Introduction to the DRDP (2015)

Welcome to the Desired Results Developmental Profile (2015) [DRDP (2015)]: A Developmental Continuum from Early Infancy to Kindergarten Entry. The DRDP (2015) is a formative assessment instrument developed by the California Department of Education for young children and their families to be used to inform instruction and program development.

The DRDP (2015) is based on the previous DRDP instruments. It includes refinements made over the past several years and new elements that are essential to quality early childhood education. It aligns with the California Department of Education's Early Learning and Development Foundations.

Key Features of the DRDP (2015):

- The DRDP (2015) is administered in natural settings through teacher observations, family observations, and examples of children's work. Ongoing documentation of children's knowledge and skills in everyday environments is a recommended practice for early childhood assessment.
- The DRDP (2015) replaces the DRDP-Infant/Toddler© (2010), the DRDP-Preschool© (2010), and the DRDP access assessment instruments.
- The DRDP (2015) represents a full continuum of development from early infancy up to kindergarten entry. It has two views: the Infant/Toddler view for use with children in infant/toddler programs, and the Preschool View, for children in preschool programs.
- The DRDP (2015) is designed for use with all children from early infancy up to kindergarten entry, including children with Individualized Family Service Plans (IFSPs) and Individualized Education Programs (IEPs).
- The DRDP (2015) takes into consideration the specific cultural and linguistic characteristics of California's diverse population of young children, with specific consideration for children who are young dual language learners (see section below).
- The DRDP (2015) was developed with the goal of ensuring that all children have the opportunity to demonstrate their knowledge and skills. To enable access to the assessment for diverse populations, the principles of Universal Design were followed.
- The DRDP (2015) includes domains that meet the federal Office of Special Education Programs (OSEP) child outcome reporting requirements for children with Individualized Family Service Plans (IFSPs) or Individualized Education Programs (IEPs).

Information about Selected Key Features

Three of these key features: (1) consideration of young children who are dual language learners, (2) universal design and adaptations for children with IFSPs and IEPs, and (3) a detailed description of the developmental domains that make up the instrument, are described in more detail to help teachers and service providers better understand and rate the measures of the DRDP (2015).

Young Dual Language Learners and the DRDP (2015)

Dual language learners are children learning two or more languages at the same time, as well as those children learning a second language while continuing to develop their first (or home) language. A child's experience with one or more languages is an asset to build on in the early childhood setting. It is critical to consider the child's communication in all the languages that he or she is learning in order to have an accurate picture of a child's knowledge and skills. Young children, including children with disabilities, can successfully learn two or more languages. Learning two or more languages has linguistic, social, cognitive, academic, and cultural benefits. The path to learning one language shares many similarities with the path to learning two or more languages. There are also differences that must be taken into consideration when assessing young children who are dual language learners. Children may have vocabulary for concepts in one language and vocabulary for other concepts in another language. So it is important to assess children in all of the languages he or she understands and uses. The DRDP (2015) addresses cultural and linguistic responsiveness in two primary ways:

1. Teachers and service providers observe and document children's behavior in both the home language and English to obtain a more accurate profile of the children's knowledge and skills across developmental domains.

2. Teachers and service providers rate children's progress on two language development domains. The Language and Literacy Development (LLD) domain assesses all children's progress in developing foundational language and literacy skills where ratings should be based on skills in all languages. The English-Language Development (ELD) domain assesses current knowledge and skills and progress in learning to communicate in English.

Universal Design and the DRDP (2015)

In the context of assessment, "Universal Design" refers to the development of assessments that are appropriate for all children to the greatest extent possible. Universal Design allows children the opportunity to demonstrate their knowledge and skills in a variety of ways. All young children are entitled access to, and meaningful participation in, age-appropriate, individually-appropriate and culturally-appropriate early childhood curricula and assessments. Teachers and service providers support children's access and participation by identifying and providing learning opportunities, materials, and teaching strategies in flexible and individualized ways and through a variety of learning modalities. DRDP (2015) assessors apply universal design when they carefully consider the various ways young children can demonstrate knowledge or skills that reflect mastery of a developmental level.
The Eight Domains of the DRDP (2015)
The DRDP (2015) is made up of eight domains. The focus of each domain is on the acquisition of knowledge, skills, or behaviors that reflect each domain's developmental constructs.

Approaches to Learning–Self-Regulation (ATL-REG)
The ATL-REG domain assesses two related areas that are recognized as important for young children's school readiness and success: Approaches to Learning and Self-Regulation. These areas have been combined into one domain because of the strong connections between them. The Approaches to Learning skills include attention maintenance, engagement and persistence, and curiosity and initiative. The Self-Regulation skills include self-comforting, self-control of feelings and behavior, imitation, and shared use of space and materials.

Social and Emotional Development (SED)
The SED domain assesses children's developing abilities to understand and interact with others and to form positive relationships with nurturing adults and their peers. The knowledge or skill areas in this domain include identity of self in relation to others, social and emotional understanding, relationships and social interactions with familiar adults, relationships and interactions with peers, and symbolic and sociodramatic play.

Language and Literacy Development (LLD)
The LLD domain assesses the progress of all children in developing foundational language and literacy skills. These skills can be demonstrated in any language and in any mode of communication. Language and literacy skills in a child's first language form the foundation for learning English. Therefore, dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. LLD measures should be completed for all infants, toddlers, and preschool-age children, including those who are dual language learners.

English-Language Development (ELD)
The ELD domain assesses the progress of children who are dual language learners in learning to communicate in English. The developmental progression described in the four ELD measures is related to the child's experiences with English, not the child's age. Keep in mind that children acquire English in different ways and at different rates. Factors that affect English acquisition include degree of exposure to English, level of support provided in their home/first language, and individual differences such as age of exposure to English or the structure of the child's home/first language. The ELD measures should be completed only for preschool-age children whose home language is other than English.

Cognition, Including Math and Science (COG)
The COG domain focuses on observation, exploration of people and objects, and investigation of objects and concepts. The knowledge or skill areas in this domain include spatial relationships, cause and effect, classification, number sense of quantity, number sense of math operations, measurement, patterning, shapes, inquiry through observation and investigation, documentation and communication of inquiry, and knowledge of the natural world.

Physical Development–Health (PD-HLTH)
The PD-HLTH domain assesses motor development and the development of routines related to personal care, safety, and nutrition. The knowledge or skill areas in this domain include perceptual-motor skills and movement concepts, gross locomotor movement skills, gross motor manipulative skills, fine motor manipulative skills, active physical play, nutrition, safety, and personal care routines (hygiene, feeding, dressing).

History-Social Science (HSS)
The HSS domain focuses on learning about the expectations of social situations, how to participate within a group, and the relationship between people and the environment in which they live. The knowledge or skill areas in this domain include sense of time, sense of place, ecology, conflict negotiation, and responsible conduct.

Visual and Performing Arts (VPA)
The VPA domain focuses on awareness and engagement in four areas of artistic expression. The knowledge or skill areas in this domain include visual art, music, drama, and dance.

About the Measures of the DRDP (2015)
The levels for each DRDP (2015) measure describe a developmental continuum, ranging from earlier developing to later developing competencies. The DRDP (2015) includes three types of continua:

- **Full Continuum Measures**: describe development from early infancy to early kindergarten entry. These measures should be used with all infants, toddlers, and preschool-age children.

- **Earlier Development Measures**: describe development that typically occurs from early infancy through early preschool ages and may be used with preschool-age children under specific conditions (identified as Conditional measures).

- **Later Development Measures**: describe development that typically occurs from early preschool ages up to kindergarten entry. These measures should be used with all preschool-age children.
### Conditional Measures for Preschool-Age Children

Some measures in the DRDP Preschool View are considered conditional measures that are assessed when certain conditions are met. These measures should be used if they assist teachers and service providers in planning a child's learning activities and supports, and documenting progress.

<table>

*Guidance for rating ELD measures for children who are dual language learners is provided in the section, “Young Dual Language Learners and the DRDP (2015)” on page Intro-2.

### The Developmental Levels

The number of levels in a measure varies depending on the competencies that are appropriate for that measure's developmental continuum. The levels are organized under four categories from early infancy up to kindergarten entry: Responding, Exploring, Building, and Integrating:

- **Responding (Earlier, Later)**
  Knowledge, skills, or behaviors that develop from basic responses (through using senses and through actions) to differentiated responses. Children generally engage in back-and-forth interactions with familiar adults and communicate through nonverbal messages.

- **Exploring (Earlier, Middle, Later)**
  Knowledge, skills, or behaviors that include active exploration including purposeful movement, purposeful exploration and manipulation of objects, purposeful communication, and the beginnings of cooperation with adults and peers. Children generally begin this period by using nonverbal means to communicate and, over time, grow in their ability to communicate verbally or use other conventional forms of language.

- **Building (Earlier, Middle, Later)**
  Knowledge, skills, or behaviors that demonstrate growing understanding of how people and objects relate to one another, how to investigate ideas, and how things work. Children use language to express thoughts and feelings, to learn specific early literacy and numeracy skills, and to increasingly participate in small group interactions and cooperative activities with others.

- **Integrating (Earlier)**
  Knowledge, skills, or behaviors that demonstrate the ability to connect and combine strategies in order to express complex thoughts and feelings, solve multi-step problems, and participate in a wide range of activities that involve social-emotional, self-regulatory, cognitive, linguistic, and physical skills. Children begin to engage in mutually supportive relationships and interactions.

Note that the developmental levels for the ELD domain differ from the above format as they represent the developmental progression for the acquisition of English as a second language during the early childhood years.
Definitions of Terms in the Navigation Maps

Developmental Domain: A crucial area of learning and development for children.

- Measures: The developmental continuum along which a child’s observed behavior is measured. Measures are the individual assessment items in the DRDP.
- Full Continuum Measure: Describes development from early infancy to early kindergarten.
- Early Development Measure: Describes development that typically occurs in infant/toddler and early preschool years.
- Later Development Measure: Describes development that typically occurs in the preschool years and early kindergarten.

Definition: Specifies the aspects of development to be observed.

Developmental Level: A point along a developmental progression for a particular measure that ranges from earlier to later levels of development.

Descriptor: Defines the behaviors that would be observed for a child at that developmental level.

Example: Specific behaviors you might see that would demonstrate that a child has reached mastery of a particular developmental level. Note that the examples provided in the DRDP are not the only way a child can demonstrate mastery of a developmental level.

Example of a Full Continuum Measure

Developmental Domain: PS-HEALTH – Physical Development/Health

Example of an Earlier Developmental Measure

Developmental Domain: ATL-REG – Approaches to Learning – Self-Regulation

Example of a Late Developmental Measure

Developmental Domain: PS-PSHCARED – Physical Self-Care

Example of an All Developmental Measures

Developmental Domain: ATL-REG 6: Engagement and Persistence

Intro-5 of 16
The 3 Steps to Completing the DRDP (2015)

⇒ Step 1: Observation and Documentation

The DRDP (2015) focuses on the child’s behavior, knowledge, and skills. To capture a child’s behavior, the DRDP (2015) incorporates observation in natural settings.

While observing and collecting documentation, remember that words, phrases, and sentences can be communicated and understood in a variety of ways, including spoken in the child’s home language, signed, and through other communication modes (e.g., via a communication device). The teacher’s and service provider’s direct observations of a child are the primary method used to inform ratings and they should also use other sources of evidence to capture a more complete picture of a child’s knowledge and skills. Other sources of evidence include the following:

- **Observations by others** – including teachers, family members/caregivers, and other service providers or caregivers, obtained through interview or conversations
- **Other documentation** – including samples of children’s work, photographs, and video/audio recordings of children’s communication and behavior

The Important Role of Families in the Documentation Process

Family members have repeated opportunities to observe their child’s activities and interactions over time and in a variety of situations. Their perspectives, combined with teachers’ and service providers’ observations, provide a more complete and reliable picture of a child’s typical behaviors. Inviting family members to share observations of their child’s development and behavior is a recommended practice for the DRDP (2015). The opportunity to observe a child’s level of mastery is greatest when the child is interacting with a familiar adult. Because of this, it is helpful to observe a child interacting with family members. This is especially true for children who are new to a program or at the earliest levels (Responding Earlier and Responding Later). These observations can inform assessment decisions for all domains. They are particularly important for the SED and LLD domains since social interaction and communication skills are learned through repeated interactions with familiar adults.

Observation and Documentation for Young Dual Language Learners

Young dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. They may also code-switch, which is using more than one language within a conversation. Therefore, communication in all languages the child uses should be considered when collecting documentation and completing the measures in all domains. The adult who is conducting observations and collecting documentation should speak the child’s home language. If not, the adult must receive assistance from another adult, who does speak the child’s home language. This may be an assistant teacher, director, parent, or other adult who knows the child.

Dual Language Learners’ Use of Code Switching

- Code switching is the use of multiple languages within a single conversation. It is a typical feature of learning two or more languages.
- As early as three years of age, children code switch to playfully experiment with the two languages and to serve their own social and communication goals. For example, children may code switch to emphasize or elaborate a point. Children might code switch when speaking with one person, or may use one language exclusively with one person and another language with another person. When children mix their two languages they use the grammatical rules of each language. For example, "I want leche" ("I want milk") is an example of inserting a Spanish noun into a grammatically correct English sentence.

Using Adaptations

Adaptations are changes in the environment or differences in observed behavior that allow children with IFSPs or IEPs to demonstrate their knowledge and skills in typical environments. Seven broad categories of adaptations have been identified for children with IFSPs and IEPs for the DRDP (2015).

- The adaptations listed in the table below have been developed so that the assessment will more accurately measure a child’s abilities rather than the impact of a child’s disability (a more detailed description of the adaptations appears in Appendix D). Adaptations must be in place for the child during the normal course of the day, and they should also be in place during observations for the DRDP (2015). Everyone working with the child should be informed of any adaptations the child uses.
- New adaptations must not be introduced solely for the purpose of conducting the DRDP (2015) assessment.
- Consideration of adaptations should be made on a regular basis from early infancy and as the child develops and grows.
Seven Categories of Adaptations

Augmentative or Alternative Communication System
Methods of communication other than speech that allow a child who is unable to use spoken language to communicate with others.

Alternative Mode for Written Language
Methods of reading or writing used by a child who cannot see well enough to read or write or cannot hold and manipulate a writing utensil (e.g., pencil, pen) well enough to produce written symbols.

Visual Support
Adjustments to the environment that provide additional information to a child who has limited or reduced visual input.

Assistive Equipment or Device
Tools that make it possible or easier for a child to perform a task.

Functional Positioning
Strategic positioning and postural support that allow a child to have increased control of his body.

Sensory Support
Increasing or decreasing sensory input to facilitate a child’s attention and interaction in the environment.

Alternative Response Mode
Recognition that a child might demonstrate mastery of a skill in a unique way that differs from the child’s typically developing peers.

Step 2: Rating the Measures

Determining the Child’s Latest Level of Mastery
For each of the measures, determine the latest developmental level the child has mastered, and mark it appropriately.

The Descriptors and Examples
Consider the descriptors first, and then the examples, to determine which developmental level is most consistent with your observations and other documentation of the child’s typical behavior. A child may demonstrate behaviors at more than one developmental level. Choose the level that most closely represents the knowledge, skills, or behaviors the child demonstrates most consistently.

Descriptors:
The descriptors define the knowledge, skills, or behaviors expected at each level along the developmental continuum of the measure (see Navigation Maps). Each descriptor is illustrated by several examples of behaviors that are consistent with that developmental level.

What is Mastery?
A developmental level is mastered if the child demonstrates the knowledge, skills, and behaviors defined at that level:

- Consistently over time
- In different situations or settings

Important notes about mastery:
- Children may demonstrate mastery of knowledge and skills through a variety of communication modes, languages, and behaviors.
- Many of the behaviors that you observe in determining a child’s mastery level may not appear on the list of examples, although they are consistent with the descriptor.

If the descriptor includes “or”:
The child only needs to demonstrate the behavior in one of the listed ways to demonstrate mastery for the developmental level. Either part of the descriptor may be observed to rate mastery at that level.

- For example, the descriptor for Exploring Later in LLD 5: Interest in Literacy is:
  Looks at books on own briefly or Chooses to join reading, singing, or rhyming activities led by an adult

If the child EITHER looks at books on own briefly OR chooses to join reading, singing, or rhyming activities led by an adult, mastery can be rated at this level.
If a descriptor includes “and”:
All parts of the descriptor are required for mastery and need to be observed together.
- For example, the descriptor for Building Earlier in ATL-REG 2: Self-Comforting is: Anticipates need for comfort and prepares self by asking questions, getting a special thing, or in other ways.
The child needs to demonstrate both anticipating a need for comfort and preparing self during the same observation.

If a descriptor includes a semi-colon (;) followed by “and”:
The child must demonstrate all the behaviors listed to rate the level as mastered, but not necessarily during the same observation within a DRDP rating period.
- For example, the descriptor for Exploring Later in SED 3: Relationships and Social Interactions with Familiar Adults is: Initiates activities with familiar adults; and Seeks out assistance or support from familiar adults.

To be rated as mastered at this level, the child must BOTH initiate activities with familiar adults AND seek out assistance or support from familiar adults. The assessor does not have to observe both behaviors during the same observation within a DRDP rating period.

Please note that key terms and phrases in the descriptors that may be new or have specific meaning to the measures are defined in the Glossary at the end of the instrument.

Examples:
Keep in mind these important points about examples:
- The examples are not a checklist of what the child must demonstrate to be rated at mastery of the knowledge, skills, or behaviors that reflect a developmental level.
- An example is one of many possible ways a child might demonstrate mastery of a developmental level. Teachers and service providers will identify other examples as they conduct their observations.
- Mastery is determined over time and across situations or settings.
- A child may not demonstrate any of the specific examples provided for a developmental level, but may demonstrate mastery in other ways that are consistent with the intent of the descriptor.
- Children demonstrate mastery in diverse and sometimes unique ways.
- Examples have not been written to include all areas of disability. Universal design is intended to support the inclusion of children with disabilities on the DRDP (2015). However, it is important to review the adaptations as well as understand the construct being measured when assessing children with disabilities.

Additional Rating Options
Emerging to the Next Developmental Level:
If your observations indicate that the child has demonstrated mastery for a developmental level and is also beginning to demonstrate knowledge, skills, or behaviors described for the next level (although not yet consistently across situations or settings), the child may be emerging to the next level.

To indicate emerging:
- First, mark the developmental level the child has mastered.
- Then, mark “emerging” if the child also demonstrates behaviors described for the next developmental level.

Notes about Emerging:
- You may mark emerging when rating full-continuum measures with infants and toddlers if the child has mastered the last level that can be rated and the child demonstrates some behaviors in the level that follows.
- Do not mark emerging if the child has mastered the latest level on a measure.
- Marking that the child is emerging to the next level does not affect the rating of mastery for the measure.

Child is Not Yet at the Earliest Developmental Level on a Later Development Measure:
If, after careful consideration, you determine that a preschool-age child is not yet demonstrating mastery of the earliest level of a later development measure, mark “Child is not yet at the earliest developmental level on this measure.”

Unable to Rate due to extended absence:
- This is used only when the child is absent from the program for such an extended period of time during the four to six weeks prior to submitting your DRDP data that you could not gather information to rate the measures.
- The following are NOT valid reasons to indicate Unable to Rate:
  o Not having enough time or enough information
  o The nature of a child’s disability or the severity of a child’s disability

The Responding Earlier level is designed to be inclusive of all children. Mark this earliest level unless the child demonstrates skills at a later level. Do not use Unable to Rate because you feel a child does not demonstrate the skills for the earliest level.
Rating Conditional Measures
If you are using the conditional measures, you will mark them on the DRDP according to the following guidance:

<table>
<thead>
<tr>
<th>Measure</th>
<th>How to Mark the DRDP</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Earlier Development Measures</strong></td>
<td></td>
</tr>
<tr>
<td>ATL-REG 1: Attention Maintenance</td>
<td>- If the measure is rated, determine the child's latest level of mastery and mark</td>
</tr>
<tr>
<td>ATL-REG 2: Self-Comforting</td>
<td>- If the measure is not rated, mark the box, &quot;I did not rate this measure because it is not used for documenting progress or planning this child's learning activities and supports&quot;</td>
</tr>
<tr>
<td>ATL-REG 3: Imitation</td>
<td></td>
</tr>
<tr>
<td>COG 1: Spatial Relationships</td>
<td></td>
</tr>
<tr>
<td><strong>English-Language Development Measures</strong></td>
<td></td>
</tr>
<tr>
<td>ELD 1: Comprehension of English (Receptive English)</td>
<td>- If these measures are rated:</td>
</tr>
<tr>
<td>ELD 2: Self-Expression in English (Expressive English)</td>
<td>- Check the box on the Information Page about the child's home language</td>
</tr>
<tr>
<td>ELD 3: Understanding and Response to English Literacy Activities</td>
<td>- Determine the latest level of mastery for each measure and mark</td>
</tr>
<tr>
<td>ELD 4: Symbol, Letter, and Print Knowledge in English</td>
<td>- If these measures are not rated, leave them blank</td>
</tr>
<tr>
<td><strong>Physical Development and Health Measures</strong></td>
<td></td>
</tr>
<tr>
<td>PD-HLTH 7: Personal Care Routines: Feeding</td>
<td>- If these measures are rated, determine the level of mastery and mark</td>
</tr>
<tr>
<td>PD-HLTH 8: Personal Care Routines: Dressing</td>
<td>- If these measures are not rated, check the box, &quot;I did not rate this measure because it is not used for documenting progress or planning this child's learning activities and supports&quot;</td>
</tr>
<tr>
<td></td>
<td>- Complete all the other PD-HLTH measures for all children</td>
</tr>
</tbody>
</table>

*Reminder: These measures are required for all preschool-age children with IEPs.*

**Step 3: Finalize the Assessment**
To finalize, simply review the assessment to make sure that you have entered a rating for all of the measures and that the Information Page is complete and up-to-date:

- For EESD programs: enter your ratings into DRDPtech,
- For SED programs: enter your ratings into your MIS system for your SELPA's CASEMIS submission. Check with your administrator for when and to whom your Rating Records are due.
**Child’s Information**

1. Child’s name:
   - 1a. Legal First Name: ____________________________
   - 1b. Legal Last Name: ____________________________

2. Agency Identifier or Statewide Student Identifier (10-digit SSID)
   Choose role from list below:__________
   - Primary Teacher
   - Special Education Teacher
   - Early Intervention Specialist
   - Home visitor
   - Other (please specify) ____________

3. Child’s classroom or setting: ____________________________

4. Birth date (mm/dd/yyyy): ____________________________

5. Gender:  
   - [ ] male  
   - [ ] female

6. Initial date of enrollment in early childhood program (mm/dd/yyyy):
   ____________________________

7. Ethnicity:
   7a. What is this child’s ethnicity? Check one.
      - [ ] Hispanic or Latino
      - [ ] Not Hispanic or Latino

   7b. What is this child’s race? Mark one or more races to indicate what this child considers himself/herself to be.
      - [ ] Asian Indian
      - [ ] Black or African American
      - [ ] Cambodian
      - [ ] Chinese
      - [ ] Filipino
      - [ ] Guamanian
      - [ ] Hawaiian
      - [ ] Hmong
      - [ ] Japanese
      - [ ] Korean
      - [ ] Laotian
      - [ ] Native American
      - [ ] Other Asian
      - [ ] Other Pacific Islander
      - [ ] Samoan
      - [ ] Tahitian
      - [ ] Vietnamese
      - [ ] White
      - [ ] Intentionally left blank

8. Does this child have an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP)?
   - [ ] Yes  
   - [ ] No  
   - [ ] Don’t know

**Assessor Information**

9. Agency/site: ____________________________

10. Person(s) completing the assessment:
    Name/role: ____________________________
    Name/role: ____________________________
    Choose role from list below:
    - Primary Teacher
    - Special Education Teacher
    - Early Intervention Specialist
    - Home visitor
    - Other (please specify) ____________

11. Did another adult assist you with assessing this child?
    - [ ] Yes (role/relation): ____________________________
    - [ ] No

**Child’s Language Information**

12. Child’s home language(s)? ____________________________

   Is a language other than English spoken in the child’s home?
   - [ ] Yes  
   - [ ] No

   If yes a language other than English is spoken in the child’s home, the ELD measures must be completed for preschool age children.

13. What language(s) do you speak with this child?

14. Did someone who understands and uses the child’s home language assist you with completing the observation?
    - [ ] Yes (role/relation):
    - [ ] No
    - [ ] Not applicable - I understand and use the child’s home language.

15. Child is enrolled in: (Check all that apply)
    - [ ] State Preschool
    - [ ] State Infant/Toddler Program
    - [ ] Head Start
    - [ ] First 5
    - [ ] Early Head Start
    - [ ] Title I
    - [ ] State After-School Program
    - [ ] Family Child Care Home
    - [ ] Special Education Services
    - [ ] Migrant
    - [ ] Tribal Head Start
    - [ ] Other
1. Child's first name (Legal): ____________________________________________
2. Child's last name (Legal): ____________________________________________
3. Date DRDP (2015) was completed (e.g., 09/07/2015) ____________________
   month    day  year
4. Assessment period (e.g., Fall 2015) _______________________________________

Child Information
5. Student ID (issued by district for reporting to CASEMIS) ____________________________
6. Statewide Student Identifier (10-digit SSID) _______________________________________
7. Gender  □ Male  □ Female
8. Birth date (e.g., 03/05/2012) ____________________
   month    day    year
9. Special education enrollment. Check one.
   □ Individualized Family Service Plan (IFSP)  □ Individualized Education Program (IEP)

Child’s Language Information
10. Child’s home language(s):  □ English  □ Spanish
    □ Vietnamese  □ Cantonese
    □ Hmong  □ Tagalog/Pilipino
    □ Other (specify) __________________________
11. Language(s) used with this child:
    □ English  □ Spanish
    □ Vietnamese  □ Cantonese
    □ Hmong  □ Tagalog/Pilipino
    □ Other (specify) __________________________
12. Is a language other than English spoken in the child’s home?  □ Yes  □ No

Use this Information Page for a child with an Individualized Family Service Plan (IFSP) or Individualized Education Program (IEP) served by a California Department of Education program.
Quick Guide to Rating the Measures

1. Review your documentation/evidence.
   Review your own observation notes, observations from others (including teachers, family members/caregivers, and other service providers or caregivers, obtained through interview or conversations), and other documentation, including samples of children's work, photographs, and video/audio recordings of children's communication and behavior.

2. Carefully read the definition and the descriptors, looking for mastery.
   Read the descriptors before you read the examples. As you read the descriptors, try to narrow down which one is most consistent with your observations and other documentation of the child's typical behavior. A developmental level is mastered if the child demonstrates the knowledge, behaviors, and skills defined at that level:
   - Consistently over time
   - In different situations or settings

   **Important Note:** When reading the descriptors, be sure you understand and pay attention to semicolons and the words "or" and "and." Most descriptors define a single skill or behavior, but some include more than one. If the descriptor includes:
   - The word "or," the child only needs to demonstrate the behavior in one of the ways listed for the developmental level to be considered mastered.
   - The word "and," all parts of the descriptor are required for mastery and need to be observed together.
   - A semi-colon (;) followed by the word "and," the child must demonstrate all the behaviors listed to master the level, but not necessarily during the same observation.

3. After you read the descriptors, consider the examples.
   The examples represent only some of the possible ways a child might demonstrate mastery. They are not a checklist of what the child must demonstrate. It is possible that a child does not demonstrate any of the specific examples provided, but does demonstrate mastery in other ways that are consistent with the intent of the descriptor.

4. Based on your careful reading of the descriptors and examples and a review of your documentation, determine the child's level of mastery.
   Once you've determined the latest developmental level the child has mastered, mark it appropriately.

5. Indicate if the child is emerging to the next level (when the option to mark emerging is available).
   If your observations indicate that the child has demonstrated mastery for a developmental level and is also beginning to demonstrate knowledge, skills, or behaviors described for the next level (although not yet consistently across situations or settings), the child may be emerging to the next level.

Remember, the examples illustrate only some of the many ways a child may demonstrate mastery.
# Rating Record

**A Developmental Continuum from Early Infancy to Kindergarten Entry**  
For use with preschool-age children

**Note:** The Rating Record is meant to be used together with the DRDP (2015) Instrument for keeping track of each child's developmental levels as you complete the assessment.

**Instructions:** Write the child's name, student identification number, and the date this Rating Record was completed. Mark the developmental level the child has mastered for each Measure. Check EM (emerging) if the child is "emerging" to the next level (optional). In the rare circumstance that you are unable to rate a Measure, mark UR. If you are not rating a child on a Conditional Measure, mark Conditional Measure.

# Developmental Domain: ATL-REG — Approaches to Learning—Self-Regulation

## ATL-REG 1: Attention Maintenance

Child develops the capacity to pay attention to people, things, or the environment when interacting with others or exploring play materials.

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>---</td>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>Later</td>
<td>---</td>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>Attends or responds briefly to people, things, or sounds</td>
<td>Shifts attention frequently from one person or thing to another</td>
<td>Maintains attention, on own or with adult support, during brief activities</td>
<td>Maintains attention, with adult support, during activities that last for extended periods of time</td>
</tr>
</tbody>
</table>

### Possible Examples

- **Responding**
  - Pays attention to a moving mobile.
  - Quiets to the voice of a familiar person.
  - Gazes at the smiling face of a familiar person.
- **Exploring**
  - Turns attention toward an interesting toy, then back to an adult or a child.
  - Actively shifts interest from one child to another playing close by.
  - Drops one thing in order to reach for another.
  - Briefly watches other children playing and then resumes play with a toy.
  - Resumes playing at sand table when an adult joins in digging.
  - Dumps toy animals from container, puts animals back in the container, and then dumps them out again.
- **Building**
  - Listens to a book from beginning to end and then gestures for an adult to read it a second time.
  - Starts working on a simple puzzle with an adult and continues when the adult steps away briefly.
  - Continues playing with toy cars, adding a bridge offered by an adult sitting nearby.
  - Makes a pile of pretend pancakes with play dough on own and then offers them to peers.
  - Builds multiple towers with interlocking blocks.
  - Looks through several books on own in library corner during the morning.
  - Listens to audio books while looking at enlarged pictures related to the story on a screen, on own, during the morning.

### Conditional Measure

- I did not rate this measure because it is not used for documenting progress or planning this child’s learning activities and supports.

- Child is emerging to the next developmental level

- Unable to rate this measure due to extended absence
**Conditional Measure**

I did not rate this measure because it is not used for documenting progress or planning this child’s learning activities and supports.

---

**ATL-REG 2: Self-Comforting**

Child develops the capacity to comfort or soothe self in response to distress from internal or external stimulation.

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Earlier</td>
<td>Earlier</td>
<td>Earlier</td>
</tr>
<tr>
<td>Later</td>
<td>Later</td>
<td>Middle</td>
<td>Later</td>
</tr>
</tbody>
</table>

- **Responds to internal or external stimulation in basic ways**
  - Engages in behaviors that have previously worked to soothe self
  - Comforts self by seeking a familiar adult or a special thing
  - Comforts self in different ways, based on the situation
  - Anticipates need for comfort and prepares self by asking questions, getting a special thing, or in other ways

- **Possible Examples**
  - Cries when hears a loud noise.
  - Closes eyes when taken into bright sunlight.
  - Brings fist to mouth and fusses when hungry.
  - Sucks thumb or fist to soothe self.
  - Turns away from sensory experiences such as loud noises, bright lights, or specific textures.
  - Nuzzles face into a blanket or a familiar adult’s shoulder when unfamiliar adults approach.
  - Seeks contact with a familiar adult when upset.
  - Seeks out a cozy place to get away from active play of other children.
  - Remains seated in a small group activity while manipulating a favorite toy.
  - Asks what’s going to happen next, to get ready to transition to a new activity.
  - Requests favorite book to read with parent before the parent leaves.
  - Moves away and covers ears when an adult brings out a vacuum to clean spilled sand on the floor.

- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**

---

**ATL-REG 2**

DRDP (2015): A Developmental Continuum from Early Infancy to Kindergarten Entry – Preschool View – August 1, 2015 © 2013-2015 California Department of Education – All rights reserved
# Developmental Domain: ATL-REG — Approaches to Learning–Self-Regulation

## ATL-REG 3: Imitation

Child mirrors, repeats, and practices the actions or words of others in increasingly complex ways

---

### Conditional Measure

- I did not rate this measure because it is not used for documenting progress or planning this child’s learning activities and supports.

---

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Earlier</td>
<td>Earlier</td>
<td>Earlier</td>
</tr>
<tr>
<td>Later</td>
<td>Later</td>
<td>Middle</td>
<td>Later</td>
</tr>
</tbody>
</table>

- **Responds to facial expressions or vocalizations in basic ways**
  - Makes a sound like “Mmmmm” after an adult makes the “Mmmmm” sound during feeding.
  - Smiles when an adult smiles.
  - Widens eyes and raises eyebrows after observing these movements on an adult’s face during an interaction.

- **Imitates approximations of single simple actions or sounds when interacting with others**
  - Opens and shuts hands as an adult leads open-shut-them finger play.
  - Raises arms in the air, following an adult’s actions, during a game of “So big!”

- **Imitates actions, or Repeats familiar words or gestures by others when interacting with them**
  - Holds a toy telephone to ear and says, “Hello.”
  - Places doll in front of a friend, or interacts with a doll, or interacts with an adult during feeding.
  - Engages in exercise movements that adults typically do.
  - Wraps a teddy bear in a blanket and communicates, “Night-night.”

- **Imitates a few actions, or Repeats familiar actions or words experienced at an earlier time**
  - Communicates, “Be safe,” (using adult intonation) when friends begin to move too fast through the classroom.
  - Pretends to cook a meal by taking out play food and pots, turning on a toy stove, and stirring the pots with a spoon.
  - Dresses up with fancy shoes and clothes in a dress-up area, and communicates, “It’s time to party.”

- **Imitates multiple steps of others’ actions, or Repeats phrases, experienced at an earlier time**
  - There are no later levels for this measure.

---

- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence
### Developmental Domain: ATL-REG — Approaches to Learning—Self-Regulation

**ATL-REG 4: Curiosity and Initiative in Learning**

Child explores the environment in increasingly focused ways to learn about people, things, materials, and events.

Mark the latest developmental level the child has mastered:

#### Possible Examples

- Responds to people, things, or sounds
  - Orients toward a noise.
  - Vocalizes or gazes at a familiar adult who makes an animated facial expression or unusual noise.
  - Smiles when an adult begins singing a song.
  - Looks at a mobile.
  - Moves arms or legs when a mobile begins moving overhead.

- Notices new or unexpected characteristics or actions of people or things
  - Turns head toward a person who comes into view or begins talking.
  - Bangs a drum with hands repeatedly.
  - Touches hair of another child.
  - Pats, pulls on, or turns pages of a board book.
  - Watches intently as an adult prepares snack.

- Explores people or things in the immediate environment
  - Paints on paper and on arm when given a paintbrush and paint.
  - Molds sand using a cup.
  - Tries using utensils to work with play dough.

- Explores new ways to use familiar things, including simple trial and error
  - Moves around a fish bowl to continue watching a fish as it swims around objects.
  - Drops a marble in a maze and follows its path as it rolls to the bottom.
  - Asks, “What’s that doing?” when seeing or hearing a bulldozer across the street while on a neighborhood walk.

- Explores through simple observations, or manipulations, or asking simple questions
  - Puts a dry sponge in water and then squeezes it to see what happens.
  - Observes a snail and asks, “Why do snails have shells?”
  - Compares color or shape of leaves gathered on a nature walk.

- Explores by engaging in specific observations, manipulations, or by asking specific questions
  - Uses a magnetic wand to figure out which objects on a table it will lift up.
  - Uses a magnifying glass to observe a caterpillar closely, and describes its pattern of colors and number of legs.
  - Places a variety of objects in water to see which will float and which will sink.

- Carries out simple investigations using familiar strategies, tools, or sources of information
  - Examines images from informational books or a computer to learn about the habitats of different animals.
  - Looks through a prism held up to the light, directing its motion until a rainbow of colors appears on the wall.
  - Sets up a project, with an adult, that involves investigating the growth of lima bean plants with different amounts of water, and documents their growth.

- Carries out multi-step investigations, using a variety of strategies, tools, or sources of information

○ Child is emerging to the next developmental level

○ Unable to rate this measure due to extended absence
**ATL-REG 5: Self-Control of Feelings and Behavior**

Child increasingly develops strategies for regulating feelings and behavior, becoming less reliant on adult guidance over time.

- **There are no earlier levels for this measure**
- **Demonstrates preferences for a few specific toys or materials**
- **Takes and plays with materials of interest, even when they are being used by another child**
- **Shows awareness that other children might want to use materials, by taking action to control the materials**
- **Maintains control of some preferred materials, allowing others to use the rest, but will need adult support to share preferred materials with other children**
- **Follows expectations or procedures for sharing, most of the time, without adult prompting**
- **Offers to share space or materials with others in the absence of explicit expectations for sharing**

---

**Possible Examples**

- **Responding**
  - Chooses to play with doll with red hair on repeated occasions.
  - Chooses to play with the same toy dinosaur every day.
  - Selects the green marker every time when at the art table.

- **Exploring**
  - Takes another child’s toy, and seems surprised by the other child’s protest.
  - Picks up a purple marker after another child put it down momentarily to do something else.
  - Squeezes in between other children at the water table, making it difficult for the other children to continue their play.

- **Building**
  - Keeps all of the crayons nearby even if only using one or two colors.
  - Places favorite dolls behind back when other children are playing in the doll area.

- **Integrating**
  - Holds onto big brushes while painting at the table, but then gives other children some big brushes, with adult prompting.
  - Keeps favorite crayons nearby, and pushes the basket of other colored crayons to the center of the table.
  - Lets another child take a book from a pile nearby, but holds onto a few favorite books.

---

- **Child is not yet at the earliest developmental level on this measure**
- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**
## Developmental Domain: SED — Social and Emotional Development

### SED 1: Identity of Self in Relation to Others
Child shows increasing awareness of self as distinct from and also related to others

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- **Possible Examples**
  - Responds in basic ways to others
  - Uses senses to explore self and others
  - Recognizes self and familiar people
  - Communicates own name and names of familiar people (e.g., "dada," "mama," "grandma," or sibling’s name)
  - Expresses simple ideas about self and connection to others
  - Describes self or others based on physical characteristics
  - Describes own preferences or feelings; and
  - Describes the feelings or desires of family members, friends, or other familiar people
  - Compares own preferences or feelings to those of others

- **Possible Examples**
  - Examines own hand or foot by looking at it or mouthing it.
  - Touches others’ hair when it is within reach.
  - Plays with sound by repeating grunts and squeals.
  - Orient toward a familiar adult when own name is spoken or signed.
  - Points to picture of self on the wall.
  - Smiles when a familiar adult enters the room.
  - Communicates, “Me llamo Luis,” ("My name is Luis," in Spanish).
  - Communicates names of immediate family members in a photo.
  - Looks to new baby sister and communicates her name.
  - Acts out roles from own family in pretend play.
  - Communicates, “I’m making cookies—just like Grandma!” while rolling play dough.
  - Draws picture of a house and communicates, “This is my house.”
  - Communicates, using communication board, “His hair is red!”
  - Identifies own height, as indicated on a growth chart posted on the wall.
  - Narrates details while drawing a picture of a friend.
  - Draws a picture of own family, representing traits such as heights and hair colors.
  - Communicates to an adult, “I was mad when it rained because we couldn’t go outside.”
  - Communicates that a friend is happy because he is going to have a birthday party.
  - Selects a pink scarf for a friend whose favorite color is pink, then selects a blue scarf for self.
  - Communicates to a peer that they both like peanut butter and jelly sandwiches.

- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**

**Possible Examples**

- Cries when hearing the sound of another child crying.
- Moves excitedly when another child comes near.
- Reaches toward another child to gain attention.
- Smiles at another child.
- Selects a truck when other children nearby are playing with trucks.
- Explores a toy alongside another child who is also exploring.
- Reaches for a toy in the water alongside other children at the water table.
- Hands a bucket to a familiar peer sitting next to child in the sandbox.
- Offers a block to a peer building a tower next to child.
- Splashes excitedly with a peer at the water table, continuing back and forth.
- Takes a few turns trying on hats with a peer in the dramatic play area.
- Plays chase briefly outside with two peers, and then goes to play alone in sandbox.
- Plays cars with a peer for a short while.
- Builds a train track with two friends, taking turns connecting the track pieces.
- Laughs and makes funny noises or faces with a friend while singing a song together.
- Plays a game of telephone that involves having a conversation with a friend about going on a shopping trip together.
- Invites friends to build a pretend barn for toy animals and, at clean-up time, asks to save it so they can play with it tomorrow.
- Invites friends to continue playing family from the day before.
- Offers a new object for a fort that child has built with peers over several days.
- Plays restaurant with friends, showing them the signs for food to be ordered.
- Plans how to build a boat with several peers, choosing materials and negotiating tasks.
- Plays superheroes with peers, planning different characters and scenarios.
- Joints peers in planning and gathering materials needed for a nature walk, such as nets, baskets, and bags.

○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
## Developmental Domain: SED — Social and Emotional Development

### SED 5: Symbolic and Sociodramatic Play

Child develops the capacity to use objects to represent other objects or ideas and to engage in symbolic play with others.

### Mark the latest developmental level the child has mastered:

<table>

</tbody>
</table>

- Cries in response to a loud voice.
- Looks toward a lamp when it is turned on.
- Moves arm in response to a touch.
- Reaches toward an adult’s glasses.
- Grabs a toy, shakes it, and then shakes it again.
- Picks up a toy and mouths it.
- Gazes intently at an adult’s changing facial expressions.
- Rocks a doll in arms.
- Uses a brush on a doll’s hair.
- Pushes a toy car along the floor.
- Places objects from around the room in a toy shopping cart.
- Uses a stacking ring as a bagel.
- Holds a rectangular block to ear and talks into it as if it is a phone.
- Pretends that puzzle pieces are cookies.
- Pretends to be a doctor and takes care of a stuffed bear that is “sick.”
- Makes a pretend cake in the sandbox and offers a “taste” to an adult.
- Makes a “pizza” out of play dough and puts it in the play oven.
- Sits in a box, pretending it is a boat.
- Sits in a box with a peer, holding a “steering wheel,” and communicates, “My turn to drive the bus.”
- Pours “coffee” for friends while seated together at a table in the dramatic play area.
- Pretends to put out fires on the playground with others, using pretend hoses and wearing firefighter hats.
- Pumps arm while saying, “Whoo-whooh,” and then collects “tickets” from seated “passengers.”
- Plays store, “scanning” items, placing them in a bag, and collecting “money” from peers.
- Uses a hose to “pump gas” as other children wait in line with their tricycles.
- Agrees with peers on who will be the bus driver, who will be the child, and who will be the mommy, while acting out school-bus play.
- Plans with peers to pretend to be a family going on a trip: using chairs as seats for a car, negotiating roles, and deciding where they will go.
- Assigns roles and acts out classroom routines (e.g., circle time, snack time) with other children.

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

#### Possible Examples

- **Responding**
  - Turns head toward, or looks in the direction of the voice of an adult.
  - Makes eye contact with a familiar adult.
  - Quiets or orients in the direction of a sound, touch, or gesture.

- **Exploring**
  - Smiles or gurgles in response to a familiar adult’s voice or simple gestures.
  - Makes a sound similar to “Mmmm” during a social interaction with a familiar adult.
  - Averts eyes to disengage from a social interaction with an adult.

- **Building**
  - Indicates a bell in a storybook when adult communicates, “Goodbye.”
  - Points to pictures of a bird, a tree, and a house, as an adult says the name of each, while looking at a book together.
  - Passes the milk at lunch time after an adult communicates, “Please pass the milk.”

- **Integrating**
  - Communicates, “I’m a princess and I live in a castle,” while playing dress-up.
  - Holds the door open, after an adult asks the child to do so, until all of the other children have come into the room.
  - Points to the picture of an eagle and its nest while sharing a book about animals building their homes.

- **Responds to voices, sounds, gestures, or facial expressions in basic ways**
  - Pounces or waves arms to indicate interest in continuing an activity after an adult pauses and asks, “More?”

- **Recognizes a few frequently used words or gestures in familiar situations**
  - Gets jacket after an adult communicates, “Get your jacket. It’s time to go outside.”
  - Moves to the sink after an adult communicates, “Time to wash hands.”

- **Shows understanding of a variety of single words**
  - Collects different types of art supplies after an adult explains an art project and where to find the supplies.

- **Shows understanding of frequently used simple phrases or sentences**
  - Hands crayons from the shelf after an adult asks, “Can you hand me the crayons that are on the shelf?”

- **Shows understanding of a wide variety of phrases or sentences**
  - Adds blocks to a tower after a peer says, “Let’s make our skyscraper the tallest!”

- **Shows understanding of language that refers to abstract concepts, including imaginary events**
  - Explores how to plant seeds to a peer after an adult reads a book about planting seeds.

#### Child is emerging to the next developmental level

- ☐ Unable to rate this measure due to extended absence
**LLD 2: Responsiveness to Language**
Child communicates or acts in response to language and responds to increasingly complex language

**Possible Responses**

- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**
LLD 3: Communication and Use of Language (Expressive)

Child’s communication develops from nonverbal communication to using language with increasingly complex words and sentences.

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>Later</td>
</tr>
<tr>
<td>Makes sounds spontaneously</td>
<td>Uses sounds, gestures, or facial expressions to communicate</td>
<td>Uses a few “first words,” word-like sounds, or gestures to communicate</td>
<td>Uses two words together to communicate</td>
</tr>
</tbody>
</table>

- **Possible Examples**
  - Cries.
  - Coos.
  - Gurgles.
  - Smiles when a familiar person approaches.
  - Cries or looks at an adult when hungry.
  - Vocalizes or babbles while interacting with an adult.
  - Asks for food when hungry, by using a special word, sound, or gesture for food.
  - Communicates, “Mama,” “Dada,” “Baba,” or similar word approximations.
  - Reaches for or gestures for an object.
  - Names familiar foods, toys, or family members.
  - Communicates ideas such as “No,” “More,” or “Up.”
  - Indicates a picture of a ball when asked what the child wants to play with next.
  - Communicates, “Mommy come,” when wanting a parent.
  - Communicates, “More juice,” when thirsty.
  - Communicates, “A mí toca,” [“It’s my turn,” in Spanish] when an adult brings the pet rabbit for a visit.
  - Communicates, “I want mommy.”
  - Communicates, “My truck!” [“My truck!” in Chinese] after another child takes a toy truck.
  - Communicates, “I like dogs,” while looking at an animal book.
  - Communicates, “The rabbit is scared,” when the pet rabbit snuggles into an adult’s lap. (“Scared” is an adjective.)
  - Communicates using a communication board, “I need a tissue. My nose is runny.” (“Tissue” is a noun and “runny” is an adjective.)
  - Communicates, “Malaking malaki ang aso namin,” [“Our dog is huge,” in Tagalog] after hearing abuela es muy vieja. (Recently encountered vocabulary word.)
  - Communicates, “He ran really fast,” (“Runned” is past tense with a grammatical error.)
  - Communicates to a peer, during play, “I like dogs,” while looking at an animal book. (“He ran really fast.”)
  - Communicates, “Tiene el cabello blanco,” [“He is a pronoun; made” is past tense.]
  - Communicates, “His feet are wet.” (“Cat’s” is possessive pronoun; “feet” is plural.)
  - Communicates, “He ran really fast.” (“Runned” is past tense with a grammatical error.)

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

# LLD 4: Reciprocal Communication and Conversation

**Child engages in back-and-forth communication that develops into increasingly extended conversations.**

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Responding</th>
<th>Earlier</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>Engages in brief back-and-forth communication with a familiar adult, using simple words or conventional gestures to communicate meaning</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

## Possible Examples

- **Responds to sounds or movements of others in basic ways**
  - Responds to or seeks contact with familiar adults, using vocalizations, gestures, or facial expressions during interactions
  - Communicates, “Yes,” or “No,” after an adult asks, “Do you want more milk?”
  - Communicates, “It’s my turn,” after an adult asks, “Do you want to play?”
  - Communicates, “I’m hungry,” after an adult asks, “Are you hungry?”

- **All others in basic ways**
  - Communicates, “I’m hungry,” when an adult asks, “Are you hungry?”
  - Communicates, “I’m tired,” when an adult asks, “Do you need a nap?”
  - Communicates, “I want to play,” when an adult asks, “Do you want to play?”

- **Familiar adults**
  - Communicates, “I want to play,” when an adult asks, “Do you want to play?”
  - Communicates, “I’m hungry,” when an adult asks, “Are you hungry?”
  - Communicates, “I’m tired,” when an adult asks, “Do you need a nap?”

## Conversations can include communication using sign language or alternative communication systems.

* Conversations can include communication using sign language or alternative communication systems.
### Developmental Domain: LLD — Language and Literacy Development

#### LLD 5: Interest in Literacy

Child shows interest in books, songs, rhymes, stories, and other literacy activities in increasingly complex ways.

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Responding</th>

<td>Middle</td>
<td>Later</td>
</tr>
</tbody>
</table>

#### Possible Examples

- Quiet to the sound of a familiar voice.
- Moves in response to an approach by a familiar adult.
- Orient to an adult’s face or voice during a caregiving routine.

- Interacts with a cloth or board book by holding or mouthing it.
- Pats a textured board book.
- Vocalizes or laughs in response to an adult singing and gesturing a simple finger-play song, such as, “Pat-a-Cake” or “Los cinco deditos,” “Five Little Fingers,” a finger play in Spanish.
- Looks at pictures in a book for a short time while a familiar adult reads the book.
- Reaches to turn the page of a board book as a familiar adult tells a story about the pictures on the page.
- Uses simple hand movements to participate during a familiar song or rhyme with a familiar adult.
- Touches textured or tactile content on pages of a book as an adult is reading the book.
- Joins a group doing a simple finger play led by an adult.
- Points at a picture when joining an adult who is reading a book, newspaper, or tablet.
- Picks up a book and looks at pictures, turns a few pages, and then drops the book to go play.
- Pretends to read a book from start to finish.
- Explores a book with Braille and tactile content with hands.
- Sings some words of a familiar song, from beginning to end, with an adult.
- Asks questions or communicates about why something happened in a story.
- Starts a song or rhyme with others while playing outside.
- Uses finger puppets while reciting a familiar rhyme.
- Uses flannel-board pieces to retell parts of a story after story time.
- Retells a familiar story to a peer while pretending to read from a book.
- Uses a communication device to tell the sequence of events in a favorite story.
- Pretends to be a character from a story, using props.
- Chooses to read a book related to a particular theme or interest (e.g., dinosaurs or fairies).
- Asks for help finding a book about bugs after a nature walk.
- Participates, with others, in using the computer to create a story about a class trip.
- Makes up own version of rhyming song with peers’ names.

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

---

<td>Later</td>
<td>Earlier</td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Responding**
  - Shows interest when attending to books, pictures, or print materials, with an adult
  - Provides simple one- or two-word responses to questions when attending to books or other materials that include text, with an adult
  - Makes comments or asks questions about text presented in books or the environment
  - Demonstrates knowledge of main characters, events, or ideas in familiar narrative or informational text

- **Child is not yet at the earliest developmental level on this measure**
- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**

**Examples:**

- Looks at a picture book with an adult.
- Brings a favorite book about baby animals to an adult, to be reread often.
- Points to photos, with captions, that were taken while on a nature walk.
- Turns the page after an adult stops reading a book.
- Touches Braille and image of sheep with textured wool in a book and says, “Sheep.”
- Communicates, “Pasta,” after an adult points out items on a children’s menu.
- Communicates, “Elephants have really big ears,” after an adult reads about elephants.
- Asks, “Why did they go there?” during the reading of a story.
- Points to a lighted exit sign and asks, “What does that say?”
- Communicates, using a communication board, “Firefighters have to wear special clothes so that they don’t get burned,” after an adult reads a book about what firefighters do.
- Holds up two books about bears and communicates, “Ang dalawang aklat na ito ay tungkol sa mga usog, ngunit ang mga usog sa Goldilocks ay mas maganda,” (“These two books are about bears, but the bears in Goldilocks are nicer,” in Tagalog).
- Relates what happens in a familiar storybook to a peer as they begin to share the book together.
- Brings a book from home and communicates to the class about what happens in the story and why.

---

**Comprehension of Age-Appropriate Text**

DRDP (2015): A Developmental Continuum from Early Infancy to Kindergarten Entry – Preschool View – August 1, 2015 © 2013-2015 California Department of Education – All rights reserved
## LLD 7: Concepts About Print

Child shows an increasing understanding of the conventions and physical organization of print material and that print carries meaning.

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Middle</td>
<td>Earlier</td>
<td>Middle</td>
</tr>
<tr>
<td>Later</td>
<td>Later</td>
<td></td>
<td>Later</td>
</tr>
<tr>
<td>Earlier</td>
<td>Earlier</td>
<td></td>
<td>Earlier</td>
</tr>
</tbody>
</table>

**Possible Examples**

- Opens and closes a book.
- Touches the pages of a book when looking at a book on own.
- Holds or carries a book.
- Brings book to adult.

- Points to pictures in a book while an adult reads the book aloud.
- Lifts tabs in an interactive book while being read to by an adult.
- Points at a stop sign and then communicates, “That means stop,” while on a neighborhood walk.
- Points to the print while pretending to read a page with both print and pictures.
- Requests that an adult write words next to a picture the child has drawn.
- Communicates, “There are two words on this sign,” while looking at a sign with the words “Writing Center.”
- Creates a pretend grocery list with letters that look like words, then names the words as grocery items, such as “corn,” “milk,” and “bread.”
- Communicates that the first letter or sound of a peer’s name is the same as the first letter or sound of child’s own name.

* *Children who are familiar with print in languages other than English may demonstrate differences in how they approach print materials. Some languages (e.g., English, Spanish, Tagalog, Vietnamese) are written from left to right within a horizontal line of print and from top to bottom in books and other print media. Other languages (e.g., Arabic, Hebrew) are written from right to left within a horizontal line of print and from top to bottom in books and other print media.*

- ☐ Child is not yet at the earliest developmental level on this measure
- ☐ Child is emerging to the next developmental level
- ☐ Unable to rate this measure due to extended absence

---

**Concepts About Print**

DRDP (2015): A Developmental Continuum from Early Infancy to Kindergarten Entry – Preschool View – August 1, 2015 © 2013-2015 California Department of Education – All rights reserved
LLD 8: Phonological Awareness

Child shows increasing awareness of the sounds (elements) that make up language, including the ability to manipulate them in language.

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th></th>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Middle</td>
<td>Later</td>
<td>Earlier</td>
<td>Middle</td>
</tr>
<tr>
<td><strong>Possible Examples</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- **Responding**
  - Turns toward adult when adult sings a song.
  - Looks at adult’s hands when adult signs “more.”
  - Attends to adult saying, “bye-bye.”

- **Exploring**
  - Whispers a word, and then says it loudly.
  - Communicates, “No, no, no,” varying pitch.
  - Uses sounds or hand movements to play with variations of stress and rhythm.
  - Rhymes children’s names with other words during a group sing-along.
  - Sings “Twinkle, Twinkle, Little Star” with a group.
  - Communicates the rhyming word “fall,” after an adult says, “Humpty Dumpty sat on a wall. Humpty Dumpty had a great . . . ?”
  - Uses signs to participate in a song such as “The Wheels on the Bus.”

- **Building**
  - Drums out each word in “I am Matt” in a name game.
  - Communicates, “Rain,” after an adult communicates, “There are two words in ‘raincoat.’ What happens when we take away the word ‘coat’?” while moving a picture of a coat away from a picture of rain.
  - Communicates, “Zebra,” after an adult separates the word into syllables, and says, “Ze-,” and “-bra,” while looking at a wordless picture book about the zoo.
  - Communicates, “Marker,” after an adult communicates, “What happens when I put the two syllables ‘mark’- and ‘-er’ together?”

- **Integrating**
  - Answers, “Goldfish;” after an adult asks, “If you put together the words ‘gold’ and ‘fish,’ what word does that make?”
  - Communicates, “Cup,” at the snack table, after an adult says, “I have a c–up. What do I have?”
  - Communicates, “Lee,” after an adult asks what word is left when the m– is removed from the word “mice,” while playing a word game.
  - Communicates, “d” (letter sound), while looking at a picture of a dog, after an adult says, “What is the first sound you hear when you say ‘dog’?” while looking at pictures of dogs together.

---

*Children who are deaf and learning American Sign Language will attend to elements of language (hand shapes and movements) in the early levels of learning, but eventually will be able to use finger spelling in relation to learning about sounds. For a child who is hard of hearing, has a cochlear implant, or is using cued speech, the sequence may or may not be similar to that of a hearing child.*
**Developmental Domain:** LLD — Language and Literacy Development

**LLD 9: Letter and Word Knowledge**

Child shows increasing awareness of letters in the environment and their relationship to sound, including understanding that letters make up words.

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>

</tr>
<tr>
<td>Later</td>
<td>Earlier</td>
<td>Middle</td>
<td>Later</td>
</tr>
<tr>
<td>Earlier</td>
<td>Middle</td>
<td>Later</td>
<td>Earlier</td>
</tr>
</tbody>
</table>

- **Possible Examples**
  - There are no earlier levels for this measure.
  - Demonstrates awareness that pictures represent people or things.
  - Demonstrates awareness of a few common simple symbols in the environment.
  - Demonstrates awareness of a few letters in the environment.
  - Identifies some letters by name.
  - Identifies ten or more letters (not necessarily at the same time); and shows understanding that letters make up words.
  - Identifies most upper-case letters; and identifies most lower-case letters; and shows understanding that a letter corresponds to a sound in words.

- **Child is not yet at the earliest developmental level on this measure**
- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**

**Letter and Word Knowledge**

<td>Later</td>
<td>Earlier</td>
</tr>
</tbody>
</table>

#### Possible Examples

- Dips sponge in paint and dots onto paper.
- Makes a dot on a paper and then makes more dots using different markers.
- Holds crayon against paper.
- Makes marks on paper
- Makes scribble marks
- Makes scribble marks or simple drawings that represent people, things, or events
- Makes marks to represent own name or words
- Uses letters or clearly recognizable approximations of letters to write own name
- Writes several words or a few simple phrases, or clearly recognizable approximations

#### Children who are familiar with print in languages other than English may demonstrate differences in how they approach writing. For instance, some languages use letters (e.g., English, Spanish, Tagalog, Arabic, Hebrew), while others use characters (e.g., Chinese).

- ○ Child is not yet at the earliest developmental level on this measure
- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence

* Children who are familiar with print in languages other than English may demonstrate differences in how they approach writing. For instance, some languages use letters (e.g., English, Spanish, Tagalog, Arabic, Hebrew), while others use characters (e.g., Chinese).
### ELD 1: Comprehension of English (Receptive English)

Child shows increasing progress toward fluency in understanding English.

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Discovering Language</th>
<th>Discovering English</th>
<th>Exploring English</th>
<th>Developing English</th>
<th>Building English</th>
<th>Integrating English</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recognizes a few frequently used words or gestures in the home language and culture in familiar situations</td>
<td>Shows understanding of words and phrases in conversations, stories, and interactions in home language (may show little understanding of common words and phrases in English)</td>
<td>Attends to interactions in English and sometimes participates in activities conducted in English; and Shows understanding of a few common English words in familiar contexts or routines</td>
<td>Shows understanding of some common words and phrases in English during interactions and activities conducted in English, and activities conducted in English, occasionally with support of home language, nonverbal cues, or both</td>
<td>Shows understanding of many words, phrases, and concepts in English during interactions and activities conducted in English, occasionally with support of home language, nonverbal cues, or both</td>
<td>Shows understanding of most information and concepts communicated in English for both instructional and social purposes</td>
</tr>
</tbody>
</table>

#### Possible Examples

- Waves good-bye after an adult communicates, “Good-bye,” in the child’s home language and culture.
- Indicates interest in continuing an activity after an adult pauses and asks to continue in the child’s home language and culture.
- Orient toward a familiar person or thing when it is named in the home language.
- Adds a block to the top of a tower in response to a question in the child’s home language, “Can you make it taller?”
- Passes a book to another child when requested in the child’s home language, having not responded to the same request in English.
- Seeks out and plays with peers who speak the child’s home language, while in the dramatic play area.
- Pauses to listen to peers speaking English for a short period of time while playing in the sandbox.
- Nods head when an adult at the snack table asks in English, “Do you want more apples?” while holding up a plate of apple slices.
- Begins to put blocks on a shelf when a peer says in English, “Clean-up time.”
- Points to the ball when a peer says in English, “Where is the ball?” during outdoor play time.
- Goes to get markers after an adult asks in English if child would like to use paint or markers to make a birthday card for a peer.
- Approaches the door to go inside when an adult says in English, “It is time to go in for a snack,” and adds, “[Hora de comer!” [“Time to eat!” in Spanish].
- Adds more blocks to a road when a peer communicates in English, “We need a longer road.”
- Pretends to talk on the phone when a peer says in English, “Baby’s sick. Call the doctor.”
- Puts drawing on the counter after an adult points to the counter and asks in English, “Please put your drawing on the counter. It’s wet and it needs to dry.”
- Sorts orange and green squash after an adult says in English, “Let’s separate them by color.”
- Brings a bigger block to a peer in response to a question in English by the peer, “Could you bring me the bigger block?”
- Nods head excitedly when a peer asks in English if child wants to ride bikes together outside.
### ELD 2: Self-Expression in English (Expressive English)

This measure is not rated: English is the only language spoken in this child’s home.

#### Developmental Domain: ELD — English-Language Development

**Conditional Measure**

**ELD 2: Self-Expression in English (Expressive English)**

Child shows increasing progress toward fluency in speaking English.

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>Discovering Language</td>
<td>Uses a few “first words” or word-like sounds or gestures to communicate in home language</td>
<td>- Asks for food when hungry, by using a special word, sound, or gesture for food.</td>
</tr>
<tr>
<td>Discovering English</td>
<td>Communicates in home language or nonverbally, or both</td>
<td>- Communicates, “¿Puedo pintar contigo?” [“Can I paint with you?” in Spanish] while approaching a peer who is painting.</td>
</tr>
<tr>
<td>Exploring English</td>
<td>Communicates most competently in home language, occasionally using single words or short memorized sequences of words in English</td>
<td>- Takes an adult’s arm and leads the adult to the drawing area, where several children are drawing, and reaches or gestures toward the paper container.</td>
</tr>
<tr>
<td>Developing English</td>
<td>Communicates in English, using single words and common phrases (may mix English with home language)</td>
<td>- Communicates, “The dog turned into a lady” in English and Chinese while helping to put a dress on a stuffed animal under a blanket in the dramatic play area.</td>
</tr>
<tr>
<td>Building English</td>
<td>Communicates in English, using sentences that may be incomplete (may contain grammatical errors and may mix English with home language)</td>
<td>- Communicates to a peer while playing with play dough, “I make galletitas [“cookies” in Spanish] and pan [“bread” in Spanish]. You like it?” [“I made cookies and bread. Do you like it?”]</td>
</tr>
<tr>
<td>Integrating English</td>
<td>Communicates in English, often using complete sentences, about a variety of social and instructional concepts and topics (may contain grammatical errors and may mix English with home language)</td>
<td>- Communicates to a peer, “I ate huevitos [“little eggs” in Spanish]. The huevitos were really yummy! My papi [“daddy” in Spanish] and me, we get them at la tiendita [“the little store” in Spanish].”</td>
</tr>
</tbody>
</table>

- **Possible Examples**

  - Asks for food when hungry, by using a special word, sound, or gesture for food.
  - Communicates from child’s home language, “Mama,” “Dada,” or other word approximations.
  - Reaches for or gestures for an object.
  - Takes an adult’s arm and leads the adult to the drawing area, where several children are drawing, and reaches or gestures toward the paper container.
  - Nods, “Yes,” and responds in home language in response to a routine question such as, “Do you want more milk?” while an adult holds up a pitcher of milk.
  - Communicates, “¿Puedo pintar contigo?” [“Can I paint with you?” in Spanish] while approaching a peer who is painting.
  - Communicates, “这是它们的家,” [“This is their home,” in Chinese] while putting some toy animals under a blanket in the dramatic play area.
  - Communicates in English, “Bye,” to a peer when leaving at the end of the day.
  - Greets peers in home language and joins in singing the words “good morning” in English during the daily morning song.
  - Chimes in with, “The end!” in English when an adult finishes reading a story to a small group of children.
  - Communicates in English, “Marker,” to ask for a marker from a peer while playing restaurant in the dramatic play area.
  - Communicates in English, “I do a house,” [“I made a house,”] while painting.
  - Communicates to a peer in English, “My turn,” and gestures at the slide during outdoor play.
  - Communicates, “The dog 变成一个lady 了,” [“The dog turned into a lady,”] in English and Chinese while helping to put a dress on a stuffed dog in the dramatic play area.
  - Communicates in English, “The lamb licked my hand!” [“The lamb licked my hand!”] when describing a family trip to a petting farm that occurred last weekend.
  - Communicates to a peer, “My dad ride a ngựa,” [“My dad rides a” in English; “horse” in Vietnamese] while attempting to draw a horse.
  - Communicates in English, “This is happy new year. This is mommy and me. We saw the dragon,” in response to an adult asking, “Tell me about your picture.”
  - Communicates to a peer, “I ate huevitos [“little eggs” in Spanish]. The huevitos were really yummy! My papi [“daddy” in Spanish] and me, we get them at la tiendita [“the little store” in Spanish].”
  - Communicates in English, “I’m going to cook them now,” while throwing some noodles made with play dough into a toy pot, and later puts “cooked noodles” on a plate and communicates, “Here’s a plate for you,” while handing it to a peer.
# Conditional Measure

**ELD 3: Understanding and Response to English Literacy Activities**

Child shows an increasing understanding of and response to books, stories, songs, and poems presented in English.

---

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Discovering Language</th>
<th>Discovering English</th>
<th>Exploring English</th>
<th>Developing English</th>
<th>Building English</th>
<th>Integrating English</th>
</tr>
</thead>
<tbody>
<tr>
<td>Attends briefly to a familiar adult looking at books, singing songs, or saying rhymes in home language</td>
<td>Participates in literacy activities in home language; and Attends to simple literacy activities in English with some support</td>
<td>Uses home language, gestures, or single words in English to show understanding of literacy activities in English</td>
<td>Uses frequently used words and short phrases in English to communicate understanding about a book, story, song, or poem told, read, or sung in English (often uses actions; may mix English with home language)</td>
<td>Uses a variety of words and phrases in English to communicate understanding about key ideas of a book, story, song, or poem told, read, or sung in English (sometimes uses actions; may mix English with home language)</td>
<td>Uses elaborated English phrases with a variety of vocabulary and grammatical structures to communicate understanding of the content of a book, story, song, or poem (may mix English with home language)</td>
</tr>
</tbody>
</table>

- **Possible Examples**

  - Looks at pictures in a book for a short time while a familiar adult reads in the home language.
  - Reaches to turn the page of a board book as a familiar adult talks or signs in the home language about the pictures on the page.
  - Uses simple hand movements to participate during a familiar song or rhyme in the home language.
  - Joins in with peers who are singing a song or chanting in child’s home language.
  - Looks at pages of a picture book with a peer while an adult reads the book aloud in English.
  - Attends to the retelling of a story in English on the flannel board, after the story has been read in child’s home language.
  - Makes faces, gestures, or sounds like a tiger when an adult reads an illustrated poem in English about tigers.
  - Gestures at a picture of a baby bear and says, “Baby,” while an adult is reading a book about animals in English to a small group of children.
  - Comments in home language about a picture in a book, after hearing other children making comments.
  - Repeats the first line of “Five Little Monkeys Jumping on the Bed,” with accompanying hand motions.
  - Draws a picture and communicates, “This is spider. This is fly,” after listening to the book The Very Busy Spider.
  - Communicates to a peer, “Look! Look! Una oruga [“a caterpillar” in Spanish]! Like the book!” while playing outside, after The Very Hungry Caterpillar was read aloud in English.
  - Brings the book Rosie’s Walk to a peer and communicates, “Chicken take a walk. Fox want eat her. Oh, no!”
  - Communicates, “Baby bear mad! The girl, she eat it all. Lahat ito!” [“The baby bear is mad! The girl, she ate it all,” in English; “All of it!” in Tagalog] during a teacher-guided discussion in English about The Three Little Bears, which has been read aloud and retold on several occasions with props.
  - Communicates most of the words of “Five Little Monkeys Jumping on the Bed” and uses flannel-board pieces to show each of the monkeys falling off the bed and bumping his head.
  - Communicates to a peer, “Sharks have sharp teeth to bite, and they swim fast,” while paging through a book about the ocean.
  - Communicates, “My mommy kiss me before I come to school. She say, ‘I love you, hijito.’ Then she goes to work,” while reading The Kissing Hand with an adult. [“Hijito” is a term of endearment that is often used with young children in some South American countries.]
  - Communicates, “She sat in Papa Bear’s chair. It was enorme [“enormous” in Spanish]. She sat in Baby Bear’s chair. It was teeny and she broke it! She was really scared,” while playing with flannel-board characters in The Three Little Bears.

- ○ Unable to rate this measure due to extended absence
### ELD 4: Symbol, Letter, and Print Knowledge in English

**Developmental Domain:** ELD — English-Language Development

Children show an increasing understanding that print in English carries meaning.

#### Conditional Measure

- **This measure is not rated:** English is the only language spoken in this child’s home.

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Discovering Language</th>
<th>Discovering English</th>
<th>Exploring English</th>
<th>Developing English</th>
<th>Building English</th>
<th>Integrating English</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Demonstrates awareness that pictures or objects can represent people or things</strong></td>
<td><strong>Demonstrates awareness that symbols carry meaning or that print in home language carries meaning</strong></td>
<td><strong>Demonstrates awareness that print in English carries meaning</strong></td>
<td><strong>Demonstrates understanding that English print consists of distinct letters with names in English</strong></td>
<td><strong>Identifies several English letters; and</strong></td>
<td><strong>Identifies at least ten English letters; and</strong></td>
</tr>
<tr>
<td><strong>Possible Examples</strong></td>
<td></td>
<td></td>
<td></td>
<td><strong>Recognizes own name in English print</strong></td>
<td><strong>Identifies a few printed words frequently used in English</strong></td>
</tr>
</tbody>
</table>

- Points to a picture of a bird in a book after seeing or hearing a bird outside.
- Goes and gets teddy bear after seeing a picture of a bear.
- Sees a photo of mother and communicates in home language, “Mama.”
- Explores a toy teacup and tries to take a drink.

- Shows an adult a book and requests, “Mẹ có thể đọc cho con nghe quyển sách này không?” (“Can you read me this book?” in Vietnamese).
- Gestures toward a Chinese character representing own name and says name.
- Asks an adult to read a note written in home language by a parent.

- Points to a caption written in English under a picture and asks an adult, in home language, what it says.
- Points to the printed word “flower” under a picture of a flower and says, in home language, “That says ‘flower.’”
- Gestures to the title of a book about trucks and communicates to an adult, in home language, “This book is about trucks.”

- Asks, in home language or in English mixed with home language, “What letter is this?” while pointing to the first letter of own name on cubby label.
- Communicates in English, “M,” while gesturing at a letter on a sign written in English during a neighborhood walk (the sign may or may not have the letter M).
- Gestures toward the letter O on a peer’s name tag after drawing an O in a sand tray.

- Names four English letters correctly while playing with magnetic letters with a peer.
- Communicates, “I have a T, and you have a T. I have an A, but not you,” “[I have an A, but you don’t.]” while gesturing at own name and a peer’s name.

- Names all the letters in own name correctly one by one, and then gestures at a friend’s name and names several letters, while standing at the name chart.
- Recognizes words posted in the writing center, such as “Mom,” “Dad,” and “love,” after a small group activity about writing letters to family members.
- Identifies labels such as “blocks,” “door,” “books,” or “art” while showing own grandma around the room.
- Communicates to a peer, “Mira, este dice ‘s–t–o–p’ [using English letter names],” while pointing to a stop sign to a Spanish-speaking peer.

- Communicates to a peer, “Mira, este dice ‘s–t–o–p’ [using English letter names],” while pointing to a stop sign to a Spanish-speaking peer.

#### Child is emerging to the next developmental level

- Unable to rate this measure due to extended absence
### COG 1: Spatial Relationships

Child increasingly shows understanding of how objects move in space or fit in different spaces.

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>Later</td>
<td>Later</td>
<td>Middle</td>
<td>Earlier</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Later</td>
<td></td>
</tr>
</tbody>
</table>

- **Moves body parts in basic ways**
  - Attends or responds as objects, people, or own body move through space
  - Explores how self or objects fit in or fill up different spaces
  - Explores spatial relationships (e.g., distance, position, direction), or movement of self or objects through space, trying a variety of possibilities
  - Takes into account spatial relationships (e.g., distance, position, direction) and physical properties (e.g., size, shape) when exploring possibilities of fitting objects together or moving through space

**Possible Examples**

- Moves hand to mouth.
- Lifts head from an adult’s shoulder.
- Stretches while lying on back.
- Turns toward an adult who enters the room.
- Watches and tracks a moving object.
- Lifts arms toward an adult as the adult reaches down to pick child up.
- Tries to squeeze body between a chair and the legs of a table to get a toy.
- Fills a purse or bucket, sometimes until it is overflowing.
- Rotates a puzzle piece that has a large knob, while trying to fit it into a space on a wooden puzzle.
- Attempts to put a star-shaped piece into the square-, triangle-, and star-shaped openings of a shape sorter.
- Repeatedly rolls various objects down a ramp.
- Changes directions to move around several obstacles while pushing a toy shopping cart.
- Uses hands to explore shape outlines in a puzzle board, and then explores puzzle pieces with hands to fit pieces into the puzzle board.
- Chooses puzzle pieces that are approximately the right size and shape to fit into a puzzle.
- Stacks a few nesting cups on top of each other to create a tower, with the largest cup on the bottom and smaller ones on top.
- Maneuvers a ride-on toy (without pedals) around people and objects on the playground, sometimes bumping into things.
- Moves around people and objects in the classroom, using a mobility aid, such as a walker.

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

**Conditional Measure**

I did not rate this measure because it is not used for documenting progress or planning this child’s learning activities and supports.
**COG 2: Classification**

Child shows an increasing ability to compare, match, and sort objects into groups according to their attributes.

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td></td>
<td>Earlier</td>
<td>Earlier</td>
</tr>
<tr>
<td>Later</td>
<td>Later</td>
<td>Middle</td>
<td>Later</td>
</tr>
</tbody>
</table>

- **Attends to people, objects, or events**
  - Interacts differently with familiar people and objects than with unfamiliar people and objects
  - Associates a person or object with another person or object, based on a similarity or relationship between them
  - Selects some objects that are similar from a collection of objects
  - Sorts objects into two or more groups based on at least two attributes, and then subdividing those groups based on a second attribute

- **Possible Examples**
  - Looks at people’s faces.
  - Quiets in response to an adult’s voice.
  - Reaches for a special blanket or toy from home.
  - Closes hand around an adult’s finger.
  - Smiles at a familiar adult’s face or voice.
  - Looks for the hammer that goes with the pounding bench.
  - Takes some apples out of a basket that contains apples and bananas while helping an adult prepare a snack.
  - Seperates blocks into a blue pile and a green pile, leaving a few green blocks in the blue pile.
  - Separates a pile of toy animals by kind (e.g., dogs, cats, and birds).
  - Separates buttons by color, and then sorts all of them again by shape or size.
  - Separates shoes based on color, and then re-sorts by type (e.g., slippers, boots, tennis shoes).
  - Removes utensils from an approaching unfamiliar adult.
  - Picks out some train cars from a box of toys.
  - Picks out toy trucks from a basket of toys and sets them on a nearby shelf, and then picks out toy cars from the basket and sets them on a different shelf.
  - Picks out toy trucks by using eye gaze to indicate where an adult should put each square.
  - Sorts shoes based on color, and then re-sorts by type (e.g., slippers, boots, tennis shoes).
  - Removes utensils from a special container.
  - Sorts flannel-board pieces by type (e.g., shoes, pants, and shirts), and then separates them by adult items and baby items.
  - Separates toys by color, and then sorts all of them again by shape or size.
  - Separates buttons by color, and then sorts all of them again by shape or size.
  - Separates shoes based on color, and then re-sorts by type (e.g., slippers, boots, tennis shoes).
  - Removes utensils from a special container.
  - Sorts flannel-board pieces by type (e.g., shoes, pants, and shirts), and then separates them by adult items and baby items.
  - Separates toys by color, and then sorts all of them again by shape or size.
  - Separates buttons by color, and then sorts all of them again by shape or size.
  - Separates shoes based on color, and then re-sorts by type (e.g., slippers, boots, tennis shoes).

- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**
## COG 3: Number Sense of Quantity

Child shows developing understanding of number and quantity.

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Earlier</td>
<td>Earlier</td>

</tbody>
</table>

- **Responding to people or objects in basic ways**
  - Responds to changes in the number of objects observed or interacted with
  - Demonstrates awareness of quantity
  - Uses number names, but not always correctly, in situations related to number or quantity
  - Identifies small quantities without counting, up to three
  - Counts up to five objects using one-to-one correspondence; and Recites numbers in order, one through ten
  - Shows understanding that the last number counted is the total number of objects in the group
  - Solves simple everyday problems involving numbers by counting up to 10 objects using one-to-one correspondence; and Recites numbers correctly, up to 20

### Possible Examples

- **Responds to people or objects in basic ways**
  - Looks at objects that are hanging from a mobile.
  - Calms in response to a familiar adult's touch.
  - Turns toward a familiar adult's voice.
  - Responds to changes in the number of objects observed or interacted with
  - Demonstrates awareness of quantity
  - Uses number names, but not always correctly, in situations related to number or quantity
  - Identifies small quantities without counting, up to three
  - Counts up to five objects using one-to-one correspondence; and Recites numbers in order, one through ten
  - Shows understanding that the last number counted is the total number of objects in the group
  - Solves simple everyday problems involving numbers by counting up to 10 objects using one-to-one correspondence; and Recites numbers correctly, up to 20

- **Method for rating**
  - Child is emerging to the next developmental level
  - Unable to rate this measure due to extended absence

## COG 5: Measurement

Child shows an increasing understanding of measurable properties such as size, length, weight, and capacity (volume), and how to quantify those properties.

<table>
<thead>
<tr>
<th>Mark the latest developmental level the child has mastered:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Responding</strong></td>
</tr>
<tr>
<td>Earlier</td>
</tr>
<tr>
<td>There are no earlier levels for this measure</td>
</tr>
</tbody>
</table>

### Possible Examples

- **Responding**
  - Gestures by holding one hand high in the air to indicate that an adult is tall.
  - Positions arms and legs far apart to “catch” a big ball while sitting on the floor.
  - Finds the big doll when asked to do so.
  - Grunts before picking up an object that might be heavy.

- **Exploring**
  - Makes repeated attempts to put different-sized trucks into a small tunnel.
  - Carries an empty purse with one hand, fills the purse with blocks, and then uses both hands to pick up the purse.
  - Pours water or sand back and forth between containers of different sizes.

- **Building**
  - Gestures to indicate how big the family dog is, when asked.
  - Communicates, “This pumpkin is so heavy.”
  - Communicates, “My braid goes down my back. It’s long.”

- **Integrating**
  - Communicates, “Este es más largo,” [“This one is longer,” in Spanish] when placing train tracks side by side to check which is longer.
  - Chooses the bigger of two buckets when asked to bring the one that will hold more water.
  - Communicates, “Mine is taller,” when building a block tower next to a peer’s block tower.
  - Arranges several leaves by size while outside on the playground.
  - Lines up several stuffed animals from smallest to largest, during pretend play.
  - Arranges five shapes on an electronic tablet from small to large by touching and dragging.
  - Puts four different objects on a balance scale, then lines them up from lightest to heaviest.

### Rating Indicators

- ○ Child is not yet at the earliest developmental level on this measure
- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence
### Developmental Domain: COG — Cognition, Including Math and Science

**COG 6: Patterning**
Child shows an increasing ability to recognize, reproduce, and create patterns of varying complexity

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>Middle</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>There are no earlier levels for this measure</td>
<td>Notices and responds to simple repeating sequences</td>
<td>Participates in some parts of simple repeating sequences in language, movement, music, everyday routines, or interactions</td>
<td>Matches simple sequences that are seen, heard, or experienced</td>
</tr>
</tbody>
</table>

#### Possible Examples

- Watches intently and waves hands while adult sings “Open, shut them” song.
- Watches another child hit drum twice, followed by adult hitting the drum twice.
- Pays attention to and attempts to follow the sequence as an adult claps, taps, claps, and taps.
- Follows snack-time routines with reminders to wash hands, go to the snack area, and sit at a table.
- Sings “E-I-E-I-O” and some animal sounds during the song “Old MacDonald’s Farm.”
- Lines up farm animals in the same order as a peer does.
- Repeats series of actions of touching head, shoulders, knees, and toes during the song “Head, Shoulders, Knees, and Toes.”
- Creates a simple repeating pattern using two different stamps, such as circle, star, circle, star.
- Claps, stomps, and then repeats.
- Paints pairs of green and yellow dots, making a pattern of two green, two yellow, two green, two yellow (numbers of dots may not be consistent).
- Continues a simple repeating pattern of drumbeats, started by an adult.
- Builds a fence out of blocks, continuing the pattern begun by a peer: tall block, short block, tall block, short block.
- Extends a simple repeating pattern of colors on a computer, using a touch screen.
- Adds cubes to continue red-yellow-blue pattern.
- Makes up a rhythmic sequence by clapping, patting, and stomping.
- Makes a fruit kebab in a repeating sequence of banana, strawberry, blueberry, banana, strawberry, blueberry, like a fruit kebab that another child is eating.
### Developmental Domain: COG — Cognition, Including Math and Science

**COG 7: Shapes**  
Child shows an increasing knowledge of shapes and their characteristics

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>Later</td>

</tbody>
</table>

There are no earlier levels for this measure

- **Possible Examples**
  - Feels along the edges of a triangle.
  - Puts one or two rings on a ring stack.
  - Takes out a puzzle piece with a knob and tries to fit it back into a hole of the puzzle, before setting it back down on the table.
  - Moves along a line of a circle painted on the pavement in an outdoor play area.
  - Feels along the edges of a triangle.
  - Puts a square-shaped puzzle piece into the correct hole of a form board.
  - Tries a variety of solutions to fit lids on boxes and other containers.
  - Puts a circle piece into the correct hole of a shape sorter.
  - Places different-shaped blocks on shelves labeled with matching shapes.
  - Uses ink stamps to make a row of circles and a row of squares.
  - Chooses blocks of the same shape to build a tower with a peer.
  - Points to a clock in the room when asked to find a circle during an "I Spy a Shape" game.
  - Communicates, "My sandwich is a square," while holding up a sandwich at lunch.
  - Names "square," "circle," and "triangle" after exploring each shape piece with hands.
  - Finds embedded shapes in a picture book, such as *Bear in a Square*.
  - Communicates that the face in a figure drawing is a circle.
  - Communicates, "It's an upside-down triangle," after noticing a yield sign.
  - Communicates, "This one has a pointy part. This one is curvy," when examining a triangle and a circle.
  - Communicates that a triangle has three sides and a square has four sides.
  - Communicates that two sides of a rectangle are longer, but the sides of a square are all the same.

- ○ Child is not yet at the earliest developmental level on this measure
- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence

---

**COG 7**

DRDP (2015): A Developmental Continuum from Early Infancy to Kindergarten Entry – Preschool View – August 1, 2015  © 2013-2015 California Department of Education – All rights reserved
## COG 8: Cause and Effect

Child demonstrates an increasing ability to observe, anticipate, and reason about the relationship between cause and effect.

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

- **Responds or shows anticipatory excitement to people, objects, or actions**
  - Widens eyes or opens mouth when a bottle or breast is presented.
  - Quiets in response to an adult’s voice.
  - Orient to a music toy nearby.

- **Repeats actions that have effects**
  - Shakes a rattle, pauses, then shakes it again.
  - Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
  - Makes a game of pushing different objects off a table, watching or listening as they fall.

- **Tries out different behaviors to cause effects**
  - Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
  - Makes a game of pushing different objects off a table, watching or listening as they fall.

- **Searches for possible causes of actions, events, or behaviors**
  - Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
  - Makes a game of pushing different objects off a table, watching or listening as they fall.

- **Acts on objects to cause a specific result**
  - Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
  - Makes a game of pushing different objects off a table, watching or listening as they fall.

- **Acts in ways that take into account an anticipated result**
  - Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
  - Makes a game of pushing different objects off a table, watching or listening as they fall.

- **Offers possible explanations for why certain actions or behaviors result in specific effects**
  - Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
  - Makes a game of pushing different objects off a table, watching or listening as they fall.

- **Shows understanding that variations in actions or degrees of actions with the same objects or materials cause different results**
  - Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
  - Makes a game of pushing different objects off a table, watching or listening as they fall.

### Possible Examples

- Widens eyes or opens mouth when a bottle or breast is presented.
- Quiets in response to an adult’s voice.
- Orient to a music toy nearby.
- Shakes a rattle, pauses, then shakes it again.
- Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
- Makes a game of pushing different objects off a table, watching or listening as they fall.
- Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
- Makes a game of pushing different objects off a table, watching or listening as they fall.
- Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
- Makes a game of pushing different objects off a table, watching or listening as they fall.
- Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
- Makes a game of pushing different objects off a table, watching or listening as they fall.

### Possible Examples

- Communicates, “The ice melted and made water because it’s hot in the sun.”
- Points to wilted leaves on a plant and communicates that the plant needs water.
- Communicates to a peer about how to feed the fish: “We have to give it a little bit of food every day. If we give it too much, it will get sick.”
- Communicates, “If I kick the ball harder, it will go really far!” during outdoor play.
- Enlarges the base of a block tower by replacing small blocks with large blocks after the tower keeps falling over.
- Communicates to a peer about how to feed the fish: “We have to give it a little bit of food every day. If we give it too much, it will get sick.”

- Communicates, “If I kick the ball harder, it will go really far!” during outdoor play.
- Enlarges the base of a block tower by replacing small blocks with large blocks after the tower keeps falling over.
- Communicates to a peer about how to feed the fish: “We have to give it a little bit of food every day. If we give it too much, it will get sick.”
**Developmental Domain: COG — Cognition, Including Math and Science**

**COG 9: Inquiry Through Observation and Investigation**

Child observes, explores, and investigates objects (living and nonliving things) and events in the environment and becomes increasingly sophisticated in pursuing knowledge about them.

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>

<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>Later</td>
</tr>
</tbody>
</table>

- **Possible Examples**
  - Points to bunny in its pen, then points to picture of a bunny.
  - Touches toy oven and communicates, “Hot.”
  - Communicates, “Lunch!” after observing plates of food come to the table.
  - Watches a bird outside, gets an adult’s attention, and then pretends to be a bird by flapping arms and making sounds like a bird.
  - Walks through a puddle, stomping feet hard to splash the water, and communicates that child can make a big splash.
  - Communicates, “La pelota es grande,” [“The ball is big,” in Spanish] while trying to pick up a large beach ball.
  - Gathers several rocks while outside and indicates which are heavy and which are light.
  - Communicates, “This one has a leaf, but that one doesn’t,” after an adult asks, “How are our plants doing?”
  - Communicates, “The grapefruit is big. The lemon is small.”
  - Uses sign language to describe what a worm feels like and what a caterpillar feels like.
  - Looks at an ant through a magnifying glass, and then draws a simple picture of what it looked like.
  - Communicates, “This one is big, but that one isn’t,” after an adult asks, “How are our plants doing?”
  - Communicates, “The grapefruit is big. The lemon is small.”
  - Uses sign language to describe what a worm feels like and what a caterpillar feels like.
  - Looks at an ant through a magnifying glass, and then draws a simple picture of what it looked like.
  - Communications, “This one has a leaf, but that one doesn’t,” after an adult asks, “How are our plants doing?”
  - Communicates, “The grapefruit is big. The lemon is small.”
  - Uses sign language to describe what a worm feels like and what a caterpillar feels like.
  - Looks at an ant through a magnifying glass, and then draws a simple picture of what it looked like.
  - Communications, “This one has a leaf, but that one doesn’t,” after an adult asks, “How are our plants doing?”
  - Communicates, “The grapefruit is big. The lemon is small.”
  - Uses sign language to describe what a worm feels like and what a caterpillar feels like.
  - Looks at an ant through a magnifying glass, and then draws a simple picture of what it looked like.
  - Communications, “This one has a leaf, but that one doesn’t,” after an adult asks, “How are our plants doing?”
  - Communicates, “The grapefruit is big. The lemon is small.”
  - Uses sign language to describe what a worm feels like and what a caterpillar feels like.
  - Looks at an ant through a magnifying glass, and then draws a simple picture of what it looked like.
  - Communications, “This one has a leaf, but that one doesn’t,” after an adult asks, “How are our plants doing?”
  - Communicates, “The grapefruit is big. The lemon is small.”

  - Communicates, “The grapefruit is big. The lemon is small.”
  - Uses sign language to describe what a worm feels like and what a caterpillar feels like.
  - Looks at an ant through a magnifying glass, and then draws a simple picture of what it looked like.
  - Communications, “This one has a leaf, but that one doesn’t,” after an adult asks, “How are our plants doing?”
  - Communicates, “The grapefruit is big. The lemon is small.”
  - Uses sign language to describe what a worm feels like and what a caterpillar feels like.
  - Looks at an ant through a magnifying glass, and then draws a simple picture of what it looked like.
## Developmental Domain: COG — Cognition, Including Math and Science

### COG 11: Knowledge of the Natural World

Child develops the capacity to understand objects (living and nonliving things) and events in the natural world, including how they change and their characteristics.

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Earlier</td>

</tr>
<tr>
<td>Later</td>
<td>Later</td>
<td>Middle</td>
<td>Later</td>
</tr>
<tr>
<td>Earlier</td>
<td>Later</td>
<td></td>
<td>Earlier</td>
</tr>
</tbody>
</table>

1. **Attends to people, objects, or events**
   - Interacts with objects or people
   - Shows interest in the characteristics of living or nonliving things in the environment
   - Explores how objects in the natural world will behave or function
   - Identifies basic characteristics of living things, earth materials, or events in the environment (e.g., how they look, feel, sound, or behave)
   - Demonstrates awareness of basic needs and processes that are unique to living things (e.g., need for water and food; change and growth)
   - Demonstrates an awareness of differences among living things, earth materials, or events in the environment by identifying some of their specific characteristics (e.g., appearance, behaviors, habitats)
   - Demonstrates knowledge of categories of living things, earth materials, or events in the environment, and knowledge of processes unique to living things (e.g., breathing, healing, changes through the life cycle)

2. **Possible Examples**

   - **Responding**
     - Looks at the movement of a mobile.
     - Quiets when an adult moves close.
     - Orient in the direction of a sound, touch, or gesture.
     - Shows pleasure during a playful interaction with adult during feeding.
     - Mouths object.
     - Makes repeated attempts to grab at a family pet’s fur.

   - **Exploring**
     - Touches the leaves of a plant.
     - Looks around when hearing a cat “meow.”
     - Rubs hands over a smooth rock during outdoor play.
     - Goes to cage where classroom pet is kept.
     - Taps a rock on another rock, then on the pavement.
     - Pours sand through a funnel.
     - Walks through a puddle, stomping feet hard to splash the water.
     - Watches a frog, then moves back when the frog jumps.
     - Touches wet ground and communicates, “Muddy.”
     - Communicates that a worm is long and wiggly.
     - Identifies different animal sounds when visiting a zoo or farm.

   - **Building**
     - Communicates, “My puppy likes to eat a lot because he’s growing and getting bigger.”
     - Observes that the water is below the roots in a sweet-potato jar and adds more water.
     - Wants to know who will feed the fish over the weekend.
     - Communicates, “The clouds are moving so fast. They cover the sun and then I can’t see it.”
     - Communicates that lemons are sour and oranges are sweet, when tasting lemons and oranges.
     - Communicates, “You find worms in the dirt and bees on the flowers.”
     - Communicates, “Fish can breathe underwater, but we have to hold our breath.”

   - **Integrating**
     - Feeds a rabbit and then explains, “它要長大需要吃青菜, 所有動物都要吃東西,” (It needs to eat vegetables. All animals need food, in Chinese).
     - Comments, while sorting through a collection of rocks and shells, “Animals live in shells, but not in rocks.”
     - Communicates, “Fish can breathe underwater, but we have to hold our breath.”
     - Communicates that a friend fell down and hurt a knee and that the knee has to be covered until it is all better.

   - **Other**
     - Communicates, “Fish can breathe underwater, but we have to hold our breath.”

---

**Responds to sensory information or input (e.g., visual, auditory, tactile) with basic movements of body parts**

- Responds to sensory information by moving body or limbs to reach for or move toward people or objects
- Uses sensory information to control body while exploring people, objects, or changes in the physical environment
- Demonstrates awareness of major body parts by exploring their movement potential
- Tries different ways to coordinate movements of large or small body parts
- Adjusts, with adult guidance, aspects of movement (e.g., effort, spatial, directional) in relation to people and objects
- Anticipates and then adjusts, on own, aspects of movement (e.g., effort, spatial, directional) in relation to people and objects in familiar spaces
- Anticipates and then adjusts aspects of movement (e.g., effort, spatial, directional) during new activities, in changed environments, or on different surfaces

**Possible Examples**

- Turns head in response to a light being turned on.
- Quiets in response to an adult singing.
- Responds to being touched on the cheek.
- Moves toward a familiar adult while being picked up.
- Bats or kicks at a hanging mobile.
- Turns toward, then grasps, a rattle being shaken.
- Gazes at, then reaches toward, glasses on someone's face.
- Moves over, under, around, and through large objects in an obstacle course, sometimes communicating, "Make sure you have enough room to stretch without bumping your neighbor."
- Changes pathway of movement from straight to curved or zigzag when following another child during a game of follow the leader.
- Pedals a wheel toy harder to go faster when catching up to another child on a wheel toy.
- Walks carefully after slipping on wet leaves or grass during a nature walk.

**Child is emerging to the next developmental level**

**Unable to rate this measure due to extended absence**
### Developmental Domain: PD-HLTH — Physical Development–Health

#### PD-HLTH 2: Gross Locomotor Movement Skills

Child shows increasing proficiency in fundamental locomotor skills (e.g., rolling, crawling, cruising, walking, running, jumping, galloping)

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>

</tr>
</tbody>
</table>

**Moves in basic and often involuntary ways**

- Turns head in response to stimulation or nourishment.
- Turns head to seek source of stimulation or nourishment.
- Responds involuntarily to a sudden loud noise or movement by extending arms and legs.

**Possible Examples**

- Turns head and reaches for a toy.
- Kicks at a mobile when lying on back.
- Rolls from stomach to back or from back to stomach.
- Creeps or crawls toward a familiar adult.
- Moves from lying down to a sitting position.
- Moves by rolling body on the floor.
- Moves by using arms to pull self forward.
- Takes steps sideways or forward while holding onto furniture.
- Walks forward steadily while pushing a cube chair.
- Pulls up to a standing position while grasping an adult’s hands.
- Stands up with support of a mobility aid, such as a walker.
- Walks forward with a wide base (legs farther apart) and arms held high.
- Stands up from squatting, unassisted, after picking up a toy.
- Walks with one object in each hand.
- Moves along a low balance beam or along the side of a curb, stepping sideways.
- Moves wheelchair through an obstacle course, first going straight, then turning quickly, then turning quickly again.

**Child is emerging to the next developmental level**

**Unable to rate this measure due to extended absence**
**Developmental Domain: PD-HLTH — Physical Development–Health**

**PD-HLTH 3: Gross Motor Manipulative Skills**

Child shows increasing proficiency in gross motor manipulative skills (e.g., reaching, kicking, grasping, throwing, and catching)

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>Middle</td>
</tr>
<tr>
<td>Moves in basic and often involuntary ways</td>
<td>Uses arms, legs, or body to move toward or reach for people or objects</td>
<td>Uses arms, legs, or body to engage in simple, repeated actions on objects</td>
<td>Manipulates objects, using one or more body parts, with limited stability</td>
</tr>
</tbody>
</table>

Possible Examples:
- Kicks legs.
- Extends arm.
- Flexes foot.
- Kicks against a nearby object.
- Rolls onto side, toward an object, while lying on a blanket.
- Reaches toward a familiar adult, using both arms.
- Bangs a cup on a table.
- Splashes in water.
- Kicks table leg while seated for snack.
- Moves to a ball, pushes it away, then moves toward it and pushes it again.
- Puts up and drops blocks while holding onto a low table.
- Sits with legs apart and traps a rolling ball with arms.
- Moves toward a large container while holding onto a beanbag, and then drops beanbag inside the container.
- Catches a ball while in a stationary position, using arms to bring it in and hold it against body.
- Practices throwing a ball by bringing it behind the head, sometimes dropping it but continuing the arm motion.
- Bends knees and jumps up to move a parachute or bed sheet that is also being held by others, sometimes losing grasp.
- Swings leg back to kick a stationary ball while standing in place.
- Hands out carpet squares to peers at circle time, sometimes dropping them.
- Catches a stuffed animal, with hands, keeping arms extended, and then uses hands to hold onto it.
- Steps and kicks a stationary ball, showing arm and leg opposition (e.g., left foot forward, right arm back), pausing briefly between stepping and kicking.
- Reaches up to take a hat off a hook, pauses to regain balance, and then puts hat on head.
- Uses hands to catch a beanbag tossed to either side of the body.
- Strikes a ball off a cone, using a bat, with a horizontal swing and rotation of upper trunk.
- Runs up to a stationary ball, plants foot next to the ball, and then swings leg for a forceful kick.
- Runs, with arm and leg opposition (e.g., left foot forward, right arm back), to try to catch a butterfly with a net.
- Runs and kicks a moving ball forcefully, showing arm and leg opposition (e.g., left food forward, right arm back), maintaining balance.
- Bounces a ball several times while walking.

○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
**Developmental Domain: PD-HLTH — Physical Development–Health**

**PD-HLTH 4: Fine Motor Manipulative Skills**

Child demonstrates increasing precision, strength, coordination, and efficiency when using muscles of the hand for play and functional tasks*

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Earlier</strong></td>
<td><strong>Middle</strong></td>
<td><strong>Later</strong></td>

<td></td>
</tr>
<tr>
<td>Later</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Earlier</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Responds in basic ways during personal care routines that involve hygiene**
  - Looks at an adult’s face, or quiets, during a diaper change.
  - Closes eyes when face is washed.
  - Kicks legs during a diaper change.

- **Responds in ways that demonstrate awareness of a hygiene routine**
  - Attends to an adult’s actions during diapering routine.
  - Grabs for the washcloth as an adult washes child’s face.
  - Shows excitement during bathtime.

- **Anticipates one or two steps of a hygiene routine**
  - Pulls at diaper or pants when diaper needs to be changed.
  - Puts hands under a faucet before an adult starts to turn on the water.
  - Turns head toward or away from a tissue when an adult tries to wipe child’s nose.

- **Participates in own hygiene routines, with an adult**
  - Communicates to an adult the need for help with toileting or for a diaper change.
  - Rubs hands together under a faucet after an adult turns the water on.
  - Tries to blow nose into a tissue held by an adult.
  - Lines up at sink to wash hands before lunch time.

- **Carries out some steps of own hygiene routines, with specific adult guidance or demonstration**
  - Uses toilet (pulls down pants, sits, etc.), but may need an adult’s assistance with wiping.
  - Gets a tissue and wipes own nose, with adult guidance to then throw tissue away and wash hands.
  - Gets own toothbrush and gives it to an adult after meals when asked.

- **Carries out most steps of familiar hygiene routines, with occasional reminders of when or how to do them**
  - Uses toilet on own, andflushes after adult reminder.
  - Washes and partially dries hands, and then dries them completely when suggested to by an adult.
  - Takes toothbrush after an adult puts on toothpaste, begins to brush teeth, but needs to be reminded to brush teeth in the back of the mouth.

- **Initiates and carries out most steps of familiar hygiene routines on own**
  - Uses toilet on own, sometimes forgetting to do one step, such as washing hands.
  - Washes hands before eating and usually remembers to use soap.
  - Gets a toothbrush, runs it under a faucet, holds it for an adult to squeeze toothpaste on, and brushes teeth.

- **Initiates and completes familiar hygiene routines on own**
  - Uses toilet on own, completing all steps, including washing hands.
  - Coughs and sneezes into elbow most of the time.
  - Goes to brush teeth after lunch, brushes teeth, and puts away toothbrush on own.

- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**
Conditional Measure*

I did not rate this measure because it is not used for documenting progress or planning this child’s learning activities and supports.

Mark the latest developmental level the child has mastered:

</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Prepares simple foods to serve to self or others</td>
</tr>
</tbody>
</table>

**Possible Examples**

- Turns toward an adult’s touch during feeding.
- Sucks on the nipple of a bottle or breast.
- Gazes at or nuzzles up to an adult when feeding.
- Closes lips around food on a spoon.
- Puts one or both hands on a bottle or breast while being held during feeding.
- Holds and bites a banana.
- Picks up and eats crackers from a tray.
- Feeds self small pieces of food, such as cereal or cheese, with fingers or whole hand.
- Eats soft food, such as yogurt or applesauce, from a bowl, using a spoon, with adult sometimes assisting with scooping.
- Drinks from a cup while an adult guides the cup.
- Uses adaptive utensils to feed self a meal when positioned functionally.
- Serves self from a serving bowl, using a large spoon, while someone else holds the bowl.
- Pours from a small pitcher, with some spilling.
- Takes the shell off of a hard-boiled egg.
- Spreads jelly on bread with a small spatula to make a sandwich.
- Cuts foods with a small plastic knife.
- Drinks water from a small whole hand. Adult sometimes assisting the bowl.
- Drinks from a cup while an adult guides the cup.
- Uses adaptive utensils to fill small bowls with cereal for snack time.

* Required for children with IFSPs and IEPs.
**Developmental Domain: PD-HLTH — Physical Development–Health**

**PD-HLTH 8: Personal Care Routines: Dressing**

Child develops and refines ability to participate in and take responsibility for dressing self

There are no earlier levels for this measure

**Possible Examples**

- Pushes a wheeled toy for a short distance.
- Climbs up a small slide, sits down, slides, and then goes to another activity.
- Puts toys in a wagon and pulls the wagon around the room.
- Lies prone on a scooter board and uses hands to push self around the room.
- Hops with two feet, pauses, and then hops again, while pretending to be a bunny.
- Runs to the ladder of a slide outdoors, climbs the ladder, and slides.
- Holds a drum and marches with a peer during part of a song.
- Jumps, moves, and waves a streamer in different ways while moving around the playground in a parade.
- Joins in a dance started by a peer and then dances until the song ends.
- Climbs up and down around a climbing structure several times.
- Joins a group of peers kicking and chasing a soccer ball around a play yard.
- Rides around the bike trail several times, increasing speed to pass a peer.
- Creates an obstacle course with peers and challenges others to see who can move the fastest through the course two times.
- Joins a group of children playing chase, while propelling own wheelchair.
- Initiates a dance activity, keeping up with a fast beat until the music ends.

*Intensity of active physical play and amount of strength required to engage in the activity will vary greatly from child to child. When observing a child, it is important to consider the child’s capacity for engaging in vigorous active physical play, in which a child’s heart is beating faster and the child is breathing harder than is typical for the child when engaged in daily activities or routines.*

○ Child is not yet at the earliest developmental level on this measure

○ Child is emerging to the next developmental level

○ Unable to rate this measure due to extended absence

**Possible Examples**

- Selects a banana when offered choice between a banana and an apple.
- Selects a carrot when offered a choice between carrots and celery.
- Chooses the picture of milk when offered a choice between water and milk.
- Accepts a variety of foods offered from a serving plate.
- Explores unfamiliar foods that are placed on a plate.
- Observes others’ reactions when they eat food items that are unfamiliar to child.
- Communicates, “Me gustan las bananas y las manzanas,” [“I like bananas and apples,” in Spanish] when selecting bananas and apples from a plate of sliced fruit.
- Identifies several pretend food items when playing restaurant with a peer.
- Makes different pretend food items, such as a tortilla and a pizza, with play dough.
- Communicates, “This rice is sticky.”
- Communicates, “I like mangos. They’re sweet.”
- Purses lips together and shakes head, “No,” when offered a slice of lemon to taste while making lemonade.
- Communicates, “Chooses the picture of milk when offered a choice between water and milk.
- Communicates, “I drink water instead of lemonade during snack time.”
- Communicates, “Broccoli is good for you,” when eating broccoli.
- Tells a peer, “Milk is good for my teeth.”
- Brings pretend soup to a peer who is pretending to be ill, to make the peer feel better.
- Communicates, “Sabi ng mama ko ay lalaki ako at lalakas kung kakain ako ng beans,” [“My mama said that I will grow big and strong if I eat my beans,” in Tagalog].
- Communicates, “Broccoli is good for you,” when eating broccoli.

- Child is not yet at the earliest developmental level on this measure
- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
### HSS 1: Sense of Time

Child increasingly communicates or demonstrates awareness about past and future events and relates them to present activity.

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>

</tr>
<tr>
<td>There are no earlier levels for this measure</td>
<td>Participates in the steps of a familiar routine or activity</td>
<td>Communicates about or acts out events that just happened; and Asks about activities that will happen soon</td>
<td>Relates past events to one another or to the present; and Plans for the near future</td>
</tr>
<tr>
<td>Possible Examples</td>
<td></td>
<td></td>
<td>Distinguishes what happened a long time ago from what happened in the recent past, or Distinguishes what will happen in the near future from what will happen much later</td>
</tr>
</tbody>
</table>

- Goes to wash hands when other children go to wash hands.
- Puts backpack and coat in cubby during morning arrival.
- Puts plate into dishes bin after lunch.
- Gestures or signs for favorite blanket, as part of getting ready for naptime, after finishing lunch.
- Asks or gestures to ring the clean-up bell when it is clean-up time.
- Waits by the door for a familiar peer who usually arrives after breakfast.
- Communicates about seeing a dog and a squirrel, after coming back from a walk.
- Communicates to an adult, when coming into a room, “We dug in the dirt and planted seeds.”
- Pretends to make muffins after helping to make muffins for snack.
- Communicates to an adult that the firemen came to visit yesterday, even though they actually came two weeks ago.
- Communicates, using a communication board, “We are going to the zoo,” when an adult asks where they are going tomorrow.
- Holds toy airplane toward the sky to communicate that child is going to fly in an airplane tomorrow.
- Communicates to an adult that a friend moved away and now doesn’t come to the school anymore.
- Communicates to an adult that a friend moved away and now doesn’t come to the school anymore.
- Draws a picture showing the progression of a plant growing from a seed to a tall plant with flowers, after planting flower seeds.
- Communicates, using a communication board, “I will be in this school this year, but next year, I will be at my sister’s school.”
- Communicates, “下個星期我媽媽要過生日，今天我要給媽做個生日卡, [”I’m going to make a card today for my mom’s birthday next week,” in Chinese].

○ Child is not yet at the earliest developmental level on this measure
○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
**HSS 2: Sense of Place**

Child demonstrates increasing awareness of the characteristics of physical environments and connections among their attributes, including the people and activities in them.

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Mark the latest developmental level the child has mastered:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Responding</strong></td>
</tr>
<tr>
<td>Earlier</td>
</tr>
<tr>
<td>---</td>
</tr>
</tbody>
</table>

- **Possible Examples**
  - Child is not yet at the earliest developmental level on this measure
  - Child is emerging to the next developmental level
  - Unable to rate this measure due to extended absence

- **Responding**
  - There are no earlier levels for this measure

- **Exploring**
  - Participates in activities that are related to specific environments
  - Recognizes or navigates familiar environments, anticipating the people and activities routinely associated with them
  - Recognizes changes in familiar environments or in the people associated with them
  - Recognizes the routes between familiar locations

- **Building**
  - Communicates about the relative distances between familiar locations, including details about those locations
  - Communicates the characteristics of or other communities with familiar ones, identifying the people associated with them

- **Integrating**
  - Communicates, "It snows where my auntie lives, but not here because it's hot."
  - Draws pictures of houses on farms and apartments in cities after an adult reads a story about different types of homes where people live.
  - Describes a trip to a farmers’ market and communicates, “That grocery store is outside! Not like our grocery store.”

- **Examples**
  - Puts paint brushes back in holder before leaving paint area.
  - Puts cars into car bin during clean-up time.
  - Puts picture into the “Who’s here today?” pocket chart hanging near the classroom door during morning arrival.
  - Shows cubby to family member upon arrival at child care.
  - Goes to the sink to wash hands before finding a place at the table for breakfast.
  - Takes an adult’s hand after being helped with putting on a jacket, and then points outside to the sandbox.
  - Asks, “¿Quién es ella?” (“Who’s that?” in Spanish) when a peer’s grandma comes to visit.
  - Looks closely at new block-shaped pictures attached to a shelf before placing blocks on the appropriate shelf, during clean-up time.
  - Communicates to an adult, “Where are the puzzles?” after going to the shelf where puzzles are usually kept and finding that the puzzles are not there.
  - Goes to area with dress-up clothes after noticing peer wearing something newly added to the dress-up area.
  - Communicates, “We go that way,” while on the way down the hall from the classroom to the bathroom.
  - Uses a communication board to ask to go by a favorite playground, when planning a walk.
  - Communicates, “This is the wrong way!” when mother takes an unfamiliar route to the grocery store.
  - Communicates that school is close to child’s house, but child’s aunt’s house is far away.
  - Communicates, after passing the post office while on a neighborhood walk with an adult, that they are almost to the fire station.
  - Communicates about driving in a car to see one grandma who lives nearby, but going on a plane to see another grandma who lives far away.
  - Communicates, “That grocery store is there. Grandma who lives far away.”

<td>Earlier</td>
</tr>
</tbody>
</table>

Possible Examples

- There are no earlier levels for this measure
- Demonstrates awareness of living things in the environment, especially animals
- Explores living things in the environment, especially animals
- Demonstrates simple understanding that people tend to the basic needs of plants and animals (e.g., watering and feeding)
- Demonstrates simple understanding that people tend to environments of plants and animals in caring for them (e.g., keeping cages clean, putting plants in the sun)
- Demonstrates simple understanding of the effects that humans have on the environment beyond their own direct experience (e.g., natural habitats for animals, climate change, clean air, clean water)

- Points to the class guinea pig in a cage.
- Notices a bug near the sandbox.
- Looks briefly as butterfly goes by.
- Turns toward a barking dog.
- Smells blossoms or feels leaves of a plant.
- Follows around or tries to pet a neighbor’s cat or dog, as reported by a family member.
- Watches goldfish intently as it swims in the fish tank.
- Feeds the fish, with adult assistance in measuring the food.
- Communicates about helping daddy feed the dog because it was hungry.
- Comments that the boy in a story watered his pumpkin seed so it would grow.
- Communicates that a pet’s cage needs to be cleaned.
- Communicates that the bunny needs to be in the shade.
- Communicates that the garden needs to be planted in the sun, not under a tree where there is too much shade.
- Puts a blanket down to make a soft bed for the dog in pretend play.
- Communicates that a pet’s cage needs to be cleaned.
- Communicates that the bunny needs to be in the shade.
- Communicates that the garden needs to be planted in the sun, not under a tree where there is too much shade.
- Puts a blanket down to make a soft bed for the dog in pretend play.
- Communicates that a pet’s cage needs to be cleaned.
- Communicates that the bunny needs to be in the shade.
- Communicates that the garden needs to be planted in the sun, not under a tree where there is too much shade.
- Puts a blanket down to make a soft bed for the dog in pretend play.

**Possible Examples**

- Continues playing while other children are cleaning up during clean-up time.
- Reaches for food on another child’s plate.
- Takes an object of interest away from another child.
- Steps in front of other children who are waiting to take their turn.
- Takes toys handed by an adult one by one at clean-up time and puts them on the shelf to help.
- Joins a group for lunch after an adult encourages child to come to the table.
- Makes room for another child to sit when adult communicates that the other child needs more space.
- Stops building a road with blocks and begins to put away blocks when an adult models for child and sings the “clean up” song.
- Returns from computer to hang up smock when an adult says, “You need to put your smock away at the easel before taking your turn at the computer.”
- Begins to get on a tricycle with another peer, but stops when an adult says, “We take turns with the trike, and your turn is next.”
- Follows the morning routine of putting away belongings, but then needs adult reminder before washing hands and going to the breakfast table.
- Rides on the bike path for several laps on a wheeled toy, after being reminded by an adult to stay on the path so that everyone is safe.
- Follows expected steps of putting away toys, putting on coat, and sitting on the rug to wait to go outside, after being shown a visual schedule depicting the sequence of steps.
- Cleans up blocks during clean-up time, on own.
- Holds hands with a peer while on a neighborhood walk.
- Gives space to other painters when painting.
- Being gentle when caring for the classroom pet.
- Suggests to a peer, while holding the class pet, “Let’s take turns. I can hold it now, and you can hold it next”; then, after a few minutes, gives the class pet to the peer.
- Reminds a peer that it's time to clean up for lunch, and then cleans up own art project and washes hands.
- Reminds peers to get in line outside the door before entering the classroom from the play yard.

- Child is not yet at the earliest developmental level on this measure
- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

- There are no earlier levels for this measure

**Possible Examples**

- Dabs dot markers on paper repeatedly, with different degrees of pressure.
- Uses a paintbrush to paint with water on various outdoor surfaces.
- Squeezes dough in hands, feeling it ooze between fingers.
- Paints with fingers, hands, or feet.
- Uses crayons, pencils, or markers to make back-and-forth marks.
- Finger paints to fill up a piece of paper with paint.
- Rolls play dough into balls.
- Squeezes dough in a ball.
- Combines lines and circles, when painting with paintbrushes, to symbolize familiar things (e.g., houses, trees, people).
- Rolls clay into balls, and shapes balls into pretend food, such as tortillas, hot dogs, or pancakes.
- Glues collage materials on a paper plate, using both two-dimensional materials (paper, fabric) and three-dimensional materials (feathers, pine cones, or leaves).
- Draws a familiar thing (e.g., sun, flower, house) on paper with a crayon or marker.
- Rolls and stacks balls of clay in order to make a head and body.
- Tries out different pieces of colored paper to create a flower.
- Draws a familiar thing using a touch screen.
- Paints a picture of a brown boat in a blue lake.
- Draws human figures (circles with faces) and adds hands and legs extending directly from the circles to show familiar actions, such as reaching and kicking a ball.
- Tapes two toilet paper rolls together to make binoculars, and then attaches yarn as a neck strap.
- Draws a scene with animals in enclosures and people watching them, after a trip to the zoo.
- Paints teardrops below the eyes on a face to show sadness.
- Creates a mobile of a sun hot dogs, or pancakes. as reaching and kicking between fingers.
- Glues wooden sticks together and weaves colorful yarn around them to make a dream catcher.

- Child is not yet at the earliest developmental level on this measure
- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

**Possible Examples**

- **Responding**
  - There are no earlier levels for this measure

- **Exploring**
  - Demonstrates interest in musical sounds
  - Tries out different ways of making musical sounds with voice, body, or instruments (sometimes in response to adult prompting)
  - Engages in brief segments of musical activities initiated by others, by making musical sounds using voice, body, or instruments

- **Building**
  - Engages in extended segments of musical activities initiated by others, by making musical sounds using voice, body, or instruments
  - Adapts to changes in the qualities of basic music elements (e.g., faster/slower, higher/lower, louder/softer) by making musical sounds using voice, body, or instruments

- **Integrating**
  - Extends or varies music with new words or sounds through voice, body, or instruments, using basic music elements (e.g., faster/slower, higher/lower, louder/softer)

**Possible Examples**

- Turns toward adult who starts to sing.
- Puts hands on a drum while another child is tapping on the drum.
- Plays a favorite song on a recorder or electronic device.
- Responds rhythmically, “I see a red bird looking at me,” when an adult chants, “Brown bear, brown bear, what do you see?” and then continues to respond to the adult with other chants.
- Sings a familiar song on own, first softly, then loudly.
- Strums a guitar or ukulele, or taps a xylophone, along with a song, changing the tempo of the strumming or tapping from faster to slower or slower to faster.
- Mimics the sounds of a musical instrument to extend the chorus of a familiar song.

#### Possible Examples

- **Responding**
  - Demonstrates interest in adult’s dramatic portrayal of a character.
  - Uses facial expressions, voice, or gestures in response to an adult’s dramatic portrayal of a character.
  - Portrays a familiar character in a simple way, using facial expressions, voice, gestures, or body movements.
  - Portrays a character with some detail when contributing to an improvised drama based on a story, song, or poem, or contributes to dialogue or ideas about a plot in response to adult’s suggestions.
  - Creates and maintains details of a character when contributing to an improvised drama (e.g., dialogue, plot, setting) without adult prompting.
  - Communicates details about a character’s emotions or thoughts when contributing to an improvised drama.

- **Exploring**
  - There are no earlier levels for this measure.
  - There are no later levels for this measure.

- **Building**
  - Child is not yet at the earliest developmental level on this measure.
  - There are no later levels for this measure.

- **Integrating**
  - Child is emerging to the next developmental level.
  - Unable to rate this measure due to extended absence.

</tr>
</tbody>
</table>

- **Possible Examples**
  - **Responding**
    - Watches intently as other children move or dance to music.
    - Moves toward other children who are doing dance-like movements with streamers.
    - Asks to watch a dance on a computer or an electronic tablet.
  - **Exploring**
    - Demonstrates interest in others' dance-like movements.
    - Moves body in response to music, rhythms, or others' movements.
  - **Building**
    - Moves body or body parts through space in response to music, rhythms, others' movements, or adults' cues.
    - Tries out a variety of movements through space, with some body control and awareness in response to music, rhythms, others' movements, or adults' cues.
    - Produces dance-like movements with increasing body control and awareness in response to music tempo, rhythms, others' movements, or adults' cues.
  - **Integrating**
    - Improvises dances by changing tempos (e.g., fast/slow) and by varying qualities of movements (e.g., big/small, high/low, smooth/jerky) in response to music.

- **Child is not yet at the earliest developmental level on this measure**
- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**
Glossary of Terms and Phrases Used in the DRDP (2015)

**Assemblage:** An artistic composition made from scraps, junk, or odds and ends.  
Appears in VPA 1: Visual Art

**Investigates/Investigation:** In the process of scientific inquiry, asking a question and conducting systematic observations or simple experiments to find an answer.  
Appears in:  
COG 9: Inquiry Through Observation and Investigation  
COG 10: Documentation and Communication of Inquiry

**Locomotor Skills:** The ability to project the body into or through space.  
Appears in:  
PD-HLTH 2: Gross Locomotor Movement Skills  
PD-HLTH 3: Gross Motor Manipulative Skills

**Manipulative Skills:** Also known as object-control skills in which the arms, hands, legs, and feet are used to give force to an object (for example, throwing a ball) or to receive and absorb the force from an object (for example, catching a ball).  
Appears in PD-HLTH 3: Gross Motor Manipulative Skills

**Observes / Observation:** Gathering information about objects and events by using the senses of sight, smell, sound, touch, and taste and noticing specific details or phenomena that ordinarily might be overlooked.  
Appears in:  
COG 9: Inquiry Through Observation and Investigation  
COG 10: Documentation and Communication of Inquiry

**Onset:** The first consonant or consonant cluster in a syllable (e.g., the h in the one-syllable word *hat*; the m and k in the two syllables in the word *monkey*).  
Appears in LLD 8: Phonological Awareness

**Rime:** A linguistic term that refers to the portion of a syllable that starts with a vowel. In the word *big*, the rime unit is /ig/. In the word *bring*, the rime unit is /ing/.  
Appears in LLD 8: Phonological Awareness

Resources for Assessing Children who are Dual Language Learners with the DRDP (2015)

The DRDP (2015) takes into consideration the specific cultural and linguistic characteristics of California’s diverse population of young children, with specific consideration for children who are young dual language learners. The introduction in the DRDP (2015) Assessment Manual provides information on completing the assessment with young children who are dual language learners. Keep in mind that young dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. Communication in all languages the child uses should be considered when collecting documentation and completing the measures in all domains of the DRDP (2015).

The following resources will increase your knowledge and help you better complete the DRDP (2015) for young children who are dual language learners.

### From the California Department of Education

<p>| California’s Best Practices for Young Dual Language Learners: Research Overview Papers | Two papers in this series are particularly relevant: “Assessment of Young Dual Language Learners in Preschool” focuses on the need for accurate and valid assessment of young dual language learners. It includes a decision tree for practitioners to determine in which language to assess young DLLs, a matrix of language and literacy assessment for use with preschool-age children, and a sample family interview protocol to learn about families’ language practices. “Early Intervention and Young Dual Language Learners with Special Needs” addresses the language development of young dual language learners with special needs and key considerations when choosing the language for intervention. | <a href="http://www.cde.ca.gov/sp/cd/ce/documents/dllresearchpapers.pdf">http://www.cde.ca.gov/sp/cd/ce/documents/dllresearchpapers.pdf</a> |

Appendix C: Strategies for Observation and Documentation

The DRDP (2015) is administered through observation in natural settings by teachers and other service providers in the classroom or center and by family members in home and community settings. Observations are embedded into typical, ongoing routines and activities throughout the day. The process of observation requires planning in advance on the part of teachers and service providers. As you review the measures of the DRDP (2015), consider specific routines or activities during the day where you would be able to observe more than one measure or more than one child.

Strategies for Effective Observation

Observation should be ongoing throughout the year. The assessment windows for the DRDP (2015) provide a period of time to make sure teachers and service providers have sufficient documentation for each of the measures in time to submit DRDP data. To rate a child’s behavior, teachers and service providers should use naturalistic, or authentic, observation strategies. Below are several key points to support naturalistic observations. You will find additional information about naturalistic assessment by viewing the short video, What is Authentic Assessment at http://draccess.org/guidancefordrdp. Many observation and documentation job aids can be found at https://desiredresults.us/content/teachers. You will also find a training DVD, Getting to know You Through Observation, at https://desiredresults.us/drdp-resources that can be used by EESD and other administrators to train staff.

Strategies for Effective Documentation

A variety of methods are available for recording information gathered through naturalistic observations, including:

- **Anecdotal Records** – An anecdotal record is a written note about what a child does or says during a typical or routine activity. Anecdotal records result in brief descriptions of the behavior observed.

- **Event recording (tallies)** – In event recording, the observer records each instance of the behavior being observed so that an indication of frequency is obtained. Usually this is done with tally marks but may also be recorded using a code such as “+” for correct and “-” for incorrect.

- **Checklists** – Checklists are lists of specific skills or behaviors that can be used during observation to check off the behaviors observed with a group of children.

- **Rating Scales or Rubrics** – Rating scales and rubrics are similar to checklists in that they include lists of behaviors but they also include additional descriptive information about the behavior such as how well, how frequently or how independently the behavior occurred.

- **Work Samples** – Documentation can also include the collection of 2- or 3-dimensional products that children have produced such as drawings, writing on paper or 3-dimensional constructions the child has made for example with play dough or other materials.

- **Videos or Photographs** – Cameras can be used to document observed behaviors of children through videos or still photographs.

Information on strategies for implementing the above documentation strategies can be found at: http://eclkc.ohs.acf.hhs.gov/hslc/tta-system/teaching/practice/iss-library.html
Consider the following for planning and collecting documentation:

- Choose methods of documentation that can be embedded into a program’s environment, structure, and routines.
- Plan ahead for materials needed for documentation such as sticky notes or pre-printed labels with children’s names for anecdotal records or clipboards with checklists or rubrics. Materials should be strategically located throughout the classroom.
- Observe children’s behaviors throughout the day and record documentation while observing.
- Date each piece of evidence for future reference.
- Collect documentation over time. Documentation over time strengthens the validity of ratings.
- Organize the documentation collected immediately after collecting it.
- Keep assessment information confidential. Store the DRDP materials, including notes, in a secure location to ensure confidentiality for each child.

Organizing Documentation

**Portfolios:** Portfolios are a helpful way of organizing information. EESD programs are required to use a form of portfolio to organize documentation. Portfolios may contain anecdotal notes, children’s work samples, photos of children’s activities, audio or video recordings, and transcripts of the child’s language. The portfolio methods selected should work well for the program.

**Electronic Portfolios:** If notes are entered into a computer, an electronic portfolio can be produced to summarize the evidence. Please check with a local administrator for procedures regarding consent for photography and video.

**Collaboration to Support Effective Documentation**

A central goal for teachers and service providers who use the DRDP (2015) is to obtain measures of the child’s developmental progress based on typical day-to-day behaviors. It is difficult to imagine one individual having access to all of the many learning opportunities that a child encounters throughout each day. Therefore, it is very helpful to seek input from individuals who have ongoing contact and who know the child well in order to obtain the most complete and accurate picture of the child’s skills and abilities. It is important to consider how and when collaborating with others will support and help to inform the accurate rating of measures for the DRDP (2015).

Although direct observation of a child is the primary method used to inform ratings, other sources of evidence should be used to supplement observations. Gathering information from others who know the child well such as family members, caregivers, or other service providers often provides a wealth of additional information about a child’s skills, knowledge, and behaviors. This also provides the additional benefit of observations across different settings. There are numerous ways that others can collaborate in sharing information such as written observations, conversations that focus on a child’s development, or viewing short videos or recordings that illustrate a child’s behavior in typical routines and activities.

Planning ahead can make the process of collaboration more helpful. Identify early on in your relationship with the child’s family, who else might provide helpful information to assist in documenting their child’s development. Make sure that the family is well informed about the purpose of the DRDP (2015) and the important role that they can play in sharing their observations about their child. With the family’s permission, communicate with other individuals who know the child and strategize with them how they might be able to share information with you.

Communication is key to successful collaboration. For a more detailed look at collaboration and the assessment process please refer to Appendix F.
Appendix D:
Comprehensive Definitions of Adaptations to be Used with the DRDP (2015)

Adaptations are changes in the environment or differences in observed behavior that allow children with Individualized Family Service Plans (IFSPs) or Individualized Education Plans (IEPs) to demonstrate their knowledge and skills in their typical environments. Adaptations that are in place for the child during the normal course of the day should also be in place during observations for the DRDP (2015). New adaptations should not be introduced solely for the purpose of conducting an assessment. Seven broad categories of adaptations are used with the DRDP (2015). This is the same system of adaptations developed for and used in the DRDP access.

1. Augmentative or Alternative Communication Systems
Augmentative and alternative communication systems are methods of communication other than speech that allow a child who is unable to use spoken language to communicate with others. An augmentative communication system is used to augment or facilitate the development of speech. An alternative communication system is used in place of speech. Some examples include sign language, picture cards, and electronic communication devices. Assessors should use these systems as part of the observation of a child using language in a natural context. Assessors should not just elicit responses or contrive adult-directed situations.

If American Sign Language is the child's primary language, it is designated as the home language, and not an adaptation. If sign language is used as a bridge to learning verbal language, then it is considered an adaptation.

2. Alternative Modes for Written Language
Alternative Modes for Written language are methods of producing written language used by a child who cannot see well enough or cannot hold and manipulate a writing utensil well enough to produce written symbols. If a child cannot see or cannot hold a pencil or marker, this adaptation may be used to assist in reading or writing, or emergent reading or writing. Examples of this adaptation include using a Braillewriter, keyboard, or computer.

Naturally, preschool-age children are not proficient at reading and writing. This adaptation allows for children to explore reading and writing and develop their skills in a developmentally appropriate manner.

3. Visual Support
Visual supports are adjustments to the environment that facilitate a child's ability to see or to understand the surrounding environment or events. Acceptable visual supports include:

- Adjustments in contrast
- Adjustments in lighting
- Distance from objects
- Increased size of materials
- Verbal description of events

4. Assistive Equipment or Devices
Assistive equipment or devices are tools that make it possible or easier for a child to perform a task. The child should be familiar with the use of the device. Any type of adaptive equipment or assistive device that the child needs for mobility, positioning or manipulating objects is acceptable, including:

- Walkers
- Standers

5. Functional Positioning
Functional positioning enables postural support that allows a child to have increased control of his body. It is important that positioning devices are available to the child across settings so that the child may access daily routines and activities and so they may be observed in a variety of activities. Some examples include:

- Standers
- Cube chairs
- Tricycles with seat belts and built-up pedals

6. Sensory Support
Sensory support includes either increasing or decreasing sensory input to facilitate a child's attention and interactions in the environment. Some children may need increased sensory input and others may need decreased input. Some children require different types of sensory support in different activities. Sensory support may include:

- Reducing background noise
- Adjusting tactile stimulation
- Adjusting visual stimulation

7. Alternative Response Mode
Using alternative response modes means recognizing that a child might demonstrate mastery of a skill in a way that differs from a typically developing child. For this adaptation, the environment is not modified as in the other adaptations. Rather, the child's unique yet consistent responses that may indicate the presence of a skill are identified. For example, the child with autism may look out of the corner of his or her eye instead of establishing direct eye contact, or the child with a physical impairment may use atypical movement patterns. The form of a child's response may differ from that of his peers and still be considered to demonstrate mastery of a skill.
Appendix E: Resources for Working in Partnership with Families

A central goal of the DRDP is to identify a child's developmental progress based on typical, day-to-day behaviors. It is appropriate to seek input from individuals who have ongoing contact with the child and know the child well. Family members' descriptions of their child's behavior in the home or in community settings will help teachers and service providers know more about the child's behaviors across settings, particularly for those skills the child may not demonstrate routinely in the educational setting; and help teachers and service providers obtain more comprehensive information in order to make accurate ratings for the DRDP (2015).

**Family members may participate in the DRDP assessment in a number of ways:**
- Inform the child's teachers and service providers of the child's history for a more complete picture of the child.
- Share the skills they see their child using in typical activities, and might share these skills via stories, photos, drawings, observations, and/or video clips.
- Share the child's strengths, areas they wish to focus on, and areas of growth they observe.
- Become informed about the next steps in their child's development.
- Help determine which adaptations will help their child participate in everyday activities (for children with an Individualized Family Service Plans (IFSPs) or Individualized Education Program (IEPs) and share with the team adaptations the child uses at home, at school, and in other settings.

Below are resources to assist families in knowing more about the DRDP (2015) and the skills assessed as well as resources to assist teachers and service providers in working as partners with families in the assessment process.

**Resources for Families**

**Overview of the DRDP (2015) for Families:**
http://draccess.org/OverviewOfDRDPAccessForFamilies.html
A document describing how the DRDP (2015) works for children, including those with IFSPs and IEPs; and how it benefits families, children, providers, and programs.

**All About Young Children:** https://allaboutyoungchildren.org/
A website for families describing skills that help children learn including how they learn language, how they learn about feelings and relationships, how they learn about numbers, and how they become skilled at moving their bodies. (Available in eight different languages.)

**California MAP to inclusion and Belonging:** http://cainclusion.org/camap/
The MAP Project website supports the inclusion of children with disabilities and other special needs ages birth to 21 in child care, after school and community settings. It includes links to resources on topics related to families and children with IFSPs and IEPs. The website contains a statewide interactive directory by county, of Family Resource Centers (FRC), Special Education Local Plan Areas (SELPA), Regional Centers, Head Start, and more for families of children with IFSPs and IEPs.

**Desired Results for Children and Families, Information for Families brochure:**
https://desiredresults.us/content/families
A brochure describing the Desired Results System for families.

**Watching My Child Grow:** https://desiredresults.us/content/families
A DVD that describes the Desired Results Assessment System and its benefits for all children and families from the voices of parents. Call 1-800-770-6339 or visit the website.

**Resources for Teachers and Service Providers**

**Family Engagement and Ongoing Child Assessment**
A document that addresses the perspectives of parents and program staff in the sharing of child assessment information through the formation of partnerships and suggests strategies for bringing those perspectives together.

**The Role of Family Observations:**
http://draccess.org/RoleOfFamilyObsv.html
A document describing the research findings that suggest parents' observations are reliable and valid and should be considered an essential component of a comprehensive assessment process.

Appendix F: Collaboration to Complete the DRDP (2015)

“‘The most valuable resource that teachers have is each other. Without collaboration our growth is limited to our own perspectives.’ – Robert John Meehan

Collaborating with Others Who Know the Child Well

Our understanding of young children is strengthened when we commit to partnerships with individuals, including family members, who know the child well and in different settings. Collaboration in gathering and sharing information is important because it affords us windows into a child’s life and offers perspectives that enhance our understanding of a child’s skills and behaviors. Identifying and communicating with the individuals who can collaborate on rating the measures of the DRDP (2015) is an essential step in this process.

Through collaboration, early educators and special educators each bring their skills and perspectives. Early educators contribute by providing a picture of the child in the context of a classroom setting. Special education providers contribute by identifying perspectives on a child’s unique learning needs and specific understanding of a child’s disability including materials that should be available and adaptations that should be in place. This lays the foundation for teachers and service providers to complement one another’s work in assessing a child’s skills and development. Shared information can build relationships that lead to joint decision-making not only about the assessment process but also about curriculum, instruction, supports, and services that teachers, providers and families make for individual children and groups of children.

Collaboration to share assessment observations and evidence for completing the DRDP (2015) is built on relationships and a commitment to ongoing communication. It is developed over time with an understanding of each person’s role. Aim for multiple, informal strategies that can be used on a daily basis. Identifying mutual interests in supporting the child is important. Some questions that address joint interests include:

- What are the child’s goals?
- What specialized equipment or adaptations are used?
- How will the goals be infused into the child’s day and into learning activities?
- How will we know our strategies are working?

Collaborating with others in the assessment process is especially important in situations where the child is served by multiple providers. For example, a child may attend an early education program and also receive special education services, such as speech-language, occupational, and/or physical therapy. Early education teachers and special education providers can work hand-in-hand to complete the observations and DRDP (2015) ratings for children who are dually enrolled in both programs. How this collaboration will take place – who will be involved and what roles each individual will play – will vary depending on the situation. Teachers and service providers have reported the following helpful strategies:

- sharing information, including observations, adaptations, curriculum and program goals, and IFSP outcomes or IEP goals
- providing anecdotal notes
- sharing work samples and portfolios
- reviewing reports of DRDP (2015) results together

Increasingly, teachers and providers are utilizing technology such as short video clips or recordings, with family permission, to share information and observations. The DRDP (2015) app helps teachers collaborate, as well as using technology such as email, phone conferences and free web conferencing platforms. Local policies on using devices should be followed.

The early education teacher and special education service provider responsible for completing the DRDP (2015) should each take the lead in partnering with others who work with the child. The general educator is responsible for entering DRDP data into DRDPtech. The special educator is responsible for reporting and entering the assessment data on children who have IEPs or IFSPs to the SELPA. However, except for data reporting, the assessment can be completed together by both educators, and a copy of the Rating Record held by each of them for their respective reporting. Suggestions to help get started working together include:

- Make an initial plan detailing areas to be observed directly and those areas in which others may have a more thorough knowledge of the child. The general education teacher can provide information on all domains. A speech-language therapist might inform measures in the Language and Literacy Domain. Families and special education providers including physical and occupational therapists are a good source of information for measures in the Physical Development and Health Domain.
- Contact the individuals who will collaborate to discuss the mutual goal of completing the assessment and to develop a plan for working together.
- Develop a timeline that is acceptable to all partners, including identifying deadlines and strategies to meet timelines.
- Collect any signature requirements for sharing child information from the family.
- Gather multiple perspectives and consider input from family and others who know the child during assessment.
- Determine when and how communicating about updates and results will occur.
Collaborating with Families

Gathering family perspectives about their child's development and behavior provides important and valid data, which is useful for making informed assessment decisions. Research suggests that family observations are reliable and valid and should be considered an essential component of a comprehensive assessment process. Inviting parents and other family members to share observations of their child's development and behavior is required for EESD programs and is good practice in all early childhood settings and programs.

When families collaborate with teachers and service providers in sharing their observations about their child's behaviors in the home or in community settings, it provides a richer and broader view of a child. Information from families helps to identify skills and behaviors that the child may not demonstrate routinely in the educational setting. For example, a teacher or therapist may not regularly observe a child's dressing or other self-help skills. However, families have repeated opportunities to observe their child's self-help skills both over time and in different settings. Parent observations support more accurate reporting about a child's skills.

Strategies for gathering information from families include the following:

- Make sure that families understand the skills and behaviors described in the DRDP (2015) measures. Teachers and service providers understand expected sequences of child development and are trained about how items on the DRDP (2015) reflect these sequences. Parents might not understand fully the meaning of measures without explanations or examples. It may be useful to provide families with examples of the kinds of behaviors to look for or the routines and activities that might provide a context for a behavior. For example, rather than ask a parent to describe a child's grasping pattern, inquire about how a child picks up small pieces of cereal during mealtime.

- It is reasonable for the observations of parents and practitioners to differ across the range of behaviors being rated. A child's behavior during activities and routines that occur in the classroom setting may differ from the same child's behavior in activities and routines in home or community settings. Not all perspectives about children's behavior based on parent or practitioner observations will be congruent. Rather, aim for convergence or the pooling of perspectives from all who know the child and have had repeated opportunities to observe behavior in different settings.

The ongoing conversations that we have with family members during our typical interactions with them are rich opportunities for learning about their child. Leading a focused conversation with a family is particularly important to obtain information on measures that you have not had the opportunity to observe. During these conversations, focusing on routines and activities provides a very useful context for asking a family about their child's everyday learning opportunities and skills. The four steps in the resource listed below will guide you in planning and leading focused conversations with families to help complete the DRDP (2015). If this is the first DRDP (2015) assessment that you will be completing with a particular child, be sure that you have spent enough time getting to know the child by observing the child's skills during typical routines/activities and by having conversations with the family.

For more information

DEC Recommended Practices in Collaboration
Developed to provide guidance to practitioners and families about the most effective ways to improve the learning outcomes and promote the development of young children, birth through age 5, who have or are at-risk for developmental delays or disabilities. The purpose is to help bridge the gap between research and practice by highlighting those practices that have been shown to result in better outcomes for you.
