

How to Compare Schools on the 2019 Dashboard

Parents can use the Dashboard to see how well their children’s school is meeting the needs of all students. They can also compare their school’s performance to the performance of other schools in the district. These tools allow parents to engage in the school improvement process with data to begin understanding strengths and areas of need at their school and in their district.

1. The Dashboard can be viewed at <https://www.caschooldashboard.org/>.
2. To compare the results of schools within your district, type the district name into the search bar. Then select the year.

Explore information about your local school and district.

2018

3. Once you select your district, its performance on state and local measures will be displayed.

STANDARD MET

4. In the top right corner is the option to view all schools.

View All Schools

5. Below the district’s performance on state measures is an at-a-glance view for each school within the district.

6. Use the sorting options on the left-hand side of the screen to view the performance of:
 - All schools in the district (sorted in ascending or descending alphabetical order)
 - A specific indicator (sorted in order of school performance on this indicator)
