How to Compare Test Results

2. Select the English Language Arts/Literacy and Mathematics link.
3. Select the Search Smarter Balanced Results button on the right side of the page.
4. Select the Compare Test Results link in the upper navigation bar.
5. Add any of the following results you wish to compare:
   - **Statewide Results**
     Select the Add to Comparison button in the California Statewide Test Results box.
   - **County, District, and School Results**
     Use the drop down menus to make selections and then select the Add to Comparison button.
     A Keyword Search box is also available. Enter the name, county-district-school code, or zip code and select the Keyword Search button. Select the Add to Comparison button next to the County, District, or School for which you want to view results.

   Three entities is the maximum number that can be compared. Comparisons can be made between levels (e.g., district to state) or at the same level (e.g., school to school).

6. All data set selections will be displayed at the top of the page. Select the X next to a data set to remove it from your comparison.
7. Select the Compare Now button to view comparison results.

   The comparison will display the percentage of students in each of the four performance categories for both English language arts/literacy and mathematics.

   Selecting the Table or Graph buttons in the top right corner will toggle the display between a table and a graph.

   Hovering over any area of the bar chart will display the exact percentage of students in that level.
