How to View Test Results for Student Groups

These steps start from the page that shows results for the selected school, district, or county. Instructions on how to access the results can be found in the How to View Test Results Quick Reference Guide for the Smarter Balanced Summative Assessment.

1. In the Report Options section, select the group or subgroup for which you want to view data.

2. Select the **Apply Selections** button.

   *This will update all results on the page. Data displayed only pertains to the students in the group or subgroup. Results will be condensed for each subgroup within the category selected.*

3. Select the triangle in next to the group or subgroup name to expand specific sets of results.

   *Graphs and tables are available for all subgroups for both English language arts/literacy and mathematics that show the percentage of students in each of the four performance categories by grade, the number of students enrolled and tested, and the mean scale score.*
