Introduction to the DRDP (2015)

Welcome to the Desired Results Developmental Profile (2015) [DRDP (2015)]: A Developmental Continuum from Early Infancy to Kindergarten Entry. The DRDP (2015) is a formative assessment instrument developed by the California Department of Education for young children and their families to be used to inform instruction and program development.

The DRDP (2015) is based on the previous DRDP instruments. It includes refinements made over the past several years and new elements that are essential to quality early childhood education. It aligns with the California Department of Education's Early Learning and Development Foundations.

Key Features of the DRDP (2015):
- The DRDP (2015) is administered in natural settings through teacher observations, family observations, and examples of children's work. Ongoing documentation of children's knowledge and skills in everyday environments is a recommended practice for early childhood assessment.
- The DRDP (2015) replaces the DRDP-Infant/Toddler© (2010), the DRDP-Preschool© (2010), and the DRDP access assessment instruments.
- The DRDP(2015) represents a full continuum of development from early infancy up to kindergarten entry. It has two views: the Infant/Toddler view for use with children in infant/toddler programs, and the Preschool View, for children in preschool programs.
- The DRDP (2015) is designed for use with all children from early infancy up to kindergarten entry, including children with Individualized Family Service Plans (IFSPs) and Individualized Education Programs (IEPs).
- The DRDP (2015) takes into consideration the specific cultural and linguistic characteristics of California's diverse population of young children, with specific consideration for children who are young dual language learners (see section below).
- The DRDP (2015) was developed with the goal of ensuring that all children have the opportunity to demonstrate their knowledge and skills. To enable access to the assessment for diverse populations, the principles of Universal Design were followed.
- The DRDP (2015) includes domains that meet the federal Office of Special Education Programs (OSEP) child outcome reporting requirements for children with Individualized Family Service Plans (IFSPs) or Individualized Education Programs (IEPs).

Information about Selected Key Features

Three of these key features: (1) consideration of young children who are dual language learners, (2) universal design and adaptations for children with IFSPs and IEPs, and (3) a detailed description of the developmental domains that make up the instrument, are described in more detail to help teachers and service providers better understand and rate the measures of the DRDP (2015).

Young Dual Language Learners and the DRDP (2015)

Dual language learners are children learning two or more languages at the same time, as well as those children learning a second language while continuing to develop their first (or home) language. A child's experience with one or more languages is an asset to build on in the early childhood setting. It is critical to consider the child's communication in all the languages that he or she is learning in order to have an accurate picture of a child's knowledge and skills. Young children, including children with disabilities, can successfully learn two or more languages. Learning two or more languages has linguistic, social, cognitive, academic, and cultural benefits. The path to learning one language shares many similarities with the path to learning two or more languages. There are also differences that must be taken into consideration when assessing young children who are dual language learners. Children may have vocabulary for concepts in one language and vocabulary for other concepts in another language. So it is important to assess children in all of the languages he or she understands and uses. The DRDP (2015) addresses cultural and linguistic responsiveness in two primary ways:

1. Teachers and service providers observe and document children's behavior in both the home language and English to obtain a more accurate profile of the children's knowledge and skills across developmental domains.

2. Teachers and service providers rate children's progress on two language development domains. The Language and Literacy Development (LLD) domain assesses all children's progress in developing foundational language and literacy skills where ratings should be based on skills in all languages. The English-Language Development (ELD) domain assesses current knowledge and skills and progress in learning to communicate in English.

Universal Design and the DRDP (2015)

In the context of assessment, "Universal Design" refers to the development of assessments that are appropriate for all children to the greatest extent possible. Universal Design allows children the opportunity to demonstrate their knowledge and skills in a variety of ways. All young children are entitled access to, and meaningful participation in, age-appropriate, individually-appropriate and culturally-appropriate early childhood curricula and assessments. Teachers and service providers support children's access and participation by identifying and providing learning opportunities, materials, and teaching strategies in flexible and individualized ways and through a variety of learning modalities. DRDP (2015) assessors apply universal design when they carefully consider the various ways young children can demonstrate knowledge or skills that reflect mastery of a developmental level.
The Eight Domains of the DRDP (2015)
The DRDP (2015) is made up of eight domains. The focus of each domain is on the acquisition of knowledge, skills, or behaviors that reflect each domain's developmental constructs.

Approaches to Learning–Self-Regulation (ATL-REG)
The ATL-REG domain assesses two related areas that are recognized as important for young children's school readiness and success: Approaches to Learning and Self-Regulation. These areas have been combined into one domain because of the strong connections between them. The Approaches to Learning skills include attention maintenance, engagement and persistence, and curiosity and initiative. The Self-Regulation skills include self-comforting, self-control of feelings and behavior, imitation, and shared use of space and materials.

Social and Emotional Development (SED)
The SED domain assesses children's developing abilities to understand and interact with others and to form positive relationships with nurturing adults and their peers. The knowledge or skill areas in this domain include identity of self in relation to others, social and emotional understanding, relationships and social interactions with familiar adults, relationships and interactions with peers, and symbolic and sociodramatic play.

Language and Literacy Development (LLD)
The LLD domain assesses the progress of all children in developing foundational language and literacy skills. These skills can be demonstrated in any language and in any mode of communication. Language and literacy skills in a child's first language form the foundation for learning English. Therefore, dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. LLD measures should be completed for all infants, toddlers, and preschool-age children, including those who are dual language learners.

English-Language Development (ELD)
The ELD domain assesses the progress of children who are dual language learners in learning to communicate in English. The developmental progression described in the four ELD measures is related to the child's experiences with English, not the child's age. Keep in mind that children acquire English in different ways and at different rates. Factors that affect English acquisition include degree of exposure to English, level of support provided in their home/first language, and individual differences such as age of exposure to English or the structure of the child's home/first language. The ELD measures should be completed only for preschool-age children whose home language is other than English.

Cognition, Including Math and Science (COG)
The COG domain focuses on observation, exploration of people and objects, and investigation of objects and concepts. The knowledge or skill areas in this domain include spatial relationships, cause and effect, classification, number sense of quantity, number sense of math operations, measurement, patterning, shapes, inquiry through observation and investigation, documentation and communication of inquiry, and knowledge of the natural world.

Physical Development–Health (PD-HLTH)
The PD-HLTH domain assesses motor development and the development of routines related to personal care, safety, and nutrition. The knowledge or skill areas in this domain include perceptual-motor skills and movement concepts, gross locomotor movement skills, gross motor manipulative skills, fine motor manipulative skills, active physical play, nutrition, safety, and personal care routines (hygiene, feeding, dressing).

History-Social Science (HSS)
The HSS domain focuses on learning about the expectations of social situations, how to participate within a group, and the relationship between people and the environment in which they live. The knowledge or skill areas in this domain include sense of time, sense of place, ecology, conflict negotiation, and responsible conduct.

Visual and Performing Arts (VPA)
The VPA domain focuses on awareness and engagement in four areas of artistic expression. The knowledge or skill areas in this domain include visual art, music, drama, and dance.

About the Measures of the DRDP (2015)
The levels for each DRDP (2015) measure describe a developmental continuum, ranging from earlier developing to later developing competencies. The DRDP (2015) includes three types of continua:

- Full Continuum Measures: describe development from early infancy to early kindergarten entry. These measures should be used with all infants, toddlers, and preschool-age children.
- Earlier Development Measures: describe development that typically occurs from early infancy through early preschool ages and may be used with preschool-age children under specific conditions (identified as Conditional measures).
- Later Development Measures: describe development that typically occurs from early preschool ages up to kindergarten entry. These measures should be used with all preschool-age children.
Conditional Measures for Preschool-Age Children

Some measures in the DRDP Preschool View are considered conditional measures that are assessed when certain conditions are met. These measures should be used if they assist teachers and service providers in planning a child’s learning activities and supports, and documenting progress.

### Measure Conditions Under Which to Assess

#### Earlier Development Measures

<table>
<thead>
<tr>
<th>Measure</th>

</tr>
</tbody>
</table>

*Guidance for rating ELD measures for children who are dual language learners is provided in the section, “Young Dual Language Learners and the DRDP (2015)” on page Intro-2.

### The Developmental Levels

The number of levels in a measure varies depending on the competencies that are appropriate for that measure’s developmental continuum. The levels are organized under four categories from early infancy up to kindergarten entry: Responding, Exploring, Building, and Integrating:

#### Responding (Earlier, Later)

Knowledge, skills, or behaviors that develop from basic responses (through using senses and through actions) to differentiated responses. Children generally engage in back-and-forth interactions with familiar adults and communicate through nonverbal messages.

#### Exploring (Earlier, Middle, Later)

Knowledge, skills, or behaviors that include active exploration including purposeful movement, purposeful exploration and manipulation of objects, purposeful communication, and the beginnings of cooperation with adults and peers. Children generally begin this period by using nonverbal means to communicate and, over time, grow in their ability to communicate verbally or use other conventional forms of language.

#### Building (Earlier, Middle, Later)

Knowledge, skills, or behaviors that demonstrate growing understanding of how people and objects relate to one another, how to investigate ideas, and how things work. Children use language to express thoughts and feelings, to learn specific early literacy and numeracy skills, and to increasingly participate in small group interactions and cooperative activities with others.

#### Integrating (Earlier)

Knowledge, skills, or behaviors that demonstrate the ability to connect and combine strategies in order to express complex thoughts and feelings, solve multi-step problems, and participate in a wide range of activities that involve social-emotional, self-regulatory, cognitive, linguistic, and physical skills. Children begin to engage in mutually supportive relationships and interactions.

Note that the developmental levels for the ELD domain differ from the above format as they represent the developmental progression for the acquisition of English as a second language during the early childhood years.
### Definitions of Terms in the Navigation Maps

**Developmental Domain:** A crucial area of learning and development for children.

**Measure:** The developmental continuum along which a child’s observed behavior is assessed. Measures are the individual assessment items in the DRDP.

- **Full Continuum Measure:** Describes development from early infancy to early kindergarten.
- **Early Development Measure:** Describes development that typically occurs in infant/toddler and early preschool years.
- **Later Development Measure:** Describes development that typically occurs in the preschool years and early kindergarten.

**Definition:** Specifies the aspects of development to be observed.

**Developmental Level:** A point along a developmental progression for a particular measure that ranges from earlier to later levels of development.

**Descriptor:** Defines the behaviors that would be observed for a child at that developmental level.

**Example:** Specific behaviors you might see that would demonstrate that a child has reached mastery of a particular developmental level. Note that the examples provided in the DRDP are not the only way a child can demonstrate mastery of a developmental level.

---

### Example of an Earlier Developmental Measure

**Developmental Domain:** ATL-REG — Approaches to Learning–Self-Regulation

**Measure:** I did not rate this measure because it is not used for documenting progress or planning.

**Definition:** Child develops the capacity to pay attention to people, things, or the environment when interacting with others or exploring play materials.

**Examples:**
- Unable to rate this measure due to extended absence
- Unable to rate this measure due to absence
- Unable to rate this measure due to observed behavior.

---

### Example of a Later Developmental Measure

**Developmental Domain:** ATL-REG — Approaches to Learning–Self-Regulation

**Measure:** Early Moreover, children go on and then go back to another child.

**Definition:** Describes development from early infancy to early kindergarten.

**Examples:**
- Child is emerging to the next developmental level
- Child is not yet at the earliest developmental level on this measure
- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

---

### Example of a Full Continuum Measure

**Developmental Domain:** ATL-REG — Approaches to Learning–Self-Regulation

**Measure:** ATL-REG 6: Engagement and Persistence

**Definition:** Continues looking across a range of activities.

**Examples:**
- Continues working on a project with an adult and continues when adult stops
- Continues working with a partner and turns attention to adult
- Coordinates movements in an upright position
- Covers self in tent or blanket
- Works through challenges on own while engaged in self-selected activities

---

### Example of a Conditioned Measure

**Developmental Domain:** ATL-REG — Approaches to Learning–Self-Regulation

**Measure:** ATL-REG 1: Attention Maintenance

**Definition:** Responsibly rises to use a library book during the morning.

**Examples:**
- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

---

### Developmental Continuum from Early Infancy to Kindergarten Entry

**PD-HLTH 2: Gross Locomotor Movement Skills**

**Responsing**

<table>
<thead>
<tr>
<th>Earlier</th>
<th>Later</th>
<th>Middle</th>
<th>Later</th>
<th>Earlier</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Moves one or more body parts together, often with intention</td>
<td>Combines movements of whole body while upright, using support</td>
<td>Combines movements of whole body while upright, using support</td>
<td>Combines movements of whole body while upright, using support</td>
<td>Combines movements of whole body while upright, using support</td>
<td>Combines movements of whole body while upright, using support</td>
</tr>
</tbody>
</table>

**Responding Examples**

- Runs fast with long strides, and stops quickly and easily while running.
- Moves one or more body parts together, often with intention.
- Combines movements of whole body while upright, using support.

**Emerging**

- Forms and practice in a group and continues building with “right” pieces.
-作品 THAN IN 3D STACKING.
- *Each work is done individually or in combination.
- Each work is done individually or in combination.

**Unable to Rate**

- Unable to rate due to extended absence.
- Unable to rate due to absence.
- Unable to rate due to observed behavior.

---

### PD-HLTH 2: Gross Locomotor Movement Skills

**Developmental Levels**

- **Engagement and Persistence**
- **Exploring**
- **Building**
- **Integrating**

**Examples**

- *Each work is done individually or in combination.
- Each work is done individually or in combination.
- Each work is done individually or in combination.

---

### DRDP (2015): A Developmental Continuum from Early Infancy to Kindergarten Entry — Infant/Toddler View

- **Intro-5 of 16**
The 3 Steps to Completing the DRDP (2015)

Step 1: Observation and Documentation

The DRDP (2015) focuses on the child’s behavior, knowledge, and skills. To capture a child’s behavior, the DRDP (2015) incorporates observation in natural settings.

While observing and collecting documentation, remember that words, phrases, and sentences can be communicated and understood in a variety of ways, including spoken in the child’s home language, signed, and through other communication modes (e.g., via a communication device). The teacher’s and service provider’s direct observations of a child are the primary method used to inform ratings and they should also use other sources of evidence to capture a more complete picture of a child’s knowledge and skills. Other sources of evidence include the following:

- **Observations by others** – including teachers, family members/caregivers, and other service providers or caregivers, obtained through interview or conversations

- **Other documentation** – including samples of children’s work, photographs, and video/audio recordings of children’s communication and behavior

Observations should occur over time, in typical settings:
- In the child’s typical program or settings such as child care, classrooms, or home;
- As the child interacts in familiar environments and routines with people he or she knows; and
- As the child engages in typical activities and routines.

The Important Role of Families in the Documentation Process

Family members have repeated opportunities to observe their child’s activities and interactions over time and in a variety of situations. Their perspectives, combined with teachers’ and service providers’ observations, provide a more complete and reliable picture of a child’s typical behaviors. Inviting family members to share observations of their child’s development and behavior is a recommended practice for the DRDP (2015). The opportunity to observe a child’s level of mastery is greatest when the child is interacting with a familiar adult. Because of this, it is helpful to observe a child interacting with family members. This is especially true for children who are new to a program or at the earliest levels (Responding Earlier and Responding Later). These observations can inform assessment decisions for all domains. They are particularly important for the SED and LLD domains since social interaction and communication skills are learned through repeated interactions with familiar adults.

Observation and Documentation for Young Dual Language Learners

Young dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. They may also code-switch, which is using more than one language within a conversation. Therefore, communication in all languages the child uses should be considered when collecting documentation and completing the measures in all domains. The adult who is conducting observations and collecting documentation should speak the child’s home language. If not, the adult must receive assistance from another adult, who does speak the child’s home language. This may be an assistant teacher, director, parent, or other adult who knows the child.

Dual Language Learners’ Use of Code Switching

- Code switching is the use of multiple languages within a single conversation. It is a typical feature of learning two or more languages.
- As early as three years of age, children code switch to playfully experiment with the two languages and to serve their own social and communication goals. For example, children may code switch to emphasize or elaborate a point.
- Children might code switch when speaking with one person, or may use one language exclusively with one person and another language with another person.
- When children mix their two languages they use the grammatical rules of each language. For example, “I want leche” (“I want milk”) is an example of inserting a Spanish noun into a grammatically correct English sentence.

Using Adaptations

Adaptations are changes in the environment or differences in observed behavior that allow children with IFSPs or IEPs to demonstrate their knowledge and skills in typical environments. Seven broad categories of adaptations have been identified for children with IFSPs and IEPs for the DRDP (2015).

- The adaptations listed in the table below have been developed so that the assessment will more accurately measure a child’s abilities rather than the impact of a child’s disability (a more detailed description of the adaptations appears in Appendix D). Adaptations must be in place for the child during the normal course of the day, and they should also be in place during observations for the DRDP (2015). Everyone working with the child should be informed of any adaptations the child uses.
- New adaptations must not be introduced solely for the purpose of conducting the DRDP (2015) assessment.
- Consideration of adaptations should be made on a regular basis from early infancy and as the child develops and grows.
Seven Categories of Adaptations

Augmentative or Alternative Communication System
Methods of communication other than speech that allow a child who is unable to use spoken language to communicate with others.

Alternative Mode for Written Language
Methods of reading or writing used by a child who cannot see well enough to read or write or cannot hold and manipulate a writing utensil (e.g., pencil, pen) well enough to produce written symbols.

Visual Support
Adjustments to the environment that provide additional information to a child who has limited or reduced visual input.

Assistive Equipment or Device
Tools that make it possible or easier for a child to perform a task.

Functional Positioning
Strategic positioning and postural support that allow a child to have increased control of his body.

Sensory Support
Increasing or decreasing sensory input to facilitate a child’s attention and interaction in the environment.

Alternative Response Mode
Recognition that a child might demonstrate mastery of a skill in a unique way that differs from the child’s typically developing peers.

Step 2: Rating the Measures

Determining the Child’s Latest Level of Mastery
For each of the measures, determine the latest developmental level the child has mastered, and mark it appropriately.

The Descriptors and Examples
Consider the descriptors first, and then the examples, to determine which developmental level is most consistent with your observations and other documentation of the child’s typical behavior. A child may demonstrate behaviors at more than one developmental level. Choose the level that most closely represents the knowledge, skills, or behaviors the child demonstrates most consistently.

Descriptors:
The descriptors define the knowledge, skills, or behaviors expected at each level along the developmental continuum of the measure (see Navigation Maps). Each descriptor is illustrated by several examples of behaviors that are consistent with that developmental level.

Most of the descriptors define discrete knowledge, skills, or behaviors. However, some include more than one behavior or skill, separated by “and,” “or,” or a semicolon (;) followed by “and.”

If the descriptor includes “or”:
The child only needs to demonstrate the behavior in one of the listed ways to demonstrate mastery for the developmental level. Either part of the descriptor may be observed to rate mastery at that level.

- For example, the descriptor for Exploring Later in LLD 5: Interest in Literacy is:
  
  \[
  \text{Looks at books on own briefly or Chooses to join reading, singing, or rhyming activities led by an adult}
  \]

  If the child EITHER looks at books on own briefly OR chooses to join reading, singing, or rhyming activities led by an adult, mastery can be rated at this level.

What is Mastery?
A developmental level is mastered if the child demonstrates the knowledge, skills, and behaviors defined at that level:

- Consistently over time
- In different situations or settings

Important notes about mastery:
- Children may demonstrate mastery of knowledge and skills through a variety of communication modes, languages, and behaviors.
- Many of the behaviors that you observe in determining a child’s mastery level may not appear on the list of examples, although they are consistent with the descriptor.
If a descriptor includes “and”: All parts of the descriptor are required for mastery and need to be observed together.

- For example, the descriptor for Building Earlier in ATL-REG 2: Self-Comforting is: Anticipates need for comfort and prepares self by asking questions, getting a special thing, or in other ways.

The child needs to demonstrate both anticipating a need for comfort and preparing self during the same observation.

If a descriptor includes a semi-colon (;) followed by “and”: The child must demonstrate all the behaviors listed to rate the level as mastered, but not necessarily during the same observation within a DRDP rating period.

- For example, the descriptor for Exploring Later in SED 3: Relationships and Social Interactions with Familiar Adults is: Initiates activities with familiar adults; and Seeks out assistance or support from familiar adults.

To be rated as mastered at this level, the child must BOTH initiate activities with familiar adults AND seek out assistance or support from familiar adults. The assessor does not have to observe both behaviors during the same observation within a DRDP rating period.

Please note that key terms and phrases in the descriptors that may be new or have specific meaning to the measures are defined in the Glossary at the end of the instrument.

Examples:
Keep in mind these important points about examples:

- The examples are not a checklist of what the child must demonstrate to be rated at mastery of the knowledge, skills, or behaviors that reflect a developmental level.
- An example is one of many possible ways a child might demonstrate mastery of a developmental level. Teachers and service providers will identify other examples as they conduct their observations.
- Mastery is determined over time and across situations or settings.
- A child may not demonstrate any of the specific examples provided for a developmental level, but may demonstrate mastery in other ways that are consistent with the intent of the descriptor.
- Children demonstrate mastery in diverse and sometimes unique ways.
- Examples have not been written to include all areas of disability. Universal design is intended to support the inclusion of children with disabilities on the DRDP (2015). However, it is important to review the adaptations as well as understand the construct being measured when assessing children with disabilities.

Additional Rating Options

Emerging to the Next Developmental Level:
If your observations indicate that the child has demonstrated mastery for a developmental level and is also beginning to demonstrate knowledge, skills, or behaviors described for the next level (although not yet consistently across situations or settings), the child may be emerging to the next level.

To indicate emerging:

- First, mark the developmental level the child has mastered.
- Then, mark “emerging” if the child also demonstrates behaviors described for the next developmental level.

Notes about Emerging:

- You may mark emerging when rating full-continuum measures with infants and toddlers if the child has mastered the last level that can be rated and the child demonstrates some behaviors in the level that follows.
- Do not mark emerging if the child has mastered the latest level on a measure.
- Marking that the child is emerging to the next level does not affect the rating of mastery for the measure.

Child is Not Yet at the Earliest Developmental Level on a Later Development Measure:
If, after careful consideration, you determine that a preschool-age child is not yet demonstrating mastery of the earliest level of a later development measure, mark “Child is Not Yet at the Earliest Developmental Level on this measure.”

Unable to Rate due to extended absence:

- This is used only when the child is absent from the program for such an extended period of time during the four to six weeks prior to submitting your DRDP data that you could not gather information to rate the measures.
- The following are NOT valid reasons to indicate Unable to Rate:
  - Not having enough time or enough information
  - The nature of a child’s disability or the severity of a child’s disability

The Responding Earlier level is designed to be inclusive of all children. Mark this earliest level unless the child demonstrates skills at a later level. Do not use Unable to Rate because you feel a child does not demonstrate the skills for the earliest level.
Rating Conditional Measures
If you are using the conditional measures, you will mark them on the DRDP according to the following guidance:

<table>
<thead>
<tr>
<th>Measure</th>
<th>How to Mark the DRDP</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier Development Measures</td>
<td></td>
</tr>
<tr>
<td>ATL-REG 1: Attention Maintenance</td>
<td>- If the measure is rated, determine the child's latest level of mastery and mark</td>
</tr>
<tr>
<td>ATL-REG 2: Self-Comforting</td>
<td>- If the measure is not rated, mark the box, &quot;I did not rate this measure because it is not used for documenting progress or planning this child's learning activities and supports&quot;</td>
</tr>
<tr>
<td>ATL-REG 3: Imitation</td>
<td></td>
</tr>
<tr>
<td>COG 1: Spatial Relationships</td>
<td></td>
</tr>
<tr>
<td>ELD 1: Comprehension of English (Receptive English)</td>
<td></td>
</tr>
<tr>
<td>ELD 2: Self-Expression in English (Expressive English)</td>
<td></td>
</tr>
<tr>
<td>ELD 3: Understanding and Response to English Literacy Activities</td>
<td></td>
</tr>
<tr>
<td>ELD 4: Symbol, Letter, and Print Knowledge in English</td>
<td></td>
</tr>
<tr>
<td>PD-HLTH 7: Personal Care Routines: Feeding</td>
<td>- If these measures are rated:</td>
</tr>
<tr>
<td>PD-HLTH 8: Personal Care Routines: Dressing</td>
<td>- Check the box on the Information Page about the child's home language</td>
</tr>
</tbody>
</table>

English-Language Development Measures
- If these measures are rated:
  - Check the box on the Information Page about the child's home language
  - Determine the latest level of mastery for each measure and mark
  - If these measures are not rated, leave them blank

Physical Development and Health Measures*
- If these measures are rated, determine the level of mastery and mark
- If these measures are not rated, check the box, "I did not rate this measure because it is not used for documenting progress or planning this child's learning activities and supports"
- Complete all the other PD-HLTH measures for all children

*Reminder: These measures are required for all preschool-age children with IEPs.

⇒ Step 3: Finalize the Assessment
To finalize, simply review the assessment to make sure that you have entered a rating for all of the measures and that the Information Page is complete and up-to-date:
- For EESD programs: enter your ratings into DRDPtech,
- For SED programs: enter your ratings into your MIS system for your SELPA's CASEMIS submission. Check with your administrator for when and to whom your Rating Records are due.
## Child’s Information

1. Child’s name: ____________________________
   1a. Legal First Name: ____________________
   1b. Legal Last Name: ____________________
2. Agency Identifier or Statewide Student Identifier (10-digit SSID) ____________________________
3. Child’s classroom or setting: ____________________________
4. Birth date (mm/dd/yyyy): ____________________________
5. Gender: 
   - □ male
   - □ female
6. Initial date of enrollment in early childhood program (mm/dd/yyyy): ____________________________
7. Ethnicity:
   - □ Hispanic or Latino
   - □ Not Hispanic or Latino
7a. What is this child’s ethnicity? Check one.
7b. What is this child’s race? Mark one or more races to indicate what this child considers himself/herself to be.
   - □ Asian Indian
   - □ Black or African American
   - □ Cambodian
   - □ Chinese
   - □ Filipino
   - □ Guamanian
   - □ Hawaiian
   - □ Hmong
   - □ Japanese
   - □ Intentionally left blank
8. Does this child have an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP)?
   - □ Yes
   - □ No
   - □ Don’t know

## Assessor Information

9. Agency/site: ____________________________
10. Person(s) completing the assessment:
    - Name/role: ____________________________
    - Name/role: ____________________________
11. Did another adult assist you with assessing this child?
    - □ Yes (role/relation): ____________________________
    - □ No

## Child’s Language Information

12. Child’s home language(s)?
    - ____________________________
13. Is a language other than English spoken in the child’s home?
    - □ Yes
    - □ No
14. Did someone who understands and uses the child’s home language assist you with completing the observation?
    - □ Yes (role/relation): ____________________________
    - □ No
    - □ Not applicable - I understand and use the child’s home language.
15. Child is enrolled in: (Check all that apply)
    - □ State Preschool
    - □ State Infant/Toddler Program
    - □ Head Start
    - □ First 5
    - □ Early Head Start
    - □ Title 1
    - □ State After-School Program
    - □ Family Child Care Home
    - □ Special Education Services
    - □ Migrant
    - □ Tribal Head Start
    - □ Other
### Child Information

5. **Student ID** (Issued by district for reporting to CASEMIS) ____________________________

6. **Statewide Student Identifier** (10-digit SSID) ____________________________

7. **Gender**
   - Male
   - Female

8. **Birth date** (e.g., 03/05/2012) _______ / _______ / _______

9. **Special education enrollment. Check one.**
   - Individualized Family Service Plan (IFSP)
   - Individualized Education Program (IEP)

### Child’s Language Information

10. **Child's home language(s):**
   - English
   - Spanish
   - Vietnamese
   - Cantonese
   - Hmong
   - Tagalog/Pilipino
   - Other (specify) ____________________

11. **Language(s) used with this child:**
   - English
   - Spanish
   - Vietnamese
   - Cantonese
   - Hmong
   - Tagalog/Pilipino
   - Other (specify) ____________________

12. **Is a language other than English spoken in the child’s home?**
   - Yes
   - No

   *If yes, the ELD measures must be completed for a preschool-age child*

### Child’s Ethnicity

13a. **Is this child Hispanic or Latino? Check one.**
   - Yes, Hispanic or Latino
   - No, not Hispanic or Latino
   - Intentionally left blank

13b. **What is the race of this child? Check up to three.**
   - Asian Indian
   - Black or African-American
   - Cambodian
   - Chinese
   - Filipino
   - Guamanian
   - Hawaiian
   - Hmong
   - Japanese
   - Korean
   - Laotian
   - Native American
   - Other Asian
   - Other Pacific Islander
   - Samoan
   - Tahitian
   - Vietnamese
   - White
   - Intentionally left blank

### Special Education Information

14. **Special education eligibility. Check one.**
   - Autism
   - Deaf-Blindness
   - Deafness
   - Emotional Disturbance
   - Established Medical Disability
   - Hard of Hearing
   - Intellectual Disability
   - Multiple Disability
   - Orthopedic Impairment
   - Other Health Impairment
   - Speech or Language Impairment
   - Traumatic Brain Injury
   - Visual Impairment

15. **Adaptations used in the assessment. Check all that apply.**
   - Augmentative or alternative communication system
   - Alternative mode for written language
   - Visual support
   - Assistive equipment or device
   - Functional positioning
   - Sensory support
   - Alternative response mode
   - None

### Program Information

16. **SELPA** ____________________________

17. **District of service** ____________________________

### Assessment Information

18. **Name of person completing the assessment** ____________________________

19. **Role of person completing the assessment:**
   - Early Intervention Specialist
   - Occupational/Physical Therapist
   - Program Specialist or Administrator
   - Special Education Teacher
   - Speech/Language Pathologist
   - Teacher of the Deaf/Hard of Hearing
   - Teacher of the Visually Impaired
   - Other

20. **Assistance completing the assessment?**
   - Yes
   - No

   *If yes, what is that person’s relationship to the child?*
Quick Guide to Rating the Measures

1. Review your documentation/evidence.
   Review your own observation notes, observations from others (including teachers, family members/caregivers, and other service providers or caregivers, obtained through interview or conversations), and other documentation, including samples of children's work, photographs, and video/audio recordings of children's communication and behavior.

2. Carefully read the definition and the descriptors, looking for mastery.
   Read the descriptors before you read the examples. As you read the descriptors, try to narrow down which one is most consistent with your observations and other documentation of the child's typical behavior. A developmental level is mastered if the child demonstrates the knowledge, behaviors, and skills defined at that level:
   - Consistently over time
   - In different situations or settings

3. After you read the descriptors, consider the examples.
   The examples represent only some of the possible ways a child might demonstrate mastery. They are not a checklist of what the child must demonstrate. It is possible that a child does not demonstrate any of the specific examples provided, but does demonstrate mastery in other ways that are consistent with the intent of the descriptor.

4. Based on your careful reading of the descriptors and examples and a review of your documentation, determine the child's level of mastery.
   Once you've determined the latest developmental level the child has mastered, mark it appropriately.

5. Indicate if the child is emerging to the next level (when the option to mark emerging is available).
   If your observations indicate that the child has demonstrated mastery for a developmental level and is also beginning to demonstrate knowledge, skills, or behaviors described for the next level (although not yet consistently across situations or settings), the child may be emerging to the next level.

Important Note: When reading the descriptors, be sure you understand and pay attention to semicolons and the words “or” and “and.” Most descriptors define a single skill or behavior, but some include more than one. If the descriptor includes:

   - The word “or,” the child only needs to demonstrate the behavior in one of the ways listed for the developmental level to be considered mastered.
   - The word “and,” all parts of the descriptor are required for mastery and need to be observed together.
   - A semi-colon (;) followed by the word “and,” the child must demonstrate all the behaviors listed to master the level, but not necessarily during the same observation.

Remember, the examples illustrate only some of the many ways a child may demonstrate mastery.
### DRDP (2015) Rating Record

A Developmental Continuum from Early Infancy to Kindergarten Entry
For use with infants and toddlers

**Note:** The Rating Record is meant to be used together with the DRDP (2015) Instrument for keeping track of each child's developmental levels as you complete the assessment.

**Instructions:** Write the child's name, student identification number, and the date this Rating Record was completed. Mark the developmental level the child has mastered for each Measure. Check EM (emerging) if the child is "emerging" to the next level (optional). In the rare circumstance that you are unable to rate a Measure, mark UR.

Note: COG 4 - COG 7 and COG 10 are only for use for preschool age children.
### ATL-REG 1: Attention Maintenance

Child develops the capacity to pay attention to people, things, or the environment when interacting with others or exploring play materials.

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>Earlier</td>
</tr>
<tr>
<td>Attends or responds briefly to people, things, or sounds</td>
<td>Shifts attention frequently from one person or thing to another</td>
<td>Maintains attention, on own or with adult support, during brief activities</td>
<td>Maintains attention, with adult support, during activities that last for extended periods of time</td>
</tr>
</tbody>
</table>

#### Possible Examples

- **Responding**
  - Pays attention to a moving mobile.
  - Quiets to the voice of a familiar person.
  - Gazes at the smiling face of a familiar person.

- **Exploring**
  - Briefly watches other children playing and then resumes play with a toy.
  - Makes a pile of pretend moving mobile.
  - Listens to audio books of a familiar person.

- **Building**
  - Turns attention toward an interesting toy, then back to an adult or a child.
  - Actively shifts interest from one child to another playing close by.
  - Dumps toy animals from container, puts animals back in the container, and then dumps them out again.

- **Integrating**
  - Briefly watches other children playing and then resumes play with a toy.
  - Makes a pile of pretend pancakes with play dough on own and then offers them to peers.
  - Builds multiple towers with interlocking blocks.

---

© 2013-2015 California Department of Education — All rights reserved
### ATL-REG 2: Self-Comforting

Child develops the capacity to comfort or soothe self in response to distress from internal or external stimulation.

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Engages in behaviors that have previously worked to soothe self</td>
<td>Anticipates need for comfort and prepares self by asking questions, getting a special thing, or in other ways</td>
<td>Middle</td>
</tr>
<tr>
<td>Later</td>
<td>Comforts self in different ways, based on the situation</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Comforts self by seeking a familiar adult or a special thing</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Responds to internal or external stimulation in basic ways</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### Possible Examples

- Cries when hears a loud noise.
- Closes eyes when taken into bright sunlight.
- Brings fist to mouth and fusses when hungry.

- Sucks thumb or fist to soothe self.
- Turns away from sensory experiences such as loud noises, bright lights, or specific textures.
- Nuzzles face into a blanket or a familiar adult’s shoulder when unfamiliar adults approach.
- Retrieves a familiar object, such as a blanket, to soothe self when upset.
- Gestures “up” to a familiar adult to be picked up when sleepy.
- Seeks contact with a familiar adult when a toy is taken by another child.

- Softly hums or vocalizes to self when lying down for naptime.
- Goes to cubby and gets a photo of family when upset after a parent leaves.
- Seeks out a cozy place to get away from active play of other children.
- Remains seated in a small group activity while manipulating a favorite toy.
- Asks what’s going to happen next, to get ready to transition to a new activity.
- Requests favorite book to read with parent before the parent leaves.
- Moves away and covers ears when an adult brings out a vacuum to clean spilled sand on the floor.

○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
### Developmental Domain: ATL-REG — Approaches to Learning–Self-Regulation

**ATL-REG 3: Imitation**

Child mirrors, repeats, and practices the actions or words of others in increasingly complex ways

---

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Earlier</strong></td>
<td><strong>Later</strong></td>

</tbody>
</table>

**Responds to facial expressions or vocalizations in basic ways**

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

**Possible Examples**

- Responds to facial expressions or vocalizations in basic ways
  - Makes a sound like “Mmmmm” after an adult makes the “Mmmmm” sound during feeding.
  - Smiles when an adult smiles.
  - Widens eyes and raises eyebrows after observing these movements on an adult’s face during an interaction.

<table>
<thead>
<tr>
<th>Possible Examples</th>
<th>Possible Examples</th>
<th>Possible Examples</th>
<th>Possible Examples</th>

**Possible Examples**

- **Responding**
  - Responds to people, things, or sounds
    - Orients toward a noise.
    - Turns head toward a person who comes into view or begins talking.
    - Looks at a mobile.

- **Exploring**
  - Notices new or unexpected characteristics or actions of people or things
    - Vocalizes or gazes at a familiar adult who makes an animated facial expression or unusual noise.
    - Smiles when an adult begins singing a song.
    - Touches hair of another child.
    - Moves arms or legs when a mobile begins moving overhead.
  - Explores people or things in the immediate environment
    - Bangs a drum with hands repeatedly.
    - Watches intently as an adult prepares snack.
    - Moves around a fish bowl.
    - Examines images from informational books or a computer to learn about the habitats of different animals.
  - Explores new ways to use familiar things, including simple trial and error
    - Paints on paper and on arm when given a paintbrush and paint.
    - Molds sand using a cup.
    - Tries using utensils to work with play dough.
    - Uses a magnifying glass to observe a caterpillar closely, and describes its pattern of colors and number of legs.
    - Compares color or shape of leaves gathered on a nature walk.
  - Explores through simple observations, or manipulations, or by asking simple questions
    - Moves around a fish bowl to continue watching a fish as it swims around objects.
    - Drops a marble in a maze and follows its path as it rolls to the bottom.
    - Asks, “What’s that doing?” when seeing or hearing a bulldozer across the street while on a neighborhood walk.
    - Places a variety of objects in water to see which will float and which will sink.
    - Uses a communication device to learn about the growth of lima bean plants with different amounts of water, and documents their growth.
  - Explores by engaging in specific observations, manipulations, or by asking specific questions
    - Puts a dry sponge in water and then squeezes it to see what happens.
    - Observes a snail and asks, “Why do snails have shells?”
    - Compares color or shape of leaves gathered on a nature walk.
    - Examines images from informational books or a computer to learn about the habitats of different animals.
  - Carries out investigations, using a variety of strategies, tools, or sources of information
    - Uses a communications device to learn about the growth of lima bean plants with different amounts of water, and documents their growth.
### ATL-REG 5: Self-Control of Feelings and Behavior

Child increasingly develops strategies for regulating feelings and behavior, becoming less reliant on adult guidance over time.

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>Later</td>
</tr>
<tr>
<td>Calms when comforted by an adult</td>
<td>Seeks a familiar adult when distressed, and responds when physically comforted by a familiar adult</td>
<td>Calms self when a familiar adult initiates contact, moves close, or offers a special thing</td>
<td>Demonstrates capacity to regulate emotional or behavioral reactions in some moderately stressful situations, occasionally needing adult support</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Relies on communication or guidance from a familiar adult to regulate emotional or behavioral reactions in moderately stressful situations</td>
<td>Expresses strong feelings through constructive forms of communication, seeking the assistance of familiar adults when needed</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Uses simple strategies (e.g., leaving a difficult situation, offering an alternative toy to a friend) to regulate own feelings or behaviors</td>
</tr>
</tbody>
</table>

#### Possible Examples

- \( \lor \) Lessens or stops crying when picked up by an adult.
- \( \lor \) Calms when comforted by an adult.
- \( \lor \) Seeks a familiar adult when distressed, and responds when physically comforted by a familiar adult.
- \( \lor \) Expresses strong feelings through appropriate strategies (e.g., negotiation, compromise, verbal reminders to self) to regulate own feelings or behaviors.
- \( \lor \) Communicates, “I want a turn. Can I use the scooter after you go around two times?” after watching another child ride for a while.
- \( \lor \) Communicates, “Don’t push!” to another child trying to fit at the water table, and then says, “Here’s a place,” and moves over.
- \( \lor \) Communicates to self, in words or signs, that the monsters are just pretend, when attending to a scary story.
- \( \lor \) Uses a communication device to suggest a strategy to share the limited number of popular art materials during a collage project.

- \( \lor \) Child is emerging to the next developmental level
- \( \lor \) Unable to rate this measure due to extended absence
## Developmental Domain: SED — Social and Emotional Development

**SED 1: Identity of Self in Relation to Others**

Child shows increasing awareness of self as distinct from and also related to others

### Possible Examples

- **Responding**
  - Attends to a familiar adult during feeding.
  - Quiets when hears a familiar adult.
  - Grasps an adult’s finger when palm of child’s hand is touched.

- **Exploring**
  - Examines own hand or foot by looking at it or mouthing it.
  - Touches others’ hair when it is within reach.
  - Plays with sound by repeating grunts and squeals.

- **Building**
  - Communicates, “Me llamo Luis,” [“My name is Luis,” in Spanish].
  - Communicates names of immediate family members in a photo.
  - Looks to new baby sister and communicates her name.

- **Integrating**
  - Acts out roles from own family in pretend play.
  - Communicates, “I’m making cookies—just like Grandma!” while rolling play dough.
  - Narrates details while drawing a picture of a friend.

- **Possible Examples**

### Possible Examples

- **Responds to faces, voices, or actions of other people**
  - Looks at faces.
  - Smiles when an adult continures after pausing during a game of patty cake.
  - Shows awareness of what to expect from familiar people by responding to or anticipating their actions.
  - Adjusts behavior in response to emotional expressions of familiar people, especially in novel or uncertain situations.
  - Identifies own or others’ feelings.
  - Communicates, with adult assistance, about feelings that caused own behavior or others’ behavior.
  - Communicates ideas about why one has a feeling or what will happen as a result of a feeling.
  - Communicates ideas about how own or another’s personality affects how one thinks, feels, and acts.

- **Examples**
  - Responds to faces, voices, or actions of other people
  - Looks at faces.
  - Smiles when an adult continues after pausing during a game of patty cake.
  - Shows awareness of what to expect from familiar people by responding to or anticipating their actions.
  - Adjusts behavior in response to emotional expressions of familiar people, especially in novel or uncertain situations.
  - Identifies own or others’ feelings.
  - Communicates, with adult assistance, about feelings that caused own behavior or others’ behavior.
  - Communicates ideas about why one has a feeling or what will happen as a result of a feeling.
  - Communicates ideas about how own or another’s personality affects how one thinks, feels, and acts.

- **Earlier**
  - Looks at faces.
  - Smiles when an adult continues after pausing during a game of patty cake.
  - Shows awareness of what to expect from familiar people by responding to or anticipating their actions.
  - Adjusts behavior in response to emotional expressions of familiar people, especially in novel or uncertain situations.
  - Identifies own or others’ feelings.
  - Communicates, with adult assistance, about feelings that caused own behavior or others’ behavior.
  - Communicates ideas about why one has a feeling or what will happen as a result of a feeling.
  - Communicates ideas about how own or another’s personality affects how one thinks, feels, and acts.

- **Later**
  - Looks at faces.
  - Smiles when an adult continues after pausing during a game of patty cake.
  - Shows awareness of what to expect from familiar people by responding to or anticipating their actions.
  - Adjusts behavior in response to emotional expressions of familiar people, especially in novel or uncertain situations.

**Possible Examples**

- **Responding**
  - Widens eyes or brightens face at the face of a familiar adult.
  - Orient toward a familiar adult’s voice.
  - Quiets when picked up by a familiar adult.

- **Exploring**
  - Reaches for a familiar adult when being held by another adult.
  - Vocalizes at a familiar adult to gain the adult’s attention.
  - Laughs in anticipation before a familiar adult nuzzles child’s neck.
  - Grasps a familiar adult’s hand to gain attention, and then gestures to begin a finger-play game.

- **Building**
  - Communicates interest in looking at a book with a familiar adult.
  - Brings a blanket to a familiar adult and then pauses. About bees.
  - Communicates to a familiar adult, “Want some tea?” during a pretend tea party.
  - Communicates to an adult, “What’s the bee doing?” while watching a bee fly from flower to flower or sharing a book together about bees.
  - Communicates with a familiar adult, “I made some hamburgers for you. You tell me what you want to drink.”

- **Integrating**
  - Offers to place napkins and cups on the table when a familiar adult is preparing a snack.
  - Brings a board game to a familiar adult and communicates an interest in playing together.
  - Plans a gardening activity with a familiar adult, communicating by signing the materials needed.
  - Gathers possible construction materials, such as glue, paper, and scissors, from a supply shelf to contribute to a building project with a familiar adult.
  - Works with a familiar adult and a group of children to make a piñata over two days, offering alternatives for its shape and construction and what will go inside.

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
### SED 4: Relationships and Social Interactions with Peers

Child becomes increasingly competent and cooperative in interactions with peers and develops friendships with several peers.

</tbody>
</table>
| Possible Examples
- Cries when hearing the sound of another child crying.
- Orient toward other children.
- Notices another child nearby.
- Moves excitedly when another child comes near.
- Reaches toward another child to gain attention.
- Smiles at another child.
- Selects a truck when other children nearby are playing with trucks.
- Explores a toy alongside another child who is also exploring.
- Reaches for a toy in the water alongside other children at the water table.
- Hands a bucket to a familiar peer sitting next to child in the sandbox.
- Offers a block to a peer building a tower next to child.
- Splashes excitedly with a peer at the water table, continuing back and forth.
- Takes a few turns trying on hats with a peer in the dramatic play area.
- Plays chase briefly outside with two peers, and then goes to play alone in sandbox.
- Plays cars with a peer for a short while.
- Builds a train track with two friends, taking turns connecting the track pieces.
- Laughs and makes funny noises or faces with a friend while singing a song together.
- Plays a game of telephone that involves having a conversation with a friend about going on a shopping trip together.
- Invites friends to build a pretend barn for toy animals and, at clean-up time, asks to save it so they can play with it tomorrow.
- Invites friends to continue playing family from the day before.
- Offers a new object for a fort that child has built with peers over several days.
- Plays restaurant with friends, showing them the signs for food to be ordered.
- Plans how to build a boat with several peers, choosing materials and negotiating tasks.
- Plays superheroes with peers, planning different characters and scenarios.
- Joins peers in planning and gathering materials needed for a nature walk, such as nets, baskets, and bags.

#### Possible Examples

- **Responding**
  - Cries in response to a loud voice.
  - Looks toward a lamp when it is turned on.
  - Moves arm in response to a touch.

- **Exploring**
  - Reaches toward an adult’s glasses.
  - Grabs a toy, shakes it, and then shakes it again.
  - Picks up a toy and mouths it.
  - Gazes intently at an adult’s changing facial expressions.

- **Building**
  - Rocks a doll in arms.
  - Uses a brush on a doll’s hair.
  - Pushes a toy car along the floor.
  - Places objects from around the room in a toy shopping cart.

- **Integrating**
  - Pretends to be a doctor and takes care of a stuffed bear that is “sick.”
  - Holds a rectangular block to ear and talks into it as if it is a phone.
  - Pretends that puzzle pieces are cookies.

- **Possible Examples**
  - Uses a stacking ring as a bagel.
  - Makes a pretend cake in the sandbox and offers a “taste” to an adult.
  - Makes a “pizza” out of play dough and puts it in the play oven.

- **Possible Examples**
  - Sits in a box, pretending it is a boat.
  - Sits in a box with a peer, holding a “steering wheel,” and communicates, “My turn to drive the bus.”
  - Pretends to put out fires as other children wait in line with their tricycles.

- **Possible Examples**
  - Assigns roles and acts out classroom routines (e.g., circle time, snack time) with other children.
  - Agreement with peers on who will be the bus driver, who will be the child, and who will be the mom, while acting out school-bus play.
  - Plans with peers to pretend to be a family going on a trip: using chairs as seats for a car, negotiating roles, and deciding where they will go.

- **Possible Examples**
  - Uses a hose to “pump gas” as other children wait in line with their tricycles.

- **Possible Examples**
  - Agree with peers on who will be the bus driver, who will be the child, and who will be the mom, while acting out school-bus play.
  - Plans with peers to pretend to be a family going on a trip: using chairs as seats for a car, negotiating roles, and deciding where they will go.
  - Assigns roles and acts out classroom routines (e.g., circle time, snack time) with other children.

- **Possible Examples**
  - Uses a hose to “pump gas” as other children wait in line with their tricycles.

- **Possible Examples**
  - Agree with peers on who will be the bus driver, who will be the child, and who will be the mom, while acting out school-bus play.
  - Plans with peers to pretend to be a family going on a trip: using chairs as seats for a car, negotiating roles, and deciding where they will go.
  - Assigns roles and acts out classroom routines (e.g., circle time, snack time) with other children.

- **Possible Examples**
  - Uses a hose to “pump gas” as other children wait in line with their tricycles.

| Child is emerging to the next developmental level |
| Unable to rate this measure due to extended absence |
**Developmental Domain: LLD — Language and Literacy Development**

**LLD 1: Understanding of Language (Receptive)**
Child understands increasingly complex communication and language

- Possible Examples
  - Turns head toward, or looks in the direction of the voice of an adult.
  - Makes eye contact with a familiar adult.
  - Quiets or orients in the direction of a sound, touch, or gesture.
  - Smiles or gurgles in response to a familiar adult’s voice or simple gestures.
  - Makes a sound similar to “Mmmmm” during a social interaction with a familiar adult.
  - Averts eyes to disengage from a social interaction with an adult.
  - Bounces or waves arms to indicate interest in continuing an activity after an adult pauses and asks, “More?”
  - Recognizes a few frequently used words or gestures in familiar situations.
  - Orient toward a familiar person or thing when it is named.
  - Indicates a bell in a storybook when adult asks about a bell.
  - Looks to the wagon after an adult refers to the wagon.
  - Points to pictures of a bird, a tree, and a house, as an adult says the name of each, while looking at a book together.
  - Gets jacket after an adult communicates, “Get your jacket. It’s time to go outside.”
  - Moves to the sink after an adult communicates, “Time to wash hands.”
  - Passes the milk at lunch time after an adult communicates, “Please pass the milk.”
  - Offers to help after an adult communicates, “Would you like to help me feed the turtle?”
  - Collects different types of art supplies after an adult explains an art project and where to find the supplies.
  - Hands crayons from the shelf after an adult asks, “Can you hand me the crayons that are on the shelf?”
  - Adds blocks to a tower after a peer says, “Let’s make our skyscraper the tallest!”
  - Holds the door open, after an adult asks the child to do so, until all of the other children have come into the room.
  - Points to the picture of an eagle and its nest while sharing a book about animals building their homes.
  - Communicates, “I’m a princess and I live in a castle,” while playing dress-up.
  - Pretends to be a character in a story after a read-aloud of the story.
  - Draws a picture of a cocoon after sharing a book about the life cycle of a butterfly.
  - Explains how to plant seeds to a peer after an adult reads a book about planting seeds.
  - Draws a picture about the changing seasons, after an adult talks about why the weather has changed.
  - Selects materials that float, while making a boat, after hearing an adult talk about materials that float or sink.

**Possible Examples**

- Turns head or looks in direction of voices.
- Sustains gaze at an adult’s smiling face.
- Quiets or orients in the direction of a sound or gesture.
- Cries when child hears another child cry.
- Smiles in response to a familiar adult’s voice or gestures.
- Vocalizes in response to a familiar adult’s voice.
- Moves toward a familiar adult’s extended arms.
- Turns head and looks away after a familiar adult offers a bottle or food again.
- Reaches for a familiar object after it is named.
- Looks up at sky after an adult communicates, “There’s an airplane.”
- Communicates, “Okay,” after an adult says, “Your turn is next.”
- Picks up sand toys after an adult says, “Please pick up the sand toys.”
- Communicates, “Yo,” [“Me,” in Spanish], after an adult asks, “Who is the helper for snack?”
- Calms when adult communicates, “Let’s get ready for the new music teacher.”
- Communicates, “Okay,” after an adult requests, “Bring me your shoes. I’ll help you put them on.”
- Uses a communication board to make a choice when an adult says, “Tell me what you would like to do next.”
- Communicates, “More,” after an adult asks, “Want to water?”
- Communicates, “More milk?” after an adult says, “Your turn is next.”
- Picks up sand toys after an adult says, “Please pick up the sand toys.”
- Calms when adult communicates, “Let’s get ready for the new music teacher.”
- Communicates, “Okay,” after an adult asks, “Your turn is next.”
- Pick up sand toys after an adult says, “Please pick up the sand toys.”
- Communicates, “Okay,” after an adult asks, “Your turn is next.”
- Picks up sand toys after an adult says, “Please pick up the sand toys.”
- Communicates, “Okay,” after an adult asks, “Your turn is next.”
- Puts compostable cup into compost bin recently added to the room after adult communicates, “Please put your cup in the compost bin.”
- Follows steps communicated by an adult at the end of an art activity to remove smock, hang it up, and then wash hands.
- Follows adult’s request to “put your book in the cubby, and wash your hands.”
- Chooses a book and then carries it to the library counter after an adult says, “Find a book and take it to the library counter.”
- Gathers different materials from outside, brings them inside, and places them on a table, as suggested by an adult, to create a nature display.
- Cares for a new pet for the first time by providing clean water, food, and fresh shavings for a guinea pig, after being told the steps by a peer.

**Table Notes:**

- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence

**Attends or responds to people or things in basic ways**
- Plays with books; and
- Responds to other literacy activities

**Possible Examples**
- Quiets to the sound of a familiar voice.
- Moves in response to an approach by a familiar adult.
- Orient to an adult's face or voice during a caregiving routine.

- Interacts with a cloth or board book by holding or mouthing it.
- Pats a textured board book.
- Vocalizes or laughs in response to an adult singing and gesturing a simple finger-play song, such as, “Pat-a-Cake” or “Los cinco deditos,” [*“Five Little Fingers,” a finger play in Spanish*].
- Looks at pictures in a book for a short time while a familiar adult reads the book.
- Joins a group doing a simple finger play led by an adult.
- Points at a picture when joining an adult who is reading a book, newspaper, or tablet.
- Picks up a book and looks at pictures, turns a few pages, and then drops the book to go play.
- Pretends to read a book from start to finish.
- Explores a book with Braille and tactile content with hands.
- Sings some words of a familiar song, from beginning to end, with an adult.
- Looks at books on own briefly, or
- Takes a book to go play.
- Asks questions or communicates about why something happened in a story.
- Starts a song or rhyme with others while playing outside.
- Uses finger puppets while reciting a familiar rhyme.
- Uses flannel-board pieces to retell parts of a story after story time.
- Retells a familiar story to a peer while pretending to read from a book.
- Uses a communication device to tell the sequence of events in a favorite story.
- Pretends to be a character from a story, using props.
- CHild is emerging to the next developmental level

○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence

**DRDP (2015): A Developmental Continuum from Early Infancy to Kindergarten Entry – Infant/Toddler View – August 1, 2015 © 2013-2015 California Department of Education – All rights reserved**
# COG 1: Spatial Relationships

Child increasingly shows understanding of how objects move in space or fit in different spaces.

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Earlier</strong></td>
<td><strong>Later</strong></td>
<td><strong>Earlier</strong></td>
<td><strong>Later</strong></td>
</tr>
<tr>
<td>Moves body parts in basic ways</td>
<td>Attends or responds as objects, people, or own body move through space</td>
<td>Explores how self or objects fit in or fill up different spaces</td>
<td>Explores spatial relationships (e.g., distance, position, direction), or movement of self or objects through space, trying a variety of possibilities</td>
</tr>
</tbody>
</table>

### Possible Examples

- Moves hand to mouth.
- Lifts head from an adult’s shoulder.
- Stretches while lying on back.
- Turns toward an adult who enters the room.
- Watches and tracks a moving object.
- Lifts arms toward an adult as the adult reaches down to pick child up.
- Tries to squeeze body between a chair and the legs of a table to get a toy.
- Fills a purse or bucket, sometimes until it is overflowing.
- Rotates a puzzle piece that has a large knob, while trying to fit it into a space on a wooden puzzle.
- Attempts to put a star-shaped piece into the square-, triangle-, and star-shaped openings of a shape sorter.
- Repeatedly rolls various objects down a ramp.
- Changes directions to move around several obstacles while pushing a toy shopping cart.
- Uses hands to explore shape outlines in a puzzle board, and then explores puzzle pieces with hands to fit pieces into the puzzle board.
- Chooses puzzle pieces that are approximately the right size and shape to fit into a puzzle.
- Stacks a few nesting cups on top of each other to create a tower, with the largest cup on the bottom and smaller ones on top.
- Maneuvers a ride-on toy (without pedals) around people and objects on the playground, sometimes bumping into things.
- Moves around people and objects in the classroom, using a mobility aid, such as a walker.

☐ Child is emerging to the next developmental level

☐ Unable to rate this measure due to extended absence
**COG 2: Classification**
Child shows an increasing ability to compare, match, and sort objects into groups according to their attributes.

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Earlier</td>

<td>Later</td>
</tr>
<tr>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
</tr>
</tbody>
</table>

### Attends to people, objects, or events
- Looks at people’s faces.
- Smiles at a familiar adult’s face or voice.
- Reaches for own special blanket or toy from home.
- Closes hand around an adult’s finger.
- Quiets in response to an adult’s voice.
- Turns face away from an approaching unfamiliar adult.
- Sorts buttons by color, and then sorts all of them again by shape or size.
- Separates buttons by color, and then sorts all of them again by shape or size.
- Separates tiles into four groups: blue circles, blue squares, red circles, and red squares.
- Removes utensils from the play kitchen and sorts them into groups: big spoons, small spoons, big forks, and small forks.
- Sorts the bin of interlocking blocks into several piles, first by color, then by shape (e.g., squares and rectangles).

### Interacts differently with familiar people and objects than with unfamiliar people and objects
- Selects some objects that are similar from a collection of objects.
- Sorts objects accurately into two or more groups based on one attribute.
- Sorts objects into two or more groups based on at least two attributes, sometimes sorting by one attribute and then subdividing those groups based on a second attribute.
- Sorts objects into two or more groups based on at least two attributes, sometimes sorting by one attribute and then subdividing those groups based on a second attribute.

### Associates a person or object with another person or object, based on a similarity or relationship between them
- Sorts objects into two groups based on one attribute, but not always accurately.
- Sorts objects accurately into two or more groups based on one attribute.
- Sorts objects into two or more groups based on at least two attributes, sometimes sorting by one attribute and then subdividing those groups based on a second attribute.
- Sorts objects into two or more groups based on at least two attributes, sometimes sorting by one attribute and then subdividing those groups based on a second attribute.

### Selects objects that are similar from a collection of objects
- Sorts buttons by color, and then sorts all of them again by shape or size.
- Separates buttons by color, and then sorts all of them again by shape or size.
- Separates tiles into four groups: blue circles, blue squares, red circles, and red squares.
- Removes utensils from the play kitchen and sorts them into groups: big spoons, small spoons, big forks, and small forks.
- Sorts the bin of interlocking blocks into several piles, first by color, then by shape (e.g., squares and rectangles).

### Possible Examples
- Smiles at a familiar adult’s face or voice.
- Reaches for own special blanket or toy from home.
- Closes hand around an adult’s finger.
- Sorts buttons by color, and then sorts all of them again by shape or size.
- Separates buttons by color, and then sorts all of them again by shape or size.
- Separates tiles into four groups: blue circles, blue squares, red circles, and red squares.
- Removes utensils from the play kitchen and sorts them into groups: big spoons, small spoons, big forks, and small forks.
- Sorts the bin of interlocking blocks into several piles, first by color, then by shape (e.g., squares and rectangles).

<td>Later</td>
</tr>
<tr>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
</tr>
</tbody>
</table>

- **Responds to people or objects in basic ways**
  - Responds to changes in the number of objects observed or interacted with
  - Demonstrates awareness of quantity
  - Uses number names, but not always correctly, in situations related to number or quantity
  - Identifies small quantities without counting, up to three
  - Counts up to five objects using one-to-one correspondence; and Recites numbers in order, one through ten
  - Shows understanding that the last number counted is the total number of objects in the group
  - Solves simple everyday problems involving numbers by counting up to 10 objects using one-to-one correspondence; and Recites numbers correctly, up to 20

- **Possible Examples**
  - Looks at objects that are hanging from a mobile.
  - Calms in response to a familiar adult’s touch.
  - Turns toward a familiar adult’s voice.
  - Attends to one moving toy on a mobile, then to another.
  - Grasps one toy, and then lets go of it while reaching for another toy that has been introduced by a familiar adult.
  - Holds an object in each hand, and then touches the two objects together.
  - Communicates, “Dos,” [“Two,” in Spanish] and holds up two cups in the play kitchen.
  - Communicates, “One, two, five, one, two,” while pointing randomly to objects in a group.
  - Shows excitement when an adult offers another book.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates a desire for two apple slices after noticing that a peer has two apple slices.
  - Communicates, “Three dogs,” while looking at a picture of three dogs.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates, “Now I have one bear and you have one,” while giving a peer a stuffed bear.
  - Communicates, “Dos,” [“Two,” in Spanish] and holds up two cups in the play kitchen.
  - Communicates, “One, two, five, one, two,” while pointing randomly to objects in a group.
  - Shows excitement when an adult offers another book.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates a desire for two apple slices after noticing that a peer has two apple slices.
  - Communicates, “Three dogs,” while looking at a picture of three dogs.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates, “Now I have one bear and you have one,” while giving a peer a stuffed bear.
  - Communicates, “Dos,” [“Two,” in Spanish] and holds up two cups in the play kitchen.
  - Communicates, “One, two, five, one, two,” while pointing randomly to objects in a group.
  - Shows excitement when an adult offers another book.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates a desire for two apple slices after noticing that a peer has two apple slices.
  - Communicates, “Three dogs,” while looking at a picture of three dogs.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates, “Now I have one bear and you have one,” while giving a peer a stuffed bear.

- **Possible Examples (continued)**
  - Communicates, “Dos,” [“Two,” in Spanish] and holds up two cups in the play kitchen.
  - Communicates, “One, two, five, one, two,” while pointing randomly to objects in a group.
  - Shows excitement when an adult offers another book.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates a desire for two apple slices after noticing that a peer has two apple slices.
  - Communicates, “Three dogs,” while looking at a picture of three dogs.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates, “Now I have one bear and you have one,” while giving a peer a stuffed bear.

- **Possible Examples (continued)**
  - Communicates, “Dos,” [“Two,” in Spanish] and holds up two cups in the play kitchen.
  - Communicates, “One, two, five, one, two,” while pointing randomly to objects in a group.
  - Shows excitement when an adult offers another book.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates a desire for two apple slices after noticing that a peer has two apple slices.
  - Communicates, “Three dogs,” while looking at a picture of three dogs.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates, “Now I have one bear and you have one,” while giving a peer a stuffed bear.

- **Possible Examples (continued)**
  - Communicates, “Dos,” [“Two,” in Spanish] and holds up two cups in the play kitchen.
  - Communicates, “One, two, five, one, two,” while pointing randomly to objects in a group.
  - Shows excitement when an adult offers another book.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates a desire for two apple slices after noticing that a peer has two apple slices.
  - Communicates, “Three dogs,” while looking at a picture of three dogs.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates, “Now I have one bear and you have one,” while giving a peer a stuffed bear.

- **Possible Examples (continued)**
  - Communicates, “Dos,” [“Two,” in Spanish] and holds up two cups in the play kitchen.
  - Communicates, “One, two, five, one, two,” while pointing randomly to objects in a group.
  - Shows excitement when an adult offers another book.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates a desire for two apple slices after noticing that a peer has two apple slices.
  - Communicates, “Three dogs,” while looking at a picture of three dogs.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates, “Now I have one bear and you have one,” while giving a peer a stuffed bear.

- **Possible Examples (continued)**
  - Communicates, “Dos,” [“Two,” in Spanish] and holds up two cups in the play kitchen.
  - Communicates, “One, two, five, one, two,” while pointing randomly to objects in a group.
  - Shows excitement when an adult offers another book.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates a desire for two apple slices after noticing that a peer has two apple slices.
  - Communicates, “Three dogs,” while looking at a picture of three dogs.
  - Signs, “Two,” in response to the question of “How old are you?”
  - Communicates, “Now I have one bear and you have one,” while giving a peer a stuffed bear.
## COG 8: Cause and Effect

Child demonstrates an increasing ability to observe, anticipate, and reason about the relationship between cause and effect.

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Earlier</td>

</tr>
<tr>
<td>Earlier</td>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
</tr>
</tbody>
</table>

### Possible Examples

- **Responding**
  - Widens eyes or opens mouth when a bottle or breast is presented.
  - Quiets in response to an adult’s voice.
  - Orient to a music toy nearby.

- **Exploring**
  - Shakes a rattle, pauses, then shakes it again.
  - Makes a game of peek-a-boo.
  - Vocalizes, gains a familiar adult’s attention, and vocalizes again.

- **Building**
  - Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
  - Makes a game of pushing different objects off a table, watching or listening as they fall.
  - Presses different buttons on a toy and notices what happens.

- **Integrating**
  - Communicates, “If I kick the ball harder, it will go really far!” during outdoor play.
  - Enlarges the base of a block tower by replacing small blocks with large blocks after the tower keeps falling over.
  - Communicates to a peer about how to feed the fish: “We have to give it a little bit of food every day. If we give it too much, it will get sick.”

### Instructions

- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence

---

*DRDP (2015): A Developmental Continuum from Early Infancy to Kindergarten Entry – Infant/Toddler View – August 1, 2015 © 2013-2015 California Department of Education – All rights reserved*
### COG 9: Inquiry Through Observation and Investigation

**Child observes, explores, and investigates objects (living and nonliving things) and events in the environment and becomes increasingly sophisticated in pursuing knowledge about them.**

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>Later</td>
</tr>
<tr>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
</tr>
</tbody>
</table>

**Possible Examples**

- Responds to people, things, or sounds
  - Notices and gazes at own hand.
  - Orient toward a person who comes into view or begins talking.
  - Looks at a mobile.

- Attends to responses of objects and people that result from own actions
  - Makes a sound and then waits for adult’s response.
  - Mouths an object and then looks at it.
  - Bangs objects one at a time and then observes what happens each time.

- Shows interest in people or things in the environment
  - Bangs a drum with hands repeatedly.
  - Touches hair of another child.
  - Watches intently as an adult prepares snack.

- Engages in simple purposeful explorations of familiar objects in the environment
  - Drops rocks into water and watches what happens.
  - Follows a trail of ants to see where they are going.
  - Stacks blocks to see how high they can go before falling over.

- Engages in sustained explorations
  - Watches a new fish in the tank closely for several minutes, then calls a peer over to watch the fish, too.
  - Digs “road” in sand, pours in water, and then checks to see if water ran to the end.
  - Notices a drooping plant and comments, “How can we make it better?” and tries different ways to support it, such as holding it or leaning it against something.

- Observes objects and events of interest in the environment, makes simple predictions about them, and checks the predictions
  - Indicates that a “roly-poly” bug will roll up into a ball if touched, and then checks by touching it.
  - Communicates that when you add water to flour, that the flour will be sticky, during a small group activity led by an adult.

- Engages in detailed observations and complex investigations of objects and events in the environment (e.g., tests predictions, makes comparisons, uses scientific tools, or tracks changes over time)
  - Predicts that a rock is heavier than a shell, and then uses a balance scale to show that the rock is heavier.
  - Communicates that a tennis ball will go down the ramp faster than a plastic ball, but more slowly than a golf ball, and then rolls the balls several times to see which reaches the bottom first.

- Contributes to planning and carries out detailed observations and complex investigations to answer questions of interest
  - Asks an adult, “How do you know if a fruit is really a fruit?” After adult responds that fruit have seeds, plans with adult to open up several different types of fruits to see if they all have seeds.

- Participates in making a chart to compare change, over time, in the growth of bean plants, and communicates, “I think this bean plant grew taller because it got more sun next to the window.”

- Participates in setting up a chart to observe how long it will take for a caterpillar to create a cocoon and turn into a butterfly.

○ Child is emerging to the next developmental level

○ Unable to rate this measure due to extended absence
**COG 11: Knowledge of the Natural World**

Child develops the capacity to understand objects (living and nonliving things) and events in the natural world, including how they change and their characteristics.

</tbody>
</table>

### Possible Examples

- **Responding**
  - Looks at the movement of a mobile.
  - Quiets when an adult moves close.
  - Orient in the direction of a sound, touch, or gesture.
- **Exploring**
  - Shows pleasure during a playful interaction with an adult during feeding.
  - Mouths object.
  - Makes repeated attempts to grab at a family pet’s fur.
  - Touches the leaves of a plant.
  - Looks around when hearing a cat “meow.”
  - Rubs hands over a smooth rock during outdoor play.
  - Goes to cage where classroom pet is kept.
  - Taps a rock on another rock, then on the pavement.
  - Pours sand through a funnel.
  - Walks through a puddle, stomping feet hard to splash the water.
  - Watches a frog, then moves back when the frog jumps.
- **Building**
  - Communicates, “My puppy likes to eat a lot because he’s growing and getting bigger.”
  - Communicates that a worm is long and wiggly.
  - Identifies different animal sounds when visiting a zoo or farm.
  - Communicates, “The clouds are moving so fast. They cover the sun and then I can’t see it.”
  - Communicates that lemons are sour and oranges are sweet, when tasting lemons and oranges.
  - Communicates, “You find worms in the dirt and bees on the flowers.”
  - Communicates, “Fish can breathe underwater, but we have to hold our breath.”
  - Communicates that a friend fell down and hurt a knee and that the knee has to be covered until it is all better.

- **Integrating**
  - Feeds a rabbit and then explains, “它要長大需要吃青菜.所有動物都要吃東西.” (“It needs lettuce to grow. All animals need food.” in Chinese).
  - Comments, while sorting through a collection of rocks and shells, “Animals live in shells, but not in rocks.”
  - Communicates, “Fish can breathe underwater, but we have to hold our breath.”
  - Communicates that a friend fell down and hurt a knee and that the knee has to be covered until it is all better.

○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
## Developmental Domain: PD-HLTH — Physical Development–Health

### PD-HLTH 1: Perceptual-Motor Skills and Movement Concepts

Child moves body and interacts with the environment, demonstrating increasing awareness of own physical effort, body awareness, spatial awareness, and directional awareness.

<table>
<thead>
<tr>
<th>Mark the latest developmental level the child has mastered:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Responding</strong></td>
</tr>
<tr>
<td>Earlier</td>
</tr>
<tr>
<td>Responds to sensory information or input (e.g., visual, auditory, tactile) with basic movements of body parts</td>
</tr>
</tbody>
</table>

### Possible Examples

- **Responding to sensory information or input (e.g., visual, auditory, tactile):**
  - Moves toward a familiar adult while being picked up.
  - Bats or kicks at a hanging mobile.
  - Turns toward, then grasps, a rattle being shaken.
  - Gazes at, then reaches toward, glasses on someone's face.

- **Responds to sensory information by moving body or limbs to reach for or move toward people or objects:**
  - Shifts body to stabilize it, in order to reach up toward an adult's face while sitting on the adult's lap.
  - Repositions body in order to manipulate levers and buttons on a busy box.
  - Dabs fingers in water before placing whole hand in.
  - Pats play dough with whole hand, then leans forward to roll it.

- **Uses sensory information to control body while exploring people, objects, or changes in the physical environment:**
  - Participates in songs or games requiring movement of specific body parts.
  - Moves arm up and down, with increasing momentum, to shake bells louder.
  - Uses arms to push against a container of wooden blocks that does not move, then leans body forward to push harder.

- **Demonstrates awareness of major body parts by exploring their movement potential:**
  - Changes movements when dancing with scarves.
  - Starts and stops movements of different body parts during a freeze-dance game.
  - Moves over, under, around, and through large objects in an obstacle course, sometimes bumping them.

- **Tries different ways to coordinate movements of large or small body parts:**
  - Avoids bumping into orange cones on a path for wheel toys by moving around them, after an adult points to the cones.
  - Raises knees high when following an adult marching.
  - Moves away from a nearby child after an adult communicates, "Make sure you have enough room to stretch without bumping your neighbor."

- **Adjusts, with adult guidance, aspects of movement (e.g., effort, spatial, directional) in relation to people and objects:**
  - Changes pathway of movement from straight to curved or zigzag when following another child during a game of follow the leader.
  - Pedals a wheel toy harder to go faster when catching up to another child on a wheel toy.
  - Uses feet to slow self when coming down a ramp.

- **Anticipates and then adjusts aspects of movement (e.g., effort, spatial, directional) during new activities, in changed environments, or on different surfaces:**
  - Moves other wheel toys closer together to make room for a new wheel toy when putting it away during outdoor play.
  - Tries several different ways to move through sections of a new obstacle course.
  - Walks carefully after slipping on wet leaves or grass during a nature walk.

---

○ Child is emerging to the next developmental level

○ Unable to rate this measure due to extended absence
# PD-HLTH 2: Gross Locomotor Movement Skills

Child shows increasing proficiency in fundamental locomotor skills (e.g., rolling, crawling, cruising, walking, running, jumping, galloping)

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>

<td>N/A</td>
</tr>
</tbody>
</table>

Moves in basic and often involuntary ways

- Moves two or more body parts together, often with intention
- Coordinates movements of body parts to move whole body, such as creeping, crawling, or scooting on bottom
- Coordinates movement of whole body while upright, using support
- Coordinates basic movements in an upright position without using support
- Coordinates movements, in an upright position, that momentarily move whole body off the ground
- Coordinates and controls individual locomotor movements, with some success
- Combines and coordinates two or more locomotor movements together in effective ways, with some success
- Combines a variety of locomotor movements and moves effectively across a range of activities

**Possible Examples**

- **Responding**
  - Turns head in response to stimulation or nourishment.
  - Turns head to seek source of stimulation or nourishment.
  - Responds involuntarily to a sudden loud noise or movement by extending arms and legs.
  - Turns head and reaches for a toy.
  - Kicks at a mobile when lying on back.
  - Rolls from stomach to back or from back to stomach.
  - Creeps or crawls toward a familiar adult.
  - Moves from lying down to a sitting position.
  - Moves by rolling body on the floor.
  - Moves by using arms to pull self forward.

- **Exploring**
  - Takes steps sideways or forward while holding onto furniture.
  - Walks forward steadily while pushing a cube chair.
  - Pulls up to a standing position while grasping an adult’s hands.
  - Stands up with support of a mobility aid, such as a walker.
  - Walks forward with a wide base (legs farther apart) and arms held high.
  - Stands up from squatting, unassisted, after picking up a toy.
  - Walks with one object in each hand.
  - Moves by using arms to pull self forward.

- **Building**
  - Runs with short strides, and sometimes has difficulty stopping.
  - Crouches down and jumps up, with heels barely coming off the ground.
  - Hops with two feet leaving the ground momentarily.
  - Runs with long strides, showing arm and leg opposition (e.g., right arm and left leg).
  - Crouches down and then jumps forward using both legs.
  - Navigates changes in surface and direction, using a mobility aid, such as a walker.
  - Runs with long strides, showing arm and leg opposition (e.g., right arm and left leg).
  - Changes direction and stops quickly and easily while running.
  - Swings arms back and then forward in preparation for jumping.
  - Moves wheelchair through an obstacle course, first going straight, then turning quickly, then turning quickly again.

**Integrating**

- Runs fast with long stride and speed, consistently showing arm and leg opposition (e.g., right arm and left leg).

**Child is emerging to the next developmental level**

**Unable to rate this measure due to extended absence**
**Developmental Domain: PD-HLTH — Physical Development–Health**

**PD-HLTH 3: Gross Motor Manipulative Skills**  
Child shows increasing proficiency in gross motor manipulative skills (e.g., reaching, kicking, grasping, throwing, and catching)

<td><strong>Moves arms or hands in basic ways</strong></td>
<td>[ ] Earlier</td>
<td>[ ] Later</td>
<td>[ ] Earlier</td>
<td>[ ] Middle</td>
</tr>
<tr>
<td>Possible Examples</td>
<td>- Curls fingers around an adult’s finger.</td>
<td>- Holds a stuffed toy against body.</td>
<td>- Grasps objects with entire hand</td>
<td>- Explores ways to use one hand, or to use both hands doing the same movements, to manipulate objects</td>
</tr>
<tr>
<td></td>
<td>- Brings fist to mouth.</td>
<td>- Pulls an object closer, using a raking motion.</td>
<td>- Grasps objects with fingers and thumb</td>
<td>- Holds play dough with one hand while cutting it with a wooden knife.</td>
</tr>
<tr>
<td></td>
<td>- Makes small movements of arms and hands near the sides of body.</td>
<td>- Pushes hands against an adult.</td>
<td>- Holds a spoon, using thumb and fingers.</td>
<td>- Scribbles back and forth on pavement with sidewalk chalk, using one hand.</td>
</tr>
<tr>
<td></td>
<td>- Possible Examples</td>
<td>- Uses fingers and palm to grasp toys of different shapes or sizes.</td>
<td>- Pinches cereal pieces between finger and thumb.</td>
<td>- Grasps and turns a doorknob, but may not have strength or coordination to open the door.</td>
</tr>
<tr>
<td></td>
<td>- Holds a stacking ring with full fist.</td>
<td>- Holds a spoon with full fist while being fed by an adult with another spoon.</td>
<td>- Lifts a cup to mouth with both hands, but may spill some.</td>
<td>- Unfastens buckle with one hand while holding the container with other hand.</td>
</tr>
<tr>
<td></td>
<td>- Pulls out a spoon, using fingers and thumb.</td>
<td>- Picks up a stacking ring, using fingers and thumb.</td>
<td>- Scribbles back and forth on pavement with sidewalk chalk, using one hand.</td>
<td>- Buttons two to three large front buttons on a shirt.</td>
</tr>
<tr>
<td></td>
<td>- Pulls an object closer, using a raking motion.</td>
<td>- Pushes hands against another adult.</td>
<td>- Holds a spoon, using thumb and fingers.</td>
<td>- Pushes a cord through a large bead, using one hand, while moving the bead onto the cord with the other hand.</td>
</tr>
<tr>
<td></td>
<td>- Pushes hands against another adult.</td>
<td>- Pulls an object closer, using a raking motion.</td>
<td>- Holds a spoon, using thumb and fingers.</td>
<td>- Grasps and turns a doorknob, but may not have strength or coordination to open the door.</td>
</tr>
<tr>
<td></td>
<td>- Pulls an object closer, using a raking motion.</td>
<td>- Pushes hands against another adult.</td>
<td>- Holds a spoon, using thumb and fingers.</td>
<td>- Grasps and turns a doorknob, but may not have strength or coordination to open the door.</td>
</tr>

<td>N/A</td>
</tr>
<tr>
<td>Later</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- **Responding**
  - Reacts to unpleasant stimulation or events in basic ways
  - Possible Examples
    - Starts to hearing a loud noise.
    - Closes eyes in response to a bright light.
    - Cries when touched by a cold washcloth.

- **Exploring**
  - Responds to situations that make child feel unsafe
  - Seeks to make contact with familiar adult
  - Follows adults’ guidance about basic safety practices
  - Possible Examples
    - Turns away from a loud noise.
    - Cries when touched by a cold washcloth.
    - Cries when an unfamiliar adult approaches.

- **Building**
  - Follows basic safety practices, with close adult supervision
  - Applies basic safety practices on own in familiar environments, with occasional adult reminders
  - Possible Examples
    - Stops running and walks after a familiar adult communicates, “Use walking feet.”
    - Accepts a familiar adult’s hand and holds it when requested to before crossing the street.
    - Stays behind the boundaries set up by adults to designate the swing-set area.

- **Integrating**
  - Communicates an understanding of some safety practices to others
  - Possible Examples
    - Explains, “I wait for the walk sign and hold my mom’s hand before I cross the street.”
    - Holds out arm to stop a peer from walking through a spill on the floor.

---

* Children at the Building Later and Integrating Earlier levels still need adult supervision to carry out safety practices on their own.

**Possible Examples**

- Turns toward an adult’s touch during feeding.
- Sucks on the nipple of a bottle or breast.
- Gazes at or nuzzles up to an adult when feeding.

- Closes lips around food on a spoon.
- Puts one or both hands on a bottle or breast while being held during feeding.
- Reaches for a spoon while being fed.
- Shows excitement as an adult approaches with a bottle or bowl.

- Feeds self small pieces of food, such as cereal or cheese, with fingers or whole hand.
- Holds and bites a banana.
- Picks up and eats crackers from a tray.

- Eats soft food, such as yogurt or applesauce, from a bowl, using a spoon, with adult sometimes assisting with scooping.
- Drinks from a cup while an adult guides the cup.
- Uses a spoon to eat dry cereal from a bowl, sometimes dropping cereal pieces.

- Uses a child-sized fork to pierce food.
- Drinks water from a small open cup.
- Uses adaptive utensils to feed self a meal when positioned functionally.

- Serves self from a serving bowl, using a large spoon, while someone else holds the bowl.
- Pours from a small pitcher, with some spilling.
- Takes the shell off of a hard-boiled egg.

- Spreads jelly on bread with a small spatula to make a sandwich.
- Cuts foods with a small plastic knife.

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
**Developmental Domain: PD-HLTH — Physical Development–Health**

**PD-HLTH 8: Personal Care Routines: Dressing**

Child develops and refines ability to participate in and take responsibility for dressing self.

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- Responds in basic ways during dressing
- Responds in ways that demonstrate awareness of a dressing routine
- Anticipates one or two steps of a dressing routine
- Participates with adult in dressing self
- Puts on clothing that is simple to manipulate, sometimes with adult assistance
- Dresses self, but still needs assistance with parts of clothing that are particularly challenging (e.g., buttons, fasteners, zippers)
- Dresses self, including clothing with parts that are particularly challenging (e.g., buttons, fasteners, zippers)

**Possible Examples:**

- Cries or fusses when diaper is changed.
- Looks at adult while being dressed.
- Blinks eyes as clothing is placed over head.
- Shifts body as an adult puts a clean diaper on child.
- Squirms to avoid having shirt being pulled over the head while being dressed.
- Allows an adult to move child's arms while removing child's jacket.
- Extends arms out when an adult approaches with a jacket.
- Leans toward an adult while a shirt is being put on child.
- Sits down and extends feet for an adult to put shoes on child.
- Pushes arms through the sleeves of a shirt held by an adult.
- Lifts smock for an adult to pull it over child's head.
- Slips foot into shoe while an adult holds it open.
- Lifts one leg, then the other, while an adult guides child's legs into pants.
- Puts legs through pant legs with adult assistance, and then pulls up pants on own.
- Puts on jacket as an adult holds it open or lays it out.
- Puts feet into shoes on own.
- Zips and snaps own pants.
- Puts on own shoes and fastens tabs.
- Buttons own jacket.
- Changes into T-shirt and sweatpants on own after water play.

**DRDP (2015): A Developmental Continuum from Early Infancy to Kindergarten Entry – Infant/Toddler View – August 1, 2015 © 2013-2015 California Department of Education – All rights reserved**

Page 29 of 41
Glossary of Terms and Phrases Used in the DRDP (2015)

**Assemblage:** An artistic composition made from scraps, junk, or odds and ends.

Appears in VPA 1: Visual Art

**Investigates/Investigation:** In the process of scientific inquiry, asking a question and conducting systematic observations or simple experiments to find an answer.

Appears in:
- COG 9: Inquiry Through Observation and Investigation
- COG 10: Documentation and Communication of Inquiry

**Locomotor Skills:** The ability to project the body into or through space.

Appears in:
- PD-HLTH 2: Gross Locomotor Movement Skills
- PD-HLTH 3: Gross Motor Manipulative Skills

**Manipulative Skills:** Also known as object-control skills in which the arms, hands, legs, and feet are used to give force to an object (for example, throwing a ball) or to receive and absorb the force from an object (for example, catching a ball).

Appears in PD-HLTH 3: Gross Motor Manipulative Skills

**Oberves / Observation:** Gathering information about objects and events by using the senses of sight, smell, sound, touch, and taste and noticing specific details or phenomena that ordinarily might be overlooked.

Appears in:
- COG 9: Inquiry Through Observation and Investigation
- COG 10: Documentation and Communication of Inquiry

**Onset:** The first consonant or consonant cluster in a syllable (e.g., the h in the one-syllable word *hat*; the m and k in the two syllables in the word *monkey*).

Appears in LLD 8: Phonological Awareness

**Rime:** A linguistic term that refers to the portion of a syllable that starts with a vowel. In the word *big*, the rime unit is /ig/. In the word *bring*, the rime unit is /ing/.

Appears in LLD 8: Phonological Awareness

<table>
<thead>
<tr>
<th>Which children are assessed?</th>
<th>Early Education and Support Division (EESD) Programs</th>
<th>Special Education Division (SED) Programs</th>
</tr>
</thead>
</table>
|                             | *All infants, toddlers and preschool age children receiving care in direct service programs, and other programs choosing to use a developmental assessment*  
*If a child receives services for less than ten hours per week, a DRDP assessment is not required* | *All infants and toddlers with Individualized Family Service Plans (IFSPs) who are reported in the CASEMIS system.*  
*All preschool-age children (3 - 5 year olds not enrolled in transitional kindergarten or kindergarten) who have Individualized Education Programs (IEPs).*  
*To be included in the fall assessment, children must begin services before October 1.*  
*To be included in the spring assessment, children must begin services before March 1.* |

| When are children assessed? | Child assessments are completed within the first 60 days of enrollment and then at six month intervals thereafter | Children are assessed twice a year, fall and spring. Plan to submit data:  
*By December 1 for the fall and June 1 for the spring assessment.*  
*Check with local administrators as to how, when, and to whom DRDP data will be submitted.* |

| How are children assessed | All children are assessed with the DRDP (2015).  
*Children birth to three years of age are assessed with the Infant/toddler View*  
*Children three to five years of age are assessed with the Preschool View* |  

| Where to submit DRDP data | Assessment data is input to DRDPTech for secure data storage and to obtain psychometrically valid reports | Submit data files in the Fall and Spring to CDE/SED in one of two ways:  
*Into the SELPA’s MIS that will upload to CASEMIS*  
*Into the DR Access Reports secure data system to prepare data for SELPA upload to CASEMIS* |

The DRDP (2015) will be administered in both the California Department of Education’s Early Education and Support Division (EESD) programs and in Special Education Division (SED) early intervention and preschool programs. This table provides information about which children are assessed with the DRDP (2015), and when, how, and where to submit the results of the DRDP (2015).

Appendix B:
Resources for Assessing Children who are Dual Language Learners with the DRDP (2015)

The DRDP (2015) takes into consideration the specific cultural and linguistic characteristics of California's diverse population of young children, with specific consideration for children who are young dual language learners. The introduction in the DRDP (2015) Assessment Manual provides information on completing the assessment with young children who are dual language learners. Keep in mind that young dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. Communication in all languages the child uses should be considered when collecting documentation and completing the measures in all domains of the DRDP (2015).

The following resources will increase your knowledge and help you better complete the DRDP (2015) for young children who are dual language learners.

Appendix C:
Strategies for Observation and Documentation

The DRDP (2015) is administered through observation in natural settings by teachers and other service providers in the classroom or center and by family members in home and community settings. Observations are embedded into typical, ongoing routines and activities throughout the day. The process of observation requires planning in advance on the part of teachers and service providers. As you review the measures of the DRDP (2015), consider specific routines or activities during the day where you would be able to observe more than one measure or more than one child.

Strategies for Effective Observation

Observation should be ongoing throughout the year. The assessment windows for the DRDP (2015) provide a period of time to make sure teachers and service providers have sufficient documentation for each of the measures in time to submit DRDP data. To rate a child's behavior, teachers and service providers should use naturalistic, or authentic, observation strategies. Below are several key points to support naturalistic observations. You will find additional information about naturalistic assessment by viewing the short video, What is Authentic Assessment at http://draccess.org/guidancefordrdp. Many observation and documentation job aids can be found at https://desiredresults.us You will also find a training DVD, Getting to know You Through Observation, at https://desiredresults.us that can be used by EESD and other administrators to train staff.

Strategies for Effective Documentation

A variety of methods are available for recording information gathered through naturalistic observations, including:

- Anecdotal Records – An anecdotal record is a written note about what a child does or says during a typical or routine activity. Anecdotal records result in brief descriptions of the behavior observed.
- Event recording (tally) – In event recording, the observer records each instance of the behavior being observed so that an indication of frequency is obtained. Usually this is done with tally marks but may also be recorded using a code such as “+” for correct and “-” for incorrect.
- Checklists – Checklists are lists of specific skills or behaviors that can be used during observation to check off the behaviors observed with a group of children.
- Rating Scales or Rubrics – Rating scales and rubrics are similar to checklists in that they include lists of behaviors but they also include additional descriptive information about the behavior such as how well, how frequently or how independently the behavior occurred.
- Work Samples – Documentation can also include the collection of 2- or 3-dimensional products that children have produced such as drawings, writing on paper or 3-dimensional constructions the child has made for example with play dough or other materials.
- Videos or Photographs – Cameras can be used to document observed behaviors of children through videos or still photographs.

Information on strategies for implementing the above documentation strategies can be found at: http://eclkc.ohs.acf.hhs.gov/hslc/tta-system/teaching/practice/iss-library.html
Organizing Documentation

**Portfolios:** Portfolios are a helpful way of organizing information. EESD programs are required to use a form of portfolio to organize documentation. Portfolios may contain anecdotal notes, children's work samples, photos of children's activities, audio or video recordings, and transcripts of the child's language. The portfolio methods selected should work well for the program.

**Electronic Portfolios:** If notes are entered into a computer, an electronic portfolio can be produced to summarize the evidence. Please check with a local administrator for procedures regarding consent for photography and video.

Collaboration to Support Effective Documentation

A central goal for teachers and service providers who use the DRDP (2015) is to obtain measures of the child's developmental progress based on typical day-to-day behaviors. It is difficult to imagine one individual having access to all of the many learning opportunities that a child encounters throughout each day. Therefore, it is very helpful to seek input from individuals who have ongoing contact and who know the child well in order to obtain the most complete and accurate picture of the child's skills and abilities. It is important to consider how and when collaborating with others will support and help to inform the accurate rating of measures for the DRDP (2015).

Although direct observation of a child is the primary method used to inform ratings, other sources of evidence should be used to supplement observations. Gathering information from others who know the child well such as family members, caregivers, or other service providers often provides a wealth of additional information about a child's skills, knowledge, and behaviors. This also provides the additional benefit of observations across different settings. There are numerous ways that others can collaborate in sharing information such as written observations, conversations that focus on a child's development, or viewing short videos or recordings that illustrate a child's behavior in typical routines and activities.

Planning ahead can make the process of collaboration more helpful. Identify early on in your relationship with the child's family, who else might provide helpful information to assist in documenting their child's development. Make sure that the family is well informed about the purpose of the DRDP (2015) and the important role that they can play in sharing their observations about their child. With the family's permission, communicate with other individuals who know the child and strategize with them how they might be able to share information with you.

Communication is key to successful collaboration. For a more detailed look at collaboration and the assessment process please refer to Appendix F.
Appendix D:
Comprehensive Definitions of Adaptations to be Used with the DRDP (2015)

Adaptations are changes in the environment or differences in observed behavior that allow children with Individualized Family Service Plans (IFSPs) or Individualized Education Plans (IEPs) to demonstrate their knowledge and skills in their typical environments. Adaptations that are in place for the child during the normal course of the day should also be in place during observations for the DRDP (2015). New adaptations should not be introduced solely for the purpose of conducting an assessment. Seven broad categories of adaptations are used with the DRDP (2015). This is the same system of adaptations developed for and used in the DRDP access.

1. Augmentative or Alternative Communication Systems
Augmentative and alternative communication systems are methods of communication other than speech that allow a child who is unable to use spoken language to communicate with others. An augmentative communication system is used to augment or facilitate the development of speech. An alternative communication system is used in place of speech. Some examples include sign language, picture cards, and electronic communication devices. Assessors should use these systems as part of the observation of a child using language in a natural context. Assessors should not just elicit responses or contrive adult-directed situations.

If American Sign Language is the child’s primary language, it is designated as the home language, and not an adaptation. If sign language is used as a bridge to learning verbal language, then it is considered an adaptation.

2. Alternative Modes for Written Language
Alternative Modes for Written language are methods of producing written language used by a child who cannot see well enough or cannot hold and manipulate a writing utensil well enough to produce written symbols. If a child cannot see or cannot hold a pencil or marker, this adaptation may be used to assist in reading or writing, or emergent reading or writing. Examples of this adaptation include using a Braillewriter, keyboard, or computer.

Naturally, preschool-age children are not proficient at reading and writing. This adaptation allows for children to explore reading and writing and develop their skills in a developmentally appropriate manner.

3. Visual Support
Visual supports are adjustments to the environment that facilitate a child’s ability to see or to understand the surrounding environment or events. Acceptable visual supports include:

- Adjustments in contrast
- Adjustments in lighting
- Distance from objects
- Increased size of materials
- Verbal description of events

4. Assistive Equipment or Devices
Assistive equipment or devices are tools that make it possible or easier for a child to perform a task. The child should be familiar with the use of the device. Any type of adaptive equipment or assistive device that the child needs for mobility, positioning or manipulating objects is acceptable, including:
- Walkers
- Standers

5. Functional Positioning
Functional positioning enables postural support that allows a child to have increased control of his body. It is important that positioning devices are available to the child across settings so that the child may access daily routines and activities and so they may be observed in a variety of activities. Some examples include:
- Standers
- Cube chairs
- Tricycles with seat belts and built-up pedals

6. Sensory Support
Sensory support includes either increasing or decreasing sensory input to facilitate a child’s attention and interactions in the environment. Some children may need increased sensory input and others may need decreased input. Some children require different types of sensory support in different activities. Sensory support may include:
- Reducing background noise
- Adjusting tactile stimulation
- Adjusting visual stimulation

7. Alternative Response Mode
Using alternative response modes means recognizing that a child might demonstrate mastery of a skill in a way that differs from a typically developing child. For this adaptation, the environment is not modified as in the other adaptations. Rather, the child’s unique yet consistent responses that may indicate the presence of a skill are identified. For example, the child with autism may look out of the corner of his or her eye instead of establishing direct eye contact, or the child with a physical impairment may use atypical movement patterns. The form of a child’s response may differ from that of his peers and still be considered to demonstrate mastery of a skill.
Appendix E:
Resources for Working in Partnership with Families

A central goal of the DRDP is to identify a child’s developmental progress based on typical, day-to-day behaviors. It is appropriate to seek input from individuals who have ongoing contact with the child and know the child well. Family members’ descriptions of their child’s behavior in the home or in community settings will help teachers and service providers know more about the child’s behaviors across settings, particularly for those skills the child may not demonstrate routinely in the educational setting; and help teachers and service providers obtain more comprehensive information in order to make accurate ratings for the DRDP (2015).

**Family members may participate in the DRDP assessment in a number of ways:**
- Inform the child’s teachers and service providers of the child’s history for a more complete picture of the child.
- Share the skills they see their child using in typical activities, and might share these skills via stories, photos, drawings, observations, and/or video clips.
- Share the child’s strengths, areas they wish to focus on, and areas of growth they observe.
- Become informed about the next steps in their child’s development.
- Help determine which adaptations will help their child participate in everyday activities (for children with an Individualized Family Service Plans [IFSPs] or Individualized Education Program [IEPs]) and share with the team adaptations the child uses at home, at school, and in other settings.

Below are resources to assist families in knowing more about the DRDP (2015) and the skills assessed as well as resources to assist teachers and service providers in working as partners with families in the assessment process.

**Resources for Families**

**Overview of the DRDP (2015) for Families:**
http://draccess.org/OverviewOfDRDPAccessForFamilies.html
A document describing how the DRDP (2015) works for children, including those with IFSPs and IEPs; and how it benefits families, children, providers, and programs.

**All About Young Children:**
https://allaboutyoungchildren.org/
A website for families describing skills that help children learn including how they learn language, how they learn about feelings and relationships, how they learn about numbers, and how they become skillful at moving their bodies. (Available in eight different languages.)

**California MAP to inclusion and Belonging**
The MAP Project website supports the inclusion of children with disabilities and other special needs ages birth to 21 in child care, after school and community settings. It includes links to resources on topics related to families and children with IFSPs and IEPs. The website contains a statewide interactive directory by county, of Family Resource Centers (FRC), Special Education Local Plan Areas (SELPA), Regional Centers, Head Start, and more for families of children with IFSPs and IEPs.

**Resources for Teachers and Service Providers**

**Family Engagement and Ongoing Child Assessment:**
A document that addresses the perspectives of parents and program staff in the sharing of child assessment information through the formation of partnerships and suggests strategies for bringing those perspectives together.

**The Role of Family Observations:**
http://draccess.org/RoleOfFamilyObsv.html
A document describing the research findings that suggest parents’ observations are reliable and valid and should be considered an essential component of a comprehensive assessment process.

Appendix F: Collaboration to Complete the DRDP (2015)

“The most valuable resource that teachers have is each other. Without collaboration our growth is limited to our own perspectives.” – Robert John Meehan

Collaborating with Others Who Know the Child Well

Our understanding of young children is strengthened when we commit to partnerships with individuals, including family members, who know the child well and in different settings. Collaboration in gathering and sharing information is important because it affords us windows into a child’s life and offers perspectives that enhance our understanding of a child’s skills and behaviors. Identifying and communicating with the individuals who can collaborate on rating the measures of the DRDP (2015) is an essential step in this process.

Through collaboration, early educators and special educators each bring their skills and perspectives. Early educators contribute by providing a picture of the child in the context of a classroom setting. Special education providers contribute by identifying perspectives on a child’s unique learning needs and specific understanding of a child’s disability including materials that should be available and adaptations that should be in place. This lays the foundation for teachers and service providers to complement one another’s work in assessing a child’s skills and development. Shared information can build relationships that lead to joint decision-making not only about the assessment process but also about curriculum, instruction, supports, and services that teachers, providers and families make for individual children and groups of children.

Collaboration to share assessment observations and evidence for completing the DRDP (2015) is built on relationships and a commitment to ongoing communication. It is developed over time with an understanding of each person’s role. Aim for multiple, informal strategies that can be used on a daily basis. Identifying mutual interests in supporting the child is important. Some questions that address joint interests include:

- What are the child’s goals?
- What specialized equipment or adaptations are used?
- How will the goals be infused into the child’s day and into learning activities?
- How will we know our strategies are working?

Collaborating with others in the assessment process is especially important in situations where the child is served by multiple providers. For example, a child may attend an early education program and also receive special education services, such as speech-language, occupational, and/or physical therapy. Early education teachers and special education providers can work hand-in-hand to complete the observations and DRDP (2015) ratings for children who are dually enrolled in both programs. How this collaboration will take place – who will be involved and what roles each individual will play – will vary depending on the situation. Teachers and service providers have reported the following helpful strategies:

- sharing information, including observations, adaptations, curriculum and program goals, and IFSP outcomes or IEP goals
- providing anecdotal notes
- sharing work samples and portfolios
- reviewing reports of DRDP (2015) results together

Increasingly, teachers and providers are utilizing technology such as short video clips or recordings, with family permission, to share information and observations. The DRDP (2015) app helps teachers collaborate, as well as using technology such as email, phone conferences and free web conferencing platforms. Local policies on using devices should be followed.

The early education teacher and special education service provider responsible for completing the DRDP (2015) should each take the lead in partnering with others who work with the child. The general educator is responsible for entering DRDP data into DRDPTech. The special educator is responsible for reporting and entering the assessment data on children who have IEPs or IFSPs to the SELPA. However, except for data reporting, the assessment can be completed together by both educators, and a copy of the Rating Record held by each of them for their respective reporting. Suggestions to help get started working together include:

- Make an initial plan detailing areas to be observed directly and those areas in which others may have a more thorough knowledge of the child. The general education teacher can provide information on all domains. A speech-language therapist might inform measures in the Language and Literacy Domain. Families and special education providers including physical and occupational therapists are a good source of information for measures in the Physical Development and Health Domain.
- Contact the individuals who will collaborate to discuss the mutual goal of completing the assessment and to develop a plan for working together.
- Develop a timeline that is acceptable to all partners, including identifying deadlines and strategies to meet timelines.
- Collect any signature requirements for sharing child information from the family.
- Gather multiple perspectives and consider input from family and others who know the child during assessment.
- Determine when and how communicating about updates and results will occur.
Collaborating with Families

Gathering family perspectives about their child's development and behavior provides important and valid data, which is useful for making informed assessment decisions. Research suggests that family observations are reliable and valid and should be considered an essential component of a comprehensive assessment process. Inviting parents and other family members to share observations of their child's development and behavior is required for EESD programs and is good practice in all early childhood settings and programs.

When families collaborate with teachers and service providers in sharing their observations about their child's behaviors in the home or in community settings, it provides a richer and broader view of a child. Information from families helps to identify skills and behaviors that the child may not demonstrate routinely in the educational setting. For example, a teacher or therapist may not regularly observe a child's dressing or other self-help skills. However, families have repeated opportunities to observe their child's self-help skills both over time and in different settings. Parent observations support more accurate reporting about a child's skills.

Strategies for gathering information from families include the following:

- Make sure that families understand the skills and behaviors described in the DRDP (2015) measures. Teachers and service providers understand expected sequences of child development and are trained about how items on the DRDP (2015) reflect these sequences. Parents might not understand fully the meaning of measures without explanations or examples. It may be useful to provide families with examples of the kinds of behaviors to look for or the routines and activities that might provide a context for a behavior. For example, rather than ask a parent to describe a child's grasping pattern, inquire about how a child picks up small pieces of cereal during mealtime.

- It is reasonable for the observations of parents and practitioners to differ across the range of behaviors being rated. A child's behavior during activities and routines that occur in the classroom setting may differ from the same child's behavior in activities and routines in home or community settings. Not all perspectives about children's behavior based on parent or practitioner observations will be congruent. Rather, aim for convergence or the pooling of perspectives from all who know the child and have had repeated opportunities to observe behavior in different settings.

The ongoing conversations that we have with family members during our typical interactions with them are rich opportunities for learning about their child. Leading a focused conversation with a family is particularly important to obtain information on measures that you have not had the opportunity to observe. During these conversations, focusing on routines and activities provides a very useful context for asking a family about their child's everyday learning opportunities and skills. The four steps in the resource listed below will guide you in planning and leading focused conversations with families to help complete the DRDP (2015). If this is the first DRDP (2015) assessment that you will be completing with a particular child, be sure that you have spent enough time getting to know the child by observing the child's skills during typical routines/activities and by having conversations with the family.

DEC Recommended Practices in Collaboration
Developed to provide guidance to practitioners and families about the most effective ways to improve the learning outcomes and promote the development of young children, birth through age 5, who have or are at-risk for developmental delays or disabilities. The purpose is to help bridge the gap between research and practice by highlighting those practices that have been shown to result in better outcomes for you.

Inclusive Planning Checklist: Home-Visiting Programs
Provides suggestions for activities that should take place to ensure that high-quality integrated services are provided. From the Early Childhood Learning and Knowledge Center, Office of Head Start.

Leading Conversations with Families to Inform the DRDP (2015): Focusing on Families and Children's Everyday Routines and Activities
A four-step process that guides early interventionists in holding focused conversations with families in order to gather information for the DRDP (2015).
