

Use the ISAAP Tool!

The web-based Individual Student Assessment Accessibility Profile (ISAAP) Tool has many features to help you import and manage your students' accessibility resources.

Features:

- Available accessibility resources can be filtered by content area and identified by student need.
- Contextual help provides a brief description of each available accessibility resource.
- Links are provided to Accessibility Resources video tutorials that show how each embedded accessibility resource renders in the test delivery system.
- ISAAP Tool is available for both the California Assessment of Student Performance and Progress (CAASPP) and English Language Proficiency Assessments for California (ELPAC).
- Up to 500 student records can be imported at a time.
- An ISAAP Tool file can be exported for continued work at a later time.
- All accessibility resources can be cleared to start over.
- No logon is required.

Access the ISAAP Tool at <https://isaap.ets.org>.

For more information about the ISAAP Tool, access the Using the ISAAP Tool instructional video on YouTube at <https://www.youtube.com/watch?v=S65paPkb10s>.
