## Site Selection Evaluation

*Part 2*

<b>Site identification</b>		<b>Grade level</b>
<b>Location</b>	<b>Gross acres</b>	<b>Estimated value</b>

FACTORS		0	1	2	3	4	5		Total Points
<b>Safety</b> (20 possible points)	<i>Dangerous</i>							<i>Safe</i>	x 4=
<b>Location</b> (15 possible points)	<i>Remote</i>							<i>Convenient</i>	x 3=
<b>Environment</b> (10 possible points)	<i>Polluted</i>							<i>Clean</i>	x 2=
<b>Soils</b> (10 possible points)	<i>Unstable</i>							<i>Stable</i>	x 2=
<b>Topography</b> (10 possible points)	<i>Unsuitable</i>							<i>Suitable</i>	x 2=
<b>Size and Shape</b> (10 possible points)	<i>Insufficient</i>							<i>Sufficient</i>	x 2=
<b>Accessibility</b> (10 possible points)	<i>Obstructed</i>							<i>Accessible</i>	x 2=

FACTORS		0	1	2	3		Total Points
<b>Public Services</b> (3 possible points)	<i>Unserviced</i>					<i>Serviced</i>	x 1=
<b>Utilities</b> (3 possible points)	<i>Unavailable</i>					<i>Available</i>	x 1=
<b>Cost</b> (3 possible points)	<i>Expensive</i>					<i>Economical</i>	x 1=
<b>Availability</b> (3 possible points)	<i>Difficult</i>					<i>Easy</i>	x 1=
<b>Public Acceptance</b> (3 possible points)	<i>Conflict</i>					<i>Harmonious</i>	x 1=

**Total Points**

(Possible 100)

**Note:** Rank each site separately. A score of zero on a critical factor such as *safety*, for example, indicates that the negative aspects of that factor could not reasonably be mitigated. Therefore, the site should be eliminated from consideration, regardless of potential high scores on other factors.
