The Chronic Absenteeism indicator is based on the number of students who were absent for 10 percent or more of the total instructional school days. For example, most schools have 180 instructional days; if a student is absent 18 or more of those days, the student would be considered chronically absent.

**Reversed Goal**

For most state indicators, the desired outcome is a high number or percent in the current year and an increase from the prior year. However, for the Chronic Absenteeism indicator, the desired outcome is a low rate in the current year and a decline from the prior year.

**Calculating Current Year Data**

\[
\text{Number of Students Chronically Absent in the Current Year} \div \text{Chronic Absenteeism Eligible Enrollment}
\]

The result will fall into one of five levels, ranging from “Very High” to “Very Low.”

**Comparing Current and Prior Year Data**

We compare current and prior year data to see whether a school or district made improvement (i.e., had a lower rate of Chronic Absenteeism in 2018 than it did in 2017) or did worse (i.e., had a higher rate in 2018).

\[
\text{Current Year Data (Class of 2018)} \text{ MINUS Prior Year Data (Class of 2017)}
\]

The result will fall into one of five levels, ranging from “Increased Significantly” to “Declined Significantly.”

Taken together—current year data and its comparison with prior year data—a performance level, or color, is given. Access the flyer about How Dashboard Colors are Determined on the California Department of Education (CDE) website at [https://www.cde.ca.gov/ta/ac/cm/documents/howcolorsdetermine18.pdf](https://www.cde.ca.gov/ta/ac/cm/documents/howcolorsdetermine18.pdf).
