*, that is, another student who can support their understanding by using their primary language.

As a follow up to their small group conversations, Mrs. Massimo conducts a whole class discussion, asking some text-dependent questions, which she prepared ahead of time:

- What is agribusiness?
- How did the U.S. government help launch the chemical fertilizer industry?
- Why are chemical fertilizers so important and necessary to agribusiness?

As students share out, she charts their responses for everyone to see using the document camera.

Julissa: Our group said this text is mostly about the big businesses that make processed food. They used the chemicals from the weapons factory to make fertilizers for the farms.

Mrs. Massimo: I see. And what word was used in the text to refer to those big businesses that grow food?

Julissa: (Looking at her notes.) Agribusinesses?

Mrs. Massimo: (Writes *agribusiness* using the document camera.) Yes, let's make sure everyone writes that down in their notes. That term is critical for understanding the text we're reading. Based on your understandings, how should we define *agribusinesses*?

Vignette 6.3. You Are What You Eat
Close Reading of an Informational Text
Integrated ELA/Literacy and ELD Instruction in Grade Seven (cont.)

Mrs. Massimo guides the class to define the term in their own words, prompting them to refer to their notes and to go back into the text to achieve a precise definition. Here is what the class generates:

> ***Agribusinesses:*** *Huge companies that do big farming as their business. They sell the seeds, tools, and fertilizer to farmers, and they also make processed foods.*

Mrs. Massimo continues to facilitate the conversation, prompting students to provide details about the text, using evidence they cited while reading independently and in their collaborative conversations. She also clarifies any vocabulary that was confusing or that students were unable to define in their small groups. She anticipated that certain words might be unfamiliar to students (e.g., bolded words in the text excerpt) and has prepared short explanations for them, which she provides to students.

When students' responses are incomplete or not detailed enough, she prompts them to elaborate.

Mrs. Massimo: Why are chemical fertilizers so important and necessary to agribusiness?

Sandra: They help the food grow.

Mrs. Massimo: Can you say more about that?

Sandra: It has something in it that the crops need to grow. Nitra- (looks at her text) nitrogen. It was in all the ammonium nitrate they had at the weapons factory. And nitrogen helps the plants to grow. So they had all this ammonium nitrate, and they made it into chemical fertilizer, and that helped the corn—the hybrid corn—grow more.

Mrs. Massimo: Okay, so why was it so important for the agribusinesses to have this chemical fertilizer and for the hybrid corn to grow?

Sandra: Because they need a lot of cheap corn to make processed foods.

Most of the meanings of words in this text can be determined from the context. During class discussion of the text-dependent questions, Mrs. Massimo reviews how to learn vocabulary from contextual clues. For example, she shows students the following sentences from the text and explains that the definition of a challenging word can be embedded within the sentence (in an appositive phrase set off by commas), or in a phrase following the challenging word: *Because **ammonium nitrate**, the main ingredient in explosives, happens to be an excellent source of **nitrogen**. And nitrogen is one of the main ingredients in fertilizer*.)

Mrs. Massimo also points out that the connector *because* introduces a dependent clause—that is, a clause that should be combined with a complete sentence—yet here the clause stands alone.

Mrs. Massimo: Why do you think the author chose to do this? Take a look at the text and briefly talk with your group. (Waits for 30 seconds.)

Tom: The sentence that comes before it is a question, "How can a weapons plant make fertilizer?" so he's just answering his question.

Vignette 6.3. You Are What You Eat
Close Reading of an Informational Text
Integrated ELA/Literacy and ELD Instruction in Grade Seven (cont.)

Mrs. Massimo: Is that the style we usually see in an academic text we're reading?

Tom: No, it seems like he's trying to make it seem like he's having a conversation with us, like he's being more informal.

Mrs. Massimo: Yes, in everyday conversation, responding to a question and starting with *because* is natural. This passage is helping to define unfamiliar terms and concepts by using a more conversational style. That leaves us with an incomplete sentence, but Pollan is making this choice deliberately. He's really thinking about the audience when he chooses to write like that. He wants to connect with his readers by using a more conversational tone. When you're having a conversation, and even when you write sometimes, you can also make that choice. But you also need to consider your audience and remember that usually, when you're writing for school, you need to use complete sentences.

Next Steps

After the lesson, Mrs. Massimo again pulls aside her two English learners at the Emerging level to ensure that they understood the critical points of the text. She reviews their journal notes and has a brief discussion with them, clarifying as needed and reinforcing the meanings of some of the vocabulary used that day.

Later on in the unit, Mrs. Massimo will guide the students to write arguments about topics related to the "You Are What You Eat" theme. As they write, students will use a rubric to ensure that their arguments support their claims with clear reasons and relevant evidence, maintain a formal style, and use appropriate text structure and organization.

Vignette 6.4. Analyzing Arguments: Text Organization and the Language of Persuasion
Designated ELD in Grade Seven

Background

During designated ELD, Ms. Quincy, the school's English as an additional language specialist, teaches a class of English learners, most of whom are at the Expanding level of English language proficiency. Many are long-term English learners, that is, they have been in U.S. schools since the elementary grades, but have not yet reached academic proficiency in English, according to state assessments. A few English learners in this class are at the Emerging level of English language proficiency. They have been in the country for a little over a year, are progressing well, and are already fairly fluent in everyday English. All of the students experience challenges using academic English when writing academic papers or providing oral presentations. Ms. Quincy uses grade level texts to help students strengthen their use of academic language in both writing and speaking.

Lesson Context

Ms. Quincy collaborates with an interdisciplinary team that includes Mrs. Massimo, the ELA teacher, on a series of lessons where students read informational texts for the cross-disciplinary thematic unit on food, nutrition, and agriculture, "You Are What You Eat." Ms. Quincy and Mrs. Massimo worked together to design a series of designated ELD lessons that build into and from the interdisciplinary unit. They want to ensure their English learners will be successful with the literacy tasks they engage in throughout the unit and will be well prepared for the culminating task: a written argument supported by evidence from the texts and multimedia they used to research the topic.

Both teachers have noticed that many of the English learners in Mrs. Massimo's class are challenged by some of the academic texts they are reading and by the short writing assignments that are leading toward the research project. As the unit progresses, Ms. Quincy adjusts her lessons to ensure that students receive sufficient scaffolding to meet the high expectations she and Mrs. Massimo hold for them. In today's lesson, Ms. Quincy will begin guiding the students to analyze several mentor texts—in this case, arguments written by previous students, as well as newspaper editorials. The class will be looking closely at the language resources the writers used to persuade readers to think a certain way or take specific action. The learning target and CA ELD Standards for today's lesson are the following:

Vignette 6.4. Analyzing Arguments: Text Organization and the Language of Persuasion
Designated ELD in Grade Seven (cont.)

Learning Target: Students will analyze a written argument, focusing on the text structure and organization and language resources strategies used to persuade an audience. They will engage in discussions about the text's structure and language resources.

CA ELD Standards (Expanding): *ELD.PI.7.1 – Contribute to class, group, and partner discussions by following turn-taking rules, asking relevant questions, affirming others, adding relevant information, and paraphrasing key ideas; ELD.PI.7.4 – Adjust language choices according to purpose (e.g., explaining, persuading, entertaining), task, and audience; ELD.PII.7.1 – Apply understanding of the organizational features of different text types (e.g., how narratives are organized by an event sequence that unfolds naturally versus how arguments are organized around reasons and evidence) to comprehending texts and to writing increasingly clear and coherent arguments, informative/explanatory texts and narratives; ELD.PII.7.2b – Apply growing understanding of how ideas, events, or reasons are linked throughout a text using a variety of connecting words or phrases (e.g., for example, as a result, on the other hand) to comprehending texts and writing texts with increasing cohesion.*

Lesson Excerpts

Ms. Quincy begins by activating students' background knowledge about persuasion and argumentation by asking them to discuss the following question with a partner:

> *Have you ever tried to persuade someone to do something? What did you say? How did you say it? Did it work?*

After the students have had a couple of minutes to discuss the questions, she explains the purpose of constructing arguments.

Ms. Quincy: When we make an argument, our purpose is to persuade someone to think a certain way or to do something. You're very familiar with trying to persuade people with good reasons in a conversation. The way we persuade people in a conversation is different from the way we persuade others in writing. When we write to persuade others, there are certain language resources we can use to construct a strong argument. We're going to take a look at those language resources, and we're going to look at how an argument is structured so that you can write arguments later in this unit.

Ms. Quincy distributes copies of an argument written by a student the previous year. She also displays the text using a document camera. She begins by having the students read the text chorally with her. The content of the text is familiar because the class is in the middle of the thematic unit on food, nutrition, and agribusiness. Nevertheless, she ensures that they understand the general idea of the text by telling them that the text is an argument that was written as a school newspaper editorial about serving organic foods in the cafeteria. She tells them that as they analyze the text structure, they will comprehend the text more fully.

Vignette 6.4. Analyzing Arguments: Text Organization and the Language of Persuasion
Designated ELD in Grade Seven (cont.)

Next, she shows them the text structure and organization of the mentor text by breaking the text up into meaningful chunks. She draws a line to separate each large chunk, or *stage*, and in the left-hand column, she explains that they will use the terms *position statement, arguments,* and *reiteration of appeal* to indicate what these stages are. Under each stage, she writes what the *phases* of each stage are and explains that the phases show where the writer is making deliberate choices about how to use language to get her idea across. Knowing where the stages and phases are, she explains, will help them to understand the argument, and it will also give them ideas about how to structure their own arguments. She has the students write the stages and phases on their copy of the text.

Stages (bigger chunks) and *Phases (smaller chunks inside stages)*	**Title:** ***"Our School Should Serve Organic Foods"***
Position Statement *Issue* *Appeal*	All students who come to Rosa Parks Middle School deserve to be served healthy, safe, and delicious food. Organic foods are more nutritious and safer to eat than non-organic foods, which are treated with pesticides. Our school *should* serve only organic foods because it's our basic right to know that we're being taken care of by the adults in our school. Organic foods *might* be more expensive than non-organic foods, but I think we can all work together to make sure that we eat only the healthiest foods, and that means organic.
Arguments *Point A* *Elaboration*	**Eating organic foods is safer for you because the crops aren't treated with chemical pesticides like non-organic crops are. According to** a recent study by Stanford University, 38% of non-organic produce had pesticides on them compared with only 7% of organic produce. Some scientists say that exposure to pesticides in food is related to neurobehavioral problems in children, like ADHD. Other studies show that even low levels of pesticide exposure can hurt us. I definitely don't want to take the risk of poisoning myself every time I eat lunch.

Vignette 6.4. Analyzing Arguments: Text Organization and the Language of Persuasion Designated ELD in Grade Seven (cont.)

Point B Elaboration	**Organic food is more nutritious and healthier for your body.** The Stanford University study also reported that organic milk and chicken contain more omega-3 fatty acids than non-organic milk and chicken. Omega-3 fatty acids are important for brain health and also might help reduce heart disease, so we should be eating foods that contain them. **According to** Michael Pollan and other experts, fruits and vegetables grown in organic soils have more nutrients in them. They also say that eating the fruits and vegetables close to the time they were picked preserves more nutrients. This is a good reason to get our school food from local organic farms. Eating local organic foods helps keep us healthier, and it also supports the local economy. We *might* even be able to get organic crops cheaper if we work more with local farms.
Point C Elaboration	**Organic foods are better for the environment and for the people who grow the food.** Farmers who grow organic produce don't use chemicals to fertilize the soil or pesticides to keep away insects or weeds. **Instead,** they use other methods like beneficial insects and crop rotation. This means that chemicals won't run off the farm and into streams and our water supply. This helps to protect the environment and our health. **In addition,** on organic farms, the farmworkers who pick the food aren't exposed to dangerous chemicals that *could* damage their health. This isn't just good for our school. It's something good we *should* do for ourselves, other human beings, and the planet.
Reiteration of Appeal	**To put it simply,** organic foods are more nutritious, safer for our bodies, and better for the environment. But there's another reason we *should* go organic. It tastes better. Non-organic food can sometimes taste like cardboard, but organic food is always delicious. When I bite into an apple or a strawberry, I want it to taste good, and I don't want a mouthful of pesticides. Some people *might* say that organic is too expensive. I say that we can't afford to risk the health of students at this school by not serving organic foods. **Therefore,** we *must* find a way to make organic foods part of our school lunches.

Source

California Department of Education. 2014. "Table 5.2 Example of Argument Text Structure." *California English Language Development Standards: Kindergarten Through Grade 12,* 166. Sacramento, CA: California Department of Education.

Once the students have the stages of their arguments delineated, Ms. Quincy models how she locates key sentences, which she highlights:

Vignette 6.4. Analyzing Arguments: Text Organization and the Language of Persuasion
Designated ELD in Grade Seven (cont.)

- **The position statement:** All students who come to Rosa Parks Middle School deserve to be served healthy, safe, and delicious food.
- **The issue:** Organic foods are more nutritious and safer to eat than non-organic foods, which are treated with pesticides.
- **The appeal:** Our school should serve only organic foods because it's our basic right to know that we're being taken care of by the adults in our school.

She underlines the arguments and briefly notes that the rest of the paragraphs elaborate on the arguments.

Ms. Quincy: We're going to be looking at text structure and organization a lot over the next couple of weeks, so if things aren't clear right now, don't worry. What I want to spend most of our time on today is all the different kinds of language resources you can use when you write an argument. We'll be looking several arguments that some students your age wrote, as well as some newspaper articles that are arguments so that you can see that there are a lot of language resources to choose from.

Thyda: What do you mean by "language resources?"

Ms. Quincy: A *resource* is something you can use to do something. Language resources are words or groups of words that help you make meaning and accomplish particular goals with language. Some language resources help you put ideas together in sentences, like when you use the words *and* or *but* or *because*. Other resources help you to be precise, for example, when you use specific vocabulary words. Because we're focusing on argumentative texts, we're going to explore which kinds of language resources are used in arguments to make a text more persuasive.

Ms. Quincy models how she identifies language resources by reading the first paragraph. She stops at the word *should*. She highlights the word and points out that it is a modal verb that expresses the point of view of the author. The word *should*, she points out, makes the statement much stronger than if the author had used the words *could* or *can*. The modal *should* tells us what the author thinks is right or best; the modals *could* and *can* simply tell us what the author thinks is possible.

She writes this observation in the margin. Next, she asks the students to work together in pairs to explore the rest of the text, paragraph by paragraph, and to work collaboratively to identify other language resources that make the text persuasive. She asks them to underline important terms or moves the writer makes, agree on how and why the language is persuasive, and write their ideas in the margin. (She has each student at the Emerging level of English language proficiency work with two other students at the Expanding level whom she knows will support and include them in the task.) As the students are exploring the text, she walks around the classroom to provide support when needed and observe which language features and resources they notice.

Vignette 6.4. Analyzing Arguments: Text Organization and the Language of Persuasion
Designated ELD in Grade Seven (cont.)

Samuel: "According to a recent study by Stanford University"—it seems like they're using that to show there's proof.

Mai: It seems like they're using what?

Samuel: The words at the beginning, "according to."

Mai: Yeah, because after that they have some numbers about pesticides, "38% of non-organic produce had pesticides on them compared with only 7% of organic produce." If they just said that, without *according to*, then it sounds less important or official.

Samuel: Let's underline that and say it makes it sound important and official.

Ms. Quincy: Can you say a little more about that? What do you mean by "important and official"?

Mai: It's like, he can say the numbers, but when you say "according to a study," then that means there's evidence.

Samuel: Or if you say "according to a scientist," that means someone important thinks it's true.

Ms. Quincy: Like an expert?

Samuel: Yeah, a scientist is like an expert on things, and a study is like evidence, so if you say "according to" that expert or that evidence, that makes your argument stronger.

Ms. Quincy carefully observes students at the Emerging level of proficiency and steps in when extra scaffolding is needed. She will also check in with these students at the end of class to ensure that they understood the purpose of the task and the ideas discussed.

After ten minutes of exploration, Ms. Quincy pulls the class together and asks them to share their observations. She writes their observations on chart paper so that the students can continue to add their ideas over the next two weeks and can refer to the chart when they begin to construct their own arguments.

Vignette 6.4. Analyzing Arguments: Text Organization and the Language of Persuasion Designated ELD in Grade Seven (cont.)

Language Resources Useful for Writing Arguments		
Language resource and examples	**Example from the text**	**What it does**
According to + (noun or pronoun), statement.	**According to** Michael Pollan and other experts, fruits and vegetables grown in organic soils have more nutrients in them.	Lets you cite evidence or an expert; makes it sound more official
Modal verbs: should, would, could, might, may, must	Our school *should* serve only organic foods . . . Organic foods *might* be more expensive . . .	Makes statements stronger or softer; lets the reader know that you believe something or doubt it's true
Judging words: deserve, basic right, more nutritious, safer	. . . it's our *basic right* to know that we're being taken care of by the adults in our school.	Shows how the author is judging or evaluating things
Precise words and academic words: nutritious, organic produce	Some scientists say that *exposure* to *pesticides* in food is *related to neurobehavioral problems* in children, like ADHD.	Makes the reader think you know what you're talking about and gets at the meaning you want

Ms. Quincy points out that there's an important reason for using terms like *according to*.

Ms. Quincy: I agree that it does make the writing seem more *official*. But there's an important reason why we use terms like *according to*. We have to attribute facts to their source. That means that we have to say where the facts came from, and *according to* is one way to do that. Facts aren't always just facts. They come from somewhere or from someone, and we have to make judgments about where they came from – the source. We have to decide if the source is *credible*, or rather, if the source knows enough to be able to give us these facts. There are lots of ways to do this. For example, we could also say something like, "Scientists at Stanford found that . . ."

The students have also noted that there are some words that help to connect ideas (create cohesion or flow) within the text. In their planning, Mrs. Massimo and Ms. Quincy had anticipated this, so they created a chart that they would each use in their classrooms to support students' use of cohesive devices. Ms. Quincy records the *text connectives* that

Vignette 6.4. Analyzing Arguments: Text Organization and the Language of Persuasion
Designated ELD in Grade Seven (cont.)

students identify *(in addition, instead, to put it simply, therefore)* and provides them with other text connectives that are useful for creating cohesion. (The class will add additional terms to the chart over time.)

Why use?	Which text connectives to use (to help create cohesion)
adding ideas	*in addition, also, furthermore*
sequence	*first of all, finally, next, then, to begin with, lastly*
example	*for example, to illustrate, for instance, to be specific, in the same way*
results	*as a result, as a consequence, consequently, therefore, for this reason, because of this*
purpose	*to this end, for this purpose, with this in mind, for this reason(s)*
comparison	*like, in the same manner (way), as so, similarly*
contrast	*instead, in contrast, conversely, however, still, nevertheless, yet, on the other hand, on the contrary, in spite of this, actually, in fact*
summarize	*to put it simply, in summary, to sum up, in short, finally, therefore, as you can see*

Next Steps

Over the next two weeks, Ms. Quincy will continue to work with students to analyze other mentor texts, deconstruct some of the sentences in them, and discuss the language resources used by the authors of these texts. Once the students have had many opportunities to analyze these texts, she will guide them to help her co-construct an argument on the theme, employing the text structure and organization of arguments as well as some of the language resources they have identified.

When Ms. Quincy and Mrs. Massimo meet for collaborative planning later that week, they discuss how the lesson went. Ms. Quincy shares that the students responded well but that there were some questions that were difficult to answer. Mrs. Massimo invites Ms. Quincy to come into her ELA class the following week to co-teach a lesson on language resources in arguments so that she can learn how to show all of her students ways to identify and use the language of persuasion. With both of them working on this area of language development, Mrs. Massimo suggests, perhaps some of the students' questions will become easier to answer.

Vignette 6.5. Freedom of Speech: Collaboratively Analyzing Complex Texts Integrated ELA/Literacy, ELD, and History/Social Studies Instruction in Grade Eight

Background

Mr. Franklin, an eighth-grade English teacher, Ms. Austin, his social studies colleague, and Mrs. García, the school's English language development specialist, frequently collaborate on interdisciplinary projects. Mrs. García frequently plans with the teachers and coteaches some lessons in order to support the students who are ELs, most of whom are at the Bridging level of English language proficiency, as well as students who are newly reclassified as English Proficient. Recently, the teachers decided to work together to address an issue that came up in their classes. Two weeks ago, the school principal asked a student to change her T-shirt because, according to the principal, it displayed an inflammatory message. Some students were upset by the principal's request and felt that their right to freedom of speech had been violated, citing the U.S. Constitution. Their position was that the T-shirt was an expression of their youth culture and that they had a right to display such sentiments.

Eager to use this *teachable moment* to promote critical thinking, content understandings, and disciplinary literacy, the teachers worked together to create a series of lessons on the First Amendment so that their students would be better equipped to first determine whether or not their First Amendment rights had, in fact, been violated, and, if so, engage in civil discourse in order to attempt to persuade the principal that he should reconsider his decision. While the teachers plan to discuss how the First Amendment establishes five key freedoms of expression for Americans—freedom of religion, freedom of speech, freedom of press, freedom to assemble peacefully, and freedom to petition the government—they will delve most deeply into what is most relevant to the students at the moment: freedom of speech.

Lesson Context

The two-week long unit that the teachers designed includes reading and discussing primary and secondary sources, viewing multimedia, writing short texts, and engaging in a debate. The culminating writing task is a jointly constructed letter to the principal advocating for particular decisions and actions regarding students' free speech, an idea that the teachers and principal feel is a purposeful goal for student learning. Mr. Franklin and Ms. Austin have selected three documents for close reading and analysis.

They agree that in her social studies class, Ms. Austin will review the events leading up to the writing of the Constitution and facilitate students' reading of the First Amendment of the Bill of Rights. She will also engage them in learning about the role of the Supreme Court in cases related to the First Amendment. In English class, Mr. Franklin will facilitate students' reading and discussion of four Supreme Court decisions: *Tinker v. Des Moines Independent Community School District, Bethel School Dist. No. 403 v. Fraser, Morse v. Frederick,* and *Hazelwood School District v. Kuhlmeyer*. Each text is about one page long and is at a text complexity level suitable for students at this grade level. Mr. Franklin will guide students in a highly structured reading of *Tinker v. Des Moines* and then facilitate an expert group jigsaw for reading the three other cases. The close reading tasks in conjunction with additional research they will conduct will prepare the students to engage in a classroom debate about the topic.

Vignette 6.5. Freedom of Speech: Collaboratively Analyzing Complex Texts Integrated ELA/Literacy, ELD, and History/Social Studies Instruction in Grade Eight (cont.)

The teachers' goal is to help students begin to formulate a position about the rights and restrictions of free speech in public schools and convey this position through spoken and written language using textual evidence to support their ideas. In preparation for the lessons, the teachers will analyze the texts in order to clarify their understandings. The school's English language development specialist, Mrs. García, helps her colleagues identify language and concepts that may be particularly challenging for some of their EL students, as well as for other culturally and linguistically diverse students. She also has an opportunity to learn more about the content the teachers are teaching so that she can help her students make connections to it during designated ELD. Excerpts from the four texts the teachers examine follow.

- **First Amendment to the U.S. Constitution of the United States (1791)**

  "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press, or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances."

- **Tinker v. Des Moines (1969)**

  Court Ruling: Student expression may not be suppressed unless it substantially disrupts the learning environment.

  In December 1965, John and Mary Beth Tinker of Des Moines, Iowa, wore black armbands to their public school as a symbol of protest against American involvement in the Vietnam War. When school authorities asked the students to remove their armbands, they refused and were subsequently suspended. The Supreme Court decided that the Tinkers had the right to wear the armbands, with Justice Abe Fortas stating that students do not "shed their constitutional rights to freedom of speech or expression at the schoolhouse gate."

- **Bethel School Dist. No. 403 v. Fraser (1987)**

  Court Ruling: Schools may sanction students for using indecent speech in educational settings.

  A student who gave a sexually suggestive speech at a high school assembly was suspended. The Supreme Court ruled that offensively vulgar, lewd, and indecent speech is not protected by the First Amendment and that school officials could sanction students for this type of speech since they need to have the authority to determine appropriate speech for educational environments, stating that the "constitutional rights of students in public school are not automatically coextensive with the rights of adults in other settings."

Vignette 6.5. Freedom of Speech: Collaboratively Analyzing Complex Texts Integrated ELA/Literacy, ELD, and History/Social Studies Instruction in Grade Eight (cont.)

- **Hazelwood v. Kuhlmeier (1988)**

  Court Ruling: Administrators may edit the content of school newspapers.

  In May 1983, Hazelwood East High School Principal Robert Reynolds removed pages from the school newspaper because of the sensitive content in two of the articles. The articles covered teenage pregnancy at the school and the effects of divorce on students. The Supreme Court decided that Principal Reynolds had the right to such editorial decisions, as he had "legitimate pedagogical concerns."

- **Morse v. Frederick (2007)**

  Court Ruling: School officials can prohibit students from displaying messages or engaging in symbolic speech that promotes illegal drug use.

  At a school-supervised event, student Joseph Frederick displayed a banner that read "Bong Hits 4 Jesus," a slang reference to smoking marijuana. Deborah Morse, the school's principal, confiscated Frederick's banner and suspended him from school for ten days, citing a school policy that bans the display of material advocating illegal drug use. Frederick sued, and the Supreme Court ruled that school officials can prohibit students from displaying messages that promote illegal drug use.

The learning target for the first few days of lessons and the focal standards follow.

Learning Target: Students will analyze four landmark court cases about students' First Amendment rights to free speech to determine to what extent these rights are protected.
CA CCSS for ELA/Literacy: *RI.8.1 – Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text; RI.8.2 – Determine a central idea of a text and analyze its development over the course of the text, including its relationship to supporting ideas; provide an objective summary of the text; SL.8.1c – Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion; L.8.4c – Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning or its part of speech.*
CA ELD Standards (Bridging): *ELD.PI.1 – Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion; ELD.PI.2 – Adjust language choices according to task (e.g., facilitating a science experiment, providing peer feedback on a writing assignment), purpose, and audience; ELD.PI.6a – Explain ideas, phenomena, processes, and text relationships (e.g., compare/contrast, cause/effect, problem/solution) based on close reading of a variety of grade-level texts and viewing of multimedia with light support.*
Related CA History–Social Science Standards: *8.2 Students analyze the political principles underlying the U.S. Constitution and compare the enumerated and implied powers of the federal government.*

Vignette 6.5. Freedom of Speech: Collaboratively Analyzing Complex Texts Integrated ELA/Literacy, ELD, and History/Social Studies Instruction in Grade Eight (cont.)

Lesson Excerpts

Mr. Franklin provides an overview of the unit, telling them that, over the next two weeks, they will engage in a variety of reading, writing, discussing, and viewing tasks in order to learn more about their freedom of speech rights, so they can articulate an informed civil response to the principal's decision. He explains that, today, they will begin reading about one of several court cases that provide information about freedom of expression in public schools. The *big question* they will be considering is the following:

> ***Should students be allowed to express any message or point of view while they are at school?***

He posts this big question on the wall, in a section that he has prepared for posting terms and photographs related to the unit, as well as current news articles related to free speech. He previews several terms (such as *symbolic act, prohibit, majority opinion, minority opinion, exercise rights, in favor of*) from the texts, which he suspects will be challenging or new for them, and he also highlights some words for which they may know other meanings than those that are in the text (e.g., *exercise*). He provides the students with a First Amendment Cases *terms sheet*, which contains the words, their definitions, and an example of each term in use.

Mr. Franklin briefly previews the content of the short Tinker v. Des Moines text, and he provides a quick overview of the historical context for the case (the Vietnam War, the 1960s). He shows the students photographs of anti-war protests in the U.S. and a short video (http://www.youtube.com/watch?v=SqQvygBVSxA) about the case made by a high school student. He asks the students to discuss their initial impressions about the case so far in their table groups.

He then asks the students to follow along as he reads the *Tinker v. Des Moines* text aloud, referring to their terms sheet as needed. Before reading, he asks them to try to get the big ideas in the text and not to worry too much about the details, and he lets them know that they will be reading the text two more times. As he reads, he stops at strategic points to explain terms and model good reading behaviors, such as stopping to summarize what he has read or to figure out what challenging words mean. After he reads, he asks students to turn to a partner and briefly discuss what they think the text is about. He acknowledges that the text is challenging, both in terms of content and the structure.

> Mr. Franklin: This is a pretty complex text, and you might not know every single word or understand everything perfectly the first time you listen to or read it. With texts like this one, you need—even I need—to read it several times because there are lots of layers to it. That's the kind of reading we're going to be doing: layered reading. I like to call it that because each time you go back to the text and read it again; you peel away additional layers of meaning, just like you can pull away the layers of an artichoke.

As he explains, he pulls out a real artichoke. He tells them that in order to get to the heart of the artichoke, he has to work at it, peeling away the outer layers and then the inner layers, and then, when he gets to the center, he has to do some additional peeling to get to the heart. He shows them a photo of a peeled artichoke with all of the leaves piled high on a plate.

Vignette 6.5. Freedom of Speech: Collaboratively Analyzing Complex Texts Integrated ELA/Literacy, ELD, and History/Social Studies Instruction in Grade Eight (cont.)

Mr. Franklin: What's interesting to me is that once I've peeled away the layers, there's more on my plate than when I started peeling. That's how it is when you read a text very closely, in a layered way: you end up understanding more about the text each time you read it, with more on you plate than when you started.

He provides his students with a handout of *focus questions*, and he discusses the questions with them to make sure they understand what to look for. The focus questions for the Tinker v. Des Moines text are provided below:

Tinker v. Des Moines Focus Questions

1. What was the case about?
2. How did the three students involved in this case participate in expressing "symbolic speech?"
3. How did the school try to justify *prohibiting* the students' rights to free speech?
4. Why did the Supreme Court rule in favor of the students and say that the school did **not** have just cause (fair reasons) for banning the armbands?

He asks students to read the short text independently, writing their comments in the margins of the text as well as taking notes on the focus questions handout. Each student has a dictionary to look up unfamiliar words as they read independently, including bilingual dictionaries for students who choose to use them. (Earlier that morning during designated ELD, Mrs. García previewed the text and the focus questions for the EL students at the late Emerging and early Expanding levels of English language proficiency.)

Next, Mr. Franklin asks them to read the text again with a partner, taking turns reading chunks of the text and adding notes to their focus questions handout. Mr. Franklin then asks each pair of students to join one or two other pairs to discuss their notes. As they engage in discussions, he listens in to determine how they are interpreting the information and where they might need assistance. Julissa, Caitlin, Sirtaj, and Liam are discussing the text at their table.

Julissa: Caitlin and me said that the Supreme Court ruled for the students because they were quiet and not making any problems when they were wearing the armbands. They weren't – what did it say (looking at her notes) – they weren't disrupting the school activities.

Caitlin: Yeah, can I add something? There's something here about that, about them not disrupting what was happening in school. The judges said, "There is no indication that the work of the schools or any class was disrupted . . . there were no threats or acts of violence on school premises." So, the Supreme Court ruled in their favor because they weren't really interfering with the other students' rights.

Vignette 6.5. Freedom of Speech: Collaboratively Analyzing Complex Texts Integrated ELA/Literacy, ELD, and History/Social Studies Instruction in Grade Eight (cont.)

Sirtaj: I think that's why the school was wrong. The Supreme Court said that they had to protect the free speech at school, for the students' free speech. Here it says, ". . . students are entitled to freedom of expression of their views . . ." and here, it says that what the school did "is not constitutionally permissible."

Caitlin: What does that mean? *Constitutionally permissible*?

Julissa: It sounds like permission. Like they don't have permission to do that.

Caitlin: So, they don't have the permission to do that in the Constitution?

Liam: Yeah, I think that's what that means. So schools can't tell students not to wear something unless they have evidence that it's disrupting what's happening in the school or that it's interfering with the rights of other students. If they don't have evidence, then it's not permitted in the Constitution.

Mr. Franklin: Can you say a bit more about why the Supreme Court ruled in favor of the students?

Julissa: The judges said that the students weren't hurting anyone at the school when they were wearing the armbands. They were just expressing their beliefs about the Vietnam War in a peaceful way. They weren't saying it, but they were showing it in a (looking at her notes), in a *symbolic way*.

Mr. Franklin: And what was guiding the Supreme Court's decision?

Julissa: It just wasn't fair. It wasn't . . . it wasn't fair in the First Amendment, and the judges had to look at the First Amendment when they decided if it was fair.

The groups continue to discuss the focus questions, going back into the text to find evidence and clarify their thinking. To wrap up the day's lesson, Mr. Franklin asks his students to spend time discussing and responding to the following question at their table groups:

How might a school justify *protecting* its students' rights to free speech?

Now that Mr. Franklin's students have had an opportunity to use the *layered reading* process on one text, the next day, he has them follow the same reading process with three other texts. This time, however, he splits the class into three groups. Each group reads only one of three cases (*Bethel School Dist. No. 403 v. Fraser*, *Morse v. Frederick*, or *Hazelwood School District v. Kuhlmeyer*). They have an opportunity to discuss the focus questions and the text with an *expert partner* (another student who has read the same text), and then a second time with an *expert group* composed of four to six students who likewise have read the same text. The following day, they meet in *jigsaw groups* composed of six students. Each jigsaw group includes two students who read each text; each pair shares what they learned from their particular text and also listens and learns from the other dyads about the two texts that they did not read.

Vignette 6.5. Freedom of Speech: Collaboratively Analyzing Complex Texts Integrated ELA/Literacy, ELD, and History/Social Studies Instruction in Grade Eight (cont.)

Once the students have had a chance to delve deeply into the four texts by reading them closely and discussing them in depth, they apply this knowledge in a variety of ways in collaboration with others: conducting additional research on the case that interests them the most, writing a script for and recording a newscast on the case, engaging in a debate about the big question, writing a letter to the principal and discussing it with him. The outline for this two-week mini-unit follows.

Freedom of Speech Mini-Unit

Day 1	Day 2	Day 3
Whole group and small group reading: Tinker v. Des Moines • Preview the two-week unit, discuss new terms • Read aloud • Students read independently and take notes on focus questions handout • Students read the text a second time with a partner • Students discuss notes in their table groups • Facilitate whole group discussion	*Expert group jigsaw: the three other court cases* • Students read one text independently with handout of focus questions • Students read the text a second time with an expert group partner • Students meet in expert groups (four to six students) to discuss the text • Students reread the text a third time for homework, highlighting any ideas or phrases that are still confusing • Students do a quickwrite summary of the text • Teach vocabulary in depth: *justify, prohibit, protection*	*Expert group jigsaw (continued)* • Students meet in their expert groups and agree on specific information that they will all share in their jigsaw groups • Students meet in jigsaw groups (six students) to discuss three texts • Students go back to their expert groups to compare their jigsaw group notes • Debrief with whole class to clarify understandings • Students do a quickwrite summary of the three texts

Vignette 6.5. Freedom of Speech: Collaboratively Analyzing Complex Texts Integrated ELA/Literacy, ELD, and History/Social Studies Instruction in Grade Eight (cont.)

Freedom of Speech Mini-Unit		
Day 4 *Research* • Students choose the court case that they are most interested in to research further in groups. • Students conduct Internet research to gather additional information about the case (teacher has bookmarked sites as a start) • Students take notes using a notetaking handout	**Days 5–6** *Newscasts* • Show a model newscast about a court case • Facilitate a discussion about the structure of a newscast and what type of language is used • Students meet in their interest groups and write a short newscast on the court case with required elements • Check in with groups to review the newscast • Students practice their scripts and record their newscasts	**Day 7** *Newscasts (continued)* • Students watch all the newscasts made by members of the class and take notes using a handout on the content and language used • Facilitate discussion about how well the issues were addressed and how persuasive the language was in each of the newscasts
Day 8 *Debate* • Students work in small teams (three for and three against in each team), and use the texts and their notes to support their position regarding the following: "Should students be allowed to express any message or point of view while at school?" • Whole group debate	**Day 9** *Write letter collaboratively* • Students discuss and chart words and phrases important to include in a letter • Facilitate a whole class, jointly constructed letter to the principal • Students rehearse in small groups and discuss letter, referring back to evidence gathered. • Students write a first draft of their own letters to the editor about free speech • Debrief with whole class	**Day 10** *Present letter and write independently* • Students invite the principal in to discuss the letter and engage in dialogue. • Students finish their individual letters in peer editing groups (letters will be posted, and students can choose to send in a copy to the local newspaper)

Vignette 6.5. Freedom of Speech: Collaboratively Analyzing Complex Texts Integrated ELA/Literacy, ELD, and History/Social Studies Instruction in Grade Eight (cont.)

When the students engage in the newscast scriptwriting, Mr. Franklin provides the guidelines. Each script must contain the following:

- A brief overview of the freedoms established by the First Amendment
- A summary of the case
- An explanation of the main points made in the Court's majority opinion
- An explanation of the main points made in the Court's dissenting opinion
- Interviews with key people involved in the case (such as the students involved, parents, school staff, attorneys, but not the Supreme Court justices since they have little or no direct contact with the press)

At the end of the two-week unit, Mr. Franklin facilitates a text jointly written by the whole class: a letter to the principal persuading him to *refine* his approach to limiting students' First Amendment free speech rights. The excerpt below includes evidence from an article the students found during their Internet search:

> We learned that, according to legal scholar Nathan M. Roberts, "administrators when confronted with a student speech issue should now categorize the speech into one of the following four categories: (1) constitutes a substantial disruption; (2) is offensive; (3) is school sponsored or carries the imprimatur of the school; or (4) could be reasonably interpreted as advocating for illegal drug use. Once the speech is categorized, administrators must analyze it under the appropriate standard to determine if it is permissible student expression." We agree with this suggestion, and we invite you to include it in our school's policy.

After the students jointly construct the letter to the principal, Mr. Franklin asks them to write their own letter to either the school or city newspaper. He shows them two recent examples of letters to the editor from the local newspaper that were written by teenagers, and he briefly discusses what the purpose of each letter seems to be, how many words each letter has, and the tone conveyed by each letter. He encourages students to use the letters as models for writing their own. The students have an opportunity to edit their writing with peers, and Mr. Franklin offers to provide further editorial support if they choose to submit their letters to a newspaper.

Next Steps

Mr. Franklin, Ms. Austin, and Mrs. García meet to reflect on the unit and review the individual letters students wrote. They look for patterns in understandings and misunderstandings, so they can clarify as needed in their own classes. For example, Mr. Franklin will address misunderstandings having to do with the readings on court cases, while Ms. Austin will clarify understandings about the First Amendment and the role of the Supreme Court. Mrs. García will work with both teachers to address literacy challenges that students exhibit in their letters (e.g., cohesion, sentence structure, vocabulary), and she will also continue to teach argumentative writing with a focus on language during designated ELD.

Vignette 6.5. Freedom of Speech: Collaboratively Analyzing Complex Texts Integrated ELA/Literacy, ELD, and History/Social Studies Instruction in Grade Eight (cont.)

The teachers observe that students have started noticing many current events related to free speech. For example, one student brought in a newspaper article about a legal resident in the U.S. who was deported to his home country for speaking to the press. The students are eager to delve more deeply into the topic of free speech, and the teachers decide to extend the unit for another week. After surveying the classes, the teachers develop guidelines for a multimedia project (using Prezi or iMovie, for example) that students will create collaboratively in small groups to demonstrate understandings gleaned from the unit and connect those understandings with current events, as well as their own experiences.

Vignette 6.6. Becoming Skillful Debaters
Designated ELD Instruction in Grade Eight

Background

Mrs. García teaches designated ELD to sixteen eighth graders in her school who are at the late Emerging and early Expanding levels of English language proficiency. Mrs. García also meets with a select group of *long-term English learners* (EL students who have been in U.S. schools for more than six years) during seventh period for a disciplinary literacy class. This class includes the involvement of community mentors, positive role models who have committed to building strong relationships with these students through high school graduation with the explicit goal of helping their mentees make deliberate decisions that will eventually enable them to attend college and/or pursue the career of their choice. All EL students have a zero period during which they take an elective; this schedule extends their school day to ensure that they are receiving targeted language instruction without missing out on content classes or electives, such as art and music.

Lesson Context

Mrs. García collaborates with the eighth-grade English and other content area teachers at the school to ensure that the designated ELD instruction students receive is directly aligned with the expectations their teachers have for their students' language use. During their planning, the teachers agree that, due to the fact that they integrate ELD into content instruction, their ELs at the late Emerging and early Expanding levels of English language proficiency who have been in U.S. schools for two to three years, will be able to fully participate in most of the tasks. However, they anticipate that there are some tasks that these students will need additional support for given their particular language learning needs.

The eighth graders are learning about students' First Amendment rights and will be engaging in a variety of literacy tasks to develop and convey their understandings of the topic (see vignette 6.5). One of the tasks students will engage in is a debate about the big question:

> ***Should students be allowed to express any message or point of view while at school?***

The eighth-grade teaching team members determine that their EL students at the late Emerging and early Expanding levels of proficiency would benefit from additional support when engaging in the literacy tasks for the First Amendment unit. In preparation for the series of lessons she will teach, Mrs. García has gathered several short articles about debatable topics. The students will read the articles, discuss them, learn about the language in the articles, learn about language that is useful for debating, and apply their knowledge of the content and language to engage in several debates. Mrs. García's ultimate goal is for her students to be able to engage in debates and persuasive writing tasks in Mr. Franklin's English class, as well as in other content areas. The learning target and focus standards in Mrs. García's lesson plans follow.

Vignette 6.6. Becoming Skillful Debaters
Designated ELD Instruction in Grade Eight (cont.)

Learning Target: Students will read about debating, practice engaging in debates, and discuss language powerful for debates.

CA ELD Standards (Expanding): *ELD.P1.8.3 – Negotiate with or persuade others in conversations (e.g., to provide counterarguments) using learned phrases (I agree with X, but . . .) and open responses; ELD.PI.8.4 – Adjust language choices according to purpose (e.g., explaining, persuading, entertaining), task, and audience; ELD.P1.8.5 – Demonstrate active listening in oral presentation activities by asking and answering detailed questions with occasional prompting and moderate support; ELD.PI.8.11 – a) Justify opinions or persuade others by providing relevant textual evidence or relevant background knowledge with moderate support; b) Express attitude and opinions or temper statements with a variety of familiar modal expressions (e.g., possibly/likely, could/would); ELD.PI.8.12a – Use a growing set of academic words . . . ; ELD.PII.8.1 – Apply understanding of the organizational features of different text types . . . (debate here is seen as a text type; application of other Part II standards, as well).*

Lesson Excerpts

Mrs. García begins by explaining that for the next couple of weeks, they are going to be reading about topics that are *debatable*, that is, people typically have strong opinions about the topic and good reasons to support these opinions. Often, they will write arguments to express their opinions and try to persuade others to do something or at least to think about the topic in different ways. They may also engage in a debate, which can be informal or formal. She tells them that they are going to learn how to engage in more formal debates, which they will be doing a lot of in their content classes. She gives them a brief explanation of what *justify* means in English and provides cognates for the word (where they exist) in students' primary languages (e.g., *justificar* in Spanish) and translations in students' primary languages for those that don't have cognates for the word (e.g., palawang-sala in Filipino).

She gives them examples of times when she has debated with others in everyday life, and then she asks them if they have ever debated an issue with anyone and, if so, how they approached it. She gives them a few moments to think about this, jot down their ideas, and then share with a partner. She also provides sentence frames to support the use of words *debate* and *justify* in their short conversations (I debated about _____ with _____. My opinion was ____, and I justified it by saying ____.)

Mrs. García: Okay, so you can see that in real life, you're engaging in debate, trying to persuade other people to see things from your point of view all the time. So you already know something about debate. Now we're going to discuss how we debate in an academic environment, like school, and we're going to learn how to debate like scholars.

Mrs. García poses the question that is the topic of lessons for the week, and she also writes it on the white board:

Should school be a place for debate?

Vignette 6.6. Becoming Skillful Debaters
Designated ELD Instruction in Grade Eight (cont.)

She clarifies the meaning of the question and then asks students to think about it for a moment and rate the degree to which they agree with the question on a continuum (completely agree, agree, don't have an opinion, disagree, completely disagree) and to jot down a few notes explaining their rating. As they are discussing their responses at their table groups, she reminds them to refer to a chart of *Scholarly Discourse Phrases* in the classroom as they converse. All of the eighth-grade classes have been using and adding to the chart since the beginning of the school year, and Mrs. García notices that her EL students frequently refer to it while conversing with classmates.

Scholarly Discourse Phrases	
To ask for clarification: Can you say more about ___? What do you mean by ____? Can you show me evidence in the text that ___?	*To affirm or agree:* That's an excellent point because ___. What you said about ___ resonated with me because ___.
To build or add on: I'd like to add on to what you said. Also, ___. Another thing I noticed was that ___.	*To disagree respectfully:* I agree with you, but ____. You make a good point, but have you considered ____? I can see your point. However, _____.

After she debriefs with the whole class, she previews the text students will read. The short article contains some content that may be unfamiliar to students (e.g., civil rights movement, boycott), so she explains the ideas. The text also contains many general academic words, and she previews the meaning of some of them. (She will teach eight of the words/terms more intensively over the next two weeks: justify, protest, avoid, bias, perspective, controversy, defined by, issue. She also asks the other eighth grade teachers to use the words as much as they can so that students experience them in different contexts.)

The process she uses to facilitate students' reading of the short text is the following:

- The teacher reads the text aloud as students follow along in their texts.
- Students discuss the big ideas in the text in pairs and then debrief with teacher.
- Students partner read the text.
    - Each partner reads a section.
    - The other partner uses a *Careful Reading Tips* bookmark to clarify understandings of the section.
    - The two briefly discuss their ideas, write questions and notes in the margins, and highlight or circle terms that are unclear.
    - The students swap roles and read the next chunk, continuing this exchange of roles until the whole text has been read.
    - Each pair discusses the questions at the end of the text and goes back to clarify terms and understandings.
- The teacher debriefs with the whole class.

Vignette 6.6. Becoming Skillful Debaters
Designated ELD Instruction in Grade Eight (cont.)

The text and the Careful Reading Tips bookmark follow.

Should School Be a Place for Debate?

In room 207, Mr. Smith is teaching his students about the civil rights movement. He asks the students questions such as, "Who were the freedom riders?" or "What year was the Montgomery bus boycott?" It is easy for students to find the answers in their textbooks. Mr. Smith tells the students whether they are right or wrong. On Friday, they will have a quiz about these facts.

In room 209, Ms. Miles is also teaching about the civil rights movement. She asks her students, "Is peaceful protest the best way to make things change for the better?" The students have a **debate**. Some think Martin Luther King was right to tell **protesters** to **avoid** violence. Others believe that sometimes violence is necessary when people will not listen to reason. They ask Ms. Miles for the right answer, but she says there is no right answer.

Some people believe that kids in school should only learn about facts. These people think students should get information from their textbooks or teacher and memorize it. That way, some argue, everybody will learn the same things and they can all do well on tests.

Other people think **debates** can be hard because there are no right answers. Sometimes everybody learns different things from a **debate**. This makes it hard for teachers to give a test to find out what students have learned. **Debates** also take a lot of time. Teachers who have debates may not be able to cover as many topics in class. Then, students may not learn all of the facts in the textbook.

However, **debates** may help students understand why the facts they learn in school are important. We live in a democracy, where everyone needs to know how to form and **justify** opinions in order to make decisions. Students will not always have a teacher or a textbook to give the right answers, so young people need to learn to think for themselves. Each person has a unique **perspective defined by** his or her knowledge, experience, and attitudes. Even teachers and textbook authors have their own **perspectives**.

Through a classroom **debate**, students hear their classmates' opinions. Students **justify** their opinions with evidence from texts and their own experiences. Sometimes, hearing from classmates who disagree with them makes students learn about their own **biases** and understand a problem in a new way. Hearing classmates' **perspectives** during a debate can help students understand the complexity of many important **issues**. Whether it is better to have teachers teach from the text or to have students engage in **debates** is a continuing **controversy** in education.

What do you think? Should students learn only facts in school? Or should **debates** be an important part of their education?

Vignette 6.6. Becoming Skillful Debaters
Designated ELD Instruction in Grade Eight (cont.)

Careful Reading Tips	
Do	**Say**
Think about what the section means	I'm not completely clear about what this part is about, but I think it might mean . . .
	I think this section might mean __ because __.
Summarize what the section says	What I understand about this section so far is _____.
	The main ideas/events in this section are ___.

After their partner reading, Mrs. García debriefs with the students to clarify understandings and terms. To close the lesson, she asks them to write a paragraph in response to the questions at the end of the reading, and she asks them to read the text again for homework, using an English dictionary or bilingual dictionary to look up words they still do not understand.

The next day, Mrs. García asks students to briefly share what they wrote in table groups and then collects the students' writing. She will analyze it using a framework she has developed based on the CA ELD Standards to determine language areas she needs to focus more intensively on (e.g., combining ideas in sentences, expanding and enriching ideas using adjectives or prepositional phrases).

Mrs. García: Now that you've had a chance to read and think about debates and whether or not debates should happen in school, we're going to debate that issue. In high schools in our district, there's a debate league where teams of students from each school debate controversial issues. In order to be on the debate team, you have to learn how to be a skillful debater. A skillful debater is someone who can justify more than one perspective. For example, a debater might start by arguing that students should study hip-hop lyrics because it's really like poetry. Then, she can change positions and argue that students should not study the lyrics because they make people violent. The skillful debater has to put personal opinions and biases aside and debate the issues using good reasons and evidence to justify the position. The teams that win are the ones that can justify each perspective. That's what you're going to be doing: learning how to be a skillful debater.

She splits the class into two groups and establishes guidelines for debates based on their reading (she fills in what the students do not yet know about debates). Next, she randomly assigns each group a position:

- Debates do not belong in schools. They take too much time and students need to learn a great deal of material.
- Debates belong in schools. Reading from textbooks and listening to lectures is boring for students, so they do not learn the material. Debates would get students interested, so they would learn more.

Vignette 6.6. Becoming Skillful Debaters
Designated ELD Instruction in Grade Eight (cont.)

The process she uses to engage students in the debates is the following:

Debate Process
1. Half of the class discusses their positions while the other half observes and takes notes (fishbowl approach), using two guiding questions to critique the debate: • Are the debaters providing reasoning and evidence? • Are important words from the reading used? 2. The two groups of students switch roles so that the observers (now debaters) get a chance to discuss the issue. The observing group then critiques the debate. 3. The teacher debriefs with the whole class on their use of reasoning and evidence, argumentation, and precise words, as well as their use of scholarly discourse.
Once the students become used to debating, Mrs. García will insert two additional steps after step 2 (so that step 3 above will become step 5): 3. The two groups resume their original roles. This time, they try to apply counterarguments to the positions of the other students. The observing group then critiques the debate. 4. The two groups switch roles so the second group also has an opportunity to try using counterarguments. The observing group then critiques the debate.

Part of the conversation that takes place during the debate is the following:

Dante: I have two things to say. First, I think debates should be used in school because they're more fun for the students.

Phuong: That's an excellent point because it's a lot more fun to talk about things than to just read and write all the time. When you talk about things, you learn more, too.

Celia: I have something to add. In the article, it says that when you debate, you get to hear what other people in your class think, so you get to learn from what they know. You get to hear their perspectives that you might not know.

Dante: Another thing I noticed is that you don't just hear what they say. They have to justify what they think. So for example, in a debate, you really have to pay attention to what people are saying so you can agree or disagree. And you have to be able to say what you really think because you have to justify yourself. I mean, you have to justify your opinion.

Roxana: Also, in some other classes, we just have to sit and listen and be quiet all the time. That's really boring, and sometimes I fall asleep. I think that's a good reason to have debates.

Once the students have practiced debating the issue using steps 1–3, they go back to the guidelines for debating and add to and revise them so they can use the guidelines as a resource for the next debate they will have.

Vignette 6.6. Becoming Skillful Debaters
Designated ELD Instruction in Grade Eight (cont.)

Next Steps

Mrs. García observed her students as they were debating and noticed that they were very engaged in the conversation—whether they were debating or observing—and that they were applying both their understanding of the content as well as their knowledge of English. However, while the issue of debating in schools was a good foundation for discussing debate, she felt that the issue was not that controversial. She plans to provide more frequent opportunities for her students to debate more controversial topics (e.g., Should English be the official language of the United States? How should schools prevent bullying?).

At the end of the week, Mrs. García asks her students to write a response to the question, "Should school be a place for debate?" Using the framework for analyzing writing she developed based on the CA ELD Standards, she compares this response to the one students wrote at the beginning of the week. In her analysis, she finds that not only do most of the students have more to say about the topic, but they are also integrating their knowledge of the language used in the text and debates into their writing. For example, all of the students use the words *justify, debate,* and *perspective*. In addition, in the second writing piece, most students write sentences that are more grammatically complex (e.g., complex sentence, use of prepositional phrases, long noun phrases) than their first writing sample.

Mrs. García meets with the eighth-grade teaching team to share the students' writing and her observations from their debates, and the team uses this information to shape and refine upcoming lessons and projects.

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten

Background

This year at John Muir high school, the tenth-grade world literature teacher, Ms. Alemi, and the tenth-grade world history teacher, Ms. Cruz, have decided to collaborate and align their major units of instruction so that their students can see the connections between the content taught in each discipline. For example, they have noticed that a number of the reading selections and novels for the tenth-grade world literature class would support students' understandings of the historical concepts and time periods addressed in Ms. Cruz's world history course. Before the school year begins, they meet to collaborate, to determine where their curricula already intersect, and then begin planning interdisciplinary units that align content and literacy in the two courses.

One of their tasks is to ensure that the novels, poems, short stories, and other texts that students read in Ms. Alemi's English class are related to and reinforce the ideas taught in Ms. Cruz's history class. They read the texts they will use in the interdisciplinary units ahead of time, analyzing them for their themes and connections to one another, and assessing the texts' linguistic and rhetorical challenges, particularly for their students who are learning English as an additional language. About 30% of the students in their classes are ELs, and most are at the late Expanding and early Bridging levels of English language proficiency. As the two teachers begin implementing the units in their respective classrooms, they meet frequently after school to reflect on successes and challenges and to make refinements based on their observations and assessments of students' conversations and writing tasks.

Ms. Alemi and Ms. Cruz want to help students understand that an author's perspective is socially, historically, and culturally positioned (e.g., Afrocentric versus Eurocentric perspectives). They want students to critically analyze the messages they encounter in texts as they prepare for college and careers and responsible and engaged citizenship. To this end, the teachers employ and teach rhetorical strategies that will enable students to critique texts and to understand how authors leverage literary devices, linguistic resources, and particular rhetorical moves to present their ideas. Teachers also help students consider how writers tell their own stories as they write or rewrite history through varied literary and informational genres.

Lesson Context

Ms. Cruz's tenth-grade world history class is beginning a unit on the era of New Imperialism that took place roughly from the 1830s until the beginning of World War I in 1914. During this period, European powers, the United States, and later Japan sought to build large overseas empires through colonial expansion. She uses the assigned history textbook as the main source for informational and background text for the unit; however, she also has chosen a number of primary sources to include, such as images and cartoons, poems, first-hand accounts, and speeches.

Ms. Cruz begins the world history unit with passages from the primary source *The Dual Mandate in British Tropical Africa* written by Lord Frederick Lugard, the first British governor-general of Nigeria. The book exemplifies the major justifications for European powers building their colonial empires throughout the world and explains the nature of the *dual mandate*, which asserted that both the colonizer and the colonized would benefit from colonial expansion. She provides students with various types of justifications (economic, religious, social Darwinism, etc.) and students work together to pull quotes from the document that exemplify each particular category. Students read information in their textbooks and other sources that

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten (cont.)

discuss the European powers' motivations for colonizing other nations, including case studies of particular areas in Africa (and other countries later in the unit). The students will use the information they gather from primary sources, their textbook, and other readings to write a historical argument on imperialism. The primary investigative question for the world history part of the unit and the learning goals Ms. Cruz has set for her students are as follows:

> **Big Question:** *What is colonization's lasting impact in Africa and Europe?*
>
> **Learning Goals:**
>
> Students will analyze the motives and justifications for imperialism and their validity.
>
> Students will consider the positive and negative impacts of imperialism upon indigenous people and their nations.
>
> Students will explain imperialism from the perspective of the colonizers and the colonized.

Meanwhile, in world literature, Ms. Alemi's students begin a unit on African literature by reading *Things Fall Apart*. Written in 1958 by Nigerian writer Chinua Achebe, the novel takes place in eastern Nigeria at the end of the 19th century and deals with interwoven narratives: that of Okonkwo, a respected tribal leader and *strong man* who falls from grace in his Igbo village, and the clash of cultures and changes in values brought on by British colonialism. The story depicts the life of Okonkwo and his family while also showing the tragic consequences of his actions and portraying events that are beyond his control. In interviews, Chinua Achebe said that hebecame a writer in order to tell the story from his and his people's (the Igbo) perspective. Written in English (the language of the British colonizers), the novel was, in large part, a counter-narrative and response to colonial texts, (e.g., Joseph Conrad's *Heart of Darkness)* which often represent Africans as savages or animals.

In addition to supporting the learning goals Ms. Cruz set for students in world history, Ms. Alemi and Ms. Cruz selected the book because it expands their students' knowledge of world literature and provides students with an opportunity to discover universal messages and themes through the lens of the Igbo people and culture. As the teachers research the novel, they learn that "One of the things that Achebe has always said, is that part of what he thought the task of the novel was, was to create a usable past. Trying to give people a richly textured picture of what happened, not a sort of monotone bad Europeans, noble Africans, but a complicated picture" (Anthony Appiah, Princeton University Professor). The teachers are eager for students to explore these complex ideas and hope to connect them to events currently taking place throughout the world.

Ms. Alemi will facilitate students' deep analytical reading of the novel, which will prepare them to read other texts more carefully and critically, including another novel they will select from contemporary Nigerian literature. Over the course of the unit, Ms. Alemi will engage her students in *digging deeply* into the novel, *branching out* to other texts, and *harvesting* the knowledge they have gained by applying it to other readings. The interactive literacy tasks Ms. Alemi will implement in this unit include the following:

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten (cont.)

Digging Deeply: Together (as a whole class and in small groups), read and discuss the novel, *Things Fall Apart,* by Chinua Achebe and engage in various activities to understand the novel better:

- Examine particular sections of the novel to explore themes, discuss literary and rhetorical choices (e.g., similes, use of Igbo words and phrases), and work to discover Achebe's and the Igbo people's perspectives
- Create an interactive timeline of the novel, tracking the important (and often tragic) events in Okonkwo's life
- Track the themes, motifs, symbols, proverbs, and folktales in the novel
- Storyboard the five Igbo folktales that Achebe incorporates at strategic points in the novel and discuss how they reinforce the storyline and emphasize the values of the Igbo culture
- Engage in debates on questions related to the major themes (e.g., Why does Okonkwo reject all things feminine, and what are the consequences?)
- Read and discuss (in expert jigsaw groups) various expert opinions on the novel
- Consider the impact of Achebe's stylistic choices on themselves as readers
- Jointly construct (as a whole class) a short literary analysis on one theme from the novel

- ***Branching Out:*** Together (as a whole class and in small groups), listen to and discuss some of the following suggested oral and written texts related to *Things Fall Apart* in order to better understand the themes in the novel and the author's perspective:
  - Talks by and interviews with Achebe and other Nigerian novelists giving their perspectives on themes from the novel (e.g., masculinity and femininity, cultural conflict)
    - Interview with Chinua Achebe on the 50th anniversary of the novel
    - TED Talk by Komla Dumor (http://tedxeuston.blogspot.co.uk/2013/03/komla-dumor-at-tedxeuston-2013-telling.html)
    - TED Talk by Chimamanda Adichie (http://tedxtalks.ted.com/video/We-should-all-be-feminists-Chim)
    - Talks at TEDxEuston (which focus on inspiring ideas about Africa) (http://tedxeuston.com/TedxEuston/index.php/joomlaorg) - no longer available
  - Short stories and essays related to the themes and cultural context of the novel (e.g., "The Albino" by Adetokunbo Gbenga Abiola)
  - Hip-hop lyrics that address themes in the novel (e.g., gender roles, relationships, change, injustice)
    - The Roots' "Dear God 2.0" (https://www.youtube.com/watch?v=32Qr5oKKP-M&noredirect=1)
    - Tupac Shakur's "Keep Ya Head Up" (https://www.youtube.com/watch?v=HfXwmDGJAB8)

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten (cont.)

- Emmanuel Jal's "We Want Peace" (https://www.youtube.com/watch?v=g1ZEJWVSiEI&list=PL5689732C28CE51B9)
- Spoken word performances that address themes in the novel (e.g., gender roles, relationships, change, injustice) Suheir Hammad's TED Talk "Poems of War, Peace, Women, Power" (http://www.ted.com/talks/suheir_hammad_poems_of_war_peace_women_power)
- Shane Koyczan's "To this Day" (https://www.youtube.com/watch?v=ltun92DfnPY)

- ***Harvesting:*** In small interest groups (formed by students who select the novel of their choice), engage in *collaborative* literacy projects:
  - *Read and discuss* one other Nigerian novel (e.g., *Graceland* by Chris Abani; *Purple Hibiscus* by Chimamanda Ngozi Adichie), using structured protocols for careful reading and collaborative conversations
  - *Discuss*, in small groups, connections, similarities, and differences (themes, stylistic choices, rhetorical purposes) between Achebe's *Things Fall Apart* and the second novel read by the students
  - *Write* a brief analysis of a connection, similarity, or difference between the two novels citing strong and thorough textual evidence
  - *Compose* an imaginary conversation that Okonkwo might have were he to meet one character from the chosen novel
  - *Write* and refine a literary analysis of the chosen novel, using a class-generated framework of necessary elements (end of unit performance task)
  - *Create* an original media piece based on the written literary analysis exploring one of the themes in depth and creatively using excerpts and/or visuals reflecting images from the novel itself and from the unit in general (e.g., from the essays, short stories, talks, and lyrics) (end of unit performance task)

The learning target and cluster of standards for the first lessons in the world literature unit follow.

Learning Target: Students will explore author's perspectives and cultural experiences reflected in a work of world literature and discuss how history can be revised through writing.
CA CCSS for ELA/Literacy: *RL.9–10.1 – Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text; RL.9–10.2 – Determine a theme or central idea of a text and analyze in detail its development over the course of the text, including how it emerges and is shaped and refined by specific details; provide an objective summary of the text; RL.9–10.3 – Analyze how complex characters develop over the course of a text, interact with other characters, and advance the plot or develop the theme; RL.9–10.6 – Analyze a particular point of view or cultural experience reflected in a work of literature from outside the U.S., drawing on a wide reading of world literature; W.9–10.9 – Draw evidence from literary or informational texts to support analysis, reflection, and research; W.9–10.10*

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten (cont.)

– Write routinely over extended time frames and shorter time frames for a range of tasks, purposes, and audiences; SL.9–10.1a – Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas; L.9–10.3 – Apply knowledge of language to understand how language functions in different contexts, to make effective choices for meaning or style, and to comprehend more fully when reading or listening.
CA ELD Standards (Bridging): *ELD.PI.9–10.3 – Negotiate with or persuade others in conversations in appropriate registers using a variety of learned phrases, indirect reported speech, and open responses to express and defend nuanced opinions; ELD. PI.9–10.6b – Explain inferences and conclusions drawn from close reading of grade-level texts and viewing of multimedia using a variety of verbs and adverbials; ELD.PI.9–10.8 – Explain how a writer's or speaker's choice of a variety of different types of phrasing or words produces nuances and different effects on the audience; ELD.PI.9–10.11a – Justify opinions or persuade others by making connections and distinctions between ideas and texts and articulating sufficient, detailed, and relevant textual evidence or background knowledge, using appropriate register.*
Related CA History–Social Science Standards: 10.4 Students analyze patterns of global change in the era of New Imperialism in at least two of the following regions or countries: Africa, Southeast Asia, China, India, Latin America, and the Philippines. 10.4.3. Explain imperialism from the perspective of the colonizers and the colonized and the varied immediate and long-term responses by the people under colonial rule.

Lesson Excerpts

To leverage her students' background knowledge from their history class and to contextualize the novel *Things Fall Apart*, Ms. Alemi displays a map of Africa and draws her students' attention to Nigeria (https://www.learner.org/series/invitation-to-world-literature/things-fall-apart/things-fall-apart-map-timeline/). She explains how the country's borders were created as a result of new imperialism in Africa, which students have been learning about in their history class. She asks students to briefly discuss at their tables what they recall from the discussion they had in history class about Lord Lugard's *Dual Mandate*, and she listens to their conversations to determine which ideas they currently grasp. She then explains that the novel they will be reading is partly about the clash of cultures brought on by British colonialism in Nigeria, told through the story of one man from an Igbo village who conveys a perspective shared by many Igbo people. To orient students to elements of the Igbo culture, she shows them a brief video clip of a traditional Igbo ceremony performed by a contemporary dance troupe (https://www.youtube.com/watch?v=i2TUWa2T0QI) .

Ms. Alemi: The author of *Things Fall Apart*, Chinua Achebe, used an African proverb to explain the danger of having one's story told only by others: "Until the lions have their own historians, the history of the hunt will always glorify the hunter."

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten (cont.)

She posts the proverb on the whiteboard and asks the students to discuss their ideas on its meanings with a partner. After the students share in pairs and a few students share out in the whole group, Ms. Alemi sets a purpose for reading:

Ms. Alemi: As we read this novel, from time to time, I would like you to think about this proverb and ask yourselves in what ways Achebe's novel provides an alternative story or counter-narrative that challenges how European writers have historically represented life in the traditional, pre-colonial culture of the Igbo people of Southeastern Nigeria. Achebe said that people who have been written about should also participate in telling their own stories, and our task is not only to understand the story of the novel, but also to decipher Achebe's telling of his Igbo people's story.

Ms. Alemi provides each of her students with a copy of the novel, a glossary of Igbo words they will encounter, and a notetaking guide, which they will use *while reading* to document important events, characters' attitudes and behaviors, Igbo proverbs and folktales used to reinforce ideas, and illustrative quotes. For the first two chapters, Ms. Alemi reads aloud as students follow along. She stops at strategic points to explain ideas and terms and ask the students focus questions, which she gives them time to discuss with a partner. She then guides them to take notes in their notetaking guides and on sticky notes, which they place directly in the book. At the end of each chapter, she refers students to the following questions listed on their notetaking guides (with space for students to record their ideas) and posted on the board. She asks students to discuss the questions with a partner and, using their notes, to find evidence from the text to support their ideas:

- *So far, what do we know about Okonkwo and his family?*
- *What do we know about Umuofia and the Igbo people?*
- *What messages about the Igbo people do you think Achebe is trying to convey? How is he conveying these messages?*

She asks students to refer to their "Scholarly Discourse Ideas" chart and to use some of the sentence starters or similar language as they converse. Part of the chart is shown below.

Scholarly Discourse (some ideas)	
Stating an opinion and citing evidence: The author creates the impression that ___ by ___. In the part of the text where it says ___, we can infer that ___. This language indicates that ___. On page ___, this language/event/behavior suggests that ___.	*To build on or politely disagree with someone's ideas:* I heard you say ___, and I have not thought about that before. However ___. That's an interesting observation, and I would like to add to it. ___. One thing we have not discussed is ___. Have you considered this idea? ___.

After the students have had several minutes to share their ideas in pairs, she asks them to compare their thoughts with the other pair at their table groups (each table group has four students) for a few more minutes. She then asks the table groups to collaboratively generate a short paragraph that concisely responds to the questions, using textual evidence. Each

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten (cont.)

table group member must write the same paragraph in his or her notetaking guide. She gives students several more minutes to generate and write their paragraphs, and then she calls on a student from each table to share the statement the group generated while the students listening take notes on anything they hear that they did not have in their paragraphs. Ms. Alemi then facilitates a whole group discussion during which students can ask questions, clarify their thinking, and explore ideas.

Katia: Our group wrote that Okonkwo was a (looking at her paragraph) fearsome warrior and also a, well, kind of a jerk. For example, on page 14, it says that he is constantly nagging and beating his son. But when I was listening to what the other groups wrote, it made me think differently.

Ms. Alemi: Can you elaborate on that?

Katia: I mean, when someone said that maybe Okonkwo was scared of being weak like his father, he went overboard and was extra "manly." So, I think it makes it more complicated.

Ms. Alemi: What is more complicated?

Katia: He is. Okonkwo is more complicated because he is not just an evil person. Maybe he was being so fierce because he was afraid of turning out like his father.

Over the next several days, Ms. Alemi engages the students in reading the rest of the novel in various ways, including silent reading (in class and at home) and paired oral reading. She may choose to read a few selected passages aloud.

Digging More Deeply

At the end of selected chapters or groups of chapters, the table groups work together collaboratively, using notetaking guides, reading journals, and the novel to track particular aspects of the text. For example, one thing they track is the sequence of events on a timeline, along with the major events that occur in Okonkwo's life and in the Igbo village. The groups work together to identify these major events, and then the class decides what they will write on the Google Doc timeline (a different student serving as the scribe each time). The timeline grows and changes as students progress through the novel and determine the most significant events. An excerpt from the timeline, showing some of the tragic events in Okonkwo's story, follows.

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten (cont.)

***Things Fall Apart* Timeline**

Orientation	Complications and Their Resolutions Events (both joyful and tragic)				Final Resolution
Okonkwo is a *strong man* in an Igbo village, widely known and respected as a fearless warrior, a man of tradition with three wives and land.	Okonkwo feels deeply insecure about turning out like his father—weak and *effeminate*. He works hard to *make it* as a wealthy and strong man.	Okonkwo joins in the group murder of his adoptive son, Ikemefuna, out of fear of seeming weak and cowardly.	Okonkwo accidentally kills a boy during a funeral (a *feminine* crime) and is exiled for seven years to his mother's homeland. He starts to see his people *falling apart* during his exile.	White colonialists show up and convert many Igbo people, including Okonkwo's oldest son, Nwoye to Christianity. They arrest Okonkwo and other Igbo men who refuse to convert and humiliate them in jail.	

As the students work together in their table groups, Ms. Alemi plays contemporary Nigerian or Nigerian-influenced music (e.g., WizKid [https://www.youtube.com/watch?v=pAV4KlD86E8], Antibalas [https://www.youtube.com/watch?v=IIlgjOCxhLQ]) in the background, which the students enjoy and which may prompt them to explore the music and music videos of these artists on their own. When they track the themes of the novel, each table group is responsible for adding evidence that illustrates the theme, using a template posted on Google Docs. The students each have a tablet where they can add the information to the Google Doc as they work through the text, and they take turns entering the textual evidence (either by paraphrasing or using quotes), along with the page number. Students deepen their understandings of the novel's themes as they progress through the unit. For example, they begin by calling a theme *language is important*, but as they progress into the novel, they rename it *language as a sign of cultural difference* and later add to that *and pride*. The template they use is provided below.

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten (cont.)

Tracking Themes (include chapter and p. #) Themes: The universal ideas explored in a literary text	
The Struggle Between Change and Tradition	Gender (What it means to be a man or a woman)
Language as a Sign of Cultural Difference	Family and Community (Collective existence)
Traditions and Customs	Fate and Free Will

The students also track the motifs and symbols in the novel and, importantly, the Igbo proverbs and folktales that Achebe used at strategic points in the story, referring to evidence in the text. After the table groups add descriptions, explanations, and text excerpts, they refine their ideas using the Google Doc template that follows.

Tracking Motifs and Symbols, Folktales, and Proverbs (include chapter and p. #) Motifs: recurring ideas or elements that help to develop themes Symbols: objects, characters, etc. used to represent abstract ideas or concepts *"Among the Igbo the art of conversation is regarded very highly, and proverbs are the palm-oil with which words are eaten." (p. 7)*		
Motifs and Symbols: Fire • Okonkwo's nickname "Roaring Flame" (Ch. 17, p. 153): fierceness, masculinity, warrior	**Folktales:** Vulture and the Sky (Ch. 7, pp. 53–54) • Nwoye's mother sang it to him • Gentle (women's) story about rain	**Proverbs:** "If a child washed his hands, he could eat with kings" (Ch. 1, p. 8) • Okonkwo earned his place as a leader

About a third of the way through the novel, Okonkwo participates in the murder of his adoptive son, Ikemefuma. To help students write their own literary analyses, Ms. Alemi provides many opportunities for them to examine and discuss other students' written analyses, using them as models for their own writing. After the murder of Ikemefuna, Ms. Alemi asks students to discuss experts' opinions on Achebe's use of the literary device *juxtaposition* to show the complexity of the character Okonkwo.

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten (cont.)

Excerpt from *Things Fall Apart* by Chinua Achebe On the death of Ikemefuna, Okonkwo's adopted son
"Okonkwo ruled his household with a heavy hand. His wives, especially the youngest, lived in perpetual fear of his fiery temper and so did his little children. Perhaps down in his heart Okonkwo was not a cruel man, but his whole life was dominated by fear, the fear of failure and of weakness . . ." (13) "As a man who had cleared his throat drew up and raised his machete, Okonkwo looked away, he heard the blow. The pot fell and broke in the sand, he heard Ikemefuna cry, 'My father! They've killed me!' as he ran towards them. Dazed with fear, Okonkwo drew his machete and cut him down." (61)

Each small group discusses a different expert's perspective. Some of the expert opinions (drawn from the Annenberg Learner *Invitation to World Literature* unit on *Things Fall Apart*) follow.

Juxtapositions: Okonkwo on the death of his adopted son	
Osonye Tess Onwueme (Playwright and Professor of Cultural Diversity and English, University of Wisconsin-Eau Claire): "Okonkwo was always trying to prove to himself, or to the world outside him, and to his society, that he was not going to be a failure like his father. It's like he has an agenda to embody that masculine value that the Igbo man was respected for, to show those principles of manhood."	**David Damrosch (Professor of Comparative Literature, Harvard University):** "Achebe's complex portrayal of Okonkwo is built up through juxtaposed scenes. The shocking episode of the killing of Ikemefuna is balanced, two chapters later, by the scene in which Okonkwo saves the life of his favorite daughter Ezinma, only surviving child of his wife Ekwefi."
Chuck Mike (Theater Director and Associate Professor of Theater, University of Richmond): "If you consistently believe that you have to 'be a man,' you don't handle your home affairs well. Rather than reason with his wives over matters where conflict evolves, Okonkwo beats them."	**Kwame Anthony Appiah (Professor of Philosophy, Princeton University):** "Ikemefuna is interesting because he is the character through whom we learn that Okonkwo has the capacity for gentleness and love and that it's because of his obsession with not being seen to have that capacity that he does things that are manly but bad."

Ms. Alemi strategically groups students into groups of four or five students so that they can engage in a deep conversation about their expert opinion before they share their groups' findings with others who read another opinion. Among her considerations for grouping students are personal dynamics, academic and socio-emotional strengths and areas for growth, and English language proficiency (for ELs). She uses the expert group jigsaw strategy again to structure the collaborative conversations. Students refer to a discussion grid that contains spaces for them to record notes about the degree to which they agree with the expert's statement, the location of evidence in the text to support the statement, and explanations of the evidence. The procedure she uses is as follows.

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten (cont.)

Expert Group Jigsaw: *Things Fall Apart* Juxtapositions

1. **Independent Reading: Read your expert opinion *independently* and take notes using the discussion grid (10 min.)**
2. **Expert Group Discussions: Talk *within your expert group* (the people who read the same expert opinion as you) (15 min.):**
   - Share your notes
   - Listen and take notes while others share
   - Come to a consensus on (and write down) the textual evidence (at least three places in the novel that support the expert's opinion) that you will share in your jigsaw groups
   - Discuss the expert's opinion and the textual evidence to make sure you can explain it fully in your mixed jigsaw groups
3. **Mixed Jigsaw Group Discussions: Talk in *mixed jigsaw groups* (you plus other people who read *different* expert opinions than you) (20 min.):**
   - Share the expert's opinion and the textual evidence that supports/illustrates it
   - Listen to the other people as they share and take notes
   - Discuss similarities and differences that emerged
   - Come to a consensus on (and write down) three big ideas from your conversation that you will share when you are back in your expert groups
4. **Return to Expert Groups: In your expert groups, discuss what you learned in your jigsaw groups (10 min.)**
   - Share what you learned in your mixed jigsaw group
   - Listen as others share
   - Together, write a concise paragraph (or two) that sums up the juxtaposition.

As the groups engage in their conversations, Ms. Alemi circulates around the room to listen in and observe. One expert group, which includes two EL students at the late Expanding level of English language proficiency (Clara and Javier) is discussing Damrosch's opinion.

Thomas: I think what Achebe is showing is that Okonkwo is making up for killing Ikemefuna when he saves Ezinma's life. I found that on pages 85 and 86, where it says that he went to get medicinal trees and shrubs, and then he made her sit over it, even though she was coughing and choking.

Clara: Yeah, that's what a good parent does. And he really loved Ezinma because later, on page 108, he follows Chielo to the cave and tells Ekwefi to go home. I think he was worried about her, about Ezinma.

Javier: I have something to add to what you said. I think I remember that later on, he's remembering that he kept going back to the cave, like four times, because he was so scared that Chielo was going to do something bad.

Katie: Oh yeah! What page is that on? (The four students search in their texts.) Here, here it is. On page 112, it says that "he had felt very anxious but did not show it" and he waited a "manly interval" before he followed Chielo and Ezinma.

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten (cont.)

Javier: "It was only on his fourth trip that he had found Ekwefi, and by then he had become gravely worried." So, I think there are two parts where it shows he's not just a murderer. He really cares about Ezinma. That's kind of creepy because he killed his son so easily.

Ms. Alemi: Great observations, all of you. When you share in your jigsaw groups, you will need to be very clear about all of the textual evidence that supports the expert's opinion. You have got some of it, but now would be helpful to find some evidence showing how Ikefuma's murder is *balanced* by those other scenes. Remember that you will need to explain the expert's opinion first and then provide at least three pieces of evidence from the novel that support or illustrate the expert's opinion, so you also need to find and discuss the scene with the murder, too.

Ms. Alemi has noticed that providing models of writing supports students in crafting their own literary analyses. She has also found that providing scaffolding—through examining literary analyses, jointly writing literary analyses, and providing her students with opportunities to collaboratively write them—results in higher quality writing. Ultimately, the students will write their analyses independently; however, she has found that providing these different levels of scaffolding along the way helps students learn how to write arguments of this type. Before students select another novel to read, where they will engage in a variety of collaborative literacy tasks, Ms. Alemi guides them to write a brief analysis of *Things Fall Apart*.

Ms. Alemi: Now that we have had a chance to delve deeply into the novel and read what experts have written, we are going to write a literary response together, or *jointly construct* part of what we might see in a longer literary analysis. In an interview with the Washington Post in 2008, Achebe said, "I want to sort of scream that *Things Fall Apart* is on the side of women . . . And that Okonkwo is paying the penalty for his treatment of women; that all his problems, all the things he did wrong, can be seen as offenses against the feminine." What do you think Okonkwo's offenses against women are? Do you agree that his downfall was brought on by his attitude toward women and his attitude toward manliness? Before we write the response together, I would like you to brainstorm some ideas in your table groups. Be sure to find textual evidence in your notes and in the novel.

Next Steps

As the unit progresses, students select another novel they are interested in, analyze and discuss it, collaboratively write a literary analysis of it and create a media piece based on their analyses. Ms. Alemi observes them closely to see where she needs to adjust instruction and/or provide more intensive scaffolding. For the written arguments, Ms. Alemi provides a template and checklist of required elements, and she meets with groups of students at each stage of the writing process to ensure they have the appropriate level of support. For the media pieces, in addition to using textual excerpts, Ms. Alemi encourages students to be creative and use some of the ideas and techniques they discussed over the course of the unit (including spoken word and storytelling), as well as imagery and music that will support the expression of their ideas. The class views the media pieces groups of students have created,, and all of the novels are available in the classroom for students to read on their own after the unit concludes.

Vignette 7.1. Examining Diverse Perspectives in World Literature Integrated ELA/Literacy, ELD, and World History in Grade Ten (cont.)

Over the course of the unit, during their collaborative planning sessions, Ms. Alemi and Ms. Cruz discuss how things are going in both classes so that they can continuously refine their lessons. The teachers agree that, although their collaboration took a great deal of time and effort, their students showed incredible growth in their understandings of the content and in their abilities to discuss and express complex ideas. Importantly, they noticed that students were highly engaged with the tasks and even asked to learn more about certain topics, suggesting to Ms. Alemi and Ms. Cruz that they had attended not only to the students' academic and linguistic needs but had also paid attention to their interests and the things that motivated them to learn.

Vignette 7.2. Analyzing Texts from World History Designated ELD in Grade Ten

Background

Mr. Branson teaches the University and Career Preparation classes at his comprehensive high school. These classes are designed for students who need a boost in their disciplinary literacy development. His tenth-grade classes include EL students who have been in U.S. schools for four or more years and are still at the late Expanding or early Bridging level of English language proficiency. Other students in the classes are former ELs and native English speakers who are as yet underprepared for rigorous high school coursework and who have limited access to academic uses of English in their home environments. School administrators, teachers, and parents have agreed to extend the school day for these students, so they will benefit from the University and Career Preparation class but will not be prevented from participating in a well-rounded curriculum, including important college-readiness and elective classes, such as the arts.

Mr. Branson feels that one of the most important things he can do is foster a positive relationship with each of his students. He gets to know them well and lets them know that he genuinely cares about their academic and individual success in various ways. For example, he attends sports, theater, and music events in which his students are involved, often outside of the school day. In the classroom, he holds his students to high expectations by insisting upon the completion of assignments that are of the highest quality he knows they can achieve. His goal is to prepare all of his students for academic and socio-emotional success. He thinks carefully about their content understandings, literacy abilities, talents, and interests and designs learning tasks that will stretch each student to higher levels. Along with the very high standards he establishes for student work, he provides high levels of support, differentiated according to students' needs. He encourages all his students to continuously strive to demonstrate their best and gives them repeated opportunities to improve their assignments without deducting points. Mr. Branson views this as an opportunity to teach students about persistence in the face of challenges and to help them understand that trying different approaches when the first ones are not successful is a normal part of learning. He also makes sure not to assign tasks for which students are not yet sufficiently prepared.

Mr. Branson feels that it is important to model a variety of ways in which professionals or scholars interact when conflicts arise. He does not feel obligated to issue harsh consequences for behavioral infractions unless they pose a physical or emotional threat to others. Whenever possible, he uses a *counseling approach* to recognize negative behavior, such as defiance, and addresses it as an opportunity for growth. When a student is having a hard time, he gives him or her time to *cool off* and reconsider his or her behavior. He asks the student to apologize for inappropriate behavior, invites him or her back into learning, and gives options when discussing possible negative consequences for undesirable behavior. For example, he might encourage a student to return to a learning task by saying, "I would like for you to participate in our discussion because it helps us to have as many ideas as possible. I hope you choose to do this. If you choose not to, you will not be earning points for your contributions." In addition, he does not *hold over* disciplinary consequences from day to day, unless there is a very persistent problem. For minor issues, he believes that students should begin each day with a clean slate, and he has found this to be especially helpful for teenagers because of the emotional fluctuations typical of this age. He also believes that his students need to see him modeling

Vignette 7.2. Analyzing Texts from World History Designated ELD in Grade Ten (cont.)

the ability to be resilient and *move on*. Mr. Branson has found that this positive approach to discipline has resulted in a classroom environment that fosters learning and respect and results in much greater student success than when he used more punitive methods of discipline.

As the instructional leader of the classroom, Mr. Branson thinks positively about the behavioral and academic potential of each of his students. Inside and outside of the classroom, he speaks respectfully about his students and their families, which influences how his colleagues approach these students in their classrooms, as evidenced by conversations he has had with them in collaboration meetings and more casual settings. When speaking with parents about their teens, he makes a point to emphasize the positive contributions the students make in his classroom, and he also discusses improvement in terms of the academic and social goals the students have chosen to work on (e.g., "ask more questions in class," "revise my writing more carefully before submitting it").

Lesson Context

In his tenth-grade University and Career Preparation class, Mr. Branson uses many approaches to ensure his students develop not only the skills to succeed in their rigorous high school coursework, but also the dispositions and confidence to do so. At the beginning of the year, students worked on a project that asked them to reflect on their prior school learning experiences and investigate some of the possible reasons they might currently feel underprepared for the challenges of high school coursework. Another project the students undertook involved reading sections from the novel *Bless Me, Ultima*, by Rudolfo Anaya, about a boy who is on a journey to learn about his past, family's history, and his destiny. The class used the book as a departure point for a family history project in which students interviewed members of their own families and used this information, along with their analyses of the novel, to write an essay and create an original media project. Mr. Branson has found that this project, and others like it, gives students opportunities to think more deeply about their pasts, identify the strong connections they have to their families and communities, and think more critically about their futures.

Through multi-year professional learning provided by his school district, Mr. Branson and his colleagues have been learning about the linguistic and rhetorical dimensions of texts in different disciplines so that they can make particular linguistic features transparent for their students and students' use of those features in their own speaking and writing. In this professional learning, he has worked with his colleagues to analyze history, science, literature, and other texts students read in their various courses. He regularly collaborates with Ms. Cruz, the tenth-grade world history teacher, to analyze the world history textbook and other primary and secondary sources used in her classes to facilitate and accelerate their literacy development in service of content learning. Mr. Branson and Ms. Cruz have discovered some patterns in the academic language used in history texts that they would like their students to be aware of when they read and, ultimately, to use when they write. These patterns include use of abstraction, how agency is represented, and different ways of showing causal relationships. The teachers agree that Mr. Branson will teach their students these grammatical patterns explicitly, texts from their history class, and that Ms. Cruz will reinforce students' understandings of these same ideas and observe how they are *taking up* the linguistic resources in her class.

Vignette 7.2. Analyzing Texts from World History Designated ELD in Grade Ten (cont.)

At the beginning of the year, when approaching texts with densely packed sentences, such as the texts students read in their history courses, Mr. Branson teaches them how to identify the verbs and verb phrases in sentences and explains how being able to identify these parts of speech and phrasal boundaries (or processes) will help students comprehend complex sentence structures. He uses the metalinguistic term *process* (represented by verbs and verb phrases) to indicate *what is happening* in sentences because he has found this to be a meaningful way to discuss language. He still uses traditional grammar terms (e.g., verb, noun, adjective), but the new terms he introduces to students add a layer of meaning that additionally supports their understanding.

Mr. Branson discusses how *processes* could be *action* or *doing* processes, such as *extract* or *transport*. This way of thinking of verbs (as actions) is familiar to students.

Mr. Branson: However, processes can also be *sensing*, such as the words *feel* or *think*. They can also be *relating*, such as *are* or *have*, which are words that make relationships between things. For example, when I say, "Mr. Branson is a teacher," the word *is* isn't really *doing* anything. It's just relating *Mr. Branson* with *a teacher*. Processes can also be *saying* in order to report on people's speech, like when we use the words *said* or *exclaimed* to report on how people said something.

Mr. Branson guides his students in identifying the processes in clauses and in determining what type or process they are. Some processes are merely in *existence*, such as when the terms *there is* or *there are* are used, and are called *existing* processes. Using a document camera, Mr. Branson models how he finds the processes, which he circles, thinking aloud as he determines which kind of process it is. After a short time, the students are able to conduct this type of analysis in pairs, using a template for recording the processes they find.

Processes (verbs and verb groups)					
Process Type:	**Doing** (action)	**Sensing** (thinking/ feeling)	**Relating** (being/having)	**Saying**	**Existing**
What it is doing:	Telling about events and actions	Telling about the *inner world* of people	Creating relationships, definitions, descriptions	Constructing dialogue or reporting on what people say	Telling that things exist
Examples:	destroyed extract negotiated	thought imagined believed	is had became	said exclaimed suggested	(There) is (There) are

Vignette 7.2. Analyzing Texts from World History Designated ELD in Grade Ten (cont.)

Mr. Branson has observed that when he and his students analyze texts in this way, his students are able to talk *about* the language in the texts, which has helped them to decipher meanings with greater ease. Once students have had some experience analyzing complex texts using metalanguage to talk about how language functions, he plans to show them additional ways to delve deeper into the structure of language for the purpose of *unpacking* the meanings of these dense types of academic texts. The learning target and related standards follow.

Learning Target: Students will explore how the structure of language in a history text conveys meaning, focusing on analysis of *processes, participants*, and *time connectors*.
CA ELD Standards (Bridging): *ELD.PI.9–10.6b – Explain inferences and conclusions drawn from close reading of grade-level texts and viewing of multimedia using a variety of verbs and adverbials; ELD.PI.9–10.8 – Explain how a writer's or speaker's choice of a variety of different types of phrasing or words produces nuances and different effects on the audience; ELD.PII.2b – Apply knowledge of familiar language resources for linking ideas, events, or reasons throughout a text to comprehending grade-level texts and to writing cohesive texts for specific purposes and audiences; ELD.PII.9–10.3 – Use a variety of verbs in different tenses and mood appropriate for the text type and discipline to create a variety of texts that describe concrete and abstract ideas, explain procedures and sequences, summarize texts and ideas, and present and critique points of view; ELD.PII.9–10.4 – Expand noun phrases in a variety of ways to create detailed sentences that accurately describe concrete and abstract ideas, explain procedures and sequences, summarize texts and ideas, and present and critique points of view on a variety of academic topics.*
CA CCSS for ELA/Literacy: *RL.9–10.1 – Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text; L.9–10.3 – Apply knowledge of language to understand how language functions in different contexts, to make effective choices for meaning or style, and to comprehend more fully when reading or listening.*
Related CA History–Social Science Standards: 10.4. Students analyze patterns of global change in the era of New Imperialism in at least two of the following regions or countries: Africa, Southeast Asia, China, India, Latin America, and the Philippines. 10.4.2. Explain imperialism from the perspective of the colonizers and the colonized and the varied immediate and long-term responses by the people under colonial rule.

Lesson Excerpts

In today's lesson, Mr. Branson will guide students to analyze an excerpt from a complex text that the students read in Ms. Cruz's world history class. When he initially analyzed the text, an essay on new imperialism in Africa published in 1998, he concluded that it would present particular challenges for his students due to the abstractions, technical language, and long noun phrases, as well as other complex linguistic features. Rather than avoid the complexities of the text by providing a simplified version or merely reading the text for students, Mr. Branson feels that his students are capable of dealing with the challenges, as long as he provides appropriate levels of scaffolding and plenty of time for discussion. An excerpt from the text, which Mr. Branson will guide his students to analyze, follows.

Vignette 7.2. Analyzing Texts from World History Designated ELD in Grade Ten (cont.)

"The Tentacles of Empire: The New Imperialism and New Nationalism in Asia, Africa, and the Americas"

by Candice Goucher, Charles LeGuin, and Linda Walton

The Economic Advantages (p. 3)

> In some important ways the era of colonial rule was fundamentally different from what had preceded it. Before colonial rule Africans were independent, if not always equal, trading partners. After colonial rule, this African economy became a European-dominated economy. Under post–Berlin Conference colonial rule, African political economies controlled by colonial powers—such as Great Britain, France, or Germany—were rapidly establishing Western-based capitalism that would inevitably reduce the power and economic opportunity of the African participants. While production remained largely in Africa hands, Europeans controlled colonial credit and trade tariffs. Few Africans prospered during this era; colonial controls hampered the development of free enterprise, and European governments offset the high costs of extracting raw materials and transporting them to European-based manufacturing centers by providing price supports.

Mr. Branson provides each student with a copy of the excerpt. He briefly previews the meaning of the excerpt and reminds students that in their world history class they already read the essay from which the excerpt is taken. He asks them to read the text silently while he reads it aloud. Next, he asks students to rate the text on a scale of 0–5 (0 being completely confusing and 5 being completely understandable); most students rate it as a 1 or 2. He explains that they will be learning a technique for deciphering complex texts and that this technique will add to their repertoire of *close reading* strategies. To model the approach, he uses something familiar that he knows his students will find interesting: a recent photograph of singer Shakira and soccer player Piqué. He asks the students to tell him what they see.

Jesse: Piqué's squeezing Shakira tight, and she's laughing.

Sandra: And they are holding hands. They are so cute together!

Mr. Branson: (Laughing.) Okay, let's use that. "Piqué is squeezing Shakira tightly, and she's laughing, and they are holding hands. They are so cute together." Obviously, everyone understands these sentences, so we do not really need to analyze them to unpack their meanings. But sometimes, the sentences you come across in your textbooks or other readings are going to be challenging to figure out. That's because the person who wrote those texts is masterful at putting language together in really compact and intricate ways to make particular meanings. We are going to be analyzing some of the sentences in the text I read a moment ago, but first I want to show you how we will do the analysis with easier sentences. We are going to *chunk* the sentences into meaningful parts.

Vignette 7.2. Analyzing Texts from World History Designated ELD in Grade Ten (cont.)

Mr. Branson writes the sentences the students suggested using the document camera (without the contractions so that the verbs are easier to see).

Piqué is squeezing Shakira tightly, and she is laughing, and they are holding hands. They are so cute together.

Then, he shows them a chart with some explanations of the metalanguage they will use when chunking sentences. He reminds the students that they have already used the term *process* to identify and categorize different types of verbs and verb groups, and he explains the new terms, *participants* and *circumstances* using the chart.

Using Metalanguage to Analyze Texts			
Metalinguistic term	**Question to ask**	**How it is represented**	**Examples**
Process	*What is happening*?	*Verbs and verb groups* (doing, saying, relating, sensing, existing) – Tells the action, how things are related, how people say things or what they are thinking	• *negotiate* • *think* • *explain* • *write*
Participant	*Who* or *what* is involved in the process?	*Nouns and noun groups* – The actors and objects that take part in the action or other process (the *things*) (Sometimes can be *adjective groups* when it is a description after a relating verb)	• *Mr. Branson* • *the textbook* • *a large and noisy bug*
Circumstance	*Where, when, how*, or *in what ways* is the process happening?	*Adverbs and adverb groups, prepositional phrases* – Provide details about the action or other process (Sometimes can be a *noun group* when it is adding detail)	• *suddenly* • *in the room* • *one summer day*

Mr. Branson shows students a graphic organizer for chunking sentences using these metalinguistic terms. He models how to chunk the first clause of the first sentence (*Piqué is squeezing Shakira tightly.*). First, he finds and circles the *process* (*is squeezing*), which is something familiar to the students. Next, he underlines the *participants* (*Piqué* – the *doer* of the action and *Shakira* – the *receiver* of the action) noting that they are nouns. Finally, he draws a box around the *circumstance* (tightly) and explains that the adverb provides detail about *how* Piqué is squeezing Shakira. After he has marked up the clause, he transfers the chunks to a graphic organizer. He guides students to repeat the sentence chunking procedure with him by prompting them to tell him which words represent the *processes, participants,* and *circumstances* in each of the other clauses. The graphic organizer they complete together follows.

Vignette 7.2. Analyzing Texts from World History Designated ELD in Grade Ten (cont.)

Sentence Chunking 1. Circle the processes 2. Underline the participants 3. Box the circumstances 4. Transfer the chunks to the table				
Circumstance, Connecting Words	**Participant** (*who* or *what*?)	**Process** (*what is happening*?)	**Participant** (*who* or *what*?)	**Circumstance** (*where*, *when*, *how*?)
	Piqué	is squeezing	Shakira	tightly,
and	she	is laughing,		
and	they	are holding	hands.	
	They	are	so cute	together.

Now that students have an idea about the sentence chunking procedure and have used the new metalanguage to parse the sentences they generated, Mr. Branson shows them how they can do the same thing with sentences from more complex texts, explaining that chunking challenging sentences into meaningful parts can help them comprehend text more easily. He explains further that chunking whole sections of texts can help them see language patterns in a text and how authors craft meaning at the discourse level. Mr. Branson goes back to the excerpt on imperialism in Africa and asks students to independently find and circle the processes (verbs), since they are already experienced at doing this. Next, he follows the sentence chunking procedure for the first several clauses, modeling how he identifies the meaningful chunks and inviting students to tell him what they see as well. Through much discussion, during which the students ask questions and explain their reasoning, the class analyzes the first few sentences together. Next, Mr. Branson asks the students to work together in triads to chunk the remaining sentences while he circulates around the room to observe and provide *just-in-time* scaffolding. Following the small group analyses, the class reconvenes to compare notes. This provides Mr. Branson with an opportunity to clarify confusions and reinforce the *chunking* concepts. The following is part of the graphic organizer that the students complete.

Sentence Chunking 1. Circle the processes 2. Underline the participants 3. Box the circumstances 4. Transfer the chunks to the table				
Circumstance, Connecting Words	**Participant** (*who* or *what*?)	**Process** (*what is happening*?)	**Participant** (*who* or *what*?)	**Circumstance** (*where*, *when*, *how*?)
In some important ways	the era of colonial rule	was	fundamentally different	from what had preceded it.
After colonial rule				
Before colonial rule	Africans	were	independent, if not always equal, trading partners.	

Vignette 7.2. Analyzing Texts from World History Designated ELD in Grade Ten (cont.)

Sentence Chunking (cont.)				
After colonial rule	this African economy	became	a European-dominated economy.	
Under post-Berlin Conference colonial rule,	African political economies *controlled by colonial powers-such as Great Britain, France, or Germany*	were rapidly establishing	Western-based capitalism *that would inevitably reduce the power and economic opportunity of the African participants.*	
While	production	remained		largely in African hands,
	Europeans	controlled	colonial credit and trade tariffs.	
	Few Africans	prospered		during this era;
	colonial controls	hampered	the development of free enterprise;	

Solange notes that chunking the sentences and showing them on the graphic organizer makes the meanings *pop*.

Solange: You can see things clearer. You can tell what's happening, and who's doing it, and how or when or where they are doing it.

Miguel: Yeah, it's more clear. It makes you see when things are happening, like "before colonial rule" and "after colonial rule." But some of it is still confusing. Some of the participants are really long.

Mr. Branson: Can you say more about that?

Miguel: Like that one: "Western-based capitalism *that would inevitably reduce the power and economic opportunity of the African participants*." I think it's about capitalism, I mean Western-based capitalism, whatever that means, but I do not get the rest. Or that other participant: "*African political economies controlled by colonial powers-such as Great Britain, France, or Germany*." What does that mean?

Vignette 7.2. Analyzing Texts from World History Designated ELD in Grade Ten (cont.)

Mr. Branson: Let's take a look at that first participant you noticed. You are absolutely right that it's mainly about capitalism, or Western-based capitalism. Let's stop for a moment to think about what "Western-based capitalism" means.

Miguel's question provides an opening for Mr. Branson to guide his students in exploring the meaning of the noun group in a focused way. Through the discussion, Mr. Branson guides the students to clarify that *capitalism* is an economic system in which trade, industry, and production are controlled by private owners with the goal of making profits in a market that is determined by supply and demand (where the value of goods are determined in a *free price* system). By looking back in the text, the students note that "Western-based" must have something to do with the colonial powers (Great Britain, France, or Germany).

Mr. Branson: We have clarified a bit more about what "Western-based capitalism" is. Let's take a look at the rest of this participant: "*that would inevitably reduce the power and economic opportunity of the African participants."* This is part of the participant because it's part of the noun group. It's a clause, which means that there's a verb in there, that's *embedded* into the noun group. In other words, it's part of the *thing* that's the participant. What it's doing is telling us more detail about Western-based capitalism.

Jesse: So, the capitalism that the colonial countries were doing, that was going to reduce the "power and economic opportunity" of the African people? They were making that economic system, that type of capitalism, so that the African people would have less power?

Using the chunked text in the ensuing conversation enables Mr. Branson to help his students delve even more deeply into the meanings. Ahead of time, he planned to ask students to explore the following questions:

- What does it mean to be a "European-dominated economy"?
- Why did the author use the word "inevitably"?
- Looking closely at the following sentence: "European governments offset the high costs of extracting raw materials and transporting them to European-based manufacturing centers by providing price supports," what was the role of "European governments" in this process?
- Why were "price supports" important in this context?

He also prompts students to think carefully about the processes used in the excerpt—*remained, controlled, prospered, hampered, offset*—and to discuss how these processes shape the text and convey particular meanings. At the end of class, Mr. Branson reiterates why students might want to engage in this type of language analysis.

Mr. Branson: The point is not just to underline verbs or put words in boxes or to be able to identify what's the verb or what's the process, etcetera. The point is to use your analysis, that chunking tool, to get at the meanings in these texts that are really densely packed with a lot of information and that are challenging to read. It's also a great way for you to see how writers make deliberate choices about how to structure language to achieve particular effects. You can try these structures out in your own writing.

Vignette 7.2. Analyzing Texts from World History Designated ELD in Grade Ten (cont.)

Mr. Branson explains that the class will be using this chunking technique from time to time to explore the language in different complex texts. He reminds them as well that the texts he will be choosing will help them understand the content of their other courses. He encourages them to experiment with using chunking when they encounter challenging texts in their other classes if they feel that could be helpful.

Next Steps

When Mr. Branson meets with Ms. Cruz and his other colleagues, he shares the sentence chunking task he helped his students learn. Ms. Cruz is very interested in learning more about the task, and Mr. Branson offers to visit her class one day the following week to model how to do it.

Vignette 7.3. Reading, Analyzing, and Discussing Complex Texts in American Literature Integrated ELA/Literacy, ELD, and History in Grade Eleven

Background

Ms. Robertson teaches eleventh-grade English in an urban high school. She meets regularly with the other English teachers, the eleventh-grade U.S. history teachers, and the English language development and special education specialists at her school during collaborative planning time to ensure that all their students understand the connections between the literary and informational texts they are reading in their English and history classes. Hearing more about what the students are learning in their U.S. history class also gives Ms. Robertson an opportunity to reinforce understandings of important historical concepts and events in her English class. The current interdisciplinary unit explores the U.S. Civil Rights Movement.

In U.S. history class students learn, among other things, to interpret past events in their historical context; identify authors' perspectives and biases; evaluate major debates among historians regarding interpretations of the past; and show connections between historical events and larger social contexts. In both their U.S. history and English classes, students examine primary and secondary sources and engage in conversations and writing tasks about the topics at hand. Before examining the unit's featured text, *Bury My Heart at Wounded Knee: An Indian History of the American West,* by Dee Brown, the history teachers make sure students understand the historical context in which it was written. The book was published in 1970, shortly after the founding of the American Indian Movement (AIM), the group that occupied Alcatraz seeking to reclaim Native American land. In U.S. history, students learn about how Indian activism during this period was situated in the context of the broader Civil Rights Movement and how this activism led to the passage of important civil rights policies (e.g., the 1968 Indian Civil Rights Act, the 1972 Indian Education Act, the 1975 Indian Self-Determination and Education Assistance Act). To gain a better understanding of the historical events leading up to the American Indian Civil Rights Movement, students also view and discuss portions of the PBS documentary *We Shall Remain* (http://www.pbs.org/search/?q=we%20shall%20remain&producer=PBS) in their history classes.

Ms. Robertson and her colleagues understand that it is critical for high school students to read multiple texts representing a variety of perspectives, in order to gain an understanding of bias and learn about the objections of some people who did *not* want policies that supported desegregation and other civil rights. For example, in history class, students read writings by and view televised interviews of people who held divergent perspectives on various topics during the Civil Rights Movement. The teachers have discussed how a *simplistic* presentation of history can result in students' limited understandings of historical events and lead them to ignore multiple perspectives. Teachers therefore emphasize that human decision-making is complex and depends on many different factors, including historical and cultural contexts.

In English class, Ms. Robertson guides her students to explore a range of perspectives about various aspects of the Civil Rights Movement by reading literary texts (including novels, short stories, and poems) and related informational texts. Students also view and discuss documentaries and other multimedia, such as scenes from plays and films. The unit's culminating task asks students to write arguments that draw on evidence from the texts and media they have examined to support their arguments regarding the responsibilities of

Vignette 7.3. Reading, Analyzing, and Discussing Complex Texts in American Literature Integrated ELA/Literacy, ELD, and History in Grade Eleven (cont.)

historians to depict history from multiple perspectives. One goal is for students to think critically about how documents represent people and events differently depending on who is writing the text.

The unit includes reading and discussion of a variety of literary and informational genres representing diverse perspectives, including a selection of the following:

- *Tracks*, by Louise Erdrich, which is a novel that addresses tensions between traditional Native American cultures and the westernizing influence of white America
- *The Bluest Eye*, by Alice Walker, which is the story of a young African American girl dealing with racism, poverty, and other issues
- Novellas from *I Hotel*, by Karen Tei Yamashita, Leland Wong, and Sina Grace, which tell the stories of Asian Americans in San Francisco during the 1960s and 1970s
- *The Circuit: Stories from the Life of a Migrant Child* by Francisco Jiménez, which is a collection of autobiographical short stories about the life of an immigrant in the U.S.
- A National Farm Workers Association speech given by Dolores Huerta in Sacramento, April 10, 1966 (https://diva.sfsu.edu/collections/sfbatv/bundles/185999).
- Martin Luther King's "Letter from Birmingham Jail," which advocated for the philosophy of non-violence as a political strategy
- The play*, A Raisin in the Sun*, by Lorraine Hansberry, which explores, among other things, African American identity, racism, and social status in the 1950s
- Several poems, including "Let America Be America Again," by Langston Hughes (http://www.crmvet.org/poetry/fhughes.htm), and an excerpt from *I am Joaquin: Yo Soy Joaquin*, by Rodolfo Corky Gonzales (http://www.latinamericanstudies.org/latinos/joaquin.htm). (The students may also write original poems from the perspective of an individual engaged in the struggle for civil rights)

Ms. Robertson's English class includes students who experience challenges with reading and writing grade-level texts, as well as students who are reading at and above grade level. Her class also includes three ELs at the late Emerging and early Expanding levels, and several ELs at the Bridging level. All students are capable of and accustomed to engaging in collaborative conversations about complex texts and topics, and Ms. Robertson provides ample and varied levels of support so that students can meet these challenges.

Lesson Context

At the beginning of the week, Ms. Robertson asks her students to view and discuss the portrait "Manifest Destiny" by John Gast, which provides an opportunity for the students—regardless of their prior knowledge of westward expansion in the 19th century—to discuss how ideas in art can both reflect and shape human beliefs and actions. Ms. Robertson also asks the class to view and discuss how Native Americans were depicted in photographs taken in the nineteenth century. This task prepares students for discussing authors' perspectives in texts. The students then view and discuss brief excerpts from the film, *Bury My Heart at Wounded Knee* (HBO Films), before reading excerpts from the book on which the movie was based. The students compare the way Native Americans and the U.S. government were depicted in the

Vignette 7.3. Reading, Analyzing, and Discussing Complex Texts in American Literature Integrated ELA/Literacy, ELD, and History in Grade Eleven (cont.)

film, photographs, and art. Ms. Robertson tells her students that, in order to understand the text they will be reading, it is important to think critically about the historical context, as well as whose perspectives are being represented.

Ms. Robertson's students will be reading excerpts from the book *Bury My Heart at Wounded Knee: An Indian History of the American West,* by Dee Brown. It is an historical informational text that describes the experiences of American Indian people from their own perspectives during the second half of the nineteenth century. For the unit on the U.S. Civil Rights movement, this book is considered a primary source as it was published in 1970 at a time of increasing American Indian activism, and it addresses the civil rights of Native Americans. The book weaves together many primary and secondary source documents from the 19th century. (For studying westward expansion in the late 19th century itself, the book is considered a secondary source.)

The learning target for today's lesson and related standards follow.

Learning Target: Students will closely examine and discuss an excerpt from *Bury My Heart at Wounded Knee* to better understand the author's perspective and reasons for the American Indian Civil Rights Movement.
CA CCSS for ELA/Literacy: *RI.11–12.1 – Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text, including determining where the text leaves matters uncertain; RI.11–12.6 – Determine an author's point of view or purpose in a text in which the rhetoric is particularly effective, analyzing how style and content contribute to the power, persuasiveness, or beauty of the text; SL.11–12.1 – Initiate and participate effectively in a range of collaborative discussions with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.*
CA ELD Standards (Expanding): *ELD.PI.11–12.1 – Contribute to class, group, and partner discussions, sustaining conversations on a variety of age and grade-appropriate academic topics by following turn-taking rules, asking and answering relevant, on-topic questions, affirming others, providing additional, relevant information, and paraphrasing key ideas; ELD.PI.11–12.3 – Negotiate with and persuade others in discussions and conversations using learned phrases and open responses to express and defend nuanced opinions; ELD.PI.11–12.6b - Explain inferences and conclusions drawn from close reading of grade-appropriate texts and viewing of multimedia using a variety of verbs and adverbials.*
Related CA History–Social Science Standard: 11.10. Students analyze the development of federal civil rights and voting rights.

Vignette 7.3. Reading, Analyzing, and Discussing Complex Texts in American Literature Integrated ELA/Literacy, ELD, and History in Grade Eleven (cont.)

Lesson Excerpts

In today's lesson, Ms. Robertson guides her students to read parts of the first chapter from *Bury My Heart at Wounded Knee* carefully and analytically, using a variety of instructional approaches. She focuses on four main tasks:

- A careful reading of a passage from the text
- A collaborative conversation about the passage using text-dependent questions
- A collaborative summary of the passage
- A written response synthesizing the day's learning

Ms. Robertson begins by asking students at their tables to recall and briefly discuss what they learned from viewing the documentary, art, and photographs on previous days, as well as what they have been learning about in their U.S. history classes. To help students express their ideas more confidently, she provides students with optional sentence frames (e.g., We noted in the reading that ___. We observed in the photographs/painting/documentary that ___.). In the whole group debrief, Ms. Robertson notes that she overheard some students discussing the negative assumptions made about American Indians. She briefly provides an overview of the first chapter, and she tells students that the text provides perspectives that counter some of the negative assumptions about American Indians that were prevalent and that may continue to exist in present times.

She reads aloud the first several paragraphs of chapter one as students follow along in their own copies of the text. She stops every so often to model the use of different types of comprehension strategies, including pointing out and explaining terms that are key to understanding the text. She models engaging in good reading practices by asking herself clarifying questions and stopping to summarize and take stock of what she has read at the end of a paragraph or longer section. After she has read the short section aloud, she poses a few comprehension questions to the class to ensure that they have understood the gist.

Next, she asks her students to read independently the next passage in the text, which she has provided on a separate handout and consider some text-dependent questions as they read. She asks them to jot down their responses to the questions as well as any questions they have about the text and to circle any unfamiliar vocabulary they encounter directly on the handout. Previously, the class read other texts and addressed text-dependent questions using a similar procedure, so they are familiar with the task. Additionally, Ms. Robertson previewed the content of the present text, as well as the meanings of the text-dependent questions, with the EL students at the Emerging level to ensure that they would be able to fully engage in the task.

Before students read the text independently, Ms. Robertson briefly explains the meaning of several terms that she anticipates may be unfamiliar to students (i.e., *decade, blotted out, gradual stages, clamor, remnants*). She does not spend much time explaining these terms, nor does she tell students the meaning of all of the words that may be unfamiliar. Her students know that in complex texts, much of the language will be challenging, and they are accustomed to identifying words that are unclear to them, looking at the text surrounding unfamiliar words to determine the words' meanings, using their dictionaries and/or thesauruses, and asking one another for clarification about word meanings during conversations.

Vignette 7.3. Reading, Analyzing, and Discussing Complex Texts in American Literature Integrated ELA/Literacy, ELD, and History in Grade Eleven (cont.)

Ms. Robertson uses a strategy called "1–2–4," where students first write down their responses to the questions ("1"), then take turns asking the questions and sharing their responses with a partner ("2"), and finally discuss the same questions in a group of four ("4"). Each table has four students. (Later in the year, once all students are able to fully participate in extended conversations, she will decrease the level of scaffolding and skip step "2.") The students' handout follows.

Bury My Heart at Wounded Knee – Excerpt (p. 7) and Focus Questions

The decade following the establishment of the "permanent Indian frontier" was a bad time for the eastern tribes. The great Cherokee nation had survived more than a hundred years of the white man's wars, diseases, and whiskey, but now it was to be blotted out. Because the Cherokees numbered several thousands, their removal to the West was planned to be in gradual stages, but the discovery of Appalachian gold within their territory brought on a clamor for their immediate wholesale exodus. During the autumn of 1838, General Winfield Scott's soldiers rounded them up and concentrated them into camps. (A few hundred escaped to the Smoky Mountains and many years later were given a small reservation in North Carolina.) From the prison camps they were started westward to Indian Territory. On the long winter trek, one of every four Cherokees died from cold, hunger, or disease. They called the march their "trail of tears." The Chocktaws, Chickasaws, Creeks, and Seminoles also gave up their homelands in the South. In the North, surviving remnants of the Shawnees, Miamis, Ottowas, Hurons, Delawares, and many other once mighty tribes walked or traveled by horseback and wagon beyond the Mississippi, carrying their shabby goods, their rusty farming tools, and bags of seed corn. All of them arrived as refugees, poor relations, in the country of the proud and free Plains Indians (Brown, 1970, p. 7).

Guiding Questions:
How is the experience of the Native Americans during this period of history depicted in the text?
What is happening in this section, and who or what is involved?
What was the "permanent Indian frontier"?
Who was being removed to the West and why?

After students have had sufficient time to read the text once, Ms. Robertson facilitates a brief discussion to clarify terms and answer questions. She asks students to return to the text and read it a second time, this time writing notes and marking up relevant parts of the text in response to the following additional focus questions:

- What is the author's perspective about the Native Americans' experiences?
- What specific language (words and phrases) does Brown use to communicate to readers his point of view and attitudes?

Students have used focus questions such as these to read sections of other texts analytically. Ms. Robertson reminds them of some previous occasions when word choices (e.g., a *glorious* rebellion, a *devastating and life-changing* event, *fortunately*) have helped them

Vignette 7.3. Reading, Analyzing, and Discussing Complex Texts in American Literature Integrated ELA/Literacy, ELD, and History in Grade Eleven (cont.)

determine an author's viewpoint. The class has discussed how all authors, regardless of genre, have opinions and attitudes when they write, and how these perspectives are conveyed in history and science texts differently than they are in novels and stories. For example, the class has discussed how textbooks often depict a very small portion of history and how the process of selecting which portion to include or exclude (even when it is simply a list of factual events) can represent the bias or opinions of the individual making the selection.

After the students have had sufficient time to read the text once again and write down some notes independently, Ms. Robertson asks them to share their ideas first in pairs ("2") and then in their table groups ("4"). She randomly assigns a *recorder* at each table who will be responsible for taking notes on the group consensus, using a template Ms. Robertson has provided (all students must also write down the consensus statements on their handouts). She asks students to refer to their notes and the textual evidence as groups come to agreement in response to each question. She reminds them of the poster in the classroom that lists ways to respectfully participate in an academic conversation and tells them that she expects to hear some of this language as she listens to their discussions. She also asks the class to repeat some of the sentence frames together and encourages students to incorporate such language into their own academic speech and writing whenever possible. She also reiterates that they are free to use any type of language that helps them to communicate their ideas. Part of the poster follows.

<table>
<tr><th colspan="2">(Some) Language for Taking an Academic Stance</th></tr>
<tr><td colspan="2">To cite evidence from the text:
In this part of the text we see that ____.
My understanding of the text is that ____.
One thing I noticed was that ____.</td></tr>
<tr><td>To ask for clarification:
Can you say more about ____?
What do you mean by ____?
Can you show me evidence in the text that ____?</td><td>To affirm or agree:
That's a really good point.
I like what you said about ____ because ____.</td></tr>
<tr><td>To build or add on:
I'd like to elaborate on to what you said.
Also, ____.</td><td>To disagree respectfully:
I'm not sure I agree with ____ because ____.
I can see your point. However, _____.</td></tr>
</table>

As students converse, Ms. Robertson circulates around the room, answering questions and prompting students' thinking. She observes how individual students participate, process the ideas, and use language appropriate for the task. At one point, she listens in on a conversation that includes two EL students at the early Bridging level of English language proficiency, Adriana and Chue.

Vignette 7.3. Reading, Analyzing, and Discussing Complex Texts in American Literature Integrated ELA/Literacy, ELD, and History in Grade Eleven (cont.)

Sara: I think that what's mostly happening in this part is that the Cherokee nation is being removed from their lands and to the West. They're going to move them somewhere in the West. Before, when Ms. Robertson was reading, they said that the "permanent Indian frontier" would let them stay because it was supposed to be permanent, but now they have to go. So, I think the quotation marks mean that it's not really permanent.

Adriana: *That's an interesting point. Also, I noticed that* it says that there were soldiers. I think the soldiers were putting them into prisons. But some of them got away into the mountains.

Sara: Yeah, I think they put them into prisons first, and then they moved them all West, right?

Chue: There was something about gold that I don't get.

David: Yeah, I saw that, too. It says "but the discovery of Appalachian gold within their territory brought on a clamor for their immediate wholesale exodus." So, I think there was gold on their land. They found gold there.

Chue: And the soldiers wanted it. So the soldiers were doing the removing.

Sara: The government. The U.S. government wanted it, I think.

Chue: So, *my understanding of the text is that* the government wanted gold, and then they moved the Cherokee nation to the West. But, why couldn't they just let them stay there while they got the gold?

Ms. Robertson: Can you take a look at this part, "a clamor for their immediate wholesale exodus"? What do you think that means?

David: A clamor is when there's a lot of noise, and immediate means they had to do it, like, right now. Exodus, what does that mean?

Adriana: It sounds like *exit*.

David: Okay, so . . . I still don't get it. (The other students concur.)

Ms. Robertson: Okay, would you like me to help you understand that part? How about if we take a look at the whole sentence first. Let's read it together: *Because the Cherokees numbered several thousands, their removal to the West was planned to be in gradual stages, but the discovery of Appalachian gold within their territory brought on a clamor for their immediate wholesale exodus.* So, the first thing I'm seeing is that there are actually three ideas packed into this sentence, which makes it kind of tricky to figure out. When you have a big long sentence like this, it helps to *unpack* it. Let's see if we can do that.

Ms. Robertson shows the students where the three clauses are and has them underline them:

Vignette 7.3. Reading, Analyzing, and Discussing Complex Texts in American Literature Integrated ELA/Literacy, ELD, and History in Grade Eleven (cont.)

– Because the Cherokees numbered several thousands,
– their removal to the West was planned to be in gradual stages,
– but the discovery of Appalachian gold within their territory brought on a clamor for their immediate wholesale exodus.

David: So, the first idea is something about there being several thousand Cherokees. But it's starting with *because*. I thought you couldn't do that.

Ms. Robertson: You can, but you can't have that sentence on its own because it's a *dependent clause*. It depends on another clause for its meaning.

Ms. Robertson writes two more examples to demonstrate when *because* would be acceptable or unacceptable at the beginning of a sentence.

Chue: Yeah, I think it's the next part because it's telling about how they were going to remove them: "in gradual stages."

Ms. Robertson: What does that mean?

Sara: Not all at the same time? A stage is like, the stages of metamorphosis, or like steps or phases. So they were going to move them to the West in stages because there were so many of them. "In gradual stages," so slowly.

Ms. Robertson: Okay, so how about that word *but*, which starts the next clause. What does that tell us?

Adriana: It's telling us something's going to be different, or the opposite. (Reads the clause) " . . . *but the discovery of Appalachian gold within their territory . . .*" I think they discovered gold on their territory.

Ms. Robertson: Who's the "they"? Who discovered the gold?

Chue: I think it's the army. Or the white people who settled there. The U.S. government knew there was gold there.

Sara: Yeah, it says "within their territory." That's not the U.S.'s territory. I think it means the Cherokee's territory, on the Cherokee's land. So they wanted to get them out fast, instead of slowly, like they were planning to do so they could get the gold.

Adriana: That's not fair.

Ms. Robertson: What's not fair?

Adriana: That's not fair that they made the Cherokee nation leave so fast, or maybe it's not fair they made them leave their land at all—just because they wanted the gold.

Ms. Robertson: Whose perspective is that?

Adriana: Mine?

Ms. Robertson: Okay, and what do you think the author's perspective might be? Why don't you discuss that for a bit.

Vignette 7.3. Reading, Analyzing, and Discussing Complex Texts in American Literature Integrated ELA/Literacy, ELD, and History in Grade Eleven (cont.)

Ms. Robertson leaves the group for a few minutes to listen in on the other groups' conversations. When she returns, the students are still discussing the fourth guiding question.

David: I think the author thinks the U.S. government treated the Cherokee nation—all the Native Americans—unfairly.

Ms. Robertson: Can you say more about that?

David: Well, here it says that the Cherokees were supposed to be removed slowly, in "gradual stages." But they discovered gold on that land, so they wanted to get them out fast and take the gold.

Chue: It seems like the author is looking down on that.

Ms. Robertson: Are there any words in particular give clues about what the author thinks?

Chue: We think when he uses the words "clamor" and "immediate wholesale exodus," it makes it sound like people were freaking out and telling the government to get rid of all the Native Americans right away. To wipe them all out. And he also uses quotation marks around "permanent Indian frontier." I think it's like when you do air quotes. You're saying it's not really that.

Adriana: And he also uses words to describe the Native Americans, like "shabby" and "rusty" and "refugees." So, that makes us think he feels more for the Native Americans than the U.S. Government. He's telling us how bad they had it, how bad their experience was.

David: He sympathizes with them.

Ms. Robertson: Who sympathizes with whom?

David: The author sympathizes with the Native Americans, and he thinks the U.S. Government treated them with injustice.

Adriana: *I want to elaborate on what you said.* I think he has the same perspective as the Native Americans. I think he's trying to show us what their experience was like.

Ms. Robertson: That's an interesting observation, and it's making me think about conversations we've had about how history isn't just facts written down. History is written by people, people who have opinions about things, only, sometimes we can't see their opinion right away because they're not saying things like "I think." But if we take a look carefully at the language they use then, we can get a better sense of what the author really thinks, what they author's perspectives and attitudes are.

After the small group conversations, Ms. Robertson pulls the whole group together to compare responses. She asks students some strategic questions about what they found, differentiating the questions based on what she knows about her students' English proficiency levels, and she calls on a mix of students at different achievement levels, tailoring the questions to individuals while prompting higher level responses from all students. As individuals share their ideas, she encourages them to elaborate and she clarifies concepts as needed. Afterwards,

Vignette 7.3. Reading, Analyzing, and Discussing Complex Texts in American Literature Integrated ELA/Literacy, ELD, and History in Grade Eleven (cont.)

she calls on representatives to report their group's findings. Her students know that they are all accountable for sharing out about their collaborative group work, and she supports them in doing so by providing adequate wait time to gather their thoughts and by suggesting that they consult with a peer or their group if they are unsure about what to say when reporting. Next, she asks a representative from each group to display the recorder's consensus notes on the document camera and explain what the group found. She requests that all students who are listening to take notes on anything that is new or different from their own group's findings.

Next, the students engage in a familiar game-like task: Collaborative Summarizing. In this task, the students have a very limited amount of time to work together to summarize the section they just read using 20 words or fewer (depending on the reading passage, Ms. Robertson sometimes limits this to 15 words or fewer). She gives the students three minutes to complete the task in pairs, using the following process:

Collaborative Summarizing

Step 1: Find *who* or *what* is most important in the section.

Step 2: Describe what the *who* or *what* is doing.

Step 3: Use the most important words to summarize the section in 20 words or fewer. (It can be more than one sentence.)

(When time permits, a Step 4 is added: "Use the thesaurus to find more precise or nuanced ways to say this." This challenges students to expand their vocabulary repertoires.)

Adriana and Sara are partners for this task, and the passage summary they generate is the following:

> The Cherokees were removed from their land because the U.S. government wanted their gold, and they became refugees.

A few students share their summaries, while the class listens to evaluate whether or not all of the critical information is embedded. To wrap up the lesson, Ms. Robertson gives students five minutes to respond to a writing prompt. The quick write is not intended as a test of their learning, but rather as an opportunity for students to synthesize the ideas discussed that day. The quick write also provides Ms. Robertson with valuable feedback she can use to adjust instruction in subsequent lessons.

Quick Write:

Based on the text we read today, what were the author's perspective and attitudes about the experiences of the Native Americans during this period of history? Use terms from today's reading and your conversations, as well as at least one example from the text to support your ideas.

Vignette 7.3. Reading, Analyzing, and Discussing Complex Texts in American Literature Integrated ELA/Literacy, ELD, and History in Grade Eleven (cont.)

Ms. Robertson briefly reviews her students' written responses as they are writing and at the end of class, and she quickly records a few notes in her journal to remind herself of specific areas she will want to focus on in future lessons. Mostly, she focuses on students' understandings of the ideas in the text they read that day while also noting any misunderstandings she will need to rectify. She is also interested to see whether students are taking up the language resources (e.g., vocabulary, complex sentences, and use of long noun phrases) modeled in the complex texts students are reading and analyzing.

Next Steps

One thing Ms. Robertson wants students to be able to do is monitor their own thinking and learning and evaluate their own writing. At the beginning of class the next day, she has students swap their quick writes and guides them to review the quick-write prompts. Ms Robertson then asks students to share examples from the writing they have in front of them that they think respond effectively to the prompt. As they offer examples, she writes down what they share using the document camera. Next, she asks students to examine their own papers, and based on what they have just discussed, evaluate how effectively they think they responded to the prompt. She has found that when students reflect on their own writing in this manner, they gain valuable ideas about what to include next time they write.

As the unit progresses, students will read other excerpts from *Bury My Heart at Wounded Knee*. They will also select a novel to read and analyze in small book groups, examining perspectives presented in the novels and relating them to the social and political changes occurring during the Civil Rights Movement. The students will also read and analyze other text types, including short essays and stories, poetry, and speeches. At the end of the unit, each student will write an argument that includes evidence from the texts they read and media they viewed to support their assertions, about the historians' responsibilities to depict history from multiple perspectives.

At their next collaborative planning session, Ms. Robertson and her colleagues discuss how the interdisciplinary unit has been going. The teachers examine a few of the writing samples from each of their classes in order to determine where they should focus more attention on content understandings, disciplinary literacy, and language development. Because the teachers have their students write daily, analyzing each piece of student writing in depth is not plausible, which is why looking at student writing *on the spot* during class and briefly during collaborative planning sessions is so valuable. The on-the-spot observations combined with examining samples of student writing during collaborative planning time helps teachers ensure that students are on track for the end-of-unit writing performance tasks, which the teachers will analyze in depth.

Vignette 7.4. Unpacking Sentences and Nominalization in Complex History Texts Designated ELD Instruction in Grade Eleven

Background

English learners from different eleventh-grade English classes come together in Mr. Martinez's designated ELD class, which is designed to support ELs who are relatively new to English. The students are at a range of English language proficiency levels, from late Emerging through early Expanding, and have been in U.S. schools for about two years. Some students spent their first year at a newcomer school where they participated in an intensive program specifically designed for high school students learning English as an additional language. Other students were placed directly in mainstream classes and in a designated ELD class like this one. All EL students at the school have a *zero period* where they take an elective, thereby extending their school day and ensuring that they can receive targeted language instruction without missing out on any content classes or electives, such as art and music, or afterschool opportunities, such as athletics.

Many of Mr. Martinez's students are also in Ms. Robertson's English class (see vignette 7.3), but some are in other teachers' English classes. Mr. Martinez works closely with the English and other content area teachers to ensure that he understands the types of reading, writing, and conversation tasks in which his EL students are expected to fully participate. He plans his instruction and designs lessons to support his students in developing disciplinary literacy so that they will be able to interact more meaningfully with texts and tasks in their content classes. He has asked the other teachers to provide him with information about the texts students are reading, writing, and discussing, so he can explicitly make connections to what they are studying in their other classes.

Lesson Context

Mr. Martinez frequently calls students' attention to the stylistic choices authors make—"how style and content contribute to the power, persuasiveness, or beauty of the text" (RI.11–12.6). Paying particular attention to his ELs' language learning needs, he uses the CA ELD Standards as focal standards for instruction. He wants to guide students to notice how writers strategically adopt particular language resources to convey their opinions or attitudes, sometimes in ways that may not be immediately evident.

In today's lesson, Mr. Martinez focuses on helping students unpack sentences to understand them better and identify some of the language resources authors are using. He knows that his students are often challenged by the texts they are asked to read in their content classes. Some of these texts contain complex sentences and long noun phrases that are densely packed with meaning. Mr. Martinez has noticed that many of the texts contain *nominalizations*, which use a verb, an adjective, or an adverb as a noun, or as the head of a noun phrase. Typically expressed (in everyday language) by verbs (e.g., destroy) or adjectives (e.g., strong), in academic text they are often expressed as *things*, or nouns and noun phrases (e.g., destroy → destruction, strong → strength). He wants his students to learn how to tackle some of the linguistic features that can make sentences difficult to read (e.g., complex sentences, long noun phrases, nominalizations), so he plans to show them how they can analyze sentences. The learning target and cluster of CA ELD Standards in focus for today's lesson are the following:

Vignette 7.4. Unpacking Sentences and Nominalization in Complex History Texts Designated ELD Instruction in Grade Eleven (cont.)

Learning Target: The students will *unpack* or break down long sentences and analyze how nominalization can affect an author's message or a reader's interpretation of a text.

CA ELD Standards (Expanding): *ELD.PI.11–12.1 – Contribute to class, group, and partner discussions, sustaining conversations on a variety of age and grade-appropriate academic topics by following turn-taking rules, asking and answering relevant, on-topic questions, affirming others, providing additional, relevant information, and paraphrasing key ideas; ELD.PI.11–12.8 – Explain how a writer's or speaker's choice of phrasing or specific words produces nuances and different effects on the audience; ELD.PI.11–12.12a – Use an increasing variety of grade-appropriate general academic and domain-specific academic words accurately and appropriately when producing increasingly complex written and spoken texts; ELD.PII.11–12.7 – Condense ideas in a growing number of ways to create more precise and detailed simple, compound, and complex sentences.*

Lesson Excerpts

In today's lesson, Mr. Martinez shows his students how to break down or *unpack* some of the sentences from *Bury My Heart at Wounded Knee: An Indian History of the American West* by Dee Brown, which most of the students have started reading in their English classes. There are a few students who have not yet begun reading the text because they are in other English classes, so he invites those who have started to read excerpts to provide an overview. To build background knowledge before analyzing the language of the text in more depth, he prompts those who are sharing to use particular words and phrases, such as "Cherokee Nation," the "permanent Indian frontier," and "removed."

He tells students that they will be looking intensively at an excerpt and that the first time they read it, it may seem quite challenging. He assures them, however, that with multiple readings, the meaning will become increasingly clear. He also promises to show them a helpful method for unpacking the meanings in particularly tricky sentences. He briefly explains some terms from the excerpt that he anticipates will be particularly challenging for students (e.g., *stages, decade, permanent, blotted out, rounded them up*). Next, he reads the excerpt aloud as students follow along, silently reading their own copies. When he models reading in this way, students are able to hear what the text sounds like, including Mr. Martinez 's pronunciation as well as his pauses and intonation. The excerpt he uses is the following:

> The decade following the establishment of the "permanent Indian frontier" was a bad time for the eastern tribes. The great Cherokee nation had survived more than a hundred years of the white man's wars, diseases, and whiskey, but now it was to be blotted out. Because the Cherokees numbered several thousands, their removal to the West was planned to be in gradual stages, but the discovery of Appalachian gold within their territory brought on a clamor for their immediate wholesale exodus. During the autumn of 1838, General Winfield Scott's soldiers rounded them up and concentrated them into camps. (A few hundred escaped to the Smoky Mountains and many years later were given a small reservation in North Carolina.) From the prison camps they were started westward to Indian Territory.

Vignette 7.4. Unpacking Sentences and Nominalization in Complex History Texts Designated ELD Instruction in Grade Eleven (cont.)

After reading aloud, Mr. Martinez invites students to share their understandings of the excerpt thus far with members of their table groups. Most of the students have already read this excerpt in their English class, and this brief discussion allows Mr. Martinez to listen in and assess what students know and what language they use to convey their knowledge. After the brief discussion, he answers a few clarifying questions students pose, using the students' primary language(s), as appropriate and possible (Mr. Martinez speaks Spanish and some Portuguese). Next, he asks students to read the excerpt aloud with him chorally. He asks them to focus on the literal meanings of the text as they read.

Mr. Martinez: Who thinks that this text is challenging? I find it challenging, but I'm going to show you some helpful ways of attacking complex texts like this one. First of all, let's talk a little bit about why this text seems difficult. What do you notice? (He listens as students comment.) Even in this short excerpt the sentences have a lot of tightly packed information.

Mr. Martinez For example, let's just look at this long noun phrase: *The decade following the establishment of the "permanent Indian frontier."* Wow! That's a lot of information crammed into a small amount of space. The main noun, or thing, in that phrase is *decade*, which means ten years, and everything around that word is providing more details and information about that decade.

Mr. Martinez then shows his students a technique for unpacking tricky sentences that contain long noun phrases such as the one he just highlighted. He uses the following procedure:

Sentence Unpacking Teaching Process

1. Choose a sentence from a text that students have already read. Ensure that it is *a sentence that is critical for understanding the key meanings of the topic in the text.*
2. Model, through thinking aloud and using natural language, how to unpack the meanings of the sentence, teasing apart the densely-packed information into workable chunks.
3. Put the meanings back together (condense) in your own words (paraphrase), and compare your version with the original sentence.
4. Talk about the language resources used in the original sentence and why the author may have chosen them to convey these ideas.
5. Discuss how the sentence is structured and how this structure affects meaning (e.g., connects, condenses, combines, enriches, or expands ideas).
6. Return to the core meaning of the sentence to make sure that students retain it as the central focus.

Vignette 7.4. Unpacking Sentences and Nominalization in Complex History Texts Designated ELD Instruction in Grade Eleven (cont.)

Mr. Martinez has prepared a chart for students to use when they "unpack" sentences:

Sentence Unpacking
1. Unpack the sentence to get at all the meanings: • *What is happening?* • *Who or what is involved?* • *What are the circumstances surrounding the action (when, where, in what ways)?* 2. Repackage (paraphrase) the meanings in your own words: • *What does this sentence mean in my own words?* • *How can I condense my words to make the sentence more compact?* 3. Think more deeply about the original sentence: • *What do I notice about the language the author chose to use?* • *How does this language make meanings in specific ways?*

He displays the sentence he will unpack using the document camera. Thinking aloud as he proceeds, he splits the sentence into its more meaningful clausal chunks and proceeds to write all the meanings he sees in the sentence in bullet points. The students watch and listen, and he invites them to ask questions when they are unclear about the language he uses.

Because the Cherokees numbered several thousands,
their removal to the West was planned to be in gradual stages,
but the discovery of Appalachian gold within their territory brought on a clamor for their immediate wholesale exodus.

- Numbered – There were lots of (several thousand) Cherokee Indians.
- Their removal – Someone was supposed to be removed from their lands. (the Cherokees?)
- Gradual stages – They (the government?) were supposed to take the Cherokees to the West slowly over time.
- Because – There were several thousand Cherokees, so they were supposed to move them slowly.
- The discovery – People (the government?) discovered Appalachian gold on Cherokee land.
- Appalachian gold – People (the government?) wanted the gold from Appalachia.
- A clamor – People made a lot of noise about something.
- Immediate wholesale exodus – People (who?) told the government to move all the Cherokees off their land right away, now.

Vignette 7.4. Unpacking Sentences and Nominalization in Complex History Texts Designated ELD Instruction in Grade Eleven (cont.)

Mr. Martinez: So, you can see that there's a lot *packed into* that one sentence. When I'm reading a sentence like this, in my head, I'm *unpacking* the meanings in my own words, so I can understand it. Obviously, I'm not writing all of this down, but I wanted to show you what's going on in my head. After I've unpacked the sentence, I put all of those meanings back together again so I can get a better sense of what the author was trying to convey. What do you think this sentence is saying? (He listens to their responses.) I think that what this sentence is saying is that people found out that there was gold on the Cherokee's land in the Appalachian mountains, and they wanted the gold, so the people wanted the Cherokees out fast. Even though there were thousands of Cherokees, and they were supposed to move them off of their land slowly, some people complained and made sure that all of the Cherokees moved off their land right away.

Eugenia: But, that's not what it says. It's not saying it the same way. The author has other words.

Mr. Martinez: You are right, and that's what's interesting here. What are some of the differences between the way it's written and the way I just used my own words to say it?

Victor: You use a lot more words!

Mr. Martinez: Yes, I did use a lot more words, but I can *condense* what I said even more and still use my own words: *The U.S. government was supposed to move the Cherokee Indians off of their land slowly, but the government discovered gold on the Cherokee's land, so people wanted the Cherokees to leave faster.* One of the things you have when you write is time, and when you have time, you can condense your ideas and make them more compact.

After some more discussion, during which Mr. Martinez clarifies students' understandings about the process of unpacking sentence meanings, he guides his students to unpack another sentence with him. This time, he has them tell him what to write, prompting them if they get stuck. Next, he asks his students to work in pairs to unpack the remaining sentences in the section, using the same process, and looking in their English dictionaries and thesauruses, and/or their bilingual dictionaries as needed. He requires students to agree on the words they will use to unpack and then repackage (or paraphraase) the meanings, and he also requires both students in each pair to write. As students work together, he listens in on their conversations. One student, Suri, has noticed that there are some words that are making it difficult to see who is doing what (e.g., *their removal, the discovery, a clamor, an exodus).*

Suri: So the word, like *removal.* It say "their removal to the West," but it no say who is removing. When he unpack it, he say people, some people remove them. But who? Who remove the Cherokee Nation?

Fayyad: Maybe we can look here (pointing to the text). Here, it says it "was planned . . ." Huh. That doesn't tell who.

Vignette 7.4. Unpacking Sentences and Nominalization in Complex History Texts Designated ELD Instruction in Grade Eleven (cont.)

Mr. Martinez takes note of the students' conversations so that he can address their questions and observations with the whole group. When he pulls the class back together to debrief, he asks them to report on their discussions. Each pair takes turns using the document camera to explain how they unpacked one of the sentences and then put them into their own words. They also share what they noticed about the language the author used.

Suri: It's hard to know who was doing it.

Mr. Martinez: Can you elaborate on that?

Suri: There are all these words—*removal, discovery, clamor.* We don't know who is doing that. We don't know who is removing or who is discovering. I think it the soldiers because then it say, "General Winfield Scott's soldiers rounded them up."

Mr. Martinez: That's a great observation, Suri. What you're noticing is that writers can put a lot of information in sentences by using nouns or noun phrases to stand in for whole ideas. This is called *nominalization*. So, instead of saying "the army removed the Cherokees from their ancestral lands to the West," or "the white settlers discovered gold," the author can just write "their *removal* to the West," and "the *discovery* of gold." That packs more information into a sentence, and it also makes it harder to see who is doing the action—who the agent of the action is. When people do things, they're the *agents*. So, one of the things nominalization does is hide the agent or who is doing the action. These types of words—things that are usually verbs, or sometimes adjectives—are sometimes turned into nouns or things. This is called *nominalization*. There are lots of reasons *why* an author would *choose* to do that, and we're going to look at some of those reasons today.

Mr. Martinez writes a student-friendly definition of nominalization on a piece of chart paper, which he will later post for the students' future reference:

Nominalization	
What is it? • Turning one part of speech into nouns or noun groups. • Usually verbs: construct → construction • Sometimes adjectives: different → difference	**Why use it?** • In history texts, nominalization is often used to make actions (verbs) or qualities (adjectives) into *things*. • This lets the writer interpret and evaluate the *things* and say more about them. • It also hides the *agents* (who is doing the action).

Vignette 7.4. Unpacking Sentences and Nominalization in Complex History Texts Designated ELD Instruction in Grade Eleven (cont.)

Nominalization (cont.)
Examples: I **destroyed** (v.) the car. → The **destruction** (n.) of the car . . . They **removed** (v.) the Native Americans. → The **removal** (n.) of the Native Americans . . . I am exhausted (adj.). → My exhaustion prevented me from enjoying the party.

As Mr. Martinez discusses the chart, he explains what he is writing and asks his students questions about the terms and examples.

Mr. Martinez: So, if you write, "The destruction of the car . . . ," that hides who did it. Why would you want to do that?

Amir: (laughing) Because you don't want the police take away your driver license!

Mr. Martinez: Right, if I say it like a thing, "the destruction of the car," we can't tell who did it—me! That one was pretty easy. If you write "The removal of the Native Americans . . . ," that also hides the agent. Why would the historian want to hide agency here? Talk for a minute with the person sitting next to you first.

Selena: If you hide the agent, the people who do it, we think it just happen. But we don't know who do it. Or we have to think hard to see who did it.

Katia: And I think it show that the Native Americans do not make the decisions themselves. Someone forced them to leave their land. But if you don't say who force them, then it makes it softer or seem not so bad.

Elois: We don't know who *planning* to remove the Cherokee, and we don't know who *removing* them.

Mr. Martinez: Right, and how do we know someone is removing them?

Nadia: It say, "their removal." But they are not removing themself.

Mr. Martinez: Good observation. Notice this word: removal. It's related to the verb remove, right? But is it a verb here?

Amir: That's passive voice.

Mr. Martinez: That's a great connection you're making. This is like passive voice, but it's a little different. The thing that's the same is that you don't know who the agent is when you use passive voice or nominalization. But what's different is that passive voice is still in the verb form. So, you might say something like "The Cherokees *were removed*." However, nominalization turns the verb into a noun or a "thing." Instead of seeing were removed, you'd see "their removal."

Vignette 7.4. Unpacking Sentences and Nominalization in Complex History Texts Designated ELD Instruction in Grade Eleven (cont.)

Mr. Martinez writes the following examples of what he explained on the board:

Active Voice	Passive Voice	Nominalization
The U.S. government ***removed*** the Cherokees.	The Cherokees ***were removed*.**	*Their removal . . .*
verb form – can see agent	*verb form – cannot see agent*	*noun form – cannot see agent*

He then asks students to find other nominalizations in the text. They read the sentences together, and at the end of each one, he asks them to identify any nominalizations. The class decides together if the words are nominalizations; the students highlight them and then discuss what questions they should be asking themselves when they read. Finally, Mr. Martinez asks students to translate the part of the sentence that contains the nominalization into a sentence using the more typical verb form of the word. A portion of the chart that the class generates follows.

Nominalizations	Questions about Agency	Verb form translation
the establishment	Who established the "permanent Indian frontier"?	The U.S. government **established (made)** the "permanent Indian frontier."
their removal	Who is removing the Cherokees?	The army **removed (took away)** the Cherokees to the West.
the discovery	Who discovered the gold?	The U.S. government **discovered (found)** gold.
a clamor	Who is clamoring for their exodus?	The white settlers **clamored (made a lot of noise)** for the Cherokee people to leave.

Next Steps

For the rest of the year, Mr. Martinez will expand his students' understandings of nominalization and other language resources by drawing their attention to instances of nominalization and facilitating discussions about word meanings and possible reasons an author might have chosen to use them. In the next collaborative planning session, Mr. Martinez discusses unpacking sentences with his colleagues. The science teacher notes that this would be a very useful technique for his classes since the science texts he uses contain many densely packed sentences. Together, the teachers look at one of the sentences from a science text that students are currently reading, and they unpack it together using Mr. Martinez's technique.
